

Rediscover the world and
shape the future through the
College of Arts and Sciences.

In an increasingly complex world, we need critical thinkers, innovators and creative problem solvers to lead and shape our future. Flexibility is the way forward; adaptability is the answer; creativity is the solution. Explore the connection between science and the arts and see the endless opportunities provided by a liberal arts education.

If you want to expand your view of the world through science, humanities, social sciences and the arts while gaining skills and experience that you can use to make a real difference, then the AUS College of Arts and Sciences is the best place to start.

“The international studies program at AUS has broadened my horizons both in the theory and application aspects, equipping me with all the necessary knowledge and skills to pursue different interests and a successful career in the real world.”
Hanan Al Arab, Bachelor of Arts in International Studies graduate

The College of Arts and Sciences (CAS) leads the way for liberal arts education in the region. Promoting excellence in diversity through world-class programs in the humanities, the social and natural sciences and the performing arts, CAS takes an interdisciplinary, multidimensional approach to knowledge and learning. This provides students with a robust, well-rounded learning experience and the skills to excel in their career paths, as they become productive members of both local and global society.

FACULTY:

CAS faculty are accomplished experts in the disciplines of natural sciences, mathematics, and the humanities and social sciences. They are actively engaged in a wide range of research, advancing their fields with exciting and cutting-edge knowledge that is both relevant and recognized on a local and global scale.

RESOURCES AND FACILITIES:

CAS students have access to various resources and facilities to further develop and support their learning and development, including the state-of-the-art MCM Audio Visual Studio, the AUS Writing Center, Mathematics Learning Center and Interpretation Lab.

HANDS-ON LEARNING:

CAS focuses on giving students the practical skills needed to be successful in the workplace with exposure to real-world experience and application.

CAMPUS LIFE:

CAS students are actively involved in the dozens of AUS clubs, sports teams and cultural events.

DIVERSITY:

CAS faculty and students come from all over the world, reflecting the diversity of nationalities living in the UAE.

Applied and Computational Mathematics
Applied Physics
Arabic Language and Literature
Biology
Data Science
English/Arabic Translation
English Language
English Literature
Environmental Policy
Environmental Sciences
History
Integrated Marketing Communications
International Studies
Journalism
Middle Eastern Studies
Music
Philosophy
Psychology
Theatre
Women's Studies

“Studying mathematics sometimes made me wonder if I would ever be able to find a job outside academia, but seeing that I now work as a data analyst at a media agency, I can say I was definitely wrong. The logical mindset and analytical skills I had fresh out of AUS allowed me to become a valuable member of my team and start contributing in ways even my more experienced colleagues could not. The things you learn by studying mathematics are incredibly fundamental, but also in short supply in the professional world, so they will help you stand out no matter where you end up working.”

Aazim Haque, Bachelor of Science in Mathematics graduate

EXPLORE DIVERSITY, PURSUE YOUR PATHWAY TO A REWARDING CAREER

At the College of Arts and Sciences, we aim to inspire the intellectual and creative potential of our students by offering the most contemporary liberal arts curriculum in the region. It is our goal to create an environment where students can pursue a diverse range of subject areas to become well-rounded, critical thinkers and creative problem solvers, who are well prepared for rewarding careers and life-long success. At CAS, we offer you the chance to rediscover the world through the social and natural sciences, the humanities and performing arts, as you explore linkages across the liberal arts disciplines.

AUS is known for its on-campus diversity, having been named by Times Higher Education, for the last two years' running, as the university with the highest percentage of international students. This multiculturalism fosters an environment of openness and tolerance and provides a rich student experience like no other. Our graduates find that this experience of internationalism at AUS sets them in good stead for future careers working across the globe in multinational organizations.

CAS graduates consistently find employment in some of the biggest corporate names in the region, and in governmental and non-governmental international agencies, across all areas of the workforce. Our graduates have also pursued further education at some of the most prestigious academic institutions in North America and Europe. Pursue a degree from CAS, and the opportunities will be endless.

“The journalism program at CAS was invaluable in instilling in me the fundamental skills necessary for a successful career as a journalist. I owe my career so far to the passion, wisdom and encouragement of the faculty, who in addition to teaching me how to be a good journalist also pushed me to publish my work and submit it to public scrutiny early in my years in the program. The contacts and skills I developed while I was at AUS helped set me on the path to being a successful journalist in an ever-changing media environment with an evolving set of challenges. I wouldn't trade my time at AUS for anything.”

Kareem Shaheen, Bachelor of Arts in Mass Communications graduate

“The solid education and research experience I gained during my studies at AUS made me a competitive candidate for graduate studies immediately after graduation. The fact that professors at AUS are highly qualified, very approachable and always willing to push students to their fullest potential makes a big difference to the student experience in this department. My time at AUS formed a major part of my academic journey and allowed me to discover my passion for biomedical research.”

Muneera Fayyad, Bachelor of Science in Biology graduate

As the world hurtles forward with social, political and cultural change, scientific advancement and new frontiers of mass communication, employers are looking for professionals with flexible skills and knowledge who can adapt to a changing work environment. CAS students are our future scientists, policy makers and reformers, communicators and influencers who will inspire and shape the future of the region and the world.

WHY AUS?

AUS was founded on the grand ambition of His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, UAE Supreme Council Member and Ruler of Sharjah, who wanted to make American-style university education available in the Gulf, allowing all members of society to achieve their potential through academic excellence. Today this mission is lived out by the thousands of people who have completed undergraduate or graduate degrees at AUS and gone on to make meaningful contributions to business, government and community, in both the Middle East and around the world.

If you want to take the next step towards a degree from the College of Arts and Sciences at AUS, then we want to hear from you. You can talk to one of our advisors about what you are looking for.
