

# Bachelor of Arts in Psychology

Are you passionate about understanding people and the world around you?

Are you curious about what makes people think and behave in the way they do?

**Consider pursuing a Bachelor of Arts in Psychology from AUS.**

With a Bachelor of Arts in Psychology from American University of Sharjah, you will be a highly employable and versatile professional, well-equipped to apply your knowledge and skills in a wide range of fields. Our graduates will undoubtedly initiate and inspire positive change in the world around them.

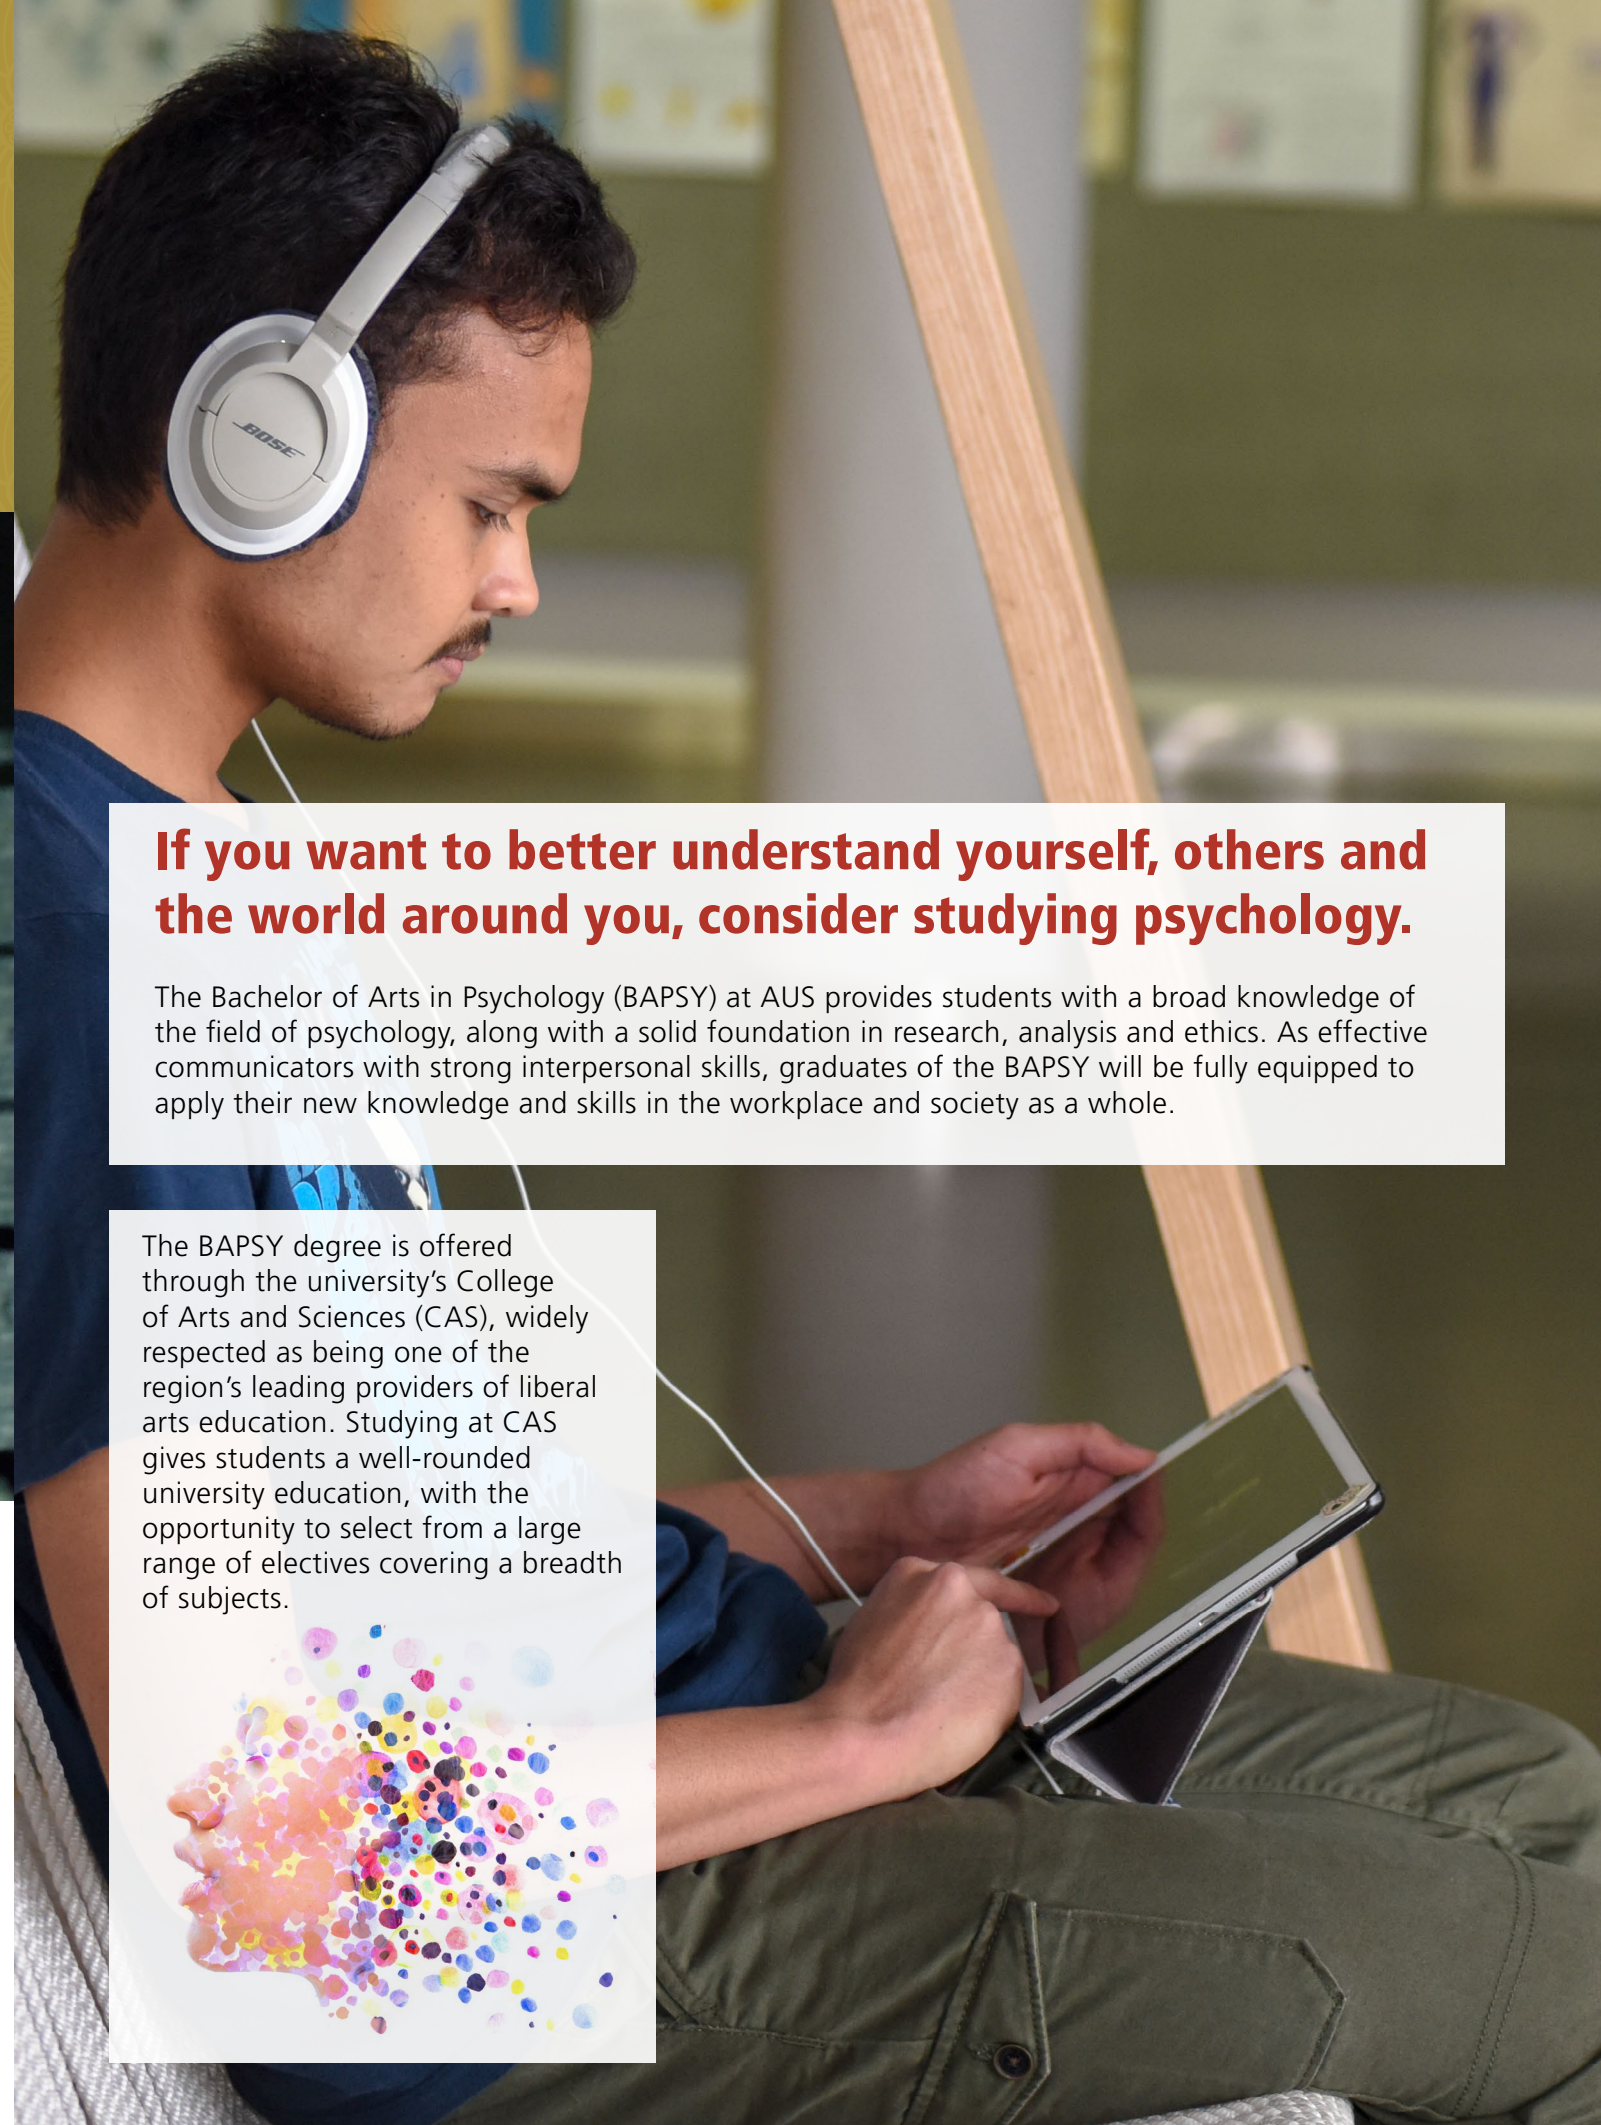

Psychology is the scientific study of the human experience. A discipline that can be applied to all aspects of everyday life, psychology considers both the internal and external factors that affect people and how we think, behave and develop.

Psychologists are fascinated by the internal functions of the mind, seeking to understand human development and the behavior of individuals, organizations and even nations.

Since the time of Ancient Greece, the study of psychology has been at the very foundation of human development and education. Today, a degree in psychology is one of the most popular qualifications across the world, with graduates leading in an expanding range of professional fields.

Psychologists are life-long learners, influencing individuals, organizations and society as clinical mental health workers, business professionals, organizational psychologists, social workers, educators and criminal justice advocates, among other professions.

## If you want to better understand yourself, others and the world around you, consider studying psychology.

The Bachelor of Arts in Psychology (BAPSY) at AUS provides students with a broad knowledge of the field of psychology, along with a solid foundation in research, analysis and ethics. As effective communicators with strong interpersonal skills, graduates of the BAPSY will be fully equipped to apply their new knowledge and skills in the workplace and society as a whole.

The BAPSY degree is offered through the university's College of Arts and Sciences (CAS), widely respected as being one of the region's leading providers of liberal arts education. Studying at CAS gives students a well-rounded university education, with the opportunity to select from a large range of electives covering a breadth of subjects.

# Where can a psychology degree take me?

A BAPSY will lead to many diverse and rewarding career paths, including:

- mental health care
- criminal justice
- education
- social work
- business
- advertising
- human resources
- training and development
- and much more!
