# Why International Internship Programs?

---

## Value of International Internships

Dear Student,

If you are reading through this advising booklet, then you obviously are showing an interest in the possibility of pursuing an international internship. I would like to really encourage you to proceed with this plan! Plenty of research has indicated that potential employers truly value skills such as intercultural competency, multicultural work experience, independence, flexibility and more. Participating in an international internship will help you to acquire all of these valuable skills and set you apart from other applicants in the job market.

Also, while we hope that all AUS students will take advantage of the opportunity to study abroad for a summer, a semester or even a year, we recognize that many are unable to do so during their undergraduate careers. Fortunately, an international internship provides many of the same benefits, plus work experience!

Take a risk, push yourself outside of your comfort zone, embark on a great adventure! Wait and see what all of this can do for your CV and for your future career!

Wishing you all the very best!

Dr. Linda Angell
