GRADUATE CATALOG 2022–2023
His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi

Supreme Council Member, Ruler of Sharjah
President of American University of Sharjah
Chancellor’s Message

Welcome to American University of Sharjah (AUS), one of the country’s top-ranked universities and home to a dynamic and vibrant community. Founded by His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, Member of the Supreme Council of the United Arab Emirates and Ruler of Sharjah, AUS has come to represent the very best in teaching and research. The combination of academic excellence and community spirit at AUS attracts world-class faculty and exceptional students, ready to make an impact in the region and beyond.

This academic year, AUS is celebrating its Silver Jubilee. For 25 years, AUS has been a place where students are nurtured and encouraged to excel academically, thrive socially, celebrate their cultural diversity, and have a positive influence in their communities. We look forward to what our next 25 years will bring.

As an AUS student, you will learn from and work alongside distinguished faculty who are leaders in their fields and are engaged in research and scholarly/creative activity that is recognized globally. AUS will also provide you with opportunities to expand your horizons and pursue programs of study that will position you for success in the future.

This catalog provides an opportunity to learn more about AUS, including an overview of the university’s programs and policies. For more information about any content in this catalog, please contact the relevant office who will be happy to assist you.

I welcome you to your new academic home that offers you opportunities to explore the world through a diverse community committed to making a global impact.

Dr. Susan Mumm
Chancellor
Board of Trustees

His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, Member of the Supreme Council and Ruler of Sharjah, United Arab Emirates, Chairman of the Board and President of AUS

Ms. Bedour Al Raqbani, Social Entrepreneur, Dubai, UAE

Mr. Charles Cotton, Director, Cambridge Enterprise, University of Cambridge, UK

Professor Dame Sandra Dawson, DBE, KPMG Professor Emeritus of Management Studies, University of Cambridge, UK

Dr. Hani Findakly, Vice Chairman, Clinton Group Inc., NY, USA

Mr. Hamid D. Jafar, Chairman and CEO, Crescent Petroleum Company, Sharjah, UAE

Dr. Cornelius M. Kerwin, President Emeritus and Professor or Public Administration and Policy, American University, Washington DC, USA

Dr. Dale T. Knobel, President Emeritus, Denison University, Ohio, USA

Dr. Susan Mumm, Chancellor, American University of Sharjah, UAE

Ms. Susan Kaufmann Nash, Senior Counsel, Chrysalis LLP, Abu Dhabi, UAE

Mr. Varouj Nerguizian, Executive Director and General Manager, Bank of Sharjah, Sharjah, UAE

Dr. S. Georgia Nugent, Interim President, College of Wooster, Ohio, USA; President Emerita, Kenyon College, Ohio, USA

Dr. G.P. “Bud” Peterson, President Emeritus and Regents Professor of Mechanical Engineering, Georgia Institute of Technology, Atlanta, USA

Mr. Riad T. Sadek, Chairman, RTS Investments Group, Dubai, UAE

Mr. Abdulfattah Sharaf, CEO and Group General Manager, HSBC Bank Middle East Limited, Dubai, UAE

Emeriti

Dr. Leroy S. Fletcher, Trustee Emeritus

Dr. Roderick S. French, Chancellor Emeritus, Trustee Emeritus*

Dr. Leland T. Blank, Dean Emeritus

Dr. Yusuf Abu-Muhanna, Professor Emeritus

Dr Yass Al Kafaji, Professor Emeritus

Dr. Fatima Badry, Professor Emerita

Dr. Ibrahim El Sadek, Professor Emeritus

Dr Basil Hatim, Professor Emeritus

Dr. Fawwaz Jumean, Professor Emeritus

Dr. Ali Saifi, Professor Emeritus

*(d: 2022)
University Administrators

Dr. Susan Mumm, Chancellor

Mr. Saeed Al-Shamsi, Chief of Protocol, Protocol and Security
Dr. Lisa Moscaritolo, Executive Director, Student Experience
  Mr. Graeme Dobie, Director, Student Athletics and Recreation
  Ms. Haifa Ismail, Director, Student Engagement and Leadership
Ms. Rania Morsi, Director, Development and Donor Relations, Advancement and Alumni Affairs
Dr. Felly Chitong Kot, Director, Institutional Research and Analysis
Mr. Kevin Fairbotham, Director, Internal Audit
Ms. Sue Mainey, Director, Strategic Communications and Marketing
Ms. Aldrine Creado, Director of Financial Grants and Scholarships

Dr. Juan M. Sanchez, Provost and Chief Academic Officer

Dr. Mohamed El-Tarhuni, Vice Provost, Research and Graduate Studies
  Ms. Kathleen Furr, Director, Research Services
Dr. James Griffin, Vice Provost, Undergraduate Affairs and Instruction
  Ms. Rasha Tawfik, Director, Academic Support Center
  Dr. Norita Ahmad, Director, Center for Innovation in Teaching and Learning
  Mr. Colby Seay, Director, International Exchange Office
Dr. Varkki Pallathucheril, Dean, College of Architecture, Art and Design
  Mr. Faysal Tabbarah, Associate Dean, College of Architecture, Art and Design
Dr. Mahmoud Anabtawi, Dean, College of Arts and Sciences
  Dr. Hana Sulieman, Associate Dean, Graduate Affairs, College of Arts and Sciences
  Dr. Ahmad Al-Issa, Associate Dean, Undergraduate Affairs, College of Arts and Sciences
Dr. Fadi Aloul, Dean, College of Engineering
  Dr. Lotfi Romdhane, Associate Dean, Graduate Affairs and Research, College of Engineering
  Dr. Assim Sagahyroon, Associate Dean, Undergraduate Affairs, College of Engineering
Dr. Narjess Boubakri, Dean, School of Business Administration
  Dr. Taisier Zoubi, Associate Dean, Graduate Programs, School of Business Administration
  Dr. Mohsen Saad, Associate Dean, Undergraduate Programs, School of Business Administration
Mr. Ali Shuhaimy, Executive Director, Enrollment Management
  Ms. Jessica March, Director, Achievement Academy
  Mr. Rami Mahfouz, Director, Enrollment Services
Ms. Lynda Ataya, Registrar
  Ms. Lina El-Khoury Bendaly, Associate Registrar
Ms. Kara Louise Jones, University Librarian
  Dr. Alanna Ross, Associate Librarian, Public Services
  Mr. Thomas Allen Hodge, Associate Librarian, Technology and Technical Services

Dr. Jeannette Vinke, Chief Operating Officer

Mr. Julien Carter, Executive Director, Employee Services
  Dr. Lubna Al Saraj, MD, Director, University Health Services
Mr. David Blacklaws, Senior Director, ICT and IT Security
  Mr. Nabeel Amireh, Director, Education Technical Support
  Mr. Naji El Nujumi, Director, Infrastructure and Information Security
Mr. Hayder Awni, Director, Development and Construction
Mr. Mobeen Ihsan, Director, Finance
Ms. Vidya Malkani, Director, Supply Chain
# Graduate Academic Calendar 2022–2023

* Islamic holidays are determined after sighting the moon and actual dates may not coincide with the dates in this calendar.  
** Commencement dates are tentative and are subject to change.

Note 1: Classes missed due to holidays will be compensated (Fall 2022: one session for classes scheduled on Wednesdays; two sessions for classes scheduled on Thursdays; schedules will be announced by the concerned graduate programs coordinators.).

Note 2: The approved calendar will be followed if there are no unforeseen circumstances that require a review or change.

The graduation requirements for any individual student are normally determined by the catalog that was effective when the student matriculated in the major. A student may choose to follow the catalog effective for any semester/term in which they were a registered student in their current program of study. A student who changes majors may petition to revert to the catalog in effect at the time of matriculation into the university. The policies, procedures and academic regulations published in the American University of Sharjah catalog are effective at the time of publication but may be subject to change. Students are responsible for adherence to the most up-to-date policies, procedures and academic regulations.

**American University of Sharjah**

Graduate Catalog 2022–2023
The University

Historical Preamble
American University of Sharjah (AUS) was founded in 1997 by His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, Member of the Supreme Council of the United Arab Emirates and Ruler of Sharjah. Sheikh Sultan articulated his vision of a distinctive institution against the backdrop of Islamic history and in the context of the aspirations and needs of contemporary society in the UAE and the Gulf region.

AUS was mandated to:
- reinforce the efforts of the leaders of the UAE "to ensure that science and education regain their rightful place in the building and advancement of our society and shaping the lives of our children"
- join other institutions of higher education in seeking "to reshape fundamentally the minds of our youth to enable them to address the challenges of life using the scientific method"
- become a "center of research for educational development and the solution of social problems"
- become "organically linked" to the economic, cultural, scientific and industrial sectors of society in "productive cooperation"
- exercise the "independence and objectivity in teaching and research" necessary for the achievement of these goals

Vision Statement
American University of Sharjah (AUS) aspires to be globally recognized for outstanding and innovative teaching, learning, research and creative work that have a positive and distinctive impact on the region and beyond.

Mission Statement
American University of Sharjah (AUS) is a comprehensive, independent, non-profit, coeducational institution of higher education that promotes excellence in teaching, learning, research and creative work. Based on an American model of higher education, integrating liberal arts and professional programs, and grounded in the context of UAE culture, AUS prepares engaged and effective members of society who display mastery in their areas of specialization, communicate clearly, think critically and solve problems creatively.

AUS fosters a community that celebrates diversity, and whose members are committed to the ideals of open intellectual inquiry, ethical behavior and civic responsibility.

Institutional Goals
The university is currently guided by the goals outlined in the AUS Strategic Plan 2020–2025 (available at www.aus.edu/about/aus-strategic-plan-2020-2025).

Overview
American University of Sharjah (AUS) is an independent, not-for-profit, coeducational institution. Although consciously based upon American institutions of higher education, AUS is expected also to be thoroughly grounded in Arab culture and to be part of a larger process of the revitalization of intellectual life in the Middle East.

Celebrating its Silver Jubilee in Academic Year 2022–2023, AUS has succeeded in building a multicultural education environment that brings together people from diverse nations and backgrounds. AUS strives to instill in its students the importance of appreciating and understanding diversity, global issues and their own roles in society.

AUS is a leading comprehensive coeducational university in the Gulf, serving students from the Gulf region and around the world. AUS students are introduced to a culture of high aspiration and achievement to aid them in leading productive and meaningful lives. AUS is also dedicated to the preservation of the physical environment, free from pollution and neglect. This sense of environmental responsibility is passed on to AUS graduates in order to create ecologically aware citizens.

In keeping with its mission, AUS offers students an education that will enable them to comprehend the dynamism and complexity of contemporary global processes. Through the integration of liberal studies and professional education, students are given both breadth of knowledge and specialization in their chosen fields. Education at AUS runs the gamut from art, poetry and religions from past civilizations to the latest skills and technologies of today’s information age. These are all presented to students in order to produce future leaders with a firm understanding of how society has reached its present state. The combination of traditional and innovative teaching methods provides an educational environment in which students can realize their individual potential and pursue their goals.

Through the College of Architecture, Art and Design, the College of Arts and Sciences, the College of Engineering, and the School of Business Administration, the university offers 28 majors and 45 minors at the undergraduate level, 15 master’s degree programs and three doctoral degree programs.

While Arabic is the official language of the United Arab Emirates, the language of instruction at AUS is English. All classes and administrative functions are conducted in English.

Islam is the official religion of the state, and Arab Islamic culture predominates in the UAE. The nation is also distinguished by its tolerance toward its large expatriate communities, which comprise diverse nationalities, cultures and religious beliefs. Following in this spirit of understanding and acceptance of all peoples, AUS admits students solely on the basis of their academic qualifications regardless of race, color, gender, religion, disabilities, age or national origin. The university’s mission is to create a multicultural, international academic community in order to prepare its students to become lifelong learners equipped to adapt to the needs of our changing world.

AUS was established as an “American” university not only in its formal academic and organizational characteristics but also in the recognition that the total culture and philosophy of the educational community is as significant as the formal program of studies. Students learn the lessons of the classroom and the lessons of life in a coeducational, multicultural and multinational environment.

Accreditation and Licensure
American University of Sharjah (AUS), located in the Emirate of Sharjah, is officially licensed from June 19, 1999 to February 25, 2025 by the Ministry of Education of the United Arab Emirates to award degrees/qualifications in higher education.

Degree programs offered by AUS are accredited by the Commission for Academic Accreditation of the Ministry of Education’s Higher Education Affairs Division in the United Arab Emirates.

AUS has been accredited in the United States of America by the Middle States Commission on Higher Education (1007 North Orange Street, 4th Floor,
The bachelor of science degree programs in chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering offered by the College of Engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

The bachelor of science degree program in computer science offered by the College of Engineering is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org/.

The School of Business Administration is accredited by the Association to Advance Collegiate Schools of Business (AACSB International), www.aacsb.edu.

The Bachelor of Architecture program of the College of Architecture, Art and Design is accredited by the National Architectural Accrediting Board (NAAB) of the United States, www.naab.org.
Campus Life

The Campus Complex

American University of Sharjah is situated in University City, which is located 16 kilometers (10 miles) from the center of Sharjah. The distinctive architecture of the domes and arches of the academic and administrative buildings is accented with graceful Arab motifs.

The center of the AUS campus comprises 13 academic buildings. These buildings house classrooms and lecture halls of various sizes; a state-of-the-art library; laboratories, workshops and studios; and offices for faculty, academic administrators and support staff.

The campus includes student residential halls (for men and for women) as well as a large Sports Complex and a Student Center. Approximately 27 percent of the student body lives in campus housing. Unlike most American universities, AUS requires faculty members and their families to live on campus. Thus, there is a large and continuous faculty presence at the heart of the campus, providing students with a learning and living environment that allows for ongoing interaction with faculty members and their families.

The City of Sharjah

The location of the university enhances its mission. Sharjah is situated strategically between the Far East and the West, between Africa and Asia. Straddling the breadth of the UAE, which regularly ranks among the world’s safest countries, the emirate of Sharjah has beautiful beaches on the shores of both the Arabian Gulf and the Gulf of Oman. Its landscape varies from level plains to rolling sand dunes and mountain ranges.

Today, as in ancient times, Sharjah is a global trade center. Modern Sharjah is also a city of learning and the arts. Due to its distinctive contributions to Islamic and human culture, Sharjah was selected as the Islamic Culture Capital of the Arab Region for 2014 by the Islamic Organization for Education, Science and Culture. In recognition of its contributions to intercultural dialogue through books and reading, Sharjah was named the 2019 UNESCO World Book Capital. This context facilitates the university’s intention to be an academic center at the intersection of ancient cultural traditions and contemporary intellectual currents. Sharjah boasts nearly 30 museums with splendid collections of artifacts and art objects as well as exhibits on science and natural history.

These institutions are sites for field trips, research and possible internships. Sharjah hosts many cultural festivals, programs, educational conferences, fairs and economic expositions, including the internationally renowned annual Sharjah International Book Fair and the Sharjah International Biennial art exhibition. These resources permit AUS to broaden students’ formal education.

Campus Services

Miscellaneous service outlets are available on campus to cater for the needs of faculty members, staff members, students and campus residents. These include services such as banking, dining, transportation, laundry, minimarts, a full-service post office and copy center, a bookstore, a travel office, a hairdresser, a barbershop and a pharmacy.

Parking facilities, free and paid, are provided for faculty, staff, students, residents and visitors. AUS reserves the right to restrict or prohibit access to the campus.

The Office of Protocol and Security is responsible for campus security, as well as serving as the university’s contact with federal and local government entities, embassies and consulates.

The office also provides services such as AUS ID cards, parking stickers, lost and found, assistance with car registration, assistance with procedures related to traffic violations and on-campus accidents, vehicle assistance and official letters required by the federal and local government entities.

The Office of Protocol and Security is located in the west Mezzanine Floor of the Main Building (offices MM 29/30/31/32/33) and can be reached at 06 515 2296/515 2074/2075 or at aus_security@aus.edu.

Campus public and occupational health and safety are monitored by AUS Safety and Crisis Management. Safety and Crisis Management provides information on public and occupational health and safety; it also monitors, controls and strives to eliminate health and safety hazards on campus. Safety and Crisis Management is located in the Campus Service Center (office 1022) and can be reached at 06 515 2068.

Immigration-related services are offered for faculty, staff and students by Visa and Equalization Services (VES). VES communicates with various government departments to assist with the processing of visas, residence permits and official government documents and transactions. For specific details, contact Visa and Equalization Services at ves@aus.edu.

Facilities and Resources

Advancement and Alumni Affairs

The Office of Advancement and Alumni Affairs (OAAA) fosters relationships between AUS and its alumni by providing opportunities for mutual involvement that contribute to the missions and interests of both. Since many of the alumni are situated within the neighboring community, OAAA also seeks to publicize the university’s programs, goals and achievements to the off-campus community, including alumni, parents and other constituencies of the university.

OAAA promotes a spirit of unity and of possible collaboration among current and former students on current as well as future projects. The alumni are valuable assets, and they are provided ways to aid in the further development of the university by drawing on their knowledge, skills, financial resources and their sense of deep loyalty to their alma mater.

OAAA enhances the financial wellbeing of AUS by raising contributions for the AUS Endowment Fund and establishing fruitful contacts and mutual collaborations with the wider community, which in turn enhances the visibility of AUS and its stature in the UAE and beyond.

OAAA also offers students and alumni comprehensive career services. It works closely with industry in the UAE and the region to promote interaction between potential employers and AUS students and alumni. It organizes corporate briefings, the AUS Careers Forum, the annual Alumni Reunion and the annual Career Fair, and provides information on job opportunities, internships and summer employment. OAAA has a career resource library and an up-to-date database of AUS alumni and employers in the UAE and Middle East.

For more information about OAAA, please visit www.aus.edu/oaaa or contact the office at oaaa@aus.edu.

Architecture, Art and Design Facilities

College of Architecture, Art and Design (CAAD) students benefit from open studios and robust, state-of-the-art
facilities. Students accepted into the second-year studio majors have dedicated individual worktables and computer workstations with network connections. Additional spaces, which are shared by all curricula, include exhibition galleries, a lecture hall, seminar rooms, a media wall, digital classrooms, high-end computing labs and comprehensive printing facilities. CAAD students and faculty also enjoy access to a variety of labs, which are among the most advanced facilities found in universities internationally. CAAD Labs cover a wide spectrum of making, both analog and digital, including conventional material fabrication as well as advanced digital technology. The labs are grouped into three categories: Digital Fabrication, Material Fabrication and Media Labs. Digital Fabrication Labs include CNC routers, industrial robotic arms, thermoforming, laser cutting machines and a number of 3D printers. Material Fabrication Labs include a comprehensive woodshop and metal shop, and ceramics studio. The Media Labs contain production spaces, editing suites, photography and printmaking studios, as well as a media equipment center.

**AUS Sustainability**

AUS understands sustainable resource management is vital to a healthy future and is working to ensure AUS is a sustainability leader in the region. AUS Sustainability connects across disciplines and departments to provide opportunities for students and faculty to incorporate sustainability into the classroom and address sustainability issues collectively. It envisions the campus as a living lab for new ideas and solutions that address environmental and social issues at AUS and beyond. AUS Sustainability engages with students to participate in campus campaigns and activities and model a sustainability mindset in their future decision making.

The student EcoRep program plays a key part in AUS achieving a sustainable campus. Student EcoReps act as an important communication channel between the student body and the AUS sustainability team, helping to promote sustainability issues to their peers and raise awareness. For more information on AUS Sustainability please visit www.aus.edu/sustainability or contact sustainability@aus.edu.

**Computer Learning Resources**

Information Technology (IT) serves the computer-related administrative, instructional, technical and research needs of students, faculty and staff. It also acts as the university’s gateway to the Internet for academic and administrative purposes.

Services provided include email, learning management system (Blackboard), online collaboration tools, online surveys, mobile applications, high-performance computing, wire/wireless network connections, support for financial, HR and student information applications, audio/video conferencing, data storage and backups, telephony, printing services and much more.

All classrooms are networked and equipped with technology that enable faculty members and students to enhance learning with digital and online content. Wireless network access is available in all dormitories and academic areas of the campus.

AUS departments and programs offer a range of specialized and general computer laboratories with software to support student work and research. Many of these software products are also remotely accessible to students using their own personal devices.

Additionally, the library features an information commons with an expanded range of computers, software and related technology along with support for students’ research and other academic work.

Additional information can be found in the IT section of the university website.

**Executive Education**

AUS provides educational opportunities to lifelong learners who want to refresh their skills and knowledge, display mastery in core competencies of their areas of specialization, stay ahead of their competition, and communicate clearly, think critically and solve problems creatively. Through its executive education programs, AUS offers individuals and organizations access to the knowledge and expertise of its faculty. Drawing on the resources and facilities of university, AUS executive education programs offer a wide range of non-credit professional certificates and mini-MBAs for executives in addition to custom programs. Executive education at AUS is an essential and continuously expanding activity, connecting academia and industry. The Jafar family has shown in many instances their support to the function of executive education at AUS, as demonstrated with the establishment of the Jafar Center for Executive Education in 2011 (see Jafar Center for Executive Education later in this section). Visit execed.aus.edu or email execed@aus.edu for more information.

**Health Services**

**University Health Services (UHS)**

University Health Services (UHS) provides primary health care services to all AUS students, faculty, staff members and their dependents. UHS is open Monday–Thursday from 8:30 a.m. to 4:30 p.m. and also provides 24-hour emergency care. Depending on the severity of the illness, patients are referred to a hospital for further treatment if required. Great emphasis is placed on making the campus a healthy and safe place to study, work and live by providing preliminary physical examinations to all students and employees as a mandatory part of the registration/employment process, followed by continued quality care throughout their time at AUS, including sport team fitness checks.

UHS is a Ministry of Health and Prevention licensed facility and is staffed with a qualified licensed medical team, which includes general practitioners and registered nurses. On-site counseling services are also available (refer to University Counseling Services at the end of this section).

UHS is equipped with an observation room (daycare) to closely monitor patients for short stays before transferring to a hospital if required. UHS has access to an on-campus laboratory and pharmacy to assist in serving the AUS community. An ambulance is on standby 24 hours a day within University City.

**Health Education Programs**

As part of an educational institution, UHS plays an active role in educating the university community and promotes on-campus health and wellness activities throughout the academic year. UHS programs include awareness campaigns on health-related issues such as first-aid training and CPR courses.

**Health Insurance Plans for Students**

Health insurance is available for graduate students. It is compulsory for AUS-sponsored (visa sponsored by AUS) graduate students and optional for graduate students who are not sponsored by AUS.

Graduate students with insurance coverage through AUS will be assigned to the AI Buhaira National Insurance Student Health Plan, in addition to the University Hospital Sharjah Supplemental Student Health Plan compulsory plan.
As part of the registration procedures, graduate students must complete their enrollment in the health insurance plans by the semester/term registration deadline to avoid incurring government fines at the time of UAE residence visa renewal. UHS will not be liable for any such fines.

For health insurance plan registration details and other information, visit www.aus.edu/life-at-aus/health-and-wellness/student-health-insurance.

Interactive Trading Floor

The Interactive Trading Floor (ITF) at American University of Sharjah is a technologically advanced 22-seat learning space designed to be the exact duplicate of the trading floor found in typical Wall Street or global investment firms, including the same live feeds, and company- and industry analysis supporting data such as Capital IQ, Thomson Reuters and state-of-the-art Bloomberg terminals. The ITF allows students to apply analytical models and trading techniques to real time market data, thereby extending theory into practice. Assignments integrating live data, trading simulations, analytical assignments and practical cases as well as trading competitions are used to promote interactive learning and facilitate a profound understanding of the intricacies of financial markets.

Jafar Center for Executive Education

Located in the School of Business Administration, the Jafar Center for Executive Education (JCEE) provides a state-of-the-art facility with equipment and furnishings to support a variety of learning formats, including team activities, video conferences, lectures and seminars. The mission of JCEE is to facilitate interaction between AUS faculty and the business community for the purpose of developing the leadership capacity of enterprises in the UAE and the wider region. Faculty interaction with business leaders also allows professors to take the needs of business and government back into the classroom with graduate and undergraduate students.

Laboratories

Engineering and Computing Laboratories

The College of Engineering has 53 laboratories and workshops. All equipment and instruments are accessible to and extensively used by students. Laboratory focus areas are presented below and may be reviewed in detail on the college’s website.

Chemical engineering laboratories focus on unit operations and process control, corrosion, environmental, petroleum, refining, water, materials, thermodynamics, fluid flow, heat transfer, process computer simulation and drug delivery.

Civil engineering laboratories contain equipment and facilities to support teaching and research in structural, geotechnical, geological, water resources and environmental engineering and construction materials.

Computer science and computer engineering laboratories relate to programming, digital systems, microprocessors, very large scale integration (VLSI), embedded systems, industrial computer applications, computer networks, software engineering, operating systems, databases, high-performance computing, Internet of Things (IoT) programming, machine and deep learning, virtual and augmented reality, and mobile and Internet computing.

Electrical engineering laboratories focus on electronics, electric power, control, measurements, machines, communications and signal processing, antennas and microwave, and medical electronics. The Department of Electrical Engineering also has a class 10,000 clean room facility for testing microelectronic chips as well as an advanced EDA lab.

The Engineering Systems Management laboratory provides students with advanced software to develop their skills in system modeling, system analysis and decision-making. The lab has specialized optimization and simulation software to solve practical systems engineering problems in various areas such as supply chain management, production and inventory systems, maintenance engineering, quality engineering, engineering economics, project management and more.

Mechanical engineering has laboratories for advanced manufacturing, aeronautics, computer-aided engineering, control systems, dynamics and mechanical vibrations, engineering measurements, fluid mechanics, heat transfer, internal combustion engines, materials testing, mechatronics, refrigeration and air-conditioning, thermodynamics and renewable energy.

Mechtronics engineering has a well-equipped center providing an excellent work environment for multidisciplinary teaching and research. Lab activities enable students to integrate, with sympathy, contemporary precision mechanics, state-of-the-art control systems, embedded computers and electronics.

The various departments share eight computer labs with 274 stations. All labs have dedicated lab instructors and engineers. Additionally, all engineering facilities offer wireless connectivity.

Interpreting and Translation Laboratory

The Department of Arabic and Translation Studies has a purpose-built interpreting facility. It features simultaneous interpreting booths, a consecutive interpreting table, Internet access and equipment for simulated video teleconferencing.

Mass Communication Studio and Creative Laboratories

Students in the Department of Mass Communication benefit from an audio-visual studio in news presentations, talk shows and dramatic works. Students also benefit from high-tech digital classroom laboratories with Mac workstations featuring industry-standard graphic design, desktop publishing, video effects, video editing and multimedia software.

Science Laboratories

The science programs benefit from up-to-date laboratories and equipment that provide a rich general and research laboratory experience for AUS students.

The biology laboratories are equipped with the latest light and phase compound microscopes, including a workstation with image analysis capabilities; a laminar flow sterile hood; electrophoresis equipment; cryostat and microtome units; bone densitometer; a freeze dryer; growth chambers and incubators; a gel documentation system; a UV trans-illuminator; refrigerated microcentrifuges; a trans-blot semi-dry transfer apparatus; a gel dryer; a CO2 cell incubator; a -80 °C freezer; a tissue homogenizer; and a thermocycler for DNA amplification.

The environmental sciences and chemistry laboratories are equipped with the latest sampling and analytical instrumentation including AA, GC-MS, FTIR, TOC, UHPLC, ICP-MS, a 400 MHz Bruker Biospin NMR, various spectrophotometers, a rapid kinetic apparatus and physisorption apparatus.

The physics laboratories are supplied with up-to-date standard equipment, including computer interfaces, motion sensors, current sensors, voltage sensors, magnetic field sensors, linear air tracks, photogates, smart timers, projectile launchers, ballistic pendulums, rotational systems, digimeter, electric field mappers, current balance apparatus, signal/function generators, oscilloscopes, a Hall effect apparatus,
lasers, spectral lamps, photoelectric effect apparatus, Geiger-Müller tubes, radiation counters, h/e apparatus, Frank Hertz apparatus, e/m apparatus, spectrometers, interferometers, X-ray machines, a Millikan oil drop apparatus, heat engines/gas law apparatus, a thermal expansion apparatus and an adiabatic gas law apparatus.

Library

The AUS Library, an 11,000-square-meter state-of-the-art facility, provides collections, services and programs to support the curricular and research needs of the university community. The AUS Library provides a wide range of resources and services to meet the specialized needs of graduate students. The library has a collection of over 155,000 items that includes reference materials, books, DVDs, and magazines and scholarly journals. In addition to its print collections, the library provides access to over 280,000 e-books, thousands of electronic journals and over 90 online databases. An online library management system can be used to search for library materials from any location on or off campus. Library facilities include a technology-intensive Information Commons, group study rooms, quiet study areas and media viewing rooms. Working with professors, AUS librarians offer hands-on workshops on performing library research, conducting a literature review, reference management and using both print and electronic tools more effectively. Graduate students can request books or journal articles not available in the library through the interlibrary loan service. Further information regarding the library is available at http://library.aus.edu.

Office of Strategic Communications and Marketing

The Office of Strategic Communications and Marketing is responsible for developing, overseeing and implementing a comprehensive marketing and communication strategy that strengthens AUS’s reputation and positioning both nationally and internationally. Aligned with the university’s vision, mission and strategic directions, the office is responsible for achieving AUS’s short- and long-term marketing objectives by successfully targeting and communicating with key stakeholders and core constituencies. The office works closely with the institution’s leadership to advance AUS’s local, regional and international positioning aspirations by actively supporting all aspects of its institutional advancement agenda; efficiently manage its media, print and electronic communication tools to engage and inform internal and external stakeholders; and ensuring campus-wide communications processes.

Research and Grants

AUS supports and promotes research, creative and scholarly work. AUS offers both its undergraduate and graduate students’ opportunities to work on faculty research projects, to present papers with faculty at international conferences, and to assist faculty in developing their own research grants.

All internal or external research activity conducted at AUS is subject to the Policy on Research Administration, Research and Scholarly Misconduct, and Protection of Human Subjects, in addition to a multitude of financial compliance policies and procedures. Students’ creative intellectual property is governed by the AUS Intellectual Property Policy. All relevant research policies and procedures are available on ilearn.aus.edu/Community/Research Services/AUS Policies.

AUS upholds its ethical responsibility to administratively review all proposed research projects involving human and animal subjects. All research studies at AUS involving the participation of humans must be submitted to and approved by the AUS Institutional Review Board (IRB) before any study is undertaken. All studies involving animal subjects undergo protocol evaluation by the Institutional Animal Care and Use Committee (IACUC) before any study is undertaken.

For further information on the university’s research and grant opportunities, please visit the AUS website or email research@aus.edu.

Research Centers

AUS has established a number of research centers as part of its commitment to research and community outreach.

Earthquake Observatory

The AUS Earthquake Observatory uses state-of-the-art equipment and software to analyze the region’s earthquake activity. The Earthquake Observatory also provides expertise on earthquake hazards and related risk in the UAE and the Gulf region; assessment of seismic hazards at construction sites and Petrochemical and industrial facilities; assessment of seismic risk of existing structures and recommendations for strengthening and retrofitting; evaluation of local site effects; preparation of microhazard and macrohazard and zonation maps; evaluation of dynamic soil properties in laboratory and field; and noise and vibration analysis.

The Earthquake Observatory provides training for engineers on seismic hazard and site response analysis, liquefaction analysis, geophysical techniques, structural analysis and design for earthquake loading, experimental analysis and design of foundations for earthquake loading, and the development of earthquake-resistant design codes.

Institute of Urban and Regional Planning and Design

The Institute of Urban and Regional Planning and Design advances urban planning as it relates to the local culture and identity of the UAE and the Arab Gulf region, and promotes sustainability as integral to all activities pertinent to urban planning and urban design. The institute’s objectives are to advance production and accumulation of knowledge in urban and regional planning and urban design; develop and offer educational and training opportunities in urban and regional planning and urban design; collaborate with local government, non-for-profit, non-governmental and private agencies concerned with urban planning and development to advance quality of practice and research; advance public discourse on urban planning through public forums, seminars, conferences, symposia; and increase public awareness in urban planning and urban design.

Mechatronics Research Lab

The Mechatronics Research Lab leads research and development in advanced engineering systems to address high-technology transfers in the region. It promotes multidisciplinary research activities between faculty members and graduate students at AUS, and industry and governmental agencies that require extensive integration of instrumentation, control systems, electronics, intelligent software and computers. The Mechatronics Research Lab offers excellent networking opportunities with leading industries in the region as well as top academic institutions worldwide. Areas of expertise within the research lab include embedded and distributed systems, robotics, autonomous systems and unmanned vehicles.

Testing Center

The AUS Testing Center serves as a central point of testing for both the AUS campus and the community. The center administers placement tests for newly admitted AUS students and facilitates general university testing. The center also offers internationally recognized tests and vocational tests.
In addition, it offers proctoring services for external tests, such as distance-learning examinations.

The Testing Center has professional, trained proctors certified by ETS and Pearson VUE®. It is an authorized TOEFL iBT Test Center and a Pearson VUE® authorized Test Center (PVT Select). AUS’ main testing partners are ETS, AMIDEAST, British Council, College Board and NCEES.

Tests offered by the center include the Institutional paper-based TOEFL (TTP), Internet-based TOEFL (iBT), paper-based IELTS, computer-delivered IELTS, SAT, Fundamentals of Engineering Exam (FE), Principles and Practice of Engineering Exam (PE), Graduate Management Admission Test (GMAT) and CISCO exams.

For more information, visit www.aus.edu/testing-center.

University Sports Facilities

Student Athletics and Recreation manages the sports facilities, including the Sports Complex and the Sports Pavilion. The Sports Complex consists of indoor facilities such as basketball, tennis, squash and volleyball courts; multipurpose halls; a 50-meter swimming pool; saunas; fitness centers with free weights and exercise machines; an aerobics hall and a multipurpose hall for table tennis/martial arts. Outdoor sports facilities include the Sports Pavilion, a 400-meter running track, a soccer field, a cricket ground, a cricket practice net and a baseball field.

The AUS Sports Facilities are to benefit the entire AUS community. Students, staff, faculty members and their dependents enjoy free usage of these facilities.

Details on the AUS sports facilities are available in the Student Handbook and at www.aus.edu/osa/athletics. Interested AUS community members can also visit the Sports Complex reception or call 515 2778.

Student Life on Campus

Student Code of Conduct

American University of Sharjah is a community of individuals living, working and studying together in order to create the ideal conditions for learning. Mutual respect and responsibility are imperative if each individual is to flourish and grow in this environment.

In order for the purpose of the university and its community to be realized, the rights, responsibilities and reasonable standards of conduct essential to a university community must be delineated. The principles, rules and regulations of the university constitute the basic standards and guidelines for conduct on and off campus. The Office of Student Affairs (OSA) establishes and enforces those rules and regulations. The full text of the Student Code of Conduct is provided in the Student Handbook and at www.aus.edu/student-handbook.

As part of OSA, Student Conduct and Conflict Resolution is responsible for educating students about their rights and responsibilities, creating awareness within the AUS community about the Student Code of Conduct, and implementing the code in a fair and consistent manner. Allegations of misconduct under the Student Code of Conduct are resolved by Student Conduct and Conflict Resolution in a manner consistent with the core values of fairness, honesty and integrity.

Student Conduct and Conflict Resolution also offers mediation services, which assist students in resolving conflicts through mediation. Students are trained in mediation and awarded a certificate on successful completion of mediation training and mock sessions. Student Conduct and Conflict Resolution is located on the first floor of the Student Center in offices A254–256 and 233.

For more information, please refer to the Student Handbook or visit www.aus.edu/osa/studentconduct.

Office of Student Affairs

The mission of the Office of Student Affairs (OSA) is to provide high-quality services and programs facilitating informal learning that is in congruence with the Middle Eastern culture, complements formal learning; and promotes aesthetic, ethical, intellectual, personal, social and talent growth in a safe environment.

The Office of Student Affairs provides a host of out-of-class learning opportunities in extracurricular areas for students to engage and develop the student life experience at AUS. Student Affairs transforms student life with a purpose, engaging students in activities that facilitate their holistic development. Student involvement in OSA-initiated activities enables them to accomplish their personal and educational goals. Students are engaged in diverse programs, activities and events and provided services through Student Athletics and Recreation, Student Engagement and Leadership, Student Clubs and Organizations, Community Services and Outreach, On-Campus Student Employment, Student Leadership Program, Student Residential Life, and Student Conduct and Conflict Resolution. The Office of Student Affairs is led by the Executive Director of Student Experience.

More information on Student Affairs is available at www.aus.edu/student-affairs. Students can also visit the Office of the Executive Director of Student Experience (M–217/218/255A on the Second Floor of the Main Building), call 06 515 2166/2216 or email studentaffairs@aus.edu.

Community Service and Outreach

Community Service and Outreach (CSO) is a division of Student Engagement and Leadership under the Office of Student Affairs. CSO offers AUS students the opportunity to get involved in social service and supporting charities. CSO goals go hand in hand with those of the Office of Student Affairs to facilitate the cultural, social and intellectual development of students. CSO aims to nurture responsible and effective individuals through its activities. It is the link between students and the various needs of society. It coordinates a variety of volunteer programs and encourages students to contribute toward the development of new ones. Current volunteer programs are listed in the Student Life section of the university website (www.aus.edu/life-at-aus/student-life/community-involvement/cso-programs-and-events) and in the Student Handbook.

Students who are interested to learn more about volunteer opportunities can visit Community Service and Outreach in the Student Center (office A222), call 515 2794 or email osacom-services@aus.edu.

Cultural Events

Theatre performances and musical events, ranging from classical and regional to jazz and rock, are brought to campus through the Cultural Events Committee. For more information, visit www.aus.edu/events.

The Performing Arts Program also presents a wide array of student productions in theatre, dance and music in the Arts Building rotunda. For more information, visit www.aus.edu/cas/performing-arts-program or email paevents@aus.edu.

Graduate Student Association

The Graduate Student Association (GSA) is an interest-oriented association under Students Clubs and Organizations. GSA represents the interests and concerns of AUS graduate students. It strives to support and promote the overall well-being and interests of the graduate student body. Through various activities and initiatives, such as meetings, networking events, sports,
research discussion groups and more, the GSA enriches the lives of graduate students and enhances the quality of their educational experience, building a strong sense of community both on and off campus.

Graduate students are automatically members of the GSA for each semester they are enrolled. The GSA is managed by the GSA Council, an elected group of students.

For more information about the GSA, please contact gsa@aus.edu.

**Graduate Student Employment Opportunities**

AUS offers graduate students several employment/learning opportunities on campus: employment through graduate assistantships, as research assistants on faculty research projects (both internally and externally funded grants) and as work-study students. For more information, please see www.aus.edu/graduate_assistantship (master's students) or www.aus.edu/admissions/doctoral-degrees/graduate-assistantships (doctoral students).

**Student Athletics and Recreation**

The Office of Student Affairs offers students many opportunities to develop their abilities in a variety of sports. Full-time and part-time coaches and trainers in Student Athletics and Recreation help develop students' fundamental skills in athleticism, strength and conditioning, and overall sportspersonship, as well as support and encourage students to adopt a disciplined and healthier approach to sports. AUS offers a variety of individual and group fitness classes, general leisure activities and a broad-base of competitive and recreational programming. For more information, visit the Sports Complex reception or www.aus.edu/osa/athletics or call 515 2778.

The university’s intramural sports program complements students’ academic, social and cultural education. Involvement in intramural sports activities reduces stress, promotes team bonding and provides an excellent opportunity for students to socialize.

Student Athletics and Recreation also offers students the opportunity to participate in local, regional and international intercollegiate sports tournaments.

**Student Center**

The Student Center plays an important role in the extracurricular life at the university by serving as a central hub for student activities. It is primarily dedicated to serving the cultural, social and recreational interests of the student body as well as to providing students with a comfortable and inviting atmosphere to unwind.

The Student Center is more than just a place for students to socialize and relax; Student Engagement and Leadership’s offices are located at the center to provide students with non-academic support services and facilities under one roof. The Student Center provides a wide array of amenities and facilities. These include an information desk, a meeting room, club workstations, TV lounges, a floating theatre and a multipurpose room.

Student Engagement and Leadership manages the Student Center facilities and all events and activities that take place at the center throughout the year. For more information about the Student Center call 06 515 2716.

**Student Clubs and Organizations**

Student-sponsored organizations are an integral part of the learning process at AUS. The academic experience is enriched by participation in activities that allow students to pursue their personal interests outside the classroom while providing opportunities for leadership development and for involvement in university life.

Student Engagement and Leadership is the central support for the numerous student organizations on campus. Its role includes supervising and providing assistance with program planning and implementation.

The student organizations at AUS span a wide range of interests and reflect the varied cultural backgrounds of AUS students. Interest-oriented and clubs organize numerous professional and cultural activities throughout the academic year and play a vital role in fostering a rich multicultural environment on campus. For a complete listing of student clubs, visit www.aus.edu/osa/studentorganizations.

Participation in student clubs and organizations is strongly encouraged. Students are also encouraged to form organizations/clubs that promote their interests and hobbies.

For more information, read the Student Clubs and Organizations Manual available at www.aus.edu/student-clubs-and-organizations-manual or visit Student Clubs and Organizations in the Student Center (A244, A246 and A247).

**Student Council**

His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi strongly encouraged AUS students to establish a Student Council in order to ensure student representation on campus.

The AUS Student Council is an elected body that articulates undergraduate students’ views and interests in the university. The Student Council is dedicated to the continued development and welfare of AUS undergraduate students. The Student Council is a vehicle for ensuring that undergraduate students can have a voice in formulating university priorities and policies. It provides support for the various student organizations and clubs, offering guidance, in an attempt to build a generation that is established on the notions of teamwork, dedication and responsibility.

The Student Council is the executive authority of the Student Union, consisting of 14 executive officers elected through campus-wide elections and three appointed committee members. The Student Council follows its constitution and by-laws in decisions made by members and the council. The constitution and by-laws are written and amended by the Student Council and approved/endorsed by the Executive Director of Student Experience and the Chancellor. The Executive Director of Student Experience advises the Student Council.

For information, please see the Student Handbook, visit the Student Council office in the Student Center (office A107) or visit www.aus.edu/student-council.

**Student Engagement and Leadership**

Student Engagement and Leadership promotes students' intellectual growth, skills and all-round personality development by engaging them in registered student organizations, volunteer programs, on-campus student employment, and varied events and activities locally, regionally and internationally. Student Engagement and Leadership offers resources and services that aid student participation and development and builds university reputation through student achievements. For more information, please see the Student Handbook or visit the Student Engagement and Leadership office in the Student Center (office A252).

**Student Leadership Program**

Student Leadership Program (SLP) is a division of Student Engagement and Leadership that recognizes leadership as an important aspect of a complete college education. SLP offers a wide range of opportunities for students to develop their leadership, personal and communication skills, and prepares them for a lifelong commitment to leadership and good citizenship. SLP engages students in local, regional and
international conferences and Model United Nations simulations that aid in the development of character, public speaking skills, confidence, mindset and overall leadership capabilities. Students can choose to get involved in programs such as the Peer Leaders Program, Women’s Leadership and Enrichment Program, and the Youth Leadership Training Program. They can also participate in the AUS Student Lecture Series and attend workshops under the Student Training and Workshop Series. For more information, visit office A249 in the Student Center, go to www.aus.edu/leadership-program, email osaslp@aus.edu or call 515 4771.

**Student Residential Life**

The main objective of Student Residential Life of OSA is to support and complement the mission of the university and its academic programs by creating a comfortable and safe environment that contributes to the success of resident students’ educational progress and personal growth. The AUS residential halls offer a unique multicultural environment in which students from different parts of the world can learn from one another.

AUS has a dedicated residential hall for male graduate students and researchers separate from undergraduate students. This is to enable more interaction between the graduate students and researchers and to provide a conducive living-learning environment. Students have the option to choose between two room categories: private rooms and sharing rooms.

Because residential hall living is seen as a positive educational experience, students are encouraged to live on campus. Living on campus complements the overall learning experience by fostering independence and tolerance of others in students. Furthermore, living on campus allows students to make the most of what AUS has to offer, such as sports and dining facilities, the library and laboratories; it also gives students convenient access to the many activities that take place during the day and in the evening. The university offers convenient bus service between the residential halls and other areas on campus.

The residential halls for male and female students are completely separate. All hall residents are expected to spend every night in the halls, unless they have written authorization from their parents or guardian indicating otherwise.

To ensure the security of all students, the residential halls are protected by security patrols. Around-the-clock security is also in place in the halls, with a Residential Life Resource Officer (RLRO) present at all times in each of the halls. For further support to the resident students, full-time Residence Hall Coordinators (RHC) are on duty during the day, with each RHC assigned to one or two residential halls, assisted by a full-time receptionist in each hall. Additionally, two RHCs are on duty rotation across the whole residential hall complex, ensuring that there is a RHC available 24/7. Resident Assistants (RAs) in each residence hall foster a sense of community among students living on campus. Each floor of a residence hall has one or more RA. In addition to connecting residential halls students to the residential community, RAs inform students about university resources, help them understand the policies outlined in the Student Handbook and introduce them to extracurricular opportunities at AUS.

Regulations for the residential halls are available in the Student Handbook and at www.aus.edu/residential-halls.

**Students with Mobility Issues**

AUS students who require support due to mobility issues should contact the Office of Student Affairs at studentaffairs@aus.edu. Please also refer to the Academic Support Center section hereafter.

**Student Educational Services**

**Study Abroad**

The International Exchange Office (IXO) works with AUS students who wish to study at universities in other countries either for a semester or for one academic year. For information on study abroad opportunities for AUS students, please see the section entitled AUS Students Studying Abroad under Registration and Course Information in the Academic Policies and Regulations section of this catalog.

The office also facilitates the admission of international students coming to AUS to study abroad for a semester or up to one academic year. For more information on study abroad students’ admission to AUS, please see the Other Admission Categories section in Admission to Undergraduate Studies later in this catalog.

In addition to facilitating student exchanges and study abroad, IXO also administers processes enabling faculty-led study tours, visiting guests-in-residence (VGIR), visiting guests and delegations, tuition exchange programs, and the dissemination of information regarding international scholarships and internships.

For more information, visit www.aus.edu/ixo.

**University Counseling Services**

University Counseling Services (UCS) provides psychological services that are designed to help students achieve their educational goals, learn the process of problem solving and decision making, develop the capacity for satisfying relationships, and learn to make full use of their potential for continued growth beyond their educational experience.

**Counseling**

Counselors at UCS help students explore any academic or personal problems or concerns that they may be experiencing. Some common issues that bring students to UCS include adjusting to university life, confusion about life or career goals, identity concerns, relationship conflicts, eating issues, anxiety, depression or dealing with grief and loss.

Our counselors are prepared to deal with a multitude of issues or concerns and encourage students to identify personal goals and help them develop coping skills and generate solutions for current difficulties.

Counseling is strictly confidential. The information shared with a counselor will not be disclosed to another individual or organization without the written consent of the student. Services are free, voluntary and available to all undergraduate and graduate students currently enrolled at AUS.

Students can schedule appointments by using the following link: ucsappointments.youcanbook.me or by calling 06 515 2100 or by stopping at the University Health Services reception.

Further details are available at www.aus.edu/life-at-aus/student-life/student-support-services/counseling-services

**Self-Help Resources**

UCS has extensive self-help resources on many subjects in the form of handouts, books, videos and links on its section of the university library website at https://aus.libguides.com/well-being. Topics include coping with stress, depression, sleep disturbance, loneliness, anxiety, eating disorders, grief and loss, substance abuse, relationship building, assertiveness, career choices, study skills, concentration and memory, motivation, time management, and test-taking strategies.

**Student Workshops**

Workshops are conducted throughout the academic year on topics such as
communication skills, anxiety and stress management, anger management, depression, adjusting to university life, personal development, positive psychology, motivational exercises and memory improvement. Workshop topics and dates are advertised around campus, or students can email UCS at ucsappointments@aus.edu to learn about future workshops. Students are encouraged to contact UCS with ideas for future workshops.

Writing Center

The AUS Writing Center, located on the ground floor of the AUS Library building (room LIB 024), helps students become independent, confident writers. Available to all AUS students, the Writing Center offers one-on-one writing conferences by appointment or on a drop-in basis. Consultations may include thesis development, organization, outlining, paragraph development, vocabulary, sentence structure and mechanics. Students may visit the Writing Center to work on drafts, to do research or work with a consultant on particular aspects of their writing. The Writing Center also offers workshops on a variety of writing topics throughout the academic year.

For more information, visit www.aus.edu/cas/writing-center.
Admission to Graduate Studies

American University of Sharjah is a center for high-quality graduate education and research as well as a resource for sustainable development and advancement for the Gulf region and internationally. Students in AUS graduate programs find career advancement opportunities and personal enrichment. These programs foster a stimulating intellectual environment of collaborative research and intellectual exchange. The university’s cross-disciplinary graduate courses and specialized programs attract excellent students who pursue creative and original work under the guidance of highly qualified, dedicated faculty members recruited from the most prestigious universities in the United States, Canada and around the world.

Degree Offerings

AUS currently offers 18 programs of graduate studies: 15 master’s degree programs and three PhD degree program. These are:

**College of Architecture, Art and Design**
- Master of Urban Planning

**College of Arts and Sciences**
- Master of Arts in Teaching English to Speakers of Other Languages
- Master of Science in Mathematics
- Master of Philosophy in Materials Science and Engineering

**College of Engineering**
- Master of Science in Biomedical Engineering
- Master of Science in Chemical Engineering
- Master of Science in Civil Engineering
- Master of Science in Computer Engineering
- Master of Science in Construction Management
- Master of Science in Electrical Engineering
- Master of Science in Engineering Systems Management
- Master of Science in Mechanical Engineering
- Master of Science in Mechatronics Engineering
- Doctor of Philosophy in Engineering - Engineering Systems Management

**School of Business Administration**
- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Finance
- Doctor of Philosophy in Business Administration

**Application Process**

Admission to all AUS graduate programs is processed through the Office of Enrollment Management/Graduate Admissions. Applicants should address all inquiries, requests for application forms and correspondence to:

American University of Sharjah
Office of Enrollment Management
Graduate Admissions
PO Box 26666
Sharjah, United Arab Emirates
+971 800 ASKAUS
https://infodesk.aus.edu

To apply to graduate studies at AUS, applicants must:
- complete the online application (www.aus.edu/apply)
- submit the official transcript, graduation diploma and TOEFL or IELTS (Academic Version) or EmSAT (Achieve English) score report to the Office of Enrollment Management/Graduate Admissions
- submit a current curriculum vitae/resume
- meet all program specific requirements
- pay the application fee

In addition to the above common requirements, along with their online application, applicants to College of Engineering master’s degree programs and applicants to PhD degree programs must submit to the Office of Enrollment Management/Graduate Admissions the following documents:
- applicants to College of Engineering master’s degree programs: two reference letters using the AUS online template (available through apply.aus.edu). Applicants to the MSESM degree program are required to submit only one reference letter.
- applicants to PhD degree programs:
  - three reference letters using the AUS online template (available through apply.aus.edu). At least two of the letters must be from an academic advisor/faculty member who is familiar with the applicant’s background.
  - a Statement of Purpose (about 1,500 words) describing experiences, research interests and reasons for applying for admission to the doctoral program.

Incomplete applications are not processed.

Some diplomas might require attestation from the Ministry of Education’s Higher Education Affairs Division in the UAE. For details, consult www.aus.edu/required-attestations.

Applicants to a master’s degree program who earned their undergraduate degree from universities outside the UAE and applicants to a PhD degree program who earned their undergraduate degree and/or their graduate degree from universities outside the UAE must present a Certificate of Equivalency for their graduation certificates from the UAE Ministry of Education’s Higher Education Affairs Division. Applicants who earned their degrees from universities inside the UAE may be required to present a Certificate of Equivalency for their graduation certificates from the UAE Ministry of Education’s Higher Education Affairs Division. In such cases, Graduate Admissions will notify the applicants. For details, refer to www.aus.edu/uae-certificate-of-equivalency.

Applicants must satisfy both the general university requirements for graduate admission and the degree program-specific admission criteria. The Office of Enrollment Management/Graduate Admissions determines if the applicant meets the general university requirements for graduate admission. Recommendations for admission to a specific degree program are made by the pertinent degree program’s graduate admission committee.

The Office of Enrollment Management/Graduate Admissions will notify the applicant of the university’s final decision.

**Waiver of English Language Proficiency Requirement**

Applicants to AUS graduate degree programs may be exempted from the English language proficiency admission requirement provided the conditions below are met. Decisions regarding exemptions are made by the Office of Enrollment Management/Graduate Admissions. Applicants are required to present supporting documents.
Admission to Graduate Studies

Applicants to a Master’s Degree Program

Applicants who are English native speakers and who have completed their undergraduate education in an English-medium institution may be considered for exemption from the English language proficiency admission requirement. Holders of a bachelor’s degree awarded by AUS are exempted from the English language proficiency admission requirement.

Applicants to a PhD Degree Program

Applicants who have earned a master’s degree from an institution where English is the language of instruction and who have met the AUS English language proficiency requirement for full graduate admission at the time of their admission to that master’s degree program are exempt from the English language proficiency admission requirement.

Application Deadlines

Applicants should submit complete online applications by the following dates:

Master’s Degree Programs

Spring Semester 2023
Students applying for assistantship: November 24, 2022
Students not applying for assistantship: December 22, 2022

Summer Term 2023
May 11, 2023

Fall Semester 2023
Students applying for assistantship: June 1, 2023
Students not applying for assistantship: July 27, 2023

PhD Degree Programs

Fall Semester 2023
Students applying for assistantship: April 13, 2023
Students not applying for assistantship: June 1, 2023

General University Requirements for Graduate Admission

Full Admission

For full admission to a graduate program at AUS, an applicant must meet the general university admission requirements detailed in the sections below. Some degree programs may require additional specific admissions requirements. For details, please refer to the relevant degree program section of this catalog.

Master’s Degree Programs

Applicants to a master’s degree program must:

- hold a four-year bachelor’s degree from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Applicants with a bachelor’s degree obtained outside the UAE must submit an equivalency of their degree from the UAE Ministry of Education’s Higher Education Affairs Division.
- have attained a minimum undergraduate cumulative grade point average (CGPA) of 3.00 (on a scale of 4.00) or its equivalent
- have attained a minimum iBT score of 80 or a minimum IELTS score of 6.5 (Academic Version) or a minimum EmSAT (Achieve English) score of 1550

PhD Degree Programs

Applicants with a Master’s Degree

Applicants to a PhD degree program must:

- hold a master’s degree from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Applicants with a master’s degree obtained outside the UAE must submit an equivalency of their degree from the UAE Ministry of Education’s Higher Education Affairs Division.
- have achieved a minimum master’s degree cumulative grade point average (CGPA) of 3.00 (on a scale of 4.00) or its equivalent. Some programs may require a higher CGPA.
- have attained a minimum iBT score of 80 or a minimum IELTS score of 6.5 (Academic Version) or a minimum EmSAT (Achieve English) score of 1550

PhD Degree Programs

Applicants with a Bachelor’s Degree (Direct Admission)

Applicants for direct admission to a PhD degree program must:

- hold a bachelor’s degree from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Applicants with a bachelor’s degree obtained outside the UAE must submit an equivalency of their degree from the UAE Ministry of Education’s Higher Education Affairs Division.
- have achieved a minimum bachelor’s degree cumulative grade point average (CGPA) of 3.50 (on a scale of 4.00) or its equivalent.
- have attained a minimum iBT score of 80 or a minimum IELTS score of 6.5 (Academic Version) or a minimum EmSAT (Achieve English) score of 1550

AUS accepts applications for direct admission to the Materials Science and Engineering PhD degree program. In addition to the general admission requirements listed herein, further program specific admission requirements must be satisfied. For details, refer to the degree program section later in this catalog.

Only applicants meeting the full admission requirements will be considered for PhD degree program admission.

Conditional Admission

Applicants to a master’s degree program, holding a four-year bachelor’s degree from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS, but who otherwise do not meet the general university requirements for full admission to a master’s degree, may be granted conditional admission, provided one of the following requirements is met:

- the applicant has achieved a minimum undergraduate cumulative GPA of 3.00 (on a scale of 4.00) or its equivalent, and an iBT score of less than 80 but greater or equal to 71, or an IELTS score (Academic Version) less than 6.5 but greater or equal to 6.0, or an EmSAT (Achieve English) score less than 1550 but greater or equal to 1400
- the applicant has achieved an undergraduate cumulative GPA less than 3.00 but greater or equal to 2.50, and have attained a minimum iBT score of 71 or a minimum IELTS score of 6.0 (Academic Version) or a minimum EmSAT (Achieve English) score of 1400

Note: The MBA and MATESOL degree programs require a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version) score of 6.5 or a minimum EmSAT (Achieve English) score of 1550. Conditional admission to these two degree programs may only be granted accordingly.

Conditional admission applicants may be required to meet additional requirements as specified by their requested master’s degree program. Applicants should consult the relevant master’s degree program section of this catalog.

Achieving Full Admission Status

To be accorded full admission into their master’s degree program, conditional
admission students must satisfy the following requirements and any other conditions imposed by the degree program:

- Students who did not meet the minimum English language proficiency scores for full admission must achieve, before the beginning of the second semester of study, the required minimum scores.
- Students who did not meet the minimum undergraduate cumulative GPA required for full admission must achieve a cumulative GPA of at least 3.00 in the first two graduate-level courses (for a minimum of six credit hours). Remedial/bridging courses do not satisfy this requirement. (For details on remedial/bridging courses, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section later in this catalog.) Courses must be completed over a maximum period of two consecutive semesters, with the summer term considered as a semester. Students who fail to meet this requirement by the conclusion of the second semester of study may petition the Office of Enrolment Management/Graduate Admissions for an extension of one semester/term. Petitions must be submitted for the semester/term immediately following the completion of the first six credit hours of graduate-level courses. Extensions are granted only in exceptional circumstances. Students granted an extension of one semester/term are not eligible for further extensions.

If the above provisions and additional specific conditions imposed by the master's degree program are not met, the student will not be allowed to continue master's degree studies at AUS.

Conditionally admitted students are not eligible to register for more than two graduate-level courses (a maximum of six credit hours) per semester. Further details on student's course load are provided in Student Course Load under the Academic Policies and Regulations section later in this catalog.

Transfer Applicants

Applicants transferring from independently accredited universities recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS and offering learning experiences equivalent to those offered at AUS may be considered for transfer admission, provided the following conditions are met:

- Applicants have successfully completed one or more semesters at their institution.
- Applicants are in good standing (i.e., not on any probation or dismissal from the institution from which they are transferring).
- Applicants achieved at the institution they are transferring from a minimum cumulative grade point average (CGPA) of 3.00 or its equivalent.
- Applicants meet the AUS General University Requirements for Graduate Admission/Full Admission (for the full list of admission requirements, refer to Full Admission earlier in this section).

Transfer applicants may not be granted conditional admission.

In addition to the complete graduate application, transfer applicants must submit official transcripts of their university studies along with the syllabi and descriptions of courses they seek to transfer. For details on transfer of credit hours, see Transfer of Credit Hours later in this section.

Applicants for a Second Master’s Degree

Holders of a master’s degree awarded by AUS or another independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS may apply for admission to an AUS master’s degree program.

Applicants for a second master’s degree must complete the New Applicant online application by the dates specified in the Application Deadlines section. The official transcript of the previously earned master’s degree must be submitted. After completing their application, applicants should contact graduateadmisions@aus.edu to request admission as applicants for a second degree.

To be considered for admission, applicants must satisfy the General University Requirements for Graduate Admission (refer to Full Admission and Conditional Admission earlier in this section), as well as any specific requirements set by the master’s degree program they are applying to. For details on program-specific admission requirements, please refer to the relevant degree program section of this catalog. Holders of a master’s degree awarded by AUS are considered to have met the AUS General University Requirements for Graduate Admission.

Graduate courses applied towards a previously earned master's degree may be considered for transfer of credit hours. Whether the first master's degree was awarded by AUS or by another university, the grades earned for courses completed to fulfill the requirements of the first master’s degree program will not count in the calculation of the cumulative GPA for the second master’s degree program. Approved courses that meet the graduation requirements of the second master’s degree program will be recorded as transferred courses. For more information on transfer of credit hours, see Transfer of Credit Hours later in this section.

Policies and regulations governing registration, grades and graduation requirements apply.

Non-degree Admission

Non-degree status is assigned to students who enroll in courses at AUS without pursuing a degree. Non-degree status does not apply to exchange, transient and visiting students.

Non-degree graduate applicants must meet the same minimum admission criteria established for full or conditional admission and must complete the online New Applicant application by the dates specified in the Application Deadlines section. Applicants must apply to the graduate degree program offering the courses they wish to take. After submitting their application, applicants should contact graduateadmisions@aus.edu to request admission as non-degree seeking graduate students.

AUS graduate students who have been dismissed or who interrupt their studies may not apply for admission as graduate non-degree seeking students.

AUS graduate students enrolled in a degree program may not change their status to graduate non-degree seeking students.

Non-degree graduate students may enroll in any graduate course for which they have the necessary academic background and qualifications. They must register for courses through the Office of the Registrar. In courses with enrollment limits, priority is given to AUS degree-seeking students.

Non-degree graduate students may register for a total of nine credit hours in graduate courses. Non-degree graduate students who do not meet the requirements for full admission may register for no more than two graduate courses (a maximum of six credit hours) in their first semester of study. If all requirements for achieving full admission status of graduate conditionally admitted students are met (refer to the Conditional Admission section earlier in this section), registration in a subsequent semester/term will be allowed.
Registration in courses is subject to approval by the relevant graduate program coordinator. Standard graduate tuition and fees apply.

Non-degree graduate students may request to change status to graduate degree seeking students. For details, please refer to the Change of Status section hereafter.

Returning Students Admission

Graduate students in good academic standing who leave AUS for more than two consecutive semesters, inclusive of semesters of complete course withdrawal, who wish to resume studies, must complete the online Returning Applicants application.

Readmission of returning students is subject to AUS academic rules and regulations on readmitting students. All admission requirements in place at the time of applying for readmission must be met.

Courses taken at another institution while on leave from AUS will not be transferred.

Students on academic probation and dismissed students may not apply for readmission.

Applicants with Mobility Issues

Depending on available facilities and the type of physical condition, the university may provide special services to applicants with mobility issues. Applicants are requested to contact the Office of Student Affairs at studentaffairs@aus.edu to determine if a specific service can be provided by AUS. This information will be treated confidentially.

The Offer of Admission

The offer of admission, regardless of type, is valid only for the semester for which the candidate has applied. Applicants can defer their admission for one semester. Deferral requests should be submitted online on apply.aus.edu. Applicants who wish to defer the application for one academic year or longer must submit a new application; a new application fee will apply.

Applicants wishing to change the degree program they were admitted to after receiving the admission offer must submit a new application. A new application fee will apply. Applicants applying for graduate assistantship under the new degree program must submit new reference letters addressed to the new degree program.

Falsified Admission Documents

AUS reserves the right to take disciplinary action up to and including the revocation of admission or permanent dismissal if the university determines that information has been misrepresented in application documents or falsified documents have been submitted in support of an application for admission or matriculation to a program.

Other Admission Categories

Exchange Students Admission

An exchange student is not formally admitted to American University of Sharjah but is allowed to take courses at AUS in the context of a semester exchange program. Exchange students should check with their home institutions about the transferability of AUS credit hours to their programs.

To be admitted as an exchange graduate student, a student must be enrolled in a graduate degree program at an accredited institution and be in good academic standing in his/her current institution. In addition, students must have attained a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version) score of 6.5 or a minimum EmSAT (Achieve English) score of 1550, or they must have successfully completed the CEFR English C1 level. Exchange students coming from institutions located in an English-speaking country and where English is the language of instruction, or from institutions with an English language proficiency admission requirement higher than at AUS, are exempt from this requirement.

Students must first apply through the study abroad office at their home institutions. In addition, they must submit to the AUS International Exchange Office (IXO) a complete online application, accessible through www.aus.edu/ixo, along with an official university transcript showing courses in progress at the time of application. To secure seats in courses, applications should be submitted by the fourth Saturday of April for summer enrollment, the fourth Saturday of March for fall enrollment and the fourth Saturday of October for spring enrollment.

Exchange graduate students register through IXO. They may enroll in any university graduate-level course for which they have the necessary academic background and qualifications, subject to the approval of the relevant graduate program coordinator or college/school associate dean for graduate studies. In courses with enrollment limits, priority is given to AUS students. Tuition and fees are governed by exchange agreements. Details are available with AUS IXO.

Normally, a student is allowed to register as an exchange student for not more than one academic year.

For further information, please contact IXO at ixo@aus.edu.

Graduate students admitted as exchange students may request to change status to graduate degree seeking students. For details, please refer to the Change of Status section hereafter.

Transient Students Admission

Transient student status is assigned to students who have obtained their undergraduate or graduate degrees from AUS and have returned to take extra course(s) at AUS.

Applicants seeking graduate transient student status at AUS and meeting the above criteria could be considered for graduate transient student admission. Applicants must submit to the Office of the Registrar the complete Transient Student Application available at www.aus.edu/registration/forms.

Graduate transient students may enroll in any university graduate-level course for which they have the necessary academic background and qualifications. They must register for courses through the Office of the Registrar. In courses with enrollment limits, priority is given to AUS students.

Normally, a student can register as a transient student for no more than one academic year. Standard graduate tuition and fees apply.

For further information, please contact the Office of the Registrar at registration@aus.edu.

Visiting Students Admission

A visiting student is one who is not formally admitted to American University of Sharjah but is allowed to take courses at AUS for transfer back to the student’s home institution. Visiting students are not registered in the context of a semester exchange program between AUS and the student’s university. Visiting students should check with their home institutions about the transferability of AUS credit hours to their programs.

To be admitted as a visiting graduate student, a student must be enrolled in a graduate degree program at an accredited institution and be in good academic standing in his/her current institution. In addition, students must have attained a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version) score of 6.5 or a minimum EmSAT (Achieve English) score of 1550, or they must have successfully completed the CEFR English C1 level. Visiting students...
coming from institutions located in an English-speaking country and where English is the language of instruction, or from institutions with an English language proficiency admission requirement higher than at AUS, are exempt from this requirement.

Applicants seeking visiting student status must submit to the AUS International Exchange Office (IXO) a complete online application accessible through www.aus.edu/ixo and an official university transcript showing courses in progress at the time of application. To secure seats in courses, applications should be submitted by the fourth Saturday of April for summer enrollment, the fourth Saturday of March for fall enrollment and the fourth Saturday of October for spring enrollment.

If the application is approved, registration is completed through IXO. Visiting graduate students may enroll in university graduate-level courses for which they have the necessary academic background and qualifications, subject to approval by the relevant graduate program coordinator or college/school associate dean for graduate studies. In courses with enrollment limits, priority is given to AUS students. Tuition and fees of visiting students coming through third-party providers are governed by annual financial agreements. Details are available with AUS IXO. Visiting students applying directly to AUS are charged the standard graduate tuition and fees.

Normally, a student is allowed to register as a visiting student for not more than one academic year.

For further information, please contact IXO at ixo@aus.edu.

Graduate students admitted as visiting students may request to change status to graduate degree seeking students. For details, please refer to the Change of Status section hereafter.

Change of Status

Students may request a change of status from non-degree to graduate degree status or from exchange/visiting to graduate degree status by submitting a complete Transfer Applicants online application by the deadlines specified in Application Deadlines earlier in this section. All admissions requirements for transfer admission in place at the time of the change of status request must be met. In addition, students wishing to transfer to degree status must have achieved a minimum cumulative GPA of 3.00 in courses completed at AUS.

Courses taken at AUS while under exchange/non-degree/visiting status can be used to satisfy registration and graduation requirements where applicable. Grades earned in such courses will count in the cumulative GPA.

Courses completed outside AUS prior to admission to the degree program are evaluated for transfer of credit hours at degree program admission time. The university rules and regulations governing transfer courses and credit hours will apply.

The degree program graduation requirements are determined by the catalog effective when the student is admitted to the degree program. For more information, please refer to the Catalog section under Graduation Requirements in Academic Policies and Regulations later in this catalog.

Transfer of Credit Hours

Transfer credit hours may be awarded to applicants from the following categories:

- transfer applicants from recognized graduate schools at independently accredited universities recognized by the UAE Ministry of Education’s Higher Education Affairs Division who meet the General University Requirements for Graduate Admission/Full Admission
- second degree applicants with a master’s degree awarded by AUS or by recognized graduate schools at independently accredited universities recognized by the UAE Ministry of Education’s Higher Education Affairs Division who meet the General University Requirements for Graduate Admission/Full Admission
- applicants to a master’s degree program with a bachelor’s degree awarded by AUS who have completed master’s-level courses while at the undergraduate level in the context of the AUS Accelerated Master’s Program (AMP), and who meet the General University Requirements for Graduate Admission/Full Admission
- applicants to a master’s degree program with a doctorate degree and who have completed graduate-level courses at another university approved by the AUS Accelerated Master’s Program (AMP), and who meet the General University Requirements for Graduate Admission/Full Admission

Transfer of credit hours may also be awarded to AUS students pursuing an AUS PhD dual degree program. For details, consult the relevant PhD degree program section of this catalog.

Applicants for transfer of credit hours must submit their official transcripts, syllabi and other material required by the program to the Office of Enrollment Management/Graduate Admissions by the application deadlines specified earlier in this section.

Applicants with transcripts from two or more institutions of higher education are eligible for transfer evaluation of only the courses completed at the institutions meeting the AUS transfer admission requirements.

Transfer credit hours are evaluated at the time of admission. Transcripts of transfer students will be evaluated only once.

To be evaluated for transfer, the course work must have been taken for graduate credit and applied toward a graduate degree at the host institution. Courses successfully completed in the context of the AMP qualify for evaluation towards transfer of credit hours. Only graduate-level courses completed with a grade of B or higher will be evaluated for transfer of credit hours.

Courses delivered online or in a hybrid mode at the host institution may be evaluated for transfer of credit hours provided the AUS equivalent courses are offered in the same mode of delivery.

Courses identified as equivalent in content and level to AUS courses will be transferred as the equivalent AUS course. Other appropriate graduate-level courses may be transferred as unspecified electives. Courses completed in a hybrid format at the host institution cannot be transferred as unspecified electives. Transfer of credit hours will not be accepted for research and thesis hours, travel experience or work/life experience.

Courses completed more than five years from the start date of the first semester of study of the current graduate degree program at AUS are not transferrable.

Courses related to areas taught within the School of Business Administration will be evaluated for transfer of credit hours only if completed within institutions accredited by the Association to Advance Collegiate Schools of Business (AACSB International), the European Quality Improvement System (EQUIS) or from universities approved by the School of Business Administration.

Grades earned in transferred courses do not count in the student’s cumulative GPA. Credit hours of transferred courses count in the cumulative earned hours and may apply towards meeting registration and graduation requirements.

Applicants to a master’s degree program may be granted up to six credit hours in master-level courses. Applicants to a PhD degree may be granted up to nine credit hours in doctoral-level courses. Students granted transfer credit hours must satisfy the university’s graduation residence requirements as outlined in
the Academic Policies and Regulations section of this catalog.

While credit hours will be temporarily transferred, the student will not be awarded his/her graduate degree until AUS receives the UAE Ministry of Education’s Higher Education Affairs Division verification of the host institution’s transcript.

Students will be notified of their transferred credit hours by the Office of the Registrar.

Decisions regarding the award of transfer credit hours are made by the appropriate academic divisions at AUS with input from faculty with expertise in the subject area. The Office of the Registrar maintains and updates the transfer students’ records.

**Course Waiver**

A graduate student may qualify to waive any or all of the discipline-bridging courses of a degree program. In general, a course may be waived if the student has completed comparable undergraduate or graduate level course work at an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division. Students may be required to submit course documentation. Waivers are only granted after an official, sealed transcript is received by the AUS Office of Enrollment Management/Graduate Admissions.

Students with professional experience and/or holders of professionally recognized certificates (e.g., CPA or CFA) that indicate mastery of the content of a discipline-bridging course may be granted a waiver.

The waiver must be established at the time of admission.

Decisions regarding the waiver of a course are made by the appropriate degree program at AUS. The Office of the Registrar maintains and updates the students’ records.
Tuition and Fees

Graduate Tuition and Fees

Tuition of graduate students is determined based on the number of credit hours registered by the end of the Add and Drop period of a given semester/term, inclusive of the credit hours of audited courses. Graduate student tuition, additional fees and housing charges are given in the tables below.

Non-degree and transient students must pay the same tuition and fees as regular students.

Tuition and fees of visiting students coming through third-party providers are governed by annual financial agreements. Visiting students applying directly to AUS are charged the same tuition and fees as regular students.

Tuition payment for exchange students attending AUS is governed by the specific terms of the exchange agreement.

The tuition payment of AUS students studying abroad at universities with which AUS has a semester exchange program is governed by the exchange agreement. For details on payment procedures, please check with the International Exchange Office.

AUS students who have received approval to study abroad at a university that does not have a semester exchange program with AUS make their payments directly to their study abroad host university.

AUS reserves the right to revise tuition and fees. Tuition schedules are published prior to the beginning of the fall semester each academic year.

Payment Methods
Tuition and fees are due each semester at or before the time of registration and form an integral part of registration. For information on the deferrment of tuition and fees, please see the Deferment of Tuition and Fees section below.

AUS accepts the methods of payment listed below. For the updated payment terms of a specific semester/term, please consult the published payment guide of the relevant semester/term (available at www.aus.edu/payment-guide).

• online payment by credit card
• direct transfers to Sharjah Islamic Bank Account No. 0011-200170-001, IBAN number: AE02 0410 0000 11200170 001 (student’s name and ID number must be noted on transfer)
• direct cash deposit at Al Ansari Exchange (student’s name and ID number must be noted on the transfer)

A charge of AED 500 + 5% VAT is added if a credit card authorization payment is declined.

All student financial transactions with the university are processed through the cashiers and/or the Student Accounts office located on the mezzanine floor of the Main Building. Questions concerning student accounts should be directed to Student Accounts at studentaccounts@aus.edu.

Deferment of Tuition and Fees
Students are expected to pay their tuition and fees or to make arrangements for deferred payment during the registration period. The deferment of tuition and fees is approved only if all of the following conditions are met:

• 60 percent of the tuition and fees have been paid by the payment deadline
• The student has a clean payment history
• The Credit Card Authorization form is completed and signed by the student and is authorized by a Finance department official.

Late Fees and Fines
All university students must adhere to university deadlines, rules and regulations. Late fees and fines, with 5% VAT if applicable, may apply for late book returns, parking violations, breakage, late tuition payment, etc.

Graduate Student Employment Opportunities
AUS offers graduate students two types of on-campus employment: graduate assistantships as research assistants on faculty research projects and graduate work-study positions.

Assistantships are available to qualified graduate students and are competitively awarded and merit-based.

Graduate students granted an assistantship opportunity are required to be available on campus during work hours.

A variety of student work-study opportunities are available through specific departments, graduate programs and AUS internal research grants to faculty members.

For information on eligibility and application guidelines, please visit www.aus.edu/graduate-assistantships-and-employment for master’s students’ assistantships and www.aus.edu/admissions/doctoral-degrees/graduate-assistantships for PhD students’ assistantships.

Sponsorship Liaison Services
Sponsorship Liaison Services is the main link between external organizations and their sponsored AUS students. Sponsorship Liaison Services provides various support services to both the sponsoring organizations and sponsored students, including providing support with the enrollment procedures, communicating progress reports, offering guidance, coordinating financial-related matters with the AUS Finance Department, and arranging for meetings between sponsors and students.

For inquiries regarding sponsorship opportunities, please contact Sponsorship Liaison Services at +971 6 515 1111, submit a query on infodesk.aus.edu or visit www.aus.edu/admissions/study-at-aus/sponsorship-liaison-services.
Academic Integrity

Student Academic Integrity Code

Academic integrity lies at the heart of intellectual life. As an institution committed to the advancement of knowledge in a manner consistent with the highest ethical standards, AUS affirms the importance of respecting the integrity of academic work. The AUS Student Academic Integrity Code (referred to herein as Code) describes standards for academic conduct, students’ rights and responsibilities as members of an academic community, and procedures for handling allegations of academic dishonesty.

In order to establish within the AUS student body a sense of ethical responsibility, honor and mutual respect, prior to registration, every student must sign the following Academic Integrity Pledge.

I [student’s name] pledge my commitment to the following values:

- I will hold myself accountable for all that I say and write;
- I will hold myself responsible for the academic integrity of my work;
- I will not misrepresent my work nor give or receive unauthorized aid;
- I will behave in a manner that demonstrates concern for the personal dignity, rights and freedoms of all members of the community;
- I will respect university property and the property of others; and
- I will not tolerate a lack of respect for these values.

Students are responsible for becoming familiar with their rights and responsibilities as defined by the Code and for ensuring that they understand the requirements for their particular courses (e.g., regarding issues such as collaborative work, use of study aids or take-home examinations, etc.).

Attempts to violate or to assist others in violating the Code, including unsuccessful attempts, are prohibited and will be treated as actual violations.

Definition of Academic Violations

Members of the AUS academic community are expected to conduct themselves with integrity in their work and actions. Violations of the Code include, but are not limited to, the following categories.

Plagiarism

To plagiarize is to use the work, ideas, concepts, images or words of someone else without fully acknowledging the source in all academic work, including assignments, quizzes, examinations, papers and projects. Plagiarism may involve using someone else’s wording—a distinctive name, a phrase, a sentence or an entire passage or essay—without using quotation marks and appropriately citing the source. Plagiarism may also involve misrepresenting the sources that were used or expressing the ideas of someone else in your own words without the appropriate citation.

Inappropriate Collaboration

Collaboration on academic work may be encouraged, but it is important to ensure that contributions are acknowledged. Inappropriate collaboration includes working with someone else in developing, organizing or revising a project (such as a paper, an oral presentation, a research or design project or a take-home examination) without acknowledging that person’s help. The use of unauthorized assistance must be avoided in the production of all academic work.

Specific requirements related to collaborative work, peer review, the use of an external entity in the production of work, the use of tutors and editing may vary among courses and students must ensure that faculty members explicitly provide approval in advance of the collaboration.

Impersonation

Students must attend their own classes, be present and sit for all tests and examinations, and personally attend other events associated with a course. The individual impersonated and the impersonator may be subject to sanctions.

Dishonesty in Examinations and Submitted Work

All academic work and materials submitted for assessment must be the sole original work of the student, unless otherwise directed by the instructor. Students are prohibited from submitting any material prepared by or purchased from another person or company.

Communication is not allowed between or among students, nor are students allowed to consult books, papers, study aids or notes without explicit permission by the faculty member responsible for the course. Dishonesty includes, but is not limited to, communication with another student or an external party using electronic devices during an examination or in-class assignment, copying from another’s paper, giving unauthorized assistance, obtaining unauthorized advance knowledge of examination questions, and the use of mechanical or marking devices or procedures for the purpose of achieving false scores on machine-graded examinations.

Specific policies regarding examinations may vary among individual professors.

Work Completed for One Course and Submitted to Another

Students may not present the same work for more than one course. Under exceptional circumstances, faculty members may permit a significant piece of research to satisfy requirements in two courses. However, both professors must agree in advance to this arrangement. If past research is incorporated into current projects, previous work must be appropriately referenced.

Deliberate Falsification of Data

Students may not deliberately falsify data or distort supporting documentation for course work or other academic activity.

Interference with Other Students’ Work

Students may not intentionally interfere with the work of others, such as sabotaging laboratory experiments, creative work, research or digital files, or by giving misleading information or disrupting class work.

Copyright Violations

Copyright laws must be observed. These laws govern practices such as making use of printed materials, duplicating computer software, duplicating images, photoduplicating copyrighted materials and reproducing audio/visual works. The Code prohibits theft and the unauthorized use of documents and requires adherence to the laws of Sharjah and the federal laws of the UAE.

The AUS library offers a Copyright and Permissions Service and can assist students with issues and questions related to copyrighted materials and their use. Students may contact copyright@aus.edu for assistance.

Complicity in Academic Dishonesty

Complicity in academic dishonesty consists of helping or attempting to help another person commit an act of academic dishonesty or willfully assisting another student in the violation of the Code. Complicity in
academic dishonesty is pre-mediated and intentional. This can include, but is not limited to, the following:

- doing work for another student
- designing or producing a project for another student
- willfully providing answers during an exam, test or quiz
- communicating with another student or external party on a computer, mobile phone or other device while an exam is in progress
- providing a student with an advance copy of a test
- posting of notes or other materials from a class (whether the student is enrolled in the class or not) on the Internet, whether or not for a fee, without express permission from the faculty member
- leaving inappropriate materials behind at the site of an exam or test

Adjudication of Academic Offenses

Jurisdiction

Academic cases resulting from alleged violations of the Code are within the jurisdiction of the dean (or appointed designee) of the college/school in which the alleged Code violation occurred.

Faculty members who have knowledge of an alleged violation should report the incident to the dean (or appointed designee) of the college/school in which the alleged Code violation occurred.

A faculty member may exercise discretion in those cases involving a student’s judgmental error rather than willful violation of the Code.

Students who wish to bring charges against other students must do so through the faculty member in whose course or academic activity the alleged Code violation occurred. The student who brings the charges must identify himself/herself to the faculty member.

Violations of the Code that involve admission and/or placement testing fall within the jurisdiction of the Vice Provost for Research and Graduate Studies and may result in the revocation of admission or dismissal from the university.

The Adjudication Process

An allegation of dishonesty must be reported to the dean (or appointed designee) within five working days of the date of discovery of the alleged offense. Normally an allegation of academic dishonesty must be reported during the semester in which it occurred, however there may be situations in which a violation is discovered after the semester has ended. Reports of an alleged violation must be supported by appropriate documentation.

Once the alleged violation has been reported, faculty members must not submit grades for the work in question or for the course until the case has been adjudicated. If the semester grades are due before the adjudication process is complete, a temporary grade of N will be assigned, and a “Pending Conduct Investigation” statement will be recorded on the student’s academic transcript.

The student must remain enrolled in the course in which an infraction has been reported until the adjudication process is complete.

Legal counsel or involvement of any parties other than the student and relevant university personnel is not permitted at any point during the adjudication process.

After receiving complete information, the dean (or appointed designee) will follow the adjudication process outlined below:

a. The dean (or appointed designee) will promptly notify the student of the allegation and inform the student of the date and time of a formal meeting to discuss the charge.

b. The dean (or appointed designee) will meet with the student to explain the adjudication process and present the charge and the evidence. If the student fails to attend the meeting, the dean (or appointed designee) will proceed with the process.

c. The student will be given the opportunity to respond to the allegation in writing within two working days.

d. After the deadline for the student to respond to the allegation has passed, the dean (or appointed designee) will consider all evidence and, depending on whether a preponderance of evidence supports the allegation of academic misconduct, take one of the following actions:

i) dismiss the case

ii) request that the student resubmit the work in question or retake an examination

iii) assign a penalty.

e. If a student resubmits the work in question or retakes an examination, the results will be considered in determining whether a preponderance of evidence exists to support the allegation of academic misconduct and the assignment of a penalty.

Penalties

Violations of the Code will be treated seriously, with increasingly severe penalties considered for repeat offenders. A second violation may result in suspension or dismissal.

In assigning a penalty, the dean will take into account both the seriousness of the offense and any particular circumstances involved.

Penalties for an academic offense may include one or more of the following:

a. a warning letter to be kept in the academic integrity database maintained by the Office of the Vice Provost for Research and Graduate Studies

b. a lowered grade or loss of credit for the work found to be in violation of the Code (to be specified at the time that the penalty is assigned)

c. a lowered overall grade for the course in which the offense occurred (to be specified at the time that the penalty is assigned)

d. a failing grade of XF for the course in which the offense occurred (to be specified at the time that the penalty is assigned)

e. suspension for the semester/term in which the offense occurred or for up to two semesters following the semester in which the offense occurred

f. dismissal from the university

Penalties (b)–(f) will result in non-academic sanctions that may include prohibition from extracurricular activities and the loss of graduate assistantship. See the AUS Student Handbook for details.

For penalties (e) and (f), the student is assigned a grade of N for all semester/term registered courses, with a provision for a grade penalty for the course where the academic offense was reported. No refund or cancellation of tuition fees will be permitted in such cases.

Students are solely responsible for any financial implications resulting from an academic integrity violation.

Students found guilty of an academic integrity violation will not be allowed to complete a course evaluation for the course in which the offense occurred.

Suspension and Dismissal

The decision as to whether suspension or dismissal is appropriate in a given
instance will necessarily depend on the circumstances of each case.

**Suspension**  
(temporary separation from the university)

Suspension is effective for not less than the semester/term in which the penalty is levied for not more than one calendar year. The length of a suspension must be specified in writing when the student is notified of the outcome of the adjudication process.

A student who is suspended is entitled to resume studies in the same college/school at the conclusion of the period of suspension if all academic requirements are met. The student must submit a Reactivation Request Form to the Office of the Registrar. The form is available at www.aus.edu/registration/forms.

Courses completed outside AUS while on suspension do not transfer.

**Dismissal**  
(permanent separation from the university)

Dismissal is invoked in cases of serious infractions of rules and regulations and when circumstances indicate that a student’s association with the university should be terminated in the interest of maintaining the standards of behavior and conduct normally expected in a university community. In instances where the dean (or appointed designee) hearing the case has recommended dismissal, the Graduate Appeals Review Committee will review the case and make a recommendation to the Provost.

**Notification of Penalty**

The dean (or appointed designee) hearing the case will notify the student in writing of the outcome of the adjudication process and, if applicable, the assigned penalty.

In addition to the faculty member bringing the charge, the following university officials have a legitimate need to know and will be informed of the outcome of the adjudication process at the time that the student is notified:

- The program coordinator/head of department in which the offense occurred
- The dean of the college/school and the program coordinator/head of department responsible for the degree program in which the student is enrolled (if applicable)
- The Executive Director of Student Experience
- The Office of the Registrar
- The Vice Provost for Research and Graduate Studies

For record keeping of documents pertaining to the infringement of the Code, please refer to the appropriate section under Student Records herein.

**Appeal of Penalty**

In cases concerning notification to the student’s record (penalties (d)–(f)), students will be notified in writing of their right of appeal. Appeals must be submitted in writing to the Vice Provost for Research and Graduate Studies within five working days of the date of notification of the outcome of the adjudication process by the dean (or appointed designee).

Appeals are limited to grounds of excessive sanction, improper procedure and unavailability of relevant evidence at the time of the meeting with the dean (or appointed designee) to discuss the charge with the student.

The Vice Provost for Research and Graduate Studies may affirm, modify, or remand the case to the dean (or appointed designee) with instructions for further action. The decision of the Vice Provost is final.

For penalty (f), the Graduate Appeals Review Committee will review the case and make a recommendation to the Provost. The Provost may affirm, modify, or remand the case to the dean with instructions for further action. The decision of the Provost is final.

**Notation of an Academic Integrity Code Violation Penalty**

A student’s standing that impacts his or her eligibility to continuously enroll at AUS affects academic progress and, for this reason, is deemed transcript-appropriate. The general type of infractions, academic or disciplinary, is noted on the student’s transcript as well as the office responsible for issuing the student’s separation from the institution.

Penalties (d)–(f) will become a permanent part of the student’s file maintained by the Office of the Registrar, with appropriate notation on the student’s academic transcript indicating that there has been a violation of the Code.

For penalties (e) and (f), the student is assigned a grade of N for all semester/term registered courses, with a provision for a grade penalty for the course where the academic offense was reported.

The student may petition to replace an XF grade resulting from a category (e) penalty with an F grade at the time of graduation or following complete withdrawal from the university. For details, please refer to the Appeal of an XF Grade section under Student Petitions and Appeals.

For tracking purposes, all academic integrity violations will be recorded in the university’s academic integrity database.
Student Records

Custody of Records

All transcripts and other documents students submit from other institutions at the time of admission or later are the property of AUS, and, as such, are part of the student record that is under the custody of the Office of the Registrar. The university is not required to provide (or allow the making of) copies of these documents. Transcripts submitted to AUS for admission or credit hours transfer cannot be returned to the student or forwarded to other institutions.

The academic record of an individual student is maintained by the Office of the Registrar for a maximum period of five years after the student graduates or leaves AUS. Beyond this retention limit, documents in a student’s record are managed in accordance with the AUS Office of the Registrar policy on file retention, which could entail permanent destruction of some of these documents.

Student Privacy Rights

The university reserves the right to disclose students’ records to the private or public authority sponsoring the student, if applicable. AUS is required to comply with requests for student information originating from the UAE Government and the Sharjah Government.

Students have the right to:

- inspect and review information contained in their educational records. The university is not required to provide (or allow the making of) copies of these documents. Under specific circumstances, the university may allow specific documents included in a student’s record to be provided. Requests for copies of such documents will be reviewed after submission of a signed request from the student concerned.
- request changes or updates to their personal data. Registered students are given access to update their emergency telephone/mobile contact numbers and their personal email address via the secured online student information system. For mailing address updates, an official request signed by the student concerned must be submitted to the Office of the Registrar/Student Records section. The form is available at www.aus.edu/registration/forms.
- request non-disclosure, within the extent of UAE federal and local laws, of personally identifiable and/or academic information from education records.
- In cases where penalties (e)–(f) were assigned: The notation indicating a violation of the Student Academic Integrity Code will become a permanent part of the student’s file maintained by the Office of the Registrar.
- For tracking purposes, all violations are recorded on the university’s academic integrity database.

Records on Student Academic Integrity Code Violations

The retention of records on academic integrity code violations is governed by the following:

- In cases where penalties (b)–(d) were assigned: All records pertaining to the infringement of the Student Academic Integrity Code are maintained by the student’s college/school. If the student does not graduate from AUS, the records are retained for five years after the student’s last registration. If the student graduates from AUS, these records are destroyed by the college/school upon the student’s graduation.

For further information on students’ records, please check with the Office of the Registrar/Student Records section.

Academic Transcripts

The Office of the Registrar maintains and updates the academic records of all students who register at the university. The permanent record reflecting the academic achievements of each student throughout his/her entire study period at the university is referred to as an academic transcript or transcript.

At the end of every semester/term, the Office of the Registrar updates the academic transcripts of the students who were registered in that semester/term. Students may access their transcripts through the secure online student information system. Students are encouraged to review their records online periodically. Online transcripts are not official and are only intended to update students on their academic achievement.

Students may obtain copies of their academic transcripts at AUS from the Office of the Registrar. Transcripts will only be released with a signed request from the student concerned (request form is available at www.aus.edu/registration/forms) or an online request submitted by the student via the secured student information system. A nominal fee applies. The university will issue only complete transcripts, not parts of the student record.

A brief explanation of the university’s grading system is provided on the back of every official transcript. The detailed explanation is included in the Grades and Academic Standing section herein.

Enrollment Verifications and Certifications

Students may need different types of official certificates pertaining to their academic record at AUS. These certificates must be requested from the Office of the Registrar using the request forms available at www.aus.edu/registration/forms. A nominal fee applies.
Registration and Course Information

Course Registration

Orientation Program
Prior to registration, each college/school holds an orientation session to familiarize students with its specific regulations and assist them with the registration process. These sessions are also to inform the students about research areas available within the program as well as existing resources, to offer them the opportunity to meet their program coordinator/head of department, and to introduce them to the graduate level academic policies and regulations.

Registration Process
Before the registration period begins, the Office of the Registrar posts the registration guide at www.aus.edu/registration. The guide provides pertinent information and indicates the registration steps along with the place, date and time for each step. A continually updated list of courses offered is posted on the online student information system as well.

Students must register in a course prior to attending classes. It is the responsibility of the individual student to monitor his/her registration status, which may be done by accessing his/her records through the AUS student information system.

Students who register after the designated date are charged a late registration fee.

New students and transfer students register with their respective college/school. New and transfer students must ensure that all documents required for finalizing their admission, particularly those indicated in the letter of admission, are submitted to the Office of Enrollment Management/Graduate Admissions by the file completion deadlines announced by the office and published in the admission package. Transfer files completed by the deadlines will be evaluated for transfer of credit hours. For details, refer to Transfer of Credit Hours under Admission to Graduate Studies earlier in this catalog.

Exchange and visiting students register through the International Exchange Office (IXO). Non-degree, study abroad and transient students register with the Office of the Registrar. Registration in courses as an exchange, non-degree or a visiting student requires the approval of the relevant graduate program coordinator/head of department. For further details, see the corresponding sections under Admission to Graduate Studies earlier in this catalog.

Continuing and returning students register through the AUS student information system.

Registration by way of proxy is not permitted.

For master’s thesis, professional project and dissertation registration, see Master’s Thesis, Professional Project and Dissertation within the Graduation section herein.

Academic Advisors
Academic advising is an essential element of the educational process. American University of Sharjah requires advisor-student meetings at least once per semester/term. Students on academic probation or facing academic difficulties are guided by academic advisors and might be required to have more frequent meetings with their advisors. However, students are responsible for selecting their courses, meeting course prerequisites and adhering to the most recent university policies and procedures. The program coordinator/head of department assists the student in interpreting university policies and procedures. Students are required to consult with their program coordinator/head of department on issues regarding degree requirements.

Some programs require that students have a graduate advisory committee, which has specific responsibilities identified by each graduate program in accordance with university policy.

Doctoral programs require the PhD candidate to form a Dissertation Advisory Committee (DAC), the chair of which is the principal dissertation advisor of the student guiding the candidate develop the PhD proposal and dissertation.

Student Course Load
A graduate student’s course load comprises the total number of credit hours of master’s or PhD courses registered in a semester/term.

Some master’s degree students may be required to complete specific undergraduate-level courses; credit hours generated by these courses are not considered in the calculation of the student’s semester/term course load. Likewise, some PhD degree students may be required to complete specific master’s or undergraduate-level courses; the credit hours generated by these courses are not considered in the calculation of the student’s semester/term course load.

Full-Time Students
The required minimum load for a full-time student is nine credit hours per semester, and the maximum load is 12 credit hours per semester.

Part-Time Students
Part-time students are those students who register for less than nine credit hours in a given semester.

Semester Course Load

Good Academic Standing Students
The maximum course load of a graduate student in good academic standing is nine credit hours per semester. The program coordinator/head of department may approve a student in good academic standing to register for up to 12 credit hours per semester.

Academic Probation Students
The maximum course load of a graduate student on academic probation is six credit hours per semester.

Summer Term Course Load
A maximum total of six credit hours is allowed during a six-week summer term. The program coordinator/head of department may further restrict the maximum credit hours of a student on academic probation in a summer term.

A graduate student may not register for more than three credit hours of thesis/project/dissertation during a six-week summer term.

Conditional Admission Students
The maximum course load of a conditionally admitted graduate student is six credit hours per semester/term.

Add and Drop

Students are allowed to add and/or drop courses at the beginning of every semester/term. The add and drop period begins on the first day of class. The duration of the add and drop period may vary, and the actual dates are published in the registration guide for each semester/term, available at www.aus.edu/registration.

Courses dropped during the add and drop period are not recorded in a student’s transcript. The semester/term tuition is recalculated accordingly with no fee penalty charged. Students interested in adding and/or dropping
courses should first consult with their respective advisors.

**Auditing Courses**

A student who wishes to attend a course but who does not wish to take examinations, receive a final grade and earn credit hours for the course may register to audit the course. The instructor may establish standards of class participation and attendance that must be met.

Registration to audit a course is managed through the Office of the Registrar. In courses with enrollment limits, priority is given to students registering for credit.

Changes to or from audit status must be made before the last day of the add and drop period.

The audited course will appear on a student’s transcript as audited.

Tuition and fees for audit students are the same as those for students registering for credit hours.

**Auditing a Graduate Course**

With the permission of the instructor and the student’s program coordinator/head of department, a graduate student may audit a graduate course.

Credit hours of an audited course are included in the calculation of the student’s maximum course load for the semester/term.

**Auditing an Undergraduate-Level Course**

With the permission of the instructor, the student’s program coordinator/head of department and the approval of the associate dean for undergraduate studies of the college/school offering the course, a graduate student may register to audit an undergraduate course. The student is charged based on the graduate tuition structure.

Credit hours of an audited undergraduate course are not included in the calculation of the student’s maximum course load for the semester/term.

**Study Abroad Opportunities for AUS Students**

AUS offers students the opportunity to study abroad at other institutions during a regular semester and gain full AUS course credit. The International Exchange Office (IXO) aims to provide students the opportunity to immerse themselves in a different culture, to enhance their language skills, to build international work connections and to gain further insight into their field of expertise. With this in mind, students must choose to attend accredited institutions that provide learning experiences similar to those offered by AUS and which meet the following additional requirements:

- The host institution is recognized by the UAE Ministry of Education’s Higher Education Affairs Division.
- The host institution is not located in a country the student is a citizen/resident of. Students will be permitted to study in a country in which they hold citizenship/residency provided the total period of residency in the country has not exceeded five years, and no more than two years of secondary education were completed in the intended host country.
- The language of instruction of the course(s) taken at the host institution must be English, except for foreign language courses conducted in other languages. Certified translations of syllabi or other relevant material may be required.
- With the approval of the graduate program coordinator/head of department and the student’s associate dean, a student pursuing a study abroad experience at colleges and universities recognized by the United States Department of Education regional accreditation authorities and the UAE Ministry of Education’s Higher Education Affairs Division, or at an official AUS exchange partner university, may take course(s) at the host university that are taught in languages other than English. Courses taught in languages other than English must be determined to be equivalent in content to AUS courses or approved to meet specific degree requirements. Certified translations of syllabi or other relevant material may be required.

Of particular interest might be institutions with which AUS has study abroad agreements. Details are available with AUS IXO at www.aus.edu/ixo.

**Requirements**

Students who wish to study abroad during a regular semester must have, at application time, a minimum cumulative GPA of 3.30 and have earned at least six credit hours of graduate courses in residence at AUS.

Contact hours for courses at the host institution must be equivalent to or greater than the contact hours required for equivalent courses at AUS.

Courses taken at AUS cannot be repeated in the context of a study abroad program.

For study abroad courses equivalent to AUS courses, course prerequisites, as specified in the AUS catalog in effect at the time of registration at the host institution, must be met prior to starting the course at the host institution.

For courses with a laboratory component at AUS, both lecture and laboratory must be taken concurrently at the host institution.

Courses related to areas taught within the School of Business Administration will be evaluated for transfer of credit hours only if completed within institutions that are accredited by AACSB or EQUIS, or at universities approved by the School of Business Administration.

Graduation residence requirements must be met. For details, see Graduation Residence Requirements. Under Graduation/Graduation Requirements later in this section.

**Application Process**

Interested students must apply online to IXO. Information related to application fees and deadlines is available at www.aus.edu/ixo. Students who are approved by the AUS International Exchange Office, the relevant graduate program coordinator/head of department and the associate dean for graduate studies will be guided by the office through the rest of the application process. Students should be aware that further admission requirements might exist at the host institution.

Students must submit the completed Course Permission Form—Outgoing Students to IXO by the deadlines specified on the application form. The IXO approved application form must be deposited at the Office of the Registrar by the end of the third week of classes of the AUS summer term for study abroad in a fall semester, and prior to the student’s departure for study abroad in a spring semester. Failure to do so will result in no credit hours being awarded for the work completed abroad.

**Registration**

AUS students who plan to study abroad must register with the AUS Office of the Registrar in addition to registering with the study abroad host institution.

AUS students studying abroad are not eligible to be enrolled for any type of course work at AUS for the semester overlapping with the study abroad semester.
Transfer of Credit hours
Credit hours earned in study abroad courses will transfer provided the following conditions are met:

- Upon completion of the course(s), the student submits to the AUS Office of the Registrar an official transcript from the host institution demonstrating that the student met the minimum course passing grade requirement, as indicated on the study abroad form.
- The student had a 3.30 cumulative GPA at the time study abroad courses are taken at the host institution.
- The student earned the equivalent of a B grade or higher on the study abroad form.
- The student had passed the AUS course prerequisites prior to starting the course at the host institution (for study abroad courses equivalent to AUS courses).

Grades earned in courses completed outside AUS do not count in the student’s cumulative GPA (CGPA). Credit hours of transferred courses count in the cumulative earned hours and may apply towards meeting graduation requirements.

While credit hours will be temporarily transferred, the student will not be awarded his/her graduate degree until AUS receives the UAE Ministry of Education’s Higher Education Affairs Division verification of the host institution’s transcript.

For further information on studying abroad, please contact IXO at ixo@aus.edu.

Summer/Winter Courses outside AUS

Requirements
An enrolled student is eligible to apply to take courses at another college/university during the summer or in the period between the fall semester and the spring semester (herein referred to as winter) with the aim of transferring credit hours to AUS. To this end, students must choose institutions meeting the following conditions:

- The host institution is located outside the UAE.
- The host institution provides learning experiences similar to those offered by AUS.
- The host institution is recognized by the UAE Ministry of Education’s Higher Education Affairs Division.
- The language of instruction of the course(s) taken at the host institution must be English, except for foreign language courses conducted in other languages. Certified translations of syllabi or other relevant material may be required.
- With the consent of the relevant graduate program coordinator/head of department and associate dean for graduate studies, a student taking summer courses at colleges and universities recognized by the United States Department of Education Regional Accreditation Authorities and the UAE Ministry of Education’s Higher Education Affairs Division, or at an official AUS exchange partner university, may take course(s) at the host university that are taught in languages other than English. Such courses must be determined to be equivalent in content to AUS courses or approved to meet specific degree requirements. Certified translations of syllabi or other relevant material may be required.
- The summer term at the host institution must not begin prior to the end of the spring semester examination period at AUS. The winter term at the host institution must not begin prior to the end of the fall semester examinations period at AUS.
- The summer term at the host institution must end before the first day of classes of the fall semester at AUS. The winter term at the host institution must end before the first day of classes of the spring semester at AUS.

Requirements
Students wishing to take summer/winter courses outside AUS must be in good academic standing at AUS at the time their application is reviewed.

Contact hours for courses at the host institution must be equivalent to or greater than the contact hours required for equivalent courses at AUS.

The summer/winter courses at the host institution must not be taken as attempts to repeat AUS courses.

For courses equivalent to AUS courses, course prerequisites, as specified in the AUS catalog in effect at the time of registration at the host institution, must be met prior to starting the course at the host institution.

For courses with a laboratory component at AUS, both lecture and laboratory must be taken concurrently at the host institution.

Courses related to areas taught within the School of Business Administration will be evaluated for transfer of credit hours only if completed within institutions that are AACSB accredited or EQUIS accredited, or at universities approved by the School of Business Administration.

Graduation residence requirements must be met. For details, see Graduation Residence Requirements under Graduation/Graduation Requirements later in this section.

Some programs may reserve the right not to allow any courses to be taken at another college/university.

Amount of Credit hours
Students may transfer no more than six credit hours for a six-week summer session conducted at a host institution.

For summer sessions of a different duration and for winter terms, AUS allows no more than the equivalent credit hours of the six-week summer term at AUS.

A college/school may place further restrictions on the allowable maximum number of credit hours. Students must consult with the relevant graduate program coordinator/head of department when planning for summer/winter courses outside AUS.

Application Process
Prior to registering for courses at the host institution, students must complete the Permission to Take Summer/Winter (Mini-Mester) Courses Outside AUS form available at www.aus.edu/registration/forms and submit it to the Office of the Registrar.

Forms must be submitted by the end of the 14th week of classes of the preceding spring semester for a summer term and by the end of the 14th week of the preceding fall semester for a winter term. Credit hours will not be awarded if the completed form is not submitted to the Office of the Registrar by the specified deadlines.

Registration
AUS students taking courses outside AUS in the summer are not eligible to be enrolled for any type of course work at AUS for the overlapping AUS summer term.

Students may register for more than one summer term between spring and fall semesters with approval of the relevant graduate program coordinator/head of department and the student’s associate dean. Students may not be concurrently registered in overlapping summer terms.

Transfer of Credit hours
Credit hours earned in summer courses taken outside AUS will transfer provided the following conditions are met:

- Upon completion of the summer course(s), and before the end of the
following fall semester (end of the following spring semester for winter courses), the student submits to the Office of the Registrar an official transcript from the host institution demonstrating that the student met the minimum course passing grade requirement, as indicated on the permission form.

- The student was in good academic standing at AUS at the time summer/winter courses were taken at the host institution.
- The student had passed the AUS course prerequisites prior to starting the course at the host institution (for summer abroad courses equivalent to AUS courses).

Grades earned in summer/winter courses completed outside AUS do not count in the student’s cumulative GPA (CGPA). Credit hours of transferred courses count in the cumulative earned hours and may apply towards meeting graduation requirements.

While credit hours will be temporarily transferred, the student will not be awarded his/her graduate degree until AUS receives the UAE Ministry of Education’s Higher Education Affairs Division verification of the host institution’s transcript.

For further information related to transfer of credit hours, please contact the Office of the Registrar.

### Tuition and Fees

For specific information on tuition, fees, deferment of tuition, and fees and payment methods, please refer to the Tuition and Fees section earlier in this catalog.

### Attendance, Withdrawal and Interruption of Studies

#### Attendance and Lateness

Attendance and participation in all class, workshop and laboratory sessions are essential to the process of education at AUS. Students benefit from the lectures and discussions with their instructors and fellow students. For this reason, students are expected to attend class regularly.

Lateness or absence hinders progress for the individual and the class and affects the student’s academic achievement.

Students are fully responsible for dropping or withdrawing from courses that they are not attending.

Absence due to a medical emergency or to national duty may result in missing a course assessment (for example, a quiz, midterm, studio review or an assignment deadline). For guidance, refer to the corresponding policies in the Grades and Academic Standing/Course Assessments section later in this section of the catalog.

### Course Withdrawal

Students may withdraw from courses without grade penalty by submitting the Withdrawal Form (available at www.aus.edu/registration/forms) to the Office of the Registrar. The student must submit the form in person or through the student’s AUS email account.

Withdrawal from courses must occur no later than the end of the 13th week of classes (end of the fourth week of classes for a 6-week summer term). A grade of W will be recorded on the transcript for the course from which the student has withdrawn. A W grade does not impact the student’s GPA. The semester/term tuition is not recalculated following course withdrawal.

If a student with a documented medical condition (e.g., operation, hospital stay, serious illness, etc.) is withdrawn from a course after the established withdrawal deadline, the student may submit a Student Petition Form (available at www.aus.edu/registration/forms) to the Office of the Registrar with the appropriate original medical documents. The Office of the Registrar will verify the claims and approve the withdrawal with a grade of W recorded for the course.

Students are fully responsible for dropping or withdrawing from courses that they are not attending.

A student may not withdraw from a course in which an academic integrity offense was committed until the case has been reviewed and the adjudication process is complete.

### Withdrawal from the University

Students seeking to withdraw from the university must submit the Complete Withdrawal Form (available at www.aus.edu/registration/forms) to the Office of the Registrar. The student must submit the form in person or through the student’s AUS email account.

If complete withdrawal occurs during the add and drop period, the courses are dropped and are not recorded in the student’s transcript. If withdrawal occurs prior to the end of the 13th week of classes (end of the fourth week of classes for a six-week summer term), a grade of W is assigned to the student for the courses registered for in the semester/term of withdrawal. In addition, the refund schedule outlined in the table below will apply.

<table>
<thead>
<tr>
<th>Withdrawal from the University*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Before the end of the first week of classes</strong></td>
</tr>
<tr>
<td>100% refund excluding non-refundable deposits</td>
</tr>
<tr>
<td><strong>During the second week of classes</strong></td>
</tr>
<tr>
<td>50% refund of tuition</td>
</tr>
<tr>
<td><strong>During the third week of classes</strong></td>
</tr>
<tr>
<td>25% refund of tuition</td>
</tr>
<tr>
<td><strong>After the third week of classes</strong></td>
</tr>
<tr>
<td>0% refund</td>
</tr>
</tbody>
</table>

Students are fully responsible for dropping or withdrawing from courses that they are not attending prior to withdrawal from the university.

Students who do not complete the withdrawal process prior to withdrawing from the university will not be eligible for any otherwise applicable tuition refund or adjustment.

### Withdrawal of PhD Candidacy

PhD candidates who do not successfully defend their dissertation proposal or their final dissertation are requested to withdraw their PhD candidacy. For details, refer to Withdrawal of PhD Candidacy under Academic Dismissal in Grades and Academic Standing later in this section of the catalog.

### Interrupted Studies and Reactivation of Student Record

Graduate students are expected to maintain continuous enrollment (fall and spring semesters) until they complete their program. For the purpose of this policy, AUS students studying abroad for a regular semester at an institution with which AUS has a study abroad agreement are considered to be in residence. A summer term abroad at an institution with which AUS has a study abroad agreement is not considered as a term in residence.

Enrollment in zero-credit hours courses only does not establish residency for the purpose of this policy.

Master’s-level students on conditional admission and students registered in bridging (remedial) courses are not eligible to interrupt their studies unless approved by their program coordinator/department and their associate dean.
Bridging Courses

Course Information

Students Away for up to Two Semesters

• A graduate student may take up to two semesters off from graduate studies but must inform the Office of the Registrar in writing of their intention to do so. Students with master's thesis/professional project/dissertation work in progress must first secure the approval of their college associate dean for graduate studies. Master's students who fail to secure their associate dean's approval will be assigned an NP grade, resulting in academic dismissal from the master's degree program. Likewise, PhD candidates who fail to secure their associate dean's prior approval will be assigned an NP grade, resulting in an automatic withdrawal of candidacy from the PhD degree program. For the purpose of this policy, a semester of complete course withdrawal is considered as a semester of leave.

• Graduate students who were on probation prior to interrupting studies and graduate students whose master's thesis/professional project/dissertation work was in progress prior to interrupting studies must petition for resuming studies by submitting the Reactivation Request Form (available at www.aus.edu/registration/forms) to the Office of the Registrar, one month prior to registration. Reactivation of the student’s record must be approved by the student’s program coordinator/head of department.

Students Away Longer than Two Semesters

• Graduate students who leave AUS for more than two consecutive semesters, inclusive of semesters of complete course withdrawal, must submit a new application for admission to the Office of Enrollment Management/Graduate Admissions.

Transfer of Credit hours

Courses taken at another institution while on leave from AUS will not be transferred.

Course Credit hours Definition

All courses are valued in credit hours. Normally, each credit hour represents 50 minutes of class instruction per week each semester, two 50-minute recitation sessions per week each semester, or three 50-minute laboratory sessions per week each semester. Due to the unique nature of labs in different content areas, one credit hour may be assigned for as few as two 50-minute laboratory sessions per week or as many as four.

The numbers in parentheses following the title of a course indicate the course contact hours’ distribution per week and the course credit hours’ information. The first digit in parentheses refers to the number of class contact hours per week the course requires, the second digit denotes the number of laboratory or practice hours required weekly, and the third digit refers to the number of credit hours the student will earn upon successfully completing the course.

Credit hours earned in bridging (or remedial) courses do not count towards meeting the graduation requirements of a graduate degree program.

Course Descriptions and Syllabi

Except for special topic courses, descriptions of courses offered by AUS are listed in the Course Descriptions section of this catalog. Courses are grouped by college/school and sorted by course subject and course code. Accelerated master’s program courses and courses offered in blended learning mode are identified. Descriptions of courses are also accessible online via the AUS student information system.
Academic Policies and Regulations

Descriptions of special topic courses are made available during registration in the college/school offering the course.

Course syllabi are available from the department or the graduate program's office. They include course title and course code; prerequisites (if any) and co-requisites (if any); name, contact information and office hours of the instructor; course description; course outcomes; course schedule; assignments and due dates; assessment methods and the weights assigned to them; and reading material and course texts.

Course Prerequisites

Certain courses require a minimum background of knowledge, as indicated by prerequisite courses cited in individual course descriptions. Titles and numbers refer to AUS courses. Equivalent courses satisfactorily completed at other institutions may also meet prerequisite requirements by transfer credit hours.

Course Offerings and Schedules

Courses are offered at the discretion of the individual programs. Students should check with the respective graduate programs for information on when courses will be offered.

To accommodate graduate students' work schedules, most programs offer their courses in the evening or over the weekend. Each course usually meets once a week for a three-hour duration. For details on course schedules, please refer to the semester/term online course offerings or check with the graduate program offering the course.

Mode of Course Delivery

The majority of the graduate programs use a face-to-face mode for class delivery where students meet on campus with the instructors during scheduled class times. However, some programs use a blended mode of course delivery to enhance and support the face-to-face delivery and promote a more flexible mode of learning. Both synchronous and asynchronous modes of delivery are utilized where students meet in real-time with the class or access class materials at their own pace. The programs ensure that students have the same learning experience and achieve the program learning outcomes regardless of the mode of delivery. The online component of each program using blended learning is limited to less than 50 percent of the total degree requirements, ensuring that the UAE Ministry of Education considers the awarded diploma as a face-to-face degree.

The following programs are approved by the Commission for Academic Accreditation of the UAE Ministry of Education to use a blended learning mode of delivery. For more details, please see the corresponding degree program section later in this catalog:

- Master of Urban Planning
- Master of Science in Engineering Systems Management

Fields of Study

Degree Offerings

American University of Sharjah has three colleges and one school that offer bachelor's, master's and PhD degree programs. Undergraduate degree offerings are listed in the AUS Undergraduate Catalog. Master's and PhD degree programs are listed below.

College of Architecture, Art and Design
- Master of Urban Planning

College of Arts and Sciences
- Master of Arts in Teaching English to Speakers of Other Languages
- Master of Science in Mathematics
- Doctor of Philosophy in Materials Science and Engineering

College of Engineering
- Master of Science in Biomedical Engineering
- Master of Science in Chemical Engineering
- Master of Science in Civil Engineering
- Master of Science in Computer Engineering
- Master of Science in Construction Management
- Master of Science in Electrical Engineering
- Master of Science in Engineering Systems Management
- Master of Science in Mechanical Engineering
- Master of Science in Mechatronics Engineering
- Doctor of Philosophy in Engineering – Engineering Systems Management

School of Business Administration
- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Finance
- Doctor of Philosophy in Business Administration

Major Offerings

Major offerings are determined by the degree offerings. Students declare their major by applying to a particular degree program offered by a college/school.

A major constitutes the student's main field of study. It requires students to complete a core of courses that are distinctive to that subject area, inclusive of a research component. Students could choose to specialize in a maximum of two majors (see Declaration of a Second Major herein).

Students pursuing a double major will be awarded the degree of their primary major with a notation of their second major added to their diploma (see Degree Information on Diplomas in the Graduation part later in this section of the catalog).

Dual Degree Offering

AUS seeks to enhance and expand international education opportunities for graduate students through agreements with highly reputable universities to offer dual degree programs. Students will take course work and conduct research under the instruction and supervision of faculty from AUS and the international institution. Upon completion of the degree requirements of each program, students will receive two degrees: one from AUS and one from the partner university.

Students interested in pursuing a dual degree must obtain the AUS program approval after completing one year of study at AUS, before applying to the dual degree program at the host institution. Students accepted in the dual degree program will be assisted by their program coordinator in developing a study plan to guide them on completing the degree requirements of both programs.

The following dual degree agreement is approved by the Commission for Academic Accreditation of the UAE Ministry of Education. For more details, please see the corresponding section of the AUS degree program later in this catalog:

- PhD in Business Administration with a concentration in finance from AUS and a PhD in International Finance from the University of South Carolina,
Darla Moore School of Business  
(South Carolina, USA).

Change of Degree Program

Graduate students seeking to change their degree program must apply for admission to the new degree program through the Office of Enrollment Management/Graduate Admission. Applications must be submitted by the assigned application deadlines (refer to Application Deadlines in the Admission to Graduate Studies section earlier in this catalog). To be eligible for a change of degree program, the student must meet the requirements for admission to the new degree program. Please refer to the relevant degree program’s catalog section for information on admission requirements.

A change of degree program might entail a change in a student’s catalog. Please refer to the Catalog section under Graduation Requirements for more details.

In addition, students seeking a change of degree program must consult the graduation requirements of the new degree program, as stipulated in the new student’s catalog, to identify specific program graduation requirements and consult with the program coordinator/head of department to determine how completed courses correspond to the graduation requirements of the new degree program.

Concentrations and Themes

Some degree programs allow students the choice of an area of concentration or a choice of a theme. This option offers students more in-depth knowledge of a subject area constituting a particular aspect of their major. Please refer to the relevant program section for concentration and theme requirements. Where the concentration or theme is mandatory, a student must declare his/her choice when applying to the program. Where the concentration or theme is an option, a student must indicate his/her choice by filling in the appropriate information on the Change of Major Form (available at www.aus.edu/registration/forms).

The Change of Major Form must be submitted to the graduate program coordinator/head of department by the last day of the 12th week of classes of the fall or spring semester. The program coordinator/head of department will forward the approved forms to the Office of the Registrar. Forms must be received by the Office of the Registrar by the end of the Add/Drop period of the following semester/term. Forms received after the end of the Add/drop period of a semester/term will be effective as of the following semester/term. However, declaration forms of prospective candidates for graduation must be received by the Office of the Registrar no later than the end of the 10th week of classes of the semester preceding their graduation semester/term.

Students approved to declare a concentration that is not listed in their degree program, as described in their catalog of record, but listed in the same degree program as described in the most recent academic catalog will have their catalog of record changed to the first academic catalog where the approved concentration was introduced.

Declaration of a Second Major

Master’s degree students may select to enroll in two separate majors offered by two different master’s degree programs. To declare a second major, the student must submit to the Office of Enrollment Management, within the announced admission deadlines, an application for admission to the program housing the second major. The Office of Enrollment Management will forward the approved application to the Office of the Registrar. Applications received by the Office of the Registrar after the end of the add and drop period of a semester/term will be effective as of the following semester/term.

One of the two majors must be designated as the primary major, but the student’s rights and responsibilities are the same in both majors. The advisor of the primary major will serve as the student’s registration advisor. The student’s diploma and transcript will indicate all majors completed at the time of graduation.

For graduation information, please refer to Requirements for a Double Major under the Graduation Requirements section.

Grades and Academic Standing

Course Assessments

Course assessments—such as quizzes, midterms and assignments—are scheduled by the course instructor and normally announced in the course syllabus.

Major course assessment activities of courses offered in a blended learning mode will be conducted on campus, following the traditional controlled measures according to university policy. Other assessment methods—such as quizzes, presentations, essays, etc.—can be assessed online with appropriate academic integrity measures.

Missing a course assessment due to a medical emergency or national duty is governed by the following policies.

Missed Assessments Due to Medical Emergencies

In the event that a medical emergency or severe illness causes the student to miss a course assessment, students are responsible for contacting their associate dean as soon as possible to report the medical issue and provide documentation certified by University Health Services. The associate dean of the school/college to which the student belongs will arrange for course instructors to be notified. Course instructors will provide an opportunity for makeup of the missed assessment or provide an alternative arrangement to account for the missed work.

Missed Assessments Due to National Duty

Students called to UAE National Duty are responsible for contacting their associate dean to report the military service and provide official documentation. The associate dean will arrange for course instructors to be notified. Course instructors will provide an opportunity for makeup of the missed assessment or provide a satisfactory alternative arrangement to account for the missed work.

Examinations

Information about final examination schedules is published by the Office of the Registrar at www.aus.edu/registration. Final examinations of graduate courses are administered within the semester/term examination period published dates and are scheduled by the faculty members teaching these courses.

Failure to Appear for a Final Examination

A student who fails to appear for the examination will not be permitted to take a make-up examination unless the
associate dean for graduate studies of the school/college responsible for the course determines that extraordinary circumstances exist and a make-up examination is warranted. The associate dean will then determine whether a make-up examination can be completed or an I grade should be awarded and the make-up examination should be scheduled at the beginning of the next semester or summer term. For further details, refer to Incomplete Grades later in this section.

Illness Prior to and During Final Examinations

Students are responsible for taking final examinations during the published examination period. If an incapacitating illness prohibits taking a final examination, the student must notify his/her graduate program coordinator/head of department and provide complete documentation to University Health Services in advance of the scheduled examination.

Students who begin a final examination are expected to complete it unless a sudden and incapacitating illness requires urgent medical attention. A student whose condition is so serious that medical care is necessary must report immediately to University Health Services. If the University Health Services determines that the medical condition prior to or during the scheduled examination period is serious enough to render a student incapable of taking or completing the examination then, based on the recommendation of University Health Services, the relevant associate dean for graduate studies will determine whether a make-up examination can be completed or an I grade should be awarded and the make-up examination should be scheduled at the beginning of the next semester or summer term. For further details, refer to Incomplete Grades later in this section.

The opportunity to complete a make-up examination will not be provided if compelling medical evidence indicates that taking or completing the examination was an option.

Tardiness

If an instructor allows a student who arrives late for a final examination to take the examination as scheduled, no additional time beyond the period assigned for the examination will be provided.

Grading System

Courses are graded using letter grades. The grade point average (GPA) is based on a four-point scale. The AUS grading system is provided below:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Excellent</td>
<td>A equals 4.00 grade points</td>
</tr>
<tr>
<td>Exceeds Expect</td>
<td>A- equals 3.70 grade points</td>
</tr>
<tr>
<td>Meets Expect</td>
<td>B+ equals 3.30 grade points</td>
</tr>
<tr>
<td></td>
<td>B equals 3.00 grade points</td>
</tr>
<tr>
<td>Below Expect</td>
<td>B- equals 2.70 grade points</td>
</tr>
<tr>
<td></td>
<td>C+ equals 2.30 grade points</td>
</tr>
<tr>
<td></td>
<td>C equals 2.00 grade points</td>
</tr>
<tr>
<td>Fail</td>
<td>F equals 0.00 grade points</td>
</tr>
<tr>
<td>Academic Integrity Violation Fail</td>
<td>XF equals 0.00 grade points</td>
</tr>
</tbody>
</table>

Grades not calculated in the grade point average are:

- AUD Audit
- AW Administrative Withdrawal
- I Incomplete
- IP In Progress
- N No Grade
- NP No Pass
- P Pass; credit hours counted
- TR Transfer; credit hours counted
- W Withdrawal
- WV Waive; no credit hours

The minimum passing grade for a graduate course is C. Students who receive an F grade in a graduate course will not be allowed to continue in the university.

Incomplete Grades

The work for a course must be completed by the end of the final examination period of the corresponding registration semester/term. In the case of unexcused incomplete work, an F grade is given for the missing work and the final course grade is computed accordingly.

Only in exceptional cases, such as a compelling medical or other emergency certified in writing by a medical or other professional, is a student assigned an incomplete (I) grade in a given course, provided the student has been in attendance up until the end of the withdrawal period of the semester/term (also see Examinations earlier in this section). The instructor of the course will then process an Incomplete Grade Form (available from the office of the associate dean) and submit it to the Office of the Registrar for final approval and implementation. The Incomplete Grade Form must be submitted no later than the last day of the examination period of the corresponding semester/term.

An I grade pending beyond the end of the fourth week of classes of the next regular semester will revert into the alternative grade indicated by the instructor of the course on the Incomplete Grade Form. In the event where no alternative grade was indicated on the form, the I grade will revert into an F grade. It is the responsibility of the student to find out from his/her professor the specific dates by which requirements must be fulfilled.

A student who is on academic probation and who was approved for an I grade in a specific semester/term is not eligible for early registration for an upcoming semester/term. Prospective candidates for graduation with incomplete grades will be awarded their degrees in the semester/term where their courses are successfully completed.

In Progress Grades

A master’s thesis/professional project/dissertation normally requires longer than one semester/term to be completed. An In Progress (IP) grade is recorded until completion of the master’s thesis/professional project/dissertation. Once the master’s thesis/professional project/dissertation is completed, the student’s associate dean will inform the Office of Research and Graduate Studies and the Office of the Registrar of the final grade.

Prospective candidates for graduation with In Progress grades will be awarded their degrees in the semester/term where their courses are successfully completed.

Master’s students who fail to maintain master’s thesis/professional project continuation in a semester without their program coordinator/head of
department prior approval of master’s thesis/professional project registration discontinuation, will be assigned an NP grade, resulting in academic dismissal from the master’s degree program. Likewise, PhD candidates who fail to maintain dissertation continuation in a semester without their program coordinator/head of department prior approval of dissertation registration discontinuation, will be assigned an NP grade, resulting in an automatic withdrawal of candidacy from the PhD degree program.

An IP grade will be changed to an N grade in the following situations:
- the student is approved to discontinue thesis work in order to pursue a final project (or vice versa)
- the student fails to complete the degree program graduation requirements within the time limit on residency and is denied an extension of the residency time limit
- the student is asked to withdraw PhD candidacy
- the student withdraws from the university.

No Grade Entries

A No Grade (N) grade is assigned to a course when an academic integrity violation has been reported and the adjudication process cannot be concluded before the course grade is due for the semester/term. In such cases, the N grade is temporary and the final grade for the course will be entered once the adjudication process is concluded. If a violation of the Student Academic Integrity Code or the Student Code of Conduct results in suspension or dismissal effective for the semester/term in which the offense occurred, then an N grade will be entered for all courses except for those that were subject to an XF grade penalty. If suspension or dismissal occurs at the end of a regular semester or summer term and a letter grade has been assigned in a course, the letter grade will revert to an N grade. The Semester GPA and the Cumulative GPA will be recalculated accordingly and a Suspended or Dismissed academic standing will be assigned for the semester/term. For details on transcript notations, refer to Notation of an Academic Integrity Code Violation Penalty under Academic Integrity earlier in this section of the catalog.

An N grade is also assigned as a replacement of an IP grade. For details, refer to the preceding In Progress Grades section.

Repeating Courses

Graduate courses may not be repeated. With the recommendation of the program coordinator/head of department and the approval of the appropriate dean (or appointed designee), a graduate student may be allowed to repeat up to two graduate courses in a degree program. The original grade and the new grade will appear in the transcript, but only the new grade will be calculated into the GPA. No course may be taken more than twice.

Students may not repeat AUS courses at another institution with the aim of transferring credit hours.

Note: Graduate students who receive an F grade in a graduate course will not be allowed to continue in the university.

Class Standing

Master’s Degree Students

The class standing of a master’s degree student in a specific semester/term is determined by the number of credit hours the student has earned up until and excluding that semester/term. The following table summarizes the earned credit hours to class standing equivalencies:

<table>
<thead>
<tr>
<th>Credit Hours Earned</th>
<th>Class Standing</th>
</tr>
</thead>
<tbody>
<tr>
<td>0–15</td>
<td>Master’s Year 1</td>
</tr>
<tr>
<td>16 and above</td>
<td>Master’s Year 2</td>
</tr>
</tbody>
</table>

PhD degree Students

The class standing of a PhD degree student in a specific semester/term is determined by passing the qualifying exam. PhD degree students who pass the qualifying exam are classified as PhD-Advanced to Candidacy; students who have not yet passed the qualifying exam are classified as PhD-Not Advanced to Candidacy.

Grade Point Average

AUS uses two grade point averages: the semester grade point average (SGPA) and the cumulative grade point average (CGPA).

Quality Points

The quality points earned in a course are calculated by multiplying the grade point value of the letter grade by the number of credit hours the course is worth.

Semester Grade Point Average (SGPA)

The SGPA is the grade point average of grades earned in a particular semester/term. It is calculated by dividing the sum of the quality points of courses taken in a particular semester/term by the total number of credit hours of the courses taken in that same semester/term.

CGPA = sum (quality points of courses taken in semester/term X) / sum (credit hours of courses taken in semester/term X)

Cumulative Grade Point Average (CGPA)

The CGPA is calculated by dividing the sum of the quality points of courses taken in all semesters/terms by the total number of credit hours of all courses taken in all semesters/terms.

A student’s academic standing is determined by his/her CGPA.

Good Academic Standing

In order to be considered in good academic standing, graduate students must maintain a CGPA of at least 3.00 out of 4.00.

A student must be in good academic standing to be eligible for graduation.

Academic Probation

If a graduate student’s cumulative GPA falls below 3.00 at the end of any given semester, the student is placed on academic probation. A graduate student placed on academic probation, who fails to remove his/her academic probation by the end of the immediately following summer term, will maintain his/her academic probationary status.

During probationary status, the following conditions apply:
- A graduate student on academic probation may not register for more than six credit hours in a semester.
  The program coordinator/head of department may restrict the summer course load of a graduate student on academic probation to three credit hours.
- A graduate student on academic probation is not eligible for thesis, final project or dissertation first-time registration.

An academic probation is removed at the end of any semester/term in which the student attains a CGPA of 3.00.
Academic Dismissal

A graduate student on academic probation who does not achieve good academic standing by the end of the regular semester following the semester in which the cumulative GPA fell below 3.00, with the academic probationary status maintained at the end of the interim summer term, is academically dismissed from the their degree program.

Graduate students who receive an F grade in a graduate course are academically dismissed from their degree program.

PhD degree seeking students who fail the qualifying examination are academically dismissed from the university.

Students who have been academically dismissed may petition for reinstatement to the student’s program coordinator/head of department, one month ahead of registration of the semester immediately following academic dismissal. The Student Petition Form is available at www.aus.edu/registration/forms. Petitions will be reviewed by the graduate program coordinator/head of department who will make a written recommendation to the appropriate dean (or appointed designee). The dean (or appointed designee) will then provide a recommendation to the Vice Provost for Research and Graduate Studies. Decisions regarding continuation in the program will be made by the Vice Provost for Research and Graduate Studies in consultation with the appropriate dean (or appointed designee). Reinstatement following academic dismissal is granted only in exceptional circumstances.

Academically dismissed students who wish to change their study path may apply for admission to a different graduate degree program. Admission requirements of the new degree program must be met. For details, consult the Admission to Graduate Studies section earlier in this catalog. Courses completed while in the previous degree program cannot be used to satisfy the graduate requirements of the new graduate degree program.

Academically dismissed students who have been away longer than two consecutive semesters may not apply for readmission. Readmission following academic dismissal is granted only in exceptional circumstances.

Withdrawal of PhD Candidacy

Doctoral students who do not successfully defend their dissertation proposal or their final dissertation are asked to withdraw their PhD candidacy. Doctoral students who are asked to withdraw their PhD candidacy are not eligible to continue at AUS, do not qualify for reinstatement and may not apply for readmission. For details, refer to Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

Student Petitions and Appeals

Student Responsibility

All official university communications are distributed through the AUS-issued email address. These are considered official notifications. Students are responsible for checking their AUS email accounts and for responding to or acting upon messages accordingly.

Students should keep their own records of all transactions with the university (e.g., registration schedules and forms, grade reports, payment records, etc.). It is also advisable to keep copies of all tests, digital files, papers and so forth submitted in fulfillment of course work. Students should keep copies of all course syllabi.

Petitions

Students may petition for exceptions to academic policies of the university. Petitions are processed through the Office of the Registrar. The Student Petition Form is available at www.aus.edu/registration/forms.

Registration related petitions must be submitted to the student’s program coordinator/head of department:

- for fall semester registration: by Monday, two weeks before the start of the fall semester
- for spring semester registration: by the Thursday of the second week following the end of the final examination week of the preceding fall semester
- for summer term registration: as soon as possible after the end of the preceding spring semester’s final examination week and before the first day of the summer term.

The office of the associate dean for graduate studies will forward the approved petitions to the Office of the Registrar by the established deadlines.

Appeal of Academic-Related Issues

If a student wishes to discuss an issue pertaining to a course, instructor or other academic-related issues, the student may direct his/her concern to the involved faculty member. If the issue or grievance is not resolved, the student should contact the program coordinator/head of department and/or dean (or appointed designee) of the college/school.

If, in the judgment of the dean (or appointed designee) of the college/school, the grievance is of such gravity or its resolution would have such impact on the welfare of students generally or on the conduct of professional responsibilities in the university as to require even more formal safeguards for the aggrieved student and faculty member involved, the dean (or appointed designee) will prescribe an appropriate procedure consonant with the university’s mission or refer the matter to the Graduate Appeals Review Committee through the Office of the Vice Provost for Research and Graduate Studies. Academic appeals requests must be submitted one week before the first day of the following semester.

Appeal of a Grade

Students are entitled to fair and equitable evaluation and treatment in the course of their academic relationships with members of the faculty. These criteria are observed by the members of the AUS faculty as a part of their professional responsibilities.

A student who believes that he/she has a legitimate concern regarding a final course grade must inform the professor responsible for the course in writing and then discuss the matter with the professor. If a resolution cannot be reached, the student may contact the program coordinator/head of department in writing to file a formal grade appeal no later than seven working days after the make-up examination day. The program coordinator/head of department will review the case and provide a written response to the student. If the matter cannot be resolved at the department level, a grade appeal review will be conducted by a college/school committee appointed by the dean (or appointed designee). Based on the
Graduation

Master’s Thesis, Professional Project and Dissertation

Master’s theses, professional project reports and PhD dissertations document research conducted by AUS graduate students under the guidance and supervision of AUS faculty members. They are the culmination of the students’ programs of study and are expected to reflect appropriate scholarly depth and rigor.

The Office of the Vice Provost for Research and Graduate Studies in collaboration with the Graduate Programs Committee establishes and oversees the regulations and requirements for master’s theses, professional projects and PhD dissertations at AUS. Degree candidates are responsible for adhering to these requirements as published in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures. In addition, degree candidates are responsible for familiarizing themselves with and adhering to the standards and regulations of the latest edition of the AUS Guide to Writing and Formatting Dissertations-Thesis-Final Project Report available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Writing and Formatting Guidelines.

It is AUS policy to maintain master’s theses and PhD dissertations in the AUS Archives and to make them available to other students and scholars. The AUS Library is responsible for the archiving of the master’s theses and PhD dissertations. Detailed procedures and requirements for submitting master’s theses and PhD dissertations to the AUS Library and Archives are outlined in the Graduate Studies Policies and Procedures document.

Appeal of an XF Grade

In cases where a failing grade of XF was assigned to a course as a result of an academic offense penalty, a student may petition during the semester/term of graduation, or at the time of complete withdrawal from AUS, to have the grade converted to an F on the academic transcript. The petition is submitted to the Office of the Registrar along with the Application for Graduation or the Complete Withdrawal Form. The final decision will be made by the Vice Provost for Research and Graduate Studies.

The F grade resulting from an XF grade will be reverted into an XF grade if the student reactivates his/her record at AUS.

AUS also has a stringent policy regarding research involving humans as subjects. Detailed information on such research activities may be found on iLearn and accessible using the following path: iLearn-Community-Research Services-Institutional Review Board (IRB).

Master’s Thesis and Professional Project

Registering for Master’s Thesis/Professional Project Credit Hours

Master’s degree students registering for master’s thesis/professional project credit hours must register through the Office of the Registrar.

Only students in good academic standing are eligible for thesis/professional project first-time registration.

Master’s Thesis/Professional Project First Registration

First-time registration in thesis/professional project is only allowed during a regular semester (fall or spring). In the first semester of master’s thesis/professional project work (no earlier than the second semester of enrollment in the master’s degree program), a student normally registers for three master’s thesis/professional project credit hours. Before the end of the add and drop period, graduate programs coordinators/head of departments must provide the Office of the Registrar with a list of all students who will be registered for master’s thesis/professional project (XXX 699/XXX 698), along with their master’s thesis/professional project titles and the names of their advisors.

Students in the thesis option and students in the project option where a six-credit-hour professional project is required must prepare and orally present the proposal of their master’s thesis/professional project to the satisfaction of a master’s thesis/professional project committee by the end of the first semester of registration in their master’s thesis/professional project. Students who do not demonstrate adequate thesis/project work progress by the end of the 10th week of the semester will be withdrawn from the master’s thesis/professional project course by their advisors.

The master’s thesis/professional project committee is normally constituted of up to three members — the master’s thesis/professional project advisor and two additional members as examiners. The committee is formed by the program coordinator/head of department in consultation with the master’s thesis/professional project advisor and is approved by the student’s associate dean. Each committee member must hold a terminal degree in their discipline and must have a demonstrated record of scholarly activities related to the thesis/project research topic. The master’s thesis/professional project advisor must be research-active and must have prior supervisory experience at the graduate level.

For details on the master’s thesis/professional project proposal preparation and submission, and on the master’s thesis/professional project committee formation and related deadlines, please refer to the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

Master’s Thesis/Professional Project Continuous Enrollment

Graduate students who have completed one semester of master’s thesis/professional project work must maintain continuous thesis/project enrollment until successful defense of the master’s thesis/professional project and the submission of the approved master’s thesis/professional project.
Academic Policies and Regulations

Continuous Enrollment

Master’s Thesis/Professional Project Continuous enrollment in a regular semester

Continuous enrollment in a regular semester is ensured by the Office of the Registrar. Changes to the master’s thesis/professional project registration details (master’s thesis/professional project title, name of advisor, credit and billing hours) are emailed to the Office of the Registrar by the program coordinator/head of department before the end of the add and drop period of the corresponding registration semester. In addition, and before the end of the add and drop period of the registration semester, the program coordinator/head of department will email the Office of the Registrar a list of the names and ID numbers of those students approved to interrupt their master’s thesis/professional project continuous enrollment.

Master’s Thesis/Professional Project Continuous Enrollment in a Summer Term

Continuous enrollment in master’s thesis/professional project in a summer term is optional. The program coordinator/head of department will email the Office of the Registrar, by the end of the add and drop period of the corresponding summer term, a list of the names and ID numbers of students wishing to maintain continuous master’s thesis/professional project enrollment in the summer term, along with their respective master’s thesis/professional project title, advisors’ names and appropriate credit and billing hours.

Master’s Thesis/Professional Project Time Extensions

Students who do not complete the master’s thesis/professional project after registering for thesis/project full credit hours must maintain continuous master’s thesis/professional project enrollment until defense of the master’s thesis/professional project.

Likewise, students who have successfully defended their master’s thesis/professional project and have already registered for the master’s thesis/professional project full credit hours must maintain continuous enrollment until submission of the approved master’s thesis/professional project final report.

A master’s thesis/professional project extension fee (see Other Fees in the Tuition and Fees section earlier in this catalog) is charged for the first extension and every subsequent summer term extension; however, further extensions in a regular semester will be charged the tuition rate of one graduate credit hour.

Students must be registered in the semester/term in which they defend their thesis.

Note: A student must complete the master’s degree program graduation requirements within five years from initial enrollment into the program, inclusive of any leave.

Switching from Master’s Thesis to Professional Project and Vice Versa

Graduate students who wish to switch from master’s thesis to professional project (or vice versa) must submit the Request to Change Program Option – Graduate Level Students (available at www.aus.edu/registration/forms) within the published deadlines. The request form must be approved by the student’s program coordinator/head of department and the student’s associate dean.

A student who switches from master’s thesis to professional project (or vice versa) will be given an N for no grade for the master’s thesis/professional project credit hours (i.e., XXX 698 or XXX 699) completed for the first option selected.

Switching from master’s thesis to professional project could require the student to take additional courses. The student must pay for any additional credit hours or courses required as a result of switching from master’s thesis to professional project (or vice versa). In switching from master’s thesis to professional project (or vice versa) while maintaining the topic of research and working with the same master’s thesis/professional project advisor, tuition paid towards the master’s thesis will be applied towards the professional project and vice versa.

Grading of Master’s Thesis/Professional Project

The master’s thesis/six-credit professional project requires longer than one semester/term to be completed. An In Progress (IP) grade is recorded by the Office of the Registrar until completion of the master’s thesis/professional project.

A master’s thesis/professional project grade will be assigned after defense of the master’s thesis/professional project and submission of the approved master’s thesis/professional project final report. The master’s thesis/professional project defense has two parts: an open public session followed by a closed session with the master’s thesis committee. The associate dean for graduate studies will inform the Office of Research and Graduate Studies and the Office of the Registrar of the master’s thesis/professional project final grade.

PhD Dissertation

PhD degree seeking students are required to pass a qualifying examination and complete a major research work in the form of a PhD dissertation.

Qualifying Examination

To advance to candidacy for a PhD degree and become eligible to register for the PhD dissertation, a doctoral student must pass a qualifying examination. The qualifying examination may have a written and/or oral part to test the student’s breadth of knowledge, understanding of fundamentals, and ability to perform independent research work in a specific area.

Registration for the qualifying examination is conditional upon meeting the following minimum requirements:

- the student must be in good academic standing
- the student must have successfully completed a minimum of 12 credit hours of doctoral-level course work.

Further eligibility requirements may be imposed by the individual PhD degree programs. For details, consult the degree program section later in this catalog. Students need to seek guidance from their program coordinator/head of department regarding the qualifying examination requirements and deadlines.

The qualifying examination may result in a Pass or a Fail grade. The program coordinator/head of department will notify the Office of Research and Graduate Studies of the result of the qualifying examination within two weeks of the examination completion date. The Office of Research and Graduate Studies will officially notify the student and the Office of Registrar of the outcome of the exam.

A doctoral student who fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the program coordinator/head of department, one month ahead of the registration of the
semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the program coordinator/head of department who will make a written recommendation to the associate dean for graduate studies. The associate dean will then provide a recommendation to the Vice Provost for Research and Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Research and Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once.

Further details on the qualifying examination are provided in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

Registration for Dissertation Credit hours

The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation. PhD degree candidates registering for dissertation credit hours must register through the Office of the Registrar.

Dissertation First Registration

Prior to registering for dissertation credit hours, PhD degree candidates must officially request the appointment of their Dissertation Advisory Committee (DAC) or, otherwise, the DAC chair. The DAC is constituted of the DAC Chair and two other members, at a minimum. In addition to the DAC chair, at least two of the DAC members must hold a full-time faculty position at AUS. All DAC members must hold doctoral degrees and must have a demonstrated record of scholarly activities related to the dissertation topic. In addition, the DAC chair must have prior supervisory experience at the graduate level. For students accepted in a dual PhD degree program, the DAC member must include a co-advisor from the partner institution who must have a demonstrated record of scholarly activities related to the dissertation topic and have prior supervisory experience at the graduate level.

The DAC chair is the principal dissertation advisor of the PhD degree candidate, guiding the candidate develop the dissertation research proposal and completing the dissertation.

In the first semester of dissertation work, a student normally registers for six dissertation credit hours working on the dissertation research proposal. Before the end of the add and drop period, the program coordinator/head of department must provide the Office of the Registrar with a list of all doctoral students who will be registered for dissertation credit hours (XXX 799), along with their dissertation titles, the names of their advisors and the number of dissertation credit hours.

For details on the DAC formation and the dissertation research proposal preparation and submission, please refer to the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

Dissertation Continuous Enrollment

PhD candidates who have completed one semester of dissertation work must maintain continuous dissertation enrollment until defense of the dissertation. Candidates who successfully defend their dissertation must remain enrolled until submission of the approved dissertation final report.

Students who fail to maintain dissertation continuation in a semester, without their program coordinator/head of department prior approval of dissertation registration discontinuation, will be assigned an NP grade, resulting in an automatic withdrawal of candidacy from the PhD degree program.

Dissertation Proposal

Students are expected to successfully complete the dissertation proposal within three semesters of dissertation first registration. A PhD candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed.

Failure to complete the dissertation proposal within the specified timeframe or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation proposal report must be submitted and orally presented to the dissertation review panel. The dissertation review panel is composed of the DAC in addition to two more members who hold a doctorate degree and are active in the research field of the proposal. The proposal must be approved in writing by the review panel. Details on the dissertation proposal review process are provided in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

Dissertation Continuous enrollment in a regular semester

Dissertation continuous enrollment in a regular semester is ensured by the Office of the Registrar. Candidates are automatically enrolled in three incremental credit hours.

Changes to the dissertation registration details (dissertation title, name of advisor, registration credit hours and billing hours) are emailed to the Office of the Registrar by the program coordinator/head of department before the end of the add and drop period of the corresponding registration semester.

In addition, and before the end of the add and drop period of the registration semester, the program coordinator/head of department will email the Office of the Registrar a list of the names and ID numbers of those students approved to interrupt their dissertation continuous enrollment.

Dissertation Continuous Enrollment in a Summer Term

Continuous enrollment in the dissertation in a summer term is optional. The program coordinator/head of department will email the Office of the Registrar, by the end of the add and drop period of the corresponding summer term, a list of the names and ID numbers of students wishing to maintain continuous dissertation enrollment in the summer term, along with their respective dissertation title, advisors’ names and appropriate credit hours and billing hours.

Dissertation Time Extensions

PhD candidates who have registered for the dissertation minimum credit hours but have not yet defended their dissertation must maintain continuous enrollment by registering and paying for three incremental credit hours per semester/term until defense of the dissertation.

Candidates who have successfully defended their dissertation must remain enrolled until submission of the approved dissertation final report by registering and paying for one incremental credit hour per semester/term until submission of the approved dissertation final report.
Candidates must be registered in the semester/term in which they defend their dissertation.

Note: A student must complete the PhD degree program graduation requirements within 10 years from initial enrollment into the program.

**Dissertation Defense and Grading**

Up until the defense of the dissertation, an In Progress (IP) grade is recorded by the Office of the Registrar for every registration semester/term.

The dissertation must be defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC consists of the DAC members and at least two additional members who have a demonstrated record of scholarly activities related to the dissertation topic. One of the additional members must be from outside AUS. The FODC membership is formed by the program coordinator/head of department in consultation with the DAC chair; it is approved by the associate dean for graduate studies and appointed by the Vice Provost for Research and Graduate Studies.

The dissertation defense has two parts: an open public session followed by a closed session with the FODC. The outcome of the defense will be either Pass or Fail resulting in a grade of P or NP, respectively. Students who pass the dissertation defense but do not submit the final approved dissertation report within the semester in which the defense took place will continue to be assigned an IP grade and must register for one incremental credit hour of dissertation per semester/term, until a final grade is assigned. Candidates with an NP grade may petition to the Vice Provost for Research and Graduate Studies, within one month of receiving the grade, for permission to a second final oral examination. If approved, the student must register for three credit hours of dissertation. The examination must be held with the same FODC, no sooner than four months from the first final oral examination. Failing the second final oral examination will result in an automatic withdrawal of candidacy from the PhD degree program.

For further details, consult the [Graduate Studies Policies and Procedures](https://www.aus.edu/registration/forms) document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

**Graduation Requirements**

**Catalog**

The graduation requirements for any individual student are determined by the catalog that was effective when the student admitted in the major, referred to as the catalog of record.

A student may choose to follow the catalog effective for any semester/term in which they were a registered student in their current program of study. To change catalogs, a student must file a Change of Academic Catalog Form (available at [www.aus.edu/registration/forms](http://www.aus.edu/registration/forms)) with the Office of the Registrar no later than the end of Add/Drop period of the student’s graduation semester/term.

A student who changes his/her degree program may petition to revert to the catalog in effect at the time of matriculation into the university. The Petition Form (available at [www.aus.edu/registration/forms](http://www.aus.edu/registration/forms)) must be approved by the student’s graduate program coordinator/head of department or associate dean and submitted to the Office of the Registrar no later than the end of the add/drop period of the student’s graduation semester/term.

Every individual student is personally responsible for meeting all graduation requirements as detailed in his/her catalog of record.

If a required course within a degree program changes its number of credit hours, then the number of credit hours required by the degree program for graduation may, at the discretion of the college/school, change by the same amount provided the minimum total number of credit hours for graduation is 30 for a master’s degree program and 54 for a PhD degree program, and the CGPA is at least 3.00.

In case of substantial changes in course offerings, equivalent graduation requirements are determined by the dean of the student’s college/school.

**Disclaimer:** Course information, content and prerequisites may be subject to change as a result of the university’s commitment to a process of continual improvement in academic programs. Students must comply with the most up-to-date course requirements.

**Courses**

Courses are considered primary components of the curriculum and should not be split into individual credit hours to be counted in different areas of the degree audit.

**Requirements of a Graduate Degree Program**

Each student in a graduate degree program must successfully complete a minimum number of credit hours in courses that are specific to the degree program and distinctive to the major subject area of the degree program. The specific requirements are listed as major requirements (that could comprise college core requirements and program core requirements), concentration requirements and electives, and major electives. The minimum number of credit hours of a master’s degree is 30 credit hours; the minimum number of credit hours of a PhD degree is 54 credit hours.

Details of the graduation requirements of a degree program are provided under the corresponding degree program section in this catalog.

**Requirements for a Double Major**

To complete a double major, students must satisfy the degree program requirements of the two majors requested. Some courses may be counted toward the fulfillment of both degrees’ requirements. The catalog in effect for the student’s primary major will be followed for the degree audit of the second major.

Double-major students will be awarded the degree of the primary major degree program, with a notation on the diploma indicating completion of a second major.

**Graduate Courses Completed While at the Undergraduate Level**

With the approval of their associate dean and the relevant graduate program coordinator/head of department, AUS senior undergraduate students with a minimum CGPA of 3.00 can register for up to two master’s level courses while enrolled at the undergraduate level. Once the student is admitted to an AUS master’s degree program, these courses may be counted toward completion of the master’s degree program requirements, provided they were completed no more than five years prior to the start date of the first semester of study of the current master’s degree program. Where AUS graduate courses taken while at the undergraduate level count towards the student’s master’s degree program graduation requirements, courses could be used to satisfy registration requirements, as applicable. Grades earned in such courses will also count in the master’s-level cumulative grade point average (CGPA).

Undergraduate students accepted to the Accelerated Master’s Program (AMP) of an AUS master’s-level degree program are eligible to register for a maximum of six credit hours in master’s-level courses while completing their undergraduate degree program graduation requirements. These courses may be used towards meeting
the undergraduate degree program graduation requirements and may be evaluated for transfer of credit hours towards meeting the master’s-level degree program graduation requirements post admission to the program. For full details on the AMP, including eligibility, application process, course registration and tuition fees, refer to the Accelerated Master’s Program section of the AUS Undergraduate Catalog or consult www.aus.edu/amp.

### Graduation Residence Requirements

Candidates for graduation are expected to complete their last semester in residence at the university, unless registered at an institution with which AUS has a study abroad agreement.

In order to obtain a master’s degree from AUS, students must complete a minimum of two regular semesters in residence at AUS. Accelerated Master’s Program (AMP) students who are admitted to the corresponding master’s degree program and who choose the thesis option of this program must complete a minimum of three regular semesters in residence at AUS as students of that master’s degree program.

To earn a PhD degree from AUS, doctoral students must complete a minimum of four semesters in residence at AUS. Coursework completed at an institution with which AUS has a study abroad agreement or as part of an approved dual degree program will meet the graduation residence requirement provided the courses have been pre-approved by the relevant graduate program coordinator/head of department and the associate dean for graduate studies.

Note that coursework completed in the context of a summer term outside AUS does not meet graduation residence requirements.

Master’s degree students may transfer up to six credit hours in master’s-level courses. PhD degree students may transfer up to nine credit hours in doctoral-level courses. For details, please refer to the Transfer Credit hours Policy under the Admission to Graduate Studies section earlier in this catalog. Students accepted in a dual degree program may be allowed to transfer more credit hours from the partner institution. For details, please refer to the corresponding degree program section of the catalog.

### Time Limit on Duration of Study

Regardless of the catalog by which the student’s graduation requirements are governed, all degree requirements must be completed within five years of admission to AUS as a master’s degree student and within 10 years of admission to AUS as a PhD degree student, inclusive of any leave.

### Academic Standing Requirement

A student must be in good academic standing to be eligible for graduation.

### Graduation Procedures and Diploma Information

#### Participation in the Commencement Ceremony

The university holds two commencement exercises: a fall commencement ceremony at the end of the fall semester and a spring commencement ceremony at the end of the spring semester.

Prospective candidates for graduation in a fall or spring semester are eligible to participate in the corresponding semester commencement ceremony. Prospective candidates for graduation in a summer term are eligible to participate in the following fall semester commencement ceremony.

Master’s degree students registered at the 13th week of a semester for courses/master’s thesis/professional project necessary to complete their degree program graduation requirements may participate in commencement at the end of that semester, unless the college/school notifies the Office of the Registrar that graduation will be delayed because of lack of progress on the thesis/project.

PhD degree students registered at the 13th week of a semester for their dissertation may participate in commencement at the end of that semester, provided they have successfully completed all their degree program requirements, including earning a P grade on their dissertation. Students whose dissertation passing grade is awarded past the 13th week of the semester may participate in the subsequent commencement ceremony.

Students who do not wish to participate in the commencement exercises of their semester of graduation must inform the Office of the Registrar within the deadlines communicated by the office.

### Application for Graduation

Candidates for graduate degrees file an online application for graduation in their last expected term of study. The online application form is active only during the application period. The link to the form as well as the submission deadlines are communicated by the Office of the Registrar after the Add/Drop period of the graduation term.

### Conferral of Degrees

Degrees are conferred at the end of the semester/term in which students have successfully completed degree requirements and all master’s thesis/professional project/dissertation requirements, including corrections and final submission of the approved master’s thesis/professional project/dissertation reports to the AUS Archives.

Conferral of the degree is noted on the academic transcript of the graduate with the date of graduation.

### Names on Diplomas

The names of AUS students will be spelled in English exactly as they appear on their passports or identity cards when printed on diplomas. If a name on a passport or an identity card does not appear in English, then the spelling of the name will be printed according to the personal preference of the student.

### Degree Information on Diplomas

The diploma will list the full name of the degree program awarded, as well as the applicable concentration(s).

The diploma of students graduating with a double major will also list the second major.

### Attestation of Diplomas and Transcripts

The Office of the Registrar provides information relevant to the attestation of diplomas and transcripts with the UAE Ministry of Education’s Higher Education Affairs Division. For details, please visit www.aus.edu/commencement.

Master of Urban Planning (MUP)
George Katodrytis, Head, Department of Architecture
Jerry Kolo, Coordinator

The Master of Urban Planning (MUP) degree program is offered by the Department of Architecture.

Urban planning has roots in architecture, engineering, public health, law and the social sciences. Planners today combine design, analytical and communication skills to help communities manage change. Urban planning involves government, private enterprise and local communities taking concerted action toward achieving a common goal.

The MUP degree program at AUS provides a specialized and professional education that enables graduates to plan urban environments and exert leadership in managing urban growth, developing urbanization policies and promoting social development. The program imparts to students ethical standards compatible with the values of local cultural settings, principles of social justice and concerns for environmental protection and sustainability. More details on the program are available at www.aus.edu/caad/mup.

Program Mission
The MUP degree program prepares students to become experts and leaders in the management and planning of urban development. In doing so, they will be guided by professional and ethical standards rooted in values of sustainability, local culture and social justice.

Program Goals
The MUP degree program seeks to:

- offer a high-quality educational setting that integrates theoretical principles of urban planning with practical methods and applications
- pursue approaches to teaching and learning that emphasize dealing with practical real-world issues and problems
- support and promote original interdisciplinary research in urban planning and related fields
- advance cooperation and forge partnerships with local communities, be they governmental, professional, academic and other local groups such as community-based organizations, not-for-profit entities and non-governmental organizations

Program Outcomes
Graduates of the MUP degree program will be able to:

- use quantitative, qualitative and visual techniques to analyze and interpret data and communicate information in support of planning and policy-making for cities and regions
- lead and guide locally relevant processes, which include stakeholder participation, for making and implementing different kinds of plans
- undertake research and analysis in an interdisciplinary setting to foster sound insights into planning for sustainable places

Admission Requirements
Applicants are required to fulfill the university's general admission requirements for graduate studies.

The program admits students from all fields of study, including, but not limited to, urban planning, architecture, engineering, business, the humanities and the social sciences.

Accelerated Master’s Program—AUS Undergraduate Students
AUS undergraduate degree-seeking students interested in pursuing an MUP degree may register for a maximum of six credit hours from MUP courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MUP degree program. The master’s-level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must have satisfied the following requirements at AMP application time:

- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievment Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MUP courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Blended Learning Mode of Delivery
The MUP degree program delivers several of its required and elective courses in a blended learning mode combining 10 weeks of face-to-face teaching with five weeks of online learning. These courses can be identified in the degree requirements section hereafter. Details about the delivery of the weekly sessions are provided in the course syllabi available from the department. Course assessments for courses delivered in blended learning mode are conducted in the same way as for courses delivered using the face-to-face mode.

To facilitate the effective use of the available learning tools, including the Learning Management System (iLearn) and online learning software, students are offered training sessions at the beginning of each semester. Furthermore, frequently asked questions related to e-learning tools are accessible to students and can be consulted at https://itfaq.aus.edu/.

Degree Requirements
The MUP degree is awarded after successful completion of a minimum of 33 credit hours consisting of core courses, elective courses and a capstone workshop research course, with a minimum cumulative grade point average of 3.00.

To graduate with an MUP degree, students must successfully complete the following minimum requirements:

- 18 credit hours in core courses
- six credit hours in a required capstone workshop research course
- a minimum of nine credit hours in elective courses

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to
Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Core Courses Requirement (18 credit hours)**

Students must successfully complete the following UPL courses:

- UPL 600 Planning History, Theory and Principles (blended learning mode)
- UPL 602 Computer Applications in Planning
- UPL 604 Urban Planning Research and Analysis
- UPL 621 Environmental and Land Use Planning (blended learning mode)
- UPL 623 Urban Design Processes, Principles and Skills (blended learning mode)
- UPL 625 Plan Making, Communication and Process

**Required Capstone Workshop Course (6 credit hours)**

Students must successfully complete the program’s capstone workshop course:

- UPL 680 Urban Research and Planning Workshop (blended learning mode)

This capstone workshop course involves working as a team on applying substantive urban planning knowledge and skills. It involves fieldwork, hands-on analysis, policy proposals and plan making.

**Elective Courses (minimum of 9 credit hours)**

Students must successfully complete three elective courses for a minimum of nine credit hours. Electives are selected from the following list of courses, in consultation with the program academic coordinator:

- UPL 633 Urban Infrastructure Planning (blended learning mode)
- UPL 634 Tourism and Hospitality Planning (blended learning mode)
- UPL 639 Urban Planning and Housing Policy
- UPL 651 Negotiation Strategies
- UPL 655 Ecological Urbanism
- UPL 694 special topic courses in urban planning

With the approval of their program academic coordinator and their head of department, students may elect to take one course outside of the list, from any university graduate-level course not counted as a core or capstone course. The course must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students could elect to complete courses outside of the list of elective courses that do not meet the above conditions. Such courses will not meet any of the degree program graduation requirements. Approvals of the student’s program academic coordinator and the student’s head of department are required.

**Academic Advising**

Program advising procedures provide students with orientation and guidance on the program and the profession. Students meet with the program academic coordinator every semester to discuss curricular progress and changes in circumstances, if any, and to confirm course choices for the next semester.

Master of Arts in Teaching English to Speakers of Other Languages (MA TESOL)

Paul Almonte, Head, Department of English

The Master of Arts in Teaching English to Speakers of Other Languages (MA TESOL) degree program is offered by the Department of English.

The mission of the MA TESOL degree program is to provide students a balanced foundation of both practical and theoretical knowledge needed to teach English at various proficiency levels, and to prepare them for doctoral studies in areas related to language learning and teaching. By combining theory and practice, the program aims to produce informed teachers capable of using theory to enhance their teaching practice.

Program Goals

To fulfill this mission, the program goals are:

- to develop in students a critical approach to assessing second language learning models, teaching methodologies and materials appropriate to the UAE cultural context
- to prepare students for positions requiring high levels of proficiency in teaching English as a foreign or second language at the secondary and tertiary levels
- to equip its graduates with the required competencies to contribute to the field and prepare them to enroll in PhD programs

Program Learning Outcomes

Upon graduation from the MA TESOL degree program, students will be able to:

- demonstrate an understanding of the basic models of language learning/teaching
- explain the role of culture in language learning and teaching in an ESL/EFL environment
- demonstrate critical and practical knowledge in the field of computer assisted/enhanced language learning
- apply pedagogical theories in applied linguistics to teaching practices
- apply testing and assessment concepts to real classroom situations
- develop/adapt and evaluate learner-centered curricula and materials for specific language teaching situations
- use effective classroom observation and research skills to improve teaching
- conduct original research

Admission Requirements

Applicants are required to fulfill the general university requirements for graduate admission. Applicants who meet the general university requirements for graduate admission but have not completed at least one undergraduate course in general linguistics may be required to complete an undergraduate course in linguistics. The undergraduate remedial course does not generate credit hours towards completion of the degree program graduation requirements. Students required to complete the remedial course are normally not eligible to register for degree program courses prior to successful completion of the course. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Conditional admission applicants must have achieved a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version) score of 6.5 or a minimum EmSAT (Achieve English) score of 1550, in addition to meeting the general university conditional admission requirements as outlined in the Admission to Graduate Studies section earlier in this catalog.

Waiver Policy

The remedial course could be waived by the MA TESOL Admissions Committee depending on the student’s background. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog.

Accelerated Master’s Program – AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MATESOL degree may register for a maximum of six credit hours from MATESOL courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MATESOL degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MATESOL courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

To qualify for graduation with an MA TESOL degree, students must successfully complete all the requirements of the program, which consist of a minimum of 30 credit hours in required courses and elective courses, inclusive of a research thesis, with a minimum cumulative GPA of 3.00.

Students must successfully complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in the catalog.

To be awarded an MA TESOL degree, students must successfully complete the following requirements:

- 12 credit hours of required course work
- a minimum of 12 credit hours of elective courses
- six credit hours of Master’s Thesis

Required Courses

(18 credit hours)

Students must successfully complete all the required courses, for a total of 18 credit hours, including a six-credit-hour master’s thesis.
• ELT 511 Linguistics for ESL Teachers
• ELT 513 Language Acquisition and Development
• ELT 515 Methods and Materials Development
• ELT 619 Practicum in TESOL

Master’s Thesis (6 credit hours)
• ELT 699 Master’s Thesis

Elective Courses (minimum of 12 credit hours)
Students must successfully complete a minimum of four elective courses (for a minimum of 12 credit hours). Students select their elective courses from the following list of courses, in consultation with their advisor:
• ELT 501 Advanced English Grammar
• ELT 507 Culture, Society and Language Learning
• ELT 517 Curriculum Design
• ELT 521 Reading and Writing in ESL
• ELT 523 Bilingual Education
• ELT 551 Language Testing and Evaluation
• ELT 617 Quantitative, Qualitative and Action Research in ELT
• ELT 694 Special Topics in ELT

With the approval of the student’s advisor and the student’s head of department, students may choose to take one elective course outside of the list of elective courses. The course must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean for graduate affairs who will inform the Office of the Registrar before course registration.

Students could elect to complete courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

Master’s Thesis
Students must complete their master’s thesis under close supervision of a faculty supervisor on a topic related to some aspect of TESOL.

The master’s thesis must be defended to the satisfaction of the thesis committee, which is composed of TESOL program faculty and one external member. A complete guide for forming the thesis committee and for preparing the master’s thesis is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-

Graduate Studies-Graduate Studies Policies and Procedures.

For the master’s thesis registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Mathematics (MSMTH)
Abdul Salam Jarrah, Head, Department of Mathematics and Statistics

The Master of Science in Mathematics (MSMTH) degree program is offered by the Department of Mathematics and Statistics.

The MSMTH degree program provides students with rigorous and thorough knowledge of a broad range of pure and applied areas of mathematics. It is designed to train students with different professional goals, ranging from employment or career advancement in business, industry or government, to basic training in foundations needed to obtain a research career or pursue a PhD in mathematics or mathematics-related fields.

Program Goals
The program seeks to accomplish the following:
• provide the analytical skills necessary to formulate and solve complex mathematical problems that are of contemporary relevance in the fields of pure and applied mathematics
• develop the mathematical skills and knowledge to facilitate career advancement in education, business or industry, or to pursue more advanced study such as a PhD degree in mathematics or mathematics-related fields
• provide the mathematical skills and knowledge to describe and solve complex quantitative problems that arise in business or industry

Program Outcomes
Upon completion of the program, graduates will be able to:
• apply advanced mathematical analysis to mathematical models
• demonstrate a comprehensive understanding of a broad domain of mathematics from (but not all) areas such as analysis, algebra, geometry and applied mathematics
• formulate and construct proofs
• clearly communicate mathematical concepts
• apply advanced mathematical techniques in their professional activities

• conduct independent research in specialized areas of mathematics
• employ mathematical methods to model and solve practical problems
• formulate problems in mathematical terms arising in related areas such as engineering, finance, and the natural sciences

Admission Requirements
In addition to meeting the university’s general graduate admission requirements, applicants must hold a bachelor’s degree in an area of mathematical science (applied or pure mathematics, actuarial science, statistics, etc.) from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS, or a bachelor’s degree from a related field with a minimum of:
• nine credit hours in calculus
• three credit hours in differential equations
• three credit hours in linear algebra
• three credit hours in abstract algebra
• three credit hours in real analysis

Applicants with a bachelor’s degree from a related field of study, who meet the university’s general graduate admission requirements but who have not completed the prescribed undergraduate courses, are required to complete these remedial courses and will not be eligible to register for degree program courses prior to successful completion of these courses. The undergraduate remedial courses do not generate credit hours towards completion of the degree program graduation requirements. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Waiver Policy
The remedial course could be waived by the MSMTH Admissions Committee depending on the student’s background. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog.

Accelerated Master’s Program—AUS Undergraduate Students
AUS undergraduate degree seeking students interested in pursuing an MSMTH degree may register for a maximum of six credit hours from MSMTH courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSMTH degree program. The master’s level courses may be counted towards meeting the graduation requirements
for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in a science or engineering major, or in the accounting, finance or economics majors
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have a minimum cumulative GPA of 3.50
- have successfully completed MTH 221 (Linear Algebra) and one course from the following subject areas:
  - Differential Equations
  - Abstract Algebra
  - Real Analysis
  - Probability Theory

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSMTH courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

**Degree Requirements**

To qualify for graduation with an MSMTH degree, students must successfully complete all the requirements of the program which consist of a minimum of 30 credit hours in required courses and elective courses, inclusive of a zero-credit seminar and a research thesis, with a minimum cumulative GPA of 3.00.

Students must successfully complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in the catalog.

To be awarded an MSMTH degree, students are required to successfully complete the following:

- 12 credit hours in required course work
- a minimum of 12 credit hours in elective courses
- a zero-credit-hour seminar
- six credit hours in Master’s Thesis

**Required Courses (18 credit hours)**

Students must successfully complete all the required courses for a total of 18 credit hours, including a zero-credit-hour seminar and a six-credit-hour master’s thesis.

- MTH 505 Ordinary Differential Equations
- MTH 511 Real Analysis
- MTH 512 Advanced Linear Algebra
- MTH 532 Abstract Algebra
- MTH 595 Seminar

**Master’s Thesis (6 credit hours)**

- MTH 599 Master’s Thesis

**Elective Courses (minimum of 12 credit hours)**

Students must successfully complete a minimum of four elective courses (for a minimum of 12 credit hours).

Students select their electives from the following list of courses, in consultation with their advisor:

- MTH 500 Mathematical Statistics with Applications
- MTH 506 Partial Differential Equations
- MTH 507 Financial Mathematics I
- MTH 508 Mathematical Biology
- MTH 517 Numerical Methods for Derivative Pricing
- MTH 520 Complex Analysis
- MTH 551 Methods of Applied Mathematics
- MTH 555 Loss and Risk Models
- MTH 560 Topology
- MTH 565 Numerical Analysis
- MTH 570 Optimal Control Theory
- MTH 594 Special Topics in Mathematics
- STA 501 Advanced Data Mining: Theory and Applications
- STA 594 approved special topics in statistics. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

With the approval of the student’s advisor and the student’s head of department, students may choose to take one elective course outside of the list of elective courses. The course must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean for graduate affairs who will inform the Office of the Registrar before course registration.

Students could elect to complete courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

**Master’s Thesis**

A student must prepare and successfully defend a master’s thesis presenting results of independent research performed under the close supervision of a faculty member from the Department of Mathematics and Statistics who will act as the student’s principal advisor. The principal advisor serves as the chair of the thesis examining committee. The committee includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the thesis committee and for preparing the master’s thesis is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For the master’s thesis registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

**Doctor of Philosophy in Materials Science and Engineering (PhD-MSE)**

Ali Alnaser, Coordinator

The PhD in Materials Science and Engineering (PhD-MSE) degree program is an interdisciplinary degree program that draws on the expertise of faculty from the College of Arts and Sciences, the College of Engineering and the College of Architecture, Arts and Design. The PhD-MSE degree program offers advanced education in four focus research areas that are aligned with the UAE Economic Vision 2030:

- Advanced Materials
- Materials for Energy and Environment
- Structures
- Analytical and Computational Modeling.

The PhD-MSE degree program is designed to provide future scholars with the skills and abilities that will allow them to contribute to the advancement of knowledge in the focus research areas of the program.
Mission Statement
The mission of the PhD-MSE degree program is to prepare future researchers and academics equipped with interdisciplinary cutting-edge knowledge and advanced skills that can be utilized in meeting the societal needs and in contributing to promising entrepreneurship in the UAE, the region, and globally.

Program Goals
The PhD-MSE program aims to:

- prepare students to meet the highest challenges of scholarship and become distinguished faculty members
- provide a research-based learning environment that is conducive to acquiring and analyzing data, developing experimental approaches to materials science and engineering, and practicing the proper scientific research methods
- provide students with the latest developments and techniques in the field through a dynamic curriculum that reflects the evolving needs of the region and the world
- prepare students for careers in the government, industry and academia sectors, and train them to lead in creating strategies and developing operations for research and development in corporate organizations as well as in government agencies.

Program Learning Outcomes
Graduates of the PhD-MSE degree program will be prepared to:

- develop advanced knowledge in the core subjects and theories of materials science and engineering
- apply relevant analytical and numerical techniques to model physical phenomena and solve complex problems
- design and conduct experiments, and demonstrate proficiency in data acquisition and analysis using state-of-the-art research techniques
- communicate research outcomes effectively to academic and relevant audiences, both orally and in writing
- carry out original independent research of theoretical and methodological rigor
- uphold standards of ethical academic conduct.

Admission Requirements
In addition to meeting the university’s general requirements for admission to PhD degree programs, applicants to the PhD-MSE degree program are required to have completed a master of science degree or a bachelor of science degree (direct admission) in any of the following fields: materials science, materials engineering, physics, chemistry, mechanical engineering, electrical engineering, chemical engineering or civil engineering. Applicants with a relevant degree but not in materials science or materials engineering could be required to complete bridging courses (for details, refer to Bridging Courses hereafter).

Degree Requirements
To qualify for graduation with a PhD-MSE degree, students admitted with a master’s degree must successfully complete a minimum of 54 credit hours with a minimum cumulative GPA of 3.00, as follows:

- a minimum of 24 credit hours of coursework (8 courses), inclusive of a zero-credit hours seminar (MSE 795)
- a minimum of 30 credit hours of research work (MSE 799)

Direct admission students must successfully complete a minimum of 60 credit hours with a minimum cumulative GPA of 3.00, as follows:

- a minimum of 30 credit hours of coursework (10 courses), inclusive of a zero-credit-hour seminar (MSE 795)
- a minimum of 30 credit hours of research work (MSE 799)

The expected minimum duration for completion of the PhD-MSE degree program for students admitted with a master’s degree is four years. Direct admission students are expected to need a minimum of five years to complete the program. All graduation requirements must be completed within 10 years of admission to AUS as a doctoral student, inclusive of any leave.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Bridging Courses
Applicants with a relevant master’s or bachelor’s degree but not in materials science or materials engineering could be required to complete the following bridging courses:

- MSE 500 Fundamentals of Materials Science and Engineering
- MSE 510 Thermodynamics in Materials Science and Engineering

Direct admission students are required to complete the following additional bridging courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 509 Computational Methods for Engineering

The bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete bridging course are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Waiver Policy
A bridging course may be waived if the student has completed comparable course work at the undergraduate or master’s level. Students may be required to submit course documentation. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog. NGN 500 and NGN 509 cannot be waived based on completion of relevant undergraduate course work.

Required Courses (minimum of 30/33 credit hours)
Students must successfully complete the following required courses:

- MSE 700 Research Methods in Materials Science and Engineering (for direct admission students only)
- MSE 795 Doctoral Seminar
- MSE 799 Dissertation (for a minimum of 30 credit hours)

Elective Courses (minimum of 24/27 credit hours)
Students admitted with a master’s degree must successfully complete a minimum of eight courses (for a minimum of 24 credit hours) selected from the following courses. Direct admission students must successfully complete a minimum of 27 credit hours of elective courses. The choice of courses must be approved by the program coordinator.

- MSE 700 Research Methods in Materials Science and Engineering (for non-direct admission students)
- MSE 705 Diffraction and Crystallography
- MSE 707 Magnetic Materials and Devices
- MSE 708 Electronic Properties of Materials
- MSE 710 Advanced Thermodynamics in Materials Science and Engineering
- MSE 711 Kinetics of Materials
- MSE 718 Materials for Energy Production and Storage
- MSE 720 Advanced Characterization and Analytical Techniques
- MSE 721 Surface Science and Technology
• MSE 730 Advanced Mechanics of Materials
• MSE 731 Plasticity
• MSE 732 Fatigue of Materials and Structures
• MSE 733 Mechanics of Laminated Composite Structures
• MSE 734 Physical Metallurgy
• MSE 740 Computational Methods in Materials Science and Engineering
• MSE 741 Advanced Finite Element Method in Materials Science and Engineering
• MSE 750 Nanomaterials: Science and Applications
• MSE 760 Advanced Corrosion
• MSE 761 Advanced Polymers and Composite Materials
• MSE 794 Special topics in Materials Science and Engineering

Qualifying Examination

To be considered as a candidate for the PhD-MSE degree, a student must pass a written qualifying examination. Registration for the qualifying examination is conditional upon meeting the following requirements:

• the student must be in good academic standing
• the student must have successfully completed a minimum of 12 credit hours of course work.

The qualifying examination may result in a pass or a fail grade. A student who fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the Program Coordinator, one month ahead of the registration of the semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the Program Coordinator who will make a written recommendation to the Associate Dean for Graduate Affairs. The associate dean will then provide a recommendation to the Vice Provost for Research and Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Research and Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once. Students need to seek guidance from the Program Coordinator regarding the qualifying examination requirements and deadlines.

Further details on the qualifying examination are provided in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

PhD Dissertation

The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation.

A PhD-MSE candidate develops his/her dissertation research proposal and completes the dissertation under the direct supervision and guidance of a principal advisor. The principal advisor serves as the chair of the student’s Dissertation Advisory Committee (DAC). The DAC also includes at least two additional faculty members. The student may request the appointment of an external committee member.

A PhD-MSE candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed. PhD candidates are expected to successfully complete the dissertation proposal within three semesters of dissertation first registration. Failure to complete the dissertation proposal within the specified time frame or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation must be publicly defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC is formed by the Program Coordinator in consultation with the DAC chair; it is approved by the Associate Dean for Graduate Affairs and appointed by the Vice Provost for Research and Graduate Studies.

A complete guide for forming the DAC and the FODC, and preparing the dissertation, including the dissertation research proposal, the dissertation defense schedule and deadlines, is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.
College of Engineering

Dean
Fadi Aloul

Associate Dean for Undergraduate Affairs
Assim Sagahyroon

Associate Dean for Graduate Affairs and Research
Lotfi Romdhane

Master of Science in Biomedical Engineering (MSBME)
Sameer Al Asheh, Coordinator

The Master of Science in Biomedical Engineering (MSBME) degree program is an interdisciplinary degree program offered by the College of Engineering that draws on the expertise of faculty from the College of Engineering and the College of Arts and Sciences.

The MSBME degree program will prepare professionals in an environment that combines biomedical engineering practice and technical research to contribute to the growing body of biomedical engineering knowledge, research and development, both regionally and internationally.

Mission Statement
The mission of the MSBME degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to biomedical engineering. The program continuously strives to create a stimulating academic environment that promotes excellence in teaching and research, thereby assisting the students to become competent, innovative and responsible professionals.

Program Educational Objectives
Graduates of the MSBME degree program will be prepared to:

- be successful professionals in a specialized area of biomedical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes
Upon graduation, an AUS MSBME graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of biomedical engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving biomedical engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to biomedical engineering professional and ethical responsibilities

Admission Requirements

In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science in Biomedical Engineering or Chemical Engineering or Computer Engineering or Electrical Engineering or Civil Engineering or Industrial Engineering or Mechanical Engineering, from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Degreed individuals in other engineering fields or a quantitative science field that is closely related to the biomedical engineering field may be considered on a case-by-case basis.

Accelerated Master’s Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSBME degree may register for a maximum of six credit hours from MSBME courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSBME degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in a science or engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSBME courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

To qualify for graduation with an MSBME degree, students must successfully complete a minimum of 30 credit hours consisting of college and program core courses, program elective courses, a seminar and a master’s thesis, with a minimum cumulative grade point average of 3.00.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Students must successfully complete the following requirements:

- three credit hours from the required college core courses
- three credit hours from the required program core course
- a minimum of 15 credit hours in elective courses
- a zero-credit hour seminar including biomedical ethics
- nine credit hours in Master’s Thesis

Required Courses (15 credit hours)

College Core Courses (3 credit hours).

Students must successfully complete one of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes
- NGN 509 Computational Methods for Engineering
- MTH 508 Mathematical Biology

Program Core Course (3 credit hours)

Students must successfully complete the following course:

- BME 511 Human Anatomy and Physiology

In addition, all students must successfully complete a zero-credit seminar course (BME 695).
Master’s Thesis (9 credit hours)
- BME 699 Master’s Thesis

Elective Courses (minimum of 15 credit hours)
Students must successfully complete a minimum of 15 credit hours. Students may select their elective courses from the following list:
- BME 533 Microfluidics and Lab-on-a-Chip Devices
- BME 541 Biomedical Measurements and Devices
- BME 543 Biomedical Imaging Technologies
- BME 544 Neuroengineering
- BME 551 Biofluid Mechanics
- BME 552 Drug Delivery
- BME 561 Healthcare Operations Management
- BME 562 Healthcare Planning and Risk Management
- BME 571 Biomechanics Engineering
- BME 572 Biomaterials Engineering
- BME 581 Biomedical Informatics
- BME 594 Special Topics in Biomedical Engineering
- CHE 611 Biomedical Engineering and Biotechnology
- ELE 544 Advanced Signal Processing
- ELE 648 Pattern Classification

A complete guide for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Chemical Engineering (MSChE)
Sameer Al-Asheh, Head, Department of Chemical and Biological Engineering

The Master of Science in Chemical Engineering (MSChE) degree program is offered by the Department of Chemical and Biological Engineering.

The MSChE degree program will prepare professionals in an environment that combines chemical engineering practice and technical research to contribute to the growing body of chemical engineering knowledge, research and development both regionally and internationally.

Mission Statement
The mission of the MSChE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to chemical engineering. The program is continuously striving to create a stimulating academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative, and responsible professionals.

Program Educational Objectives
Graduates of the MSChE degree program will be prepared to:
- be successful professionals in a specialized area of chemical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes
Upon graduation, an AUS MSChE graduate should demonstrate the ability to:
- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of chemical engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements
In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science in Chemical Engineering from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Degree individuals in other engineering fields or a quantitative science field that is closely related to the chemical engineering field may be considered on a case-by-case basis.

Accelerated Master’s Program—AUS Undergraduate Students
AUS undergraduate degree seeking students interested in pursuing an MSChE degree may register for a maximum of six credit hours from MSChE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSChE degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:
- be enrolled in the chemical engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed all the 300-level major requirements from CHE courses.

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSChE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.
**Degree Requirements**

Students in the MSChE degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSChE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master’s thesis or a professional project, with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSChE degree program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Thesis Option**

Students in the thesis option must successfully complete the following requirements:

- six credit hours of required college core courses
- nine credit hours of required program core courses
- a minimum of six credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master’s Thesis

**Project Option**

Students in the project option must successfully complete the following requirements:

- six credit hours of required college core courses
- nine credit hours of required program core courses
- a minimum of 12 credit hours in elective courses
- a zero-credit hour seminar
- three credit hours in Professional Project

**Required Courses (24/18 credit hours)**

- NGN 500 Advanced Engineering Mathematics
- NGN 509 Computational Methods for Engineering

**Program Core Courses (9 credit hours)**

Students must successfully complete the following courses:

- CHE 510 Transport Phenomena
- CHE 511 Advanced Chemical Engineering Thermodynamics
- CHE 512 Advanced Kinetics and Reactor Design

In addition, all students must successfully complete a seminar course (CHE 695).

**Master’s Thesis/Professional Project (9/3 credit hours)**

- CHE 698 Professional Project (3 credit hours—project option)
- CHE 699 Master’s Thesis (9 credit hours—thesis option)

**Elective Courses (minimum of 6/12 credit hours)**

Students in the thesis option must successfully complete a minimum of six credit hours in elective courses. Students in the project option must successfully complete a minimum of 12 credit hours.

Students may select their elective courses from the following list:

- CHE 594 special topic courses in chemical engineering
- CHE 610 Catalysis and Reaction Engineering
- CHE 611 Biomedical Engineering and Biotechnology
- CHE 613 Advanced Materials Science
- CHE 614 Environmental Engineering
- CHE 615 Particle Technology and Fluidization
- CHE 694 special topic courses in chemical engineering

With the approval of their advisor and the head of department, students in the thesis option may choose to take one graduate-level elective course outside the list of elective courses. Students in the project option may elect to take up to two elective courses. The courses must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students can elect to complete graduate-level courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

**Master’s Thesis/Professional Project**

A student must complete his/her master’s thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master’s thesis/professional project committee and for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

**Master of Science in Civil Engineering (MSCE)**

Sameh El-Sayegh, Head, Department of Civil Engineering

The Master of Science in Civil Engineering (MSCE) degree program is offered by the Department of Civil Engineering.

The MSCE degree program will prepare professionals in an environment that combines civil engineering practice and technical research to contribute to the growing body of civil engineering knowledge, research and development efforts both regionally and internationally.

**Mission Statement**

The mission of the MSCE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to civil engineering. The program strives to create a conducive academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals with effective communication skills.

**Program Educational Objectives**

Graduates of the MSCE degree program will be prepared to:

- be successful professionals in a specialized area of civil engineering
- maintain a desire for research, innovation and lifelong learning
• uphold the responsibilities of the engineering profession

Student Outcomes
Upon graduation, an AUS MSCE graduate should demonstrate the ability to:
• perform research emphasizing creativity, independent learning and scientific methods in a chosen area of civil engineering
• apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
• select and use techniques, skills and modern tools necessary for research or professional practice
• communicate effectively
• recognize the need for, and engage in, lifelong learning
• attend to professional and ethical responsibilities

Admission Requirements
In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science in Civil Engineering from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Degreed individuals in other engineering fields or a quantitative science field that is closely related to the civil engineering field may be considered on a case-by-case basis.

Accelerated Master’s Program—AUS Undergraduate Students
AUS undergraduate degree seeking students interested in pursuing an MSCE degree may register for a maximum of six credit hours from MSCE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSCE degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:
• be enrolled in the civil engineering major
• have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
• have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSCE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements
Students in the MSCE degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSCE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master’s thesis or a professional project with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSCE program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. In addition, many of the civil engineering graduate courses have research components that reinforce the research element in the program.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option
Students in the thesis option must successfully complete the following requirements:
• three credit hours of required college core courses
• a minimum of 18 credit hours in elective courses
• a zero-credit hour seminar
• nine credit hours in Master’s Thesis Project Option
Students in the project option must successfully complete the following requirements:
• three credit hours of required college core courses
• a minimum of 24 credit hours in elective courses
• a zero-credit hour seminar
• three credit hours in Professional Project

Required Courses
(12/6 credit hours)
College Core Courses (3 credit hours)
Students must successfully complete one of the following courses:
• NGN 500 Advanced Engineering Mathematics
• NGN 505 Random Variables and Stochastic Processes
• NGN 509 Computational Methods for Engineering

In addition, all students must successfully complete a seminar course (CVE 695).

Master’s Thesis/Professional Project
(9/3 credit hours)
• CVE 698 Professional Project
(3 credit hours—project option)
• CVE 699 Master’s Thesis
(9 credit hours—thesis option)

Elective Courses
(minimum of 18/24 credit hours)
Students in the thesis option must successfully complete a minimum of 18 credit hours in elective courses. Students in the project option must successfully complete a minimum of 24 credit hours.

Students may select their elective courses from the following list:
• CMT 520 Advanced Construction Scheduling
• CVE 520 Sustainable Construction and Methods
• CVE 521 Finite Element Methods for Solids and Structures
• CVE 522 Advanced Water Resources Engineering
• CVE 524 Design of Strengthened Concrete Structures
• CVE 525 Structural Earthquake Engineering
• CVE 526 Advanced Structural Steel Design
• CVE 527 Optimization Techniques for Civil Engineering Systems
• CVE 531 Dynamics of Machine Foundations
• CVE 551 Wastewater Treatment
• CVE 572 Satellite Remote Sensing
• CVE 594 special topic courses in civil engineering
• CVE 621 Analysis and Design of Tall Buildings
• CVE 622 Physical and Chemical Processes in Water Treatment
• CVE 624 Advanced Geotechnical Engineering
• CVE 625 Highway Bridge Design

American University of Sharjah
Graduate Catalog 2022–2023
52
The Engineering (MSCoE) degree program is offered by the Department of Computer Science and Engineering. The MSCoE degree program prepares professionals in an environment that combines computer engineering practice and technical research to contribute to the growing body of computer engineering knowledge, research, and development both regionally and internationally.

### Mission Statement

The mission of the MSCoE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to computer engineering. The program strives to create a stimulating academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative, and responsible professionals with effective communication skills.

### Program Educational Objectives

Graduates of the MSCoE degree program will be prepared to:

- be successful professionals in a specialized area of computer engineering
- maintain a desire for research, innovation, and lifelong learning
- uphold the responsibilities of the engineering profession

### Student Outcomes

Upon graduation, an AUS MSCoE graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning, and scientific methods in a chosen area of computer engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating, and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

### Admission Requirements

In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science in Computer Engineering from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Degreed individuals in engineering fields or a quantitative science field that is closely related to the computer engineering field may be considered on a case-by-case basis.

### Accelerated Master’s Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSCoE degree may register for a maximum of six credit hours from MSCoE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSCoE degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the computer engineering or computer science major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSCoE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

### Degree Requirements

Students in the MSCoE degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSCoE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master’s thesis or a professional project with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSCoE degree program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. In addition, many of the computer engineering courses have research components that reinforce the research element in the program.

Students must complete the degree requirements within five years from the...
time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Thesis Option**

Students in the thesis option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 18 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master’s Thesis

**Project Option**

Students in the project option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 24 credit hours in elective courses
- a zero-credit hour seminar
- three credit hours in Professional Project

**Required Courses (12/6 credit hours)**

**College Core Courses (3 credit hours)**

Students must successfully complete one of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes
- NGN 509 Computational Methods for Engineering

In addition, all students must successfully complete a seminar course (COE 695).

**Master's Thesis/Professional Project (9/3 credit hours)**

- COE 698 Professional Project (3 credit hours—project option)
- COE 699 Master’s Thesis (9 credit hours—thesis option)

**Elective Courses (minimum of 18/24 credit hours)**

Students in the thesis option must successfully complete a minimum of 18 credit hours in elective courses. Students in the project option must successfully complete a minimum of 24 credit hours.

Students may select their elective courses from the following list:

- BME 543 Biomedical Imaging Technologies
- BME 581 Biomedical Informatics
- COE 505 Cloud Computing Infrastructure
- COE 530 Advanced Computer Networks
- COE 533 Advanced Computer Architecture
- COE 555 Cyber Security
- COE 570 Big Data and Analytics
- COE 594 special topic courses in computer engineering
- COE 632 Advanced Database Systems
- COE 633 Advanced Internet Computing and Internet of Things
- COE 635 Optical Networks
- COE 636 Advanced Multicore and GPU Computing
- COE 637 Advanced Machine Learning and Data Mining
- COE 639 Digital Video Compression
- COE 694 special topic courses in computer engineering

With the approval of their advisor and the head of department, students may choose to take up to two graduate-level elective courses outside of the list of elective courses. The courses must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students can elect to complete graduate-level courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

**Master’s Thesis /Professional Project**

A student must complete his/her master’s thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master’s thesis/professional project committee and for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn—Community—Graduate Studies—Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

**Master of Science in Construction Management (MSCM)**

Sameh El-Sayegh, Coordinator

The Master of Science in Construction Management (MSCM) degree program is a multidisciplinary degree program offered by the College of Engineering (CEN) that draws on the expertise of faculty from several departments across CEN and other colleges/schools. The MSCM degree program attracts students from several disciplines including engineering, architecture and construction.

The MSCM degree program is primarily intended for professionals interested in advancing their knowledge and pursuing a career to face contemporary challenges in the construction industry.

**Mission Statement**

The mission of the MSCM degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to construction management. The program strives to create a stimulating and supportive academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals with effective communication skills.

**Program Educational Objectives**

Graduates of the MSCM degree program will be prepared to:

- be successful professionals in a specialized area of construction management
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the construction profession

**Student Outcomes**

Upon graduation, an AUS MSCM graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of construction management
- apply knowledge in solving problems, making decisions and managing risks
• select and use techniques, skills and modern tools necessary for research or professional practice
• communicate effectively
• recognize the need for, and engage in, lifelong learning
• attend to professional and ethical responsibilities

Admission Requirements
In addition to meeting the university’s general graduate admission requirements, applicants must hold a bachelor’s degree in engineering, architecture or construction from an independently accredited university recognized by UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Individuals degree in other fields that are closely related to the construction management field may be considered on a case-by-case basis. Students from disciplines other than civil engineering or construction may be required to complete bridging course(s) at the discretion of the program admission committee and the program coordinator.

Accelerated Master’s Program—AUS Undergraduate Students
AUS undergraduate degree seeking students interested in pursuing an MSCM degree may register for a maximum of six credit hours from MSCM courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSCM degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

• be enrolled in the civil engineering, architecture, interior design or design management major
• have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
• have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSCM courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements
Students in the MSCM degree program must choose from three options: the thesis option, the project option and the course option.

To qualify for graduation with an MSCM degree, students must successfully complete a minimum of 30 credit hours consisting of required core courses, elective core courses, general elective courses, and a master’s thesis or a professional project (for students in the thesis and project options only) with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSCM program will receive good exposure to the research environment, many of the construction management graduate courses have research components that reinforce the research element in the program.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option
Students in the thesis option must successfully complete the following requirements:

• nine credit hours of required program core courses
• a minimum of 12 credit hours in program and/or general elective courses as follows:
  - a minimum of six credit hours in program elective courses
  - a minimum of six credit hours in general elective courses
• nine credit hours in Master’s Thesis

Project Option
Students in the project option must successfully complete the following requirements:

• nine credit hours of required program core courses
• a minimum of 18 credit hours in program and/or general elective courses as follows:
  - a minimum of nine credit hours in program elective courses
  - a maximum of nine credit hours in general elective courses
• three credit hours in Professional Project

Course Option
Students in the course option must successfully complete the following requirements:

• nine credit hours of required program core courses
• a minimum of 21 credit hours in program and/or general elective courses as follows:
  - a minimum of nine credit hours in program elective courses
  - a maximum of 12 credit hours in general elective courses

Required Courses
(18/12/9 credit hours)

Program Core Courses (9 credit hours).

Students must successfully complete the following courses:

• CMT 500 Management of Construction Projects
• CMT 510 Construction Automation
• CMT 520 Advanced Construction Scheduling

Master’s Thesis/Professional Project (9/3 credit hours).

This requirement applies to students in the thesis and project options:

• CMT 698 Professional Project (3 credit hours—project option)
• CMT 699 Master’s Thesis (9 credit hours—thesis option)

Elective Courses
(minimum of 12/18/21 credit hours)

Program Elective Courses (minimum of 6/9/9 credit hours)

Students in the thesis option must successfully complete a minimum of 6 credit hours in program elective courses. Students in the project option must successfully complete a minimum of 9 credit hours in program elective courses. Students in the course option must successfully complete a minimum of 9 credit hours in program elective courses.

Students may select their program elective courses from the following list:

• CMT 600 Cost Analysis and Control
• CMT 610 Building Information modeling
• CMT 620 Construction Project Risk Management
• CMT 630 Construction Contracting
• CMT 640 International Construction
• CMT 650 Sustainable Infrastructure Management
• CMT 660 Sustainable Development and Construction
The committee also includes two members of the student’s examining committee. The student is responsible for choosing a principal advisor to supervise the project or thesis. This advisor must be an AUS faculty member, and the student must consult with the student’s advisor prior to selecting a principal advisor. This advisor serves as the chair of the student’s examining committee.

Students in the thesis option can successfully complete a maximum of six credit hours in general elective courses. Students in the project option can successfully complete a maximum of nine credit hours of general elective courses. Students in the course option can successfully complete a maximum of twelve credit hours of general elective courses.

Students may select their general elective courses from the following list:

- COE 570 Big Data and Analytics
- CVE 520 Sustainable Construction and Methods
- CVE 572 Satellite Remote Sensing
- CVE 594-09 Sustainable Mobility
- ESM 520 Management for Engineers
- ESM 660 Legal Aspects of Engineering
- UPL 651 Negotiation Strategies

With the approval of their advisor and the program coordinator, students may choose to take up to two graduate-level elective courses outside of the list of elective courses. The courses must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s academic advisor.

Students who are accepted to the AMP are required to complete graduate-level courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

Master’s Thesis/Professional Project

A student must complete his/her master’s thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master’s thesis/professional project committee and for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Electrical Engineering (MSEE)

Mostafa Shaaban, Interim Head, Department of Electrical Engineering

The Master of Science in Electrical Engineering (MSEE) degree program is offered by the Department of Electrical Engineering. The MSEE degree program will prepare professionals in an environment that combines electrical engineering practice and technical research to contribute to the growing body of electrical engineering knowledge, research and development both regionally and internationally.

Mission Statement

The mission of the MSEE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to electrical engineering. The program is continuously striving to create a stimulating academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals.

Program Educational Objectives

Graduates of the MSEE degree program will be prepared to:

- be successful professionals in a specialized area of electrical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSEE graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of electrical engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science in Electrical Engineering from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS. Degreed individuals in engineering fields or a quantitative science field that is closely related to the electrical engineering field may be considered on a case-by-case basis.

Accelerated Master’s Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSEE degree may register for a maximum of six credit hours from MSEE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSEE degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the electrical engineering or computer engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to the Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSEE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSEE degree program must choose from three options: the thesis option, the project option and the course option.
To qualify for graduation with an MSEE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master's thesis or a professional project (for students in the thesis and project options only) with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSEE degree program will receive good exposure to the research environment, all students will be required to complete research-oriented class projects within many of the electrical engineering graduate courses.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Thesis Option**

Students in the thesis option must successfully complete the following requirements:

- six credit hours of required college core courses
- a minimum of 15 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master’s Thesis

**Project Option**

Students in the project option must successfully complete the following requirements:

- six credit hours of required college core courses
- a minimum of 21 credit hours in elective courses
- a zero-credit hour seminar
- three credit hours in Professional Project

**Course Option**

Students in the course option must successfully complete the following requirements:

- six credit hours of required college core courses
- a minimum of 24 credit hours in elective courses
- a zero-credit hour seminar

**Required Courses (15/9 credit hours)**

- **College Core Courses (6 credit hours)**
  - Students must successfully complete two of the following courses:
    - NGN 500 Advanced Engineering Mathematics
    - NGN 505 Random Variables and Stochastic Processes
    - NGN 509 Computational Methods for Engineering
  - In addition, all students must successfully complete a seminar course (ELE 695).

- **Master’s Thesis/Professional Project (9/3 credit hours)**
  - This requirement applies to students in the thesis and project options:
    - ELE 698 Professional Project (3 credit hours — project option)
    - ELE 699 Master’s Thesis (9 credit hours — thesis option)

**Elective Courses (minimum of 15/21/24 credit hours)**

- Students in the thesis option must successfully complete a minimum of 15 credit hours in elective courses. Students in the project option must successfully complete a minimum of 21 credit hours. Students in the course option must successfully complete a minimum of 24 credit hours in elective courses.
- Students may select elective courses from the following list:
  - ELE 540 Principles of Digital Communications
  - ELE 542 Applied Electromagnetics
  - ELE 543 Analog Integrated Circuits Design
  - ELE 544 Advanced Signal Processing
  - ELE 545 Power System Operation and Control
  - ELE 546 Advanced Power Electronics
  - ELE 547 Distributed Energy Resources in Smart Grids
  - ELE 548 Photovoltaic Energy Systems
  - ELE 549 Optimization in Electrical Engineering
  - ELE 594 special topic courses in electrical engineering
  - ELE 641 Advanced Microwave Engineering
  - ELE 644 Dynamics and Control of Electrical Drives
  - ELE 645 High Voltage Engineering
  - ELE 646 Radio Frequency Integrated Circuits
  - ELE 647 Digital Protection of Power Systems
  - ELE 648 Pattern Classification
  - ELE 649 Power System Transients
  - ELE 650 Deep Learning
  - ELE 660 RF Power Amplifiers for Wireless and Satellite Communications
  - ELE 694 special topic courses in electrical engineering
  - MTR 540 Advanced Control Systems

With the approval of their advisor and the head of department, students in the thesis and project options may choose to take one graduate-level elective course outside the list of elective courses. Students in the course option may elect to take up to two elective courses. The courses must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students can elect to complete graduate-level courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

**Master’s Thesis/Professional Project**

A student must complete his/her master’s thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master’s thesis/professional project committee and for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.
Master of Science in Engineering Systems Management (MSESM)
Abdulrahim Shamayleh, Head, Department of Industrial Engineering

The Master of Science in Engineering Systems Management (MSESM) degree program is offered by the Department of Industrial Engineering (INE).

The mission of the MSESM degree program is to considerably increase the opportunities for practicing engineers to be successful in their efforts to build effective teams, lead and manage major engineering projects, and expand economic development for the private and public sectors of the UAE and the Gulf region countries.

The curriculum provides core courses followed by courses in the theme areas of engineering management (EM) and project management (PM) with quality standards similar to those established in comparable North American institutions. The program offers a multidisciplinary curriculum designed to integrate management skills with technical knowledge from different engineering disciplines for the purpose of accomplishing work activities and entire projects more economically and productively. The program provides students from engineering and related disciplines with the knowledge and skills needed to plan, design, analyze and improve integrated systems of people, material, technology and information. It also aims to contribute to the related world body of knowledge and advance research and development efforts in the region.

Program Educational Objectives
Graduates of the MSESM degree program will be prepared to:

- develop creative and effective engineered solutions that require engineering systems management skills to meet organizations’ needs in product, service and project-based industries
- succeed in a wide range of different organizations, positions and complex projects and adapt to various work environments
- lead the change management process to meet organizational goals and objectives
- seek continual professional development and lifelong learning in a dynamic, global professional environment
- act professionally and ethically in the practice of engineering systems management

Student Outcomes
Upon graduation, an AUS MSESM graduate should demonstrate the ability to:

- apply the techniques, tools and skills of engineering systems management to address real-world problems
- conduct economic and financial analysis of projects and engineering operations
- function as effective members of multidisciplinary teams and communicate effectively in both written and verbal forms
- recognize professional and ethical responsibilities and act accordingly within a global and social context
- engage in theoretical and applied research projects

Admission Requirements
In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science degree in engineering from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS.

Applicants with non-engineering degrees may be considered for conditional admission on a case-by-case basis. Preference will be given to applicants with relevant work experience. The following criteria must be met:

- The applicant should demonstrate that he/she has gained technical skills by working in an engineering/manufacturing/construction/petroleum/power utility organization for at least five years.
- The applicant should have held managerial positions in technical-oriented departments/divisions such as manufacturing/production/inventory/maintenance/quality/warehousing/scheduling/procurement.
- The applicant should demonstrate that he/she has been involved in technical-oriented projects.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in major offered by the College of Engineering
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSESM courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Blended Learning Mode of Delivery
The ESM degree program delivers several of its required and elective courses in a blended learning mode combining face-to-face teaching with online learning. These courses can be identified in the degree requirements section hereafter. Details about the delivery of the weekly sessions are provided in the course syllabi available from the department. Course assessments for courses delivered in blended learning mode are conducted in the same way as for courses delivered using the face-to-face mode.

To facilitate the effective use of the available learning tools, including the Learning Management System (iLearn) and online learning software, students are offered training sessions at the beginning of each semester. Furthermore, frequently asked questions related to e-learning tools are accessible to students and can be consulted at https://itfaq.aus.edu/.

Degree Requirements
To qualify for graduation with an MSESM degree, students must successfully complete a minimum of 30 credit hours consisting of core courses, theme courses and a master’s thesis, with a minimum cumulative grade point average of 3.00.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Students must successfully complete the following requirements:
• 15 credit hours in core courses
• nine credit hours in theme courses
• six credit hours in Master’s Thesis

Required Courses
(21 credit hours)

Students must successfully complete a total of 21 credit hours in required courses consisting of 15 credit hours of core courses and a six-credit-hour master’s thesis.

Core Courses (15 credit hours)
• ESM 520 Management for Engineers (blended learning mode)
• ESM 535 Introduction to Management Science
• ESM 570 Project Management (blended learning mode)
• ESM 575 Advanced Engineering Economy (blended learning mode)
• ESM 600 Research Methodology (blended learning mode)

Master’s Thesis (6 credit hours)
• ESM 699 Master’s Thesis

Elective Courses
(minimum of 9 credit hours)

Students must successfully complete a minimum of nine credit hours in elective courses. A minimum of six credit hours must be successfully completed in courses taken from the list of elective courses of the student’s declared theme and a maximum of three credit hours can be completed in courses outside the student’s designated theme elective courses.

Elective courses from outside the student’s theme must be approved by the student’s advisor and the student’s head of department. The courses must provide knowledge and skills that contribute to the student’s theme learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students can elect to complete graduate-level courses outside of the list of elective courses of the student’s declared theme that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

Engineering Management Theme
• ESM 615 Big Data and Business Analytics
• ESM 625 Enterprise Resource Planning Systems (blended learning mode)
• ESM 630 Quality Engineering and Management

• ESM 636 Human Resources Management for Engineers
• ESM 638 Decision Analysis
• ESM 640 Supply Chain Management
• ESM 644 Financial Management for Engineers
• ESM 694 special topic courses in ESM

Project Management Theme
• ESM 630 Quality Engineering and Management
• ESM 636 Human Resources Management for Engineers
• ESM 638 Decision Analysis
• ESM 660 Legal Aspects of Engineering
• ESM 670 Project Risk Management
• ESM 675 Project Procurement Management
• ESM 694 special topic courses in ESM

Master’s Thesis

To be eligible for master’s thesis registration, a student must have completed a minimum of 12 credits of course work and must be approved for master’s thesis registration by the head of department. Normally, a minimum cumulative GPA of 3.50 after 12 credit hours of course work is required.

A student must complete his/her master’s thesis under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master’s thesis committee and for preparing the master’s thesis is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Mechanical Engineering (MSME)

Mamoun Abdel-Hafez, Head, Department of Mechanical Engineering

The Master of Science in Mechanical Engineering (MSME) degree program is offered by the Department of Mechanical Engineering.

The MSME degree program prepares mechanical engineering and associated professionals in an environment that combines mechanical engineering practice and technical research to contribute to the growing body of mechanical engineering knowledge, research and development both regionally and internationally.

Mission Statement

The mission of the MSME degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to mechanical engineering. The program is continuously striving to create a stimulating proactive learning environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative, and responsible professionals.

Program Educational Objectives

Graduates of the MSME degree program will be prepared to:
• be successful professionals in a specialized area of mechanical engineering
• maintain a desire for research, innovation and lifelong learning
• uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSME graduate should demonstrate the ability to:
• perform research emphasizing creativity, independent learning and scientific methods in a chosen area of mechanical engineering
• apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
• select and use techniques, skills and modern tools necessary for research or professional practice
• communicate effectively
• recognize the need for, and engage in, lifelong learning
• attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university’s general graduate admission requirements, applicants must hold a Bachelor of Science in Mechanical Engineering from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS.
Degreed individuals in engineering fields or a quantitative science field that is closely related to the mechanical engineering field may be considered on a case-by-case basis.

Accelerated Master’s Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSME degree may register for a maximum of six credit hours from MSME courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSME degree program. The master’s level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the mechanical engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed all the 300-level major requirements from MCE courses.

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSME courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSME degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSME degree, students must successfully complete a minimum of 30 credit hours consisting of college core courses, program elective courses, a seminar, and a master’s thesis or a professional project with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSME degree program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. In addition, all students will be required to complete research-oriented class projects within many of the mechanical engineering graduate courses.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 18 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master’s Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 24 credit hours in elective courses
- a zero-credit-hour seminar
- three credit hours in Professional Project

Required Courses (12/6 credit hours)

College Core Courses (3 credit hours)

Students must successfully complete one of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes

In addition, all students must successfully complete a seminar course (MCE 695).

Master’s Thesis/Professional Project (9/3 credit hours)

- MCE 698 Professional Project (3 credit hours—project option)
- MCE 699 Master’s Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 18/24 credit hours)

Students in the thesis option must successfully complete a minimum of 18 credit hours in elective courses.

Students in the project option must successfully complete a minimum of 24 credit hours.

Students may select their elective courses from the following list:

- BME 533 Microfluidics and Lab-on-a-Chip Devices
- MCE 540 Advanced Dynamics
- MCE 550 Mechanical Systems Design
- MCE 551 Advanced Materials Science and Engineering
- MCE 552 Modeling and Simulation of Mechanical Systems
- MCE 553 Advanced Thermodynamics
- MCE 554 Advanced Fluid Dynamics
- MCE 562 Modeling and Simulation in MEMS
- MCE 594 special topic courses in mechanical engineering
- MCE 652 Advanced Topics in Manufacturing
- MCE 653 HVAC Systems Design
- MCE 656 Advanced Fuel Cell Systems
- MCE 694 special topic courses in mechanical engineering
- MTR 540 Advanced Control Systems

With the approval of their advisor and the head of department, students may choose to take one graduate-level elective course outside the list of elective courses. The course must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students can elect to complete graduate-level courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s head of department are required.

Master’s Thesis/Professional Project

A student must complete his/her master’s thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master’s thesis/professional project committee and for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the
following path: iLearn-Community-
Graduate Studies-Graduate Studies
Programs and Procedures.

For registration details, please refer to
Master’s Thesis, Professional Project
and Dissertation under Academic
Policies and Regulations section of this
catalog.

**Master of Science in
Mechatronics Engineering
(MSMTR)**

Mamoun Abdel-Hafez, Coordinator

The Master of Science in Mechatronics
Engineering (MSMTR) degree program
is an interdisciplinary degree program
offered by the College of Engineering
(CEN) that draws on the expertise of
faculty from the different CEN
departments.

The MSMTR degree program is
committed to being an international,
multidisciplinary center of excellence in
synergistic applications of the latest
techniques in embedded systems,
precision mechanical engineering,
control theory, computer science and
electronics through education, research
and outreach. The technological gap
between developing and industrialized
nations continues to widen at an
alarming rate, largely due to the lack of
skilled engineers capable of integrating
new technologies into existing systems
and networks. The mandate of the
mechatronics engineering program is to
improve this situation by equipping
engineers with the design, analysis and
synthesis abilities to plan, implement
and manage the latest technologies.

The curriculum of the mechatronics
program meets the region’s needs—
both present and future—through the
education of engineers and scientists.

Professional jobs considered to be in
the mechatronics engineering field are
grounded in the multidisciplinary
aspects of electrical, mechanical,
control, computer and software
engineering. The unique skills of
mechatronics graduates are becoming
increasingly valuable to employers in a
variety of areas, including modern
industrial installations and systems,
computer integrated manufacturing
systems, maintenance diagnosis and
troubleshooting, defense systems,
vehicle design and manufacturing,
robotics and many more.

The MSMTR degree program provides
students with state-of-the-art
knowledge in their areas of
specialization with practical strategies
for adapting that knowledge to serve
the specific needs of the region.

Multidisciplinary engineers are needed
now more than ever to meet the
demand for a flexible engineering

workforce to deal with highly integrated
engineering systems.

**Mission Statement**

The MSMTR degree program at AUS is
an interdisciplinary program that
synergistically integrates advances in
science and technology to prepare
students for advanced research and
applied systems engineering practices.
The program hosts a research
laboratory equipped with world-class
resources enabling hands-on teaching
and advanced research, promoting
entrepreneurial initiatives to assist
students in becoming competent,
innovative and responsible
professionals.

**Program Educational Objectives**

Graduates of the MSMTR degree
program will be prepared to:

- lead multidisciplinary projects, which
  apply the latest techniques for the
  design and development of smart
  systems
- provide employers with
  interdisciplinary skills necessary to
  utilize cutting-edge technology tools
  in the design, development, and
  implementation of modern
  engineering systems
- develop new technologies in the areas
  of cyber physical systems, and smart
  cities
- apply Mechatronics principles in the
  broad context of engineering system
  design and address the aspect of
  commercialization
- address open-ended problems and
  maintain an attitude of self-learning

**Student Outcomes**

Upon graduation, an AUS MSMTR
graduate should demonstrate the ability
to:

- apply advanced engineering tools
  necessary to identify, model and
  analyze mechatronics engineering
  problems
- formulate and propose alternative
  solutions that satisfy specific
  performance requirements of a
  mechatronics system
- design and implement a mechatronics
  component, process or system and
  assess its performance
- function effectively in multidisciplinary
  teams in a leadership role or as an
  active member
- act professionally and ethically
- recognize contemporary issues and
  their influence on technology
  advancement in a global and societal
  context
- engage in lifelong learning in
  engineering and related professional
  areas
- conduct research and development
  activities in mechatronics and related
  areas
- communicate effectively through
technical presentations and
documentations

**Admission Requirements**

In addition to meeting the university’s
general graduate admission
requirements, applicants must hold a
bachelor of science degree in
engineering from an independently
accredited university recognized by the
UAE Ministry of Education’s Higher
Education Affairs Division and by AUS.
Degreed individuals in fields closely
related to engineering or a quantitative
science may be considered on a case-
by-case basis.

**Accelerated Master’s Program—
AUS Undergraduate Students**

AUS undergraduate degree seeking
students interested in pursuing an
MSMTR degree may register for a
maximum of six credit hours from
MSMTR courses while completing their
undergraduate degree program by
seeking acceptance to the Accelerated
Master’s Program (AMP) of the MSMTR
degree program. The master’s level
courses may be counted towards
meeting the graduation requirements
for both the bachelor’s and master’s
degrees.

To qualify for acceptance to the AMP,
students must satisfy the following
requirements at AMP application time:

- be enrolled in the computer
  engineering, electrical engineering or
  mechanical engineering major
- have achieved a minimum of 90 credit
  hours (excluding credit hours earned in
  Achievement Academy/Bridge Program
courses and preparatory courses)
- have achieved a minimum cumulative
  GPA of 3.50
- have successfully completed a course
  in control systems.

For further details on the AMP, refer to
Accelerated Master’s Program in the
Academic Policies and Regulations
section of the AUS Undergraduate
Catalog. For the list of MSMTR courses
available to AMP students, consult the
Course Descriptions section of this
catalog. Course prerequisites and
background requirements must be met.

**Degree Requirements**

The program of study of the MSMTR
degree program consists of a minimum
of 30 credit hours with two options: the thesis option and the course option. Students must declare the option of their choice by submitting a formal study plan upon completion of 12 credit hours of approved MTR graduate courses.

To qualify for graduation with an MSMTR degree, students must successfully complete the requirements detailed hereafter with a minimum cumulative grade point average of 3.00.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Thesis Option**

Students in the thesis option must successfully complete a minimum of 30 credit hours, as follows:

- 15 credit hours in core courses
- a minimum of six credit hours in elective courses
- nine credit hours in Master’s Thesis

**Course Option**

Students in the course option must successfully complete a minimum of 30 credit hours, as follows:

- 15 credit hours in core courses
- a minimum of 15 credit hours in elective courses

**Prerequisite Discipline-Bridging Course**

Students admitted to the MSMTR degree program, with the exception of students with a Bachelor of Science in Mechatronics Engineering, are required to complete the prerequisite discipline-bridging course MTR 501 Introduction to Mechatronics.

The prerequisite discipline-bridging course does not generate credit hours towards completion of the degree program graduation requirements. Students required to complete the bridging course are normally not eligible to register for degree program courses prior to successful completion of the course. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

The prerequisite-discipline course could be waived by the Mechatronics Engineering Admissions Committee, depending on the student’s background.

**Waiver Policy**

The prerequisite discipline-bridging course may be waived if the student has completed comparable course work at the undergraduate or graduate level. Students may be required to submit course documentation. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog.

**Required Courses (24/15 credit hours)**

- MTR 520 Embedded Systems for Mechatronics
- MTR 540 Advanced Control Systems
- MTR 550 Robotic Systems
- MTR 615 Artificial Intelligent Systems for Mechatronics
- MTR 690 Mechatronics Design
- MTR 695 Mechatronics Seminar
- Master’s Thesis (9 credit hours)
- MCE 699 Master’s Thesis (thesis option)

**Elective Courses (minimum of 6/15 credit hours)**

Students in the thesis option must successfully complete a minimum of six credit hours in elective courses. Students in the course option must successfully complete a minimum of 15 credit hours in elective courses.

Students may select their elective courses from the following list:

- ELE 544 Advanced Signal Processing
- ELE 648 Pattern Classification
- MCE 562 Modeling and Simulation in MEMS
- MTR 610 Automated Manufacturing Systems
- MTR 644 Electric Drives for Mechatronics Systems
- MTR 650 Applied Linear Estimation
- MTR 670 Adaptive Control Systems
- MTR 694 special topic courses in mechatronics engineering
- NGN 500 Advanced Engineering Mathematics

With the approval of their advisor and the program coordinator, students may choose to take one graduate-level elective course outside the list of elective courses. The course must provide knowledge and skills that contribute to the program learning outcomes. The request must be approved by the student’s associate dean who will inform the Office of the Registrar before course registration.

Students can elect to complete graduate-level courses outside of the list of elective courses that do not meet the above conditions; such courses will not meet any of the degree program graduation requirements. Approvals of the student’s advisor and the student’s program coordinator are required.

**Master’s Thesis**

Students in the thesis option must complete a program of research culminating in a master’s thesis, for at least nine credits, that contributes to a selected area of knowledge.

A student must complete his/her master’s thesis under direct supervision and guidance of a principal advisor. This principal advisor will serve as the chair of the student’s examining committee and is appointed no later than the end of the third semester of study in the program. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one or more co-advisor.

The master’s thesis must be defended to the satisfaction of the thesis examining committee.

A complete guide for forming the master’s thesis/professional project committee and for preparing the master’s thesis, including the thesis proposal, thesis defense and deadlines, is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under Academic Policies and Regulations section of this catalog.

**Doctor of Philosophy in Engineering–Engineering Systems Management (PhD–ESM)**

Abdulrahim Shamayleh, Head, Department of Industrial Engineering
Akmal Abdelfatah, Coordinator

The PhD in Engineering-Engineering Systems Management (PhD-ESM) degree program is an interdisciplinary degree program offered by the Department of Industrial Engineering (INE) that draws on the expertise of faculty from several departments across CENG and other colleges/schools.
The PhD-ESM degree program addresses fundamental research problems of national and global importance for the 21st century centered on four concentration areas:

- supply chain management
- sustainable construction project management
- smart cities management
- engineering management

**Program Mission Statement**

The mission of the PhD-ESM degree program is to educate future researchers, practitioners, innovators and academics with cutting-edge knowledge, skills and abilities in engineering systems management that can be utilized in meeting societal needs and shaping contemporary market trends in the UAE, the region and globally.

**Program Educational Objectives**

Graduates of the PhD-ESM degree program will be prepared to:

- pursue successful academic, industry and/or government careers
- conduct research independently in multidisciplinary areas
- apply technical knowledge for long-term sustainable and economic development
- act professionally and ethically when practicing the principles of engineering systems management.

**Student Outcomes**

Upon graduation, an AUS PhD-ESM graduate should demonstrate the ability to:

- perform advanced research related to ESM areas
- assess economic, environmental and societal impacts of engineering management systems
- formulate and solve complex technical problems using ESM tools and techniques
- manage highly complex ethical issues related to engineering systems management
- use advanced written and oral communications skills to present research outcomes and evaluate scholarly publications for diverse audiences.

**Admission Requirements**

In addition to meeting the university’s general requirements for admission to PhD degree programs, applicants to the PhD-ESM degree program must meet the following program admission requirements:

- Applicants must have completed a relevant master of science or master of engineering degree. Applicants with non-engineering master’s degrees may be considered on a case-by-case basis.
- Applicants must submit an official Graduate Record Examination (GRE) score.

**Degree Requirements**

To qualify for graduation with a PhD-ESM degree, students must successfully complete a minimum of 54 credit hours with a minimum cumulative GPA of 3.00, as follows:

- a minimum of 24 credit hours (eight courses) of required and elective coursework:
  - a minimum of six credit hours (two courses) of required courses
  - a minimum of 18 credit hours (six courses) of elective courses
  - a zero-credit hour seminar
- a minimum of 30 credit hours of research work (Dissertation)

The expected minimum duration for completion of the PhD-ESM degree program is four years. All graduation requirements must be completed within 10 years of admission to AUS as a doctoral student, inclusive of any leave.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Required Courses (minimum of 36 credit hours)**

Students must successfully complete the following required courses:

- ESM 701 Research Methods
- ESM 702 Multivariate Data Analysis
- ESM 795 Doctoral Seminar
- ESM 799 Dissertation (for a minimum of 30 credits)

**Elective Courses (minimum of 18 credit hours)**

Students must successfully complete a minimum of six elective courses (for a minimum of 18 credit hours) selected from the following research areas. The elective courses must be approved by the program coordinator.

**Supply Chain Management Research Area**

- ESM 710 Advanced Decision Making Analysis
- ESM 711 Deterministic Optimization Techniques
- ESM 712 Advanced Supply Chain Management

**Sustainable Construction Project Management Research Area**

- ESM 713 Supply Chain Modeling
- ESM 714 Modeling and Analysis of Logistics Systems
- ESM 794 Special Topics in ESM—Supply Chain Management

**Smart Cities Research Area**

- ESM 720 Sustainable Development for Engineers
- ESM 721 Sustainable Development and Global Competitiveness
- ESM 722 Sustainable Analytics and Resource Management
- ESM 723 The Living Building
- ESM 724 Sustainable Ecosystems
- ESM 725 Programs and Portfolio Management
- ESM 794 Special Topics in ESM—Sustainable Construction Project Management

**Engineering Management Research Area**

- ESM 710 Advanced Decision Making Analysis
- ESM 740 Advanced Quality Engineering
- ESM 741 Organizational Performance Management
- ESM 742 Strategic Human Resources Management
- ESM 743 Strategic Management
- ESM 794 Special Topics in ESM—Engineering Management

**Qualifying Examination**

To be considered as a candidate for the PhD-ESM degree, a student must pass a written and an oral qualifying examination. Registration for the qualifying examination is conditional upon meeting the following requirements:

- The student must be in good academic standing.
- The student must have successfully completed a minimum of 12 credit hours of course work, including ESM 701 and ESM 702.

The qualifying examination may result in a pass or a fail grade. A student who...
fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the program coordinator, one month ahead of the registration of the semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the program coordinator who will make a written recommendation to the Associate Dean for Graduate Affairs and Research. The associate dean will then provide a recommendation to the Vice Provost for Research and Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Research and Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once.

Students need to seek guidance from the program coordinator regarding the qualifying examination requirements and deadlines.

Further details on the qualifying examination are provided in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

PhD Dissertation

The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation.

A PhD-ESM candidate develops his/her dissertation research proposal and completes the dissertation under the direct supervision and guidance of a principal advisor. The principal advisor serves as the chair of the student's Dissertation Advisory Committee (DAC). The DAC also includes at least two additional faculty members. The student may request the appointment of an external committee member.

A PhD-ESM candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed. PhD candidates are expected to successfully complete the dissertation proposal within three semesters of first registering for the dissertation. Failure to complete the dissertation proposal within the specified time frame or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation must be publicly defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC is formed by the program coordinator in consultation with the DAC chair; it is approved by the Associate Dean for Graduate Affairs and Research and appointed by the Vice Provost for Research and Graduate Studies.

A complete guide for forming the DAC and the FODC, and preparing the dissertation, including the dissertation research proposal, the dissertation defense schedule and deadlines, is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.
School of Business Administration

Dean
Narjess Boubakri

Associate Dean for Undergraduate Programs
Mohsen Saad

Associate Dean for Graduate Programs
Taisier Zoubi

Master of Business Administration (MBA)
Taisier Zoubi, Coordinator

The Master of Business Administration (MBA) degree program is an interdisciplinary program offered by the School of Business Administration (SBA) that draws on the expertise of faculty from all the SBA departments.

The MBA degree program prepares students for leadership positions in the private and public sectors.

The MBA is designed to help managers in the MENA region think and act globally by integrating the latest business knowledge into problem solving. The program provides advanced management education in an environment that encourages students to extend their leadership capabilities.

Our high-quality curriculum, taught in the evening, requires a total 33 credit hours. The MBA degree program comprises seven core courses that cover the principles of analysis and leadership skills expected of an executive manager, two elective courses and a professional research project.

More details on the program are available at www.aus.edu/mba.

Program Goals
The MBA degree program prepares graduate students to demonstrate:

- proficiency in the core business knowledge required of an executive manager
- understanding of the interrelations between business organizations and other societal institutions
- teamwork, interpersonal, communication and leadership skills expected of an executive manager
- application of critical thinking, analysis and problem-solving skills to crucial business decisions

Program Learning Outcomes
Upon graduation from the MBA degree program, students will be able to:

- integrate knowledge from different business-related disciplines to solve complex business problems, utilizing a research-informed approach
- critically examine principles of ethics and social responsibility to analyze and reflect on the management of relationships between a business enterprise and its key internal and external stakeholders
- demonstrate graduate-level cognitive, creative and leadership competences in team interaction, effective writing and presentation deliveries
- utilize, with justification, appropriate research methods/approaches to critically analyze business problems
- develop, evaluate and select from competing alternative courses of action, and design relevant implementation options for solving business problems

Admission Requirements
Admission to the MBA degree program is competitive. In addition to meeting the university’s general graduate admission requirements, applicants are required to take the MBA Admission Test (administered through the AUS Testing Center) or provide a GMAT score. These tests can be taken online. The score is considered with the student’s work experience and the undergraduate grade point average, particularly for the last two years of study. These results are used to assist the SBA Graduate Committee in determining the admission status of an applicant.

Applicants who lack the requisite undergraduate training in business may be required to complete a business bridging course prior to matriculating in the major. For details, please see the Business Bridging Courses section hereafter.

Business Bridging Course
Students admitted to the MBA degree program may be required to complete a three-credit-hour bridging course that serves as the foundation for the core MBA program. The requirement for the course will normally depend on courses completed by the student as an undergraduate and is determined by the program at the time of admission.

The business bridging course does not generate credit hours towards completion of the degree program graduation requirements. Students required to complete the bridging course are normally not eligible to register for degree program courses prior to successful completion of the bridging course. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

The business bridging course may be waived when the waiver policy requirements are met. Matriculation into the major requires successful completion or waiver of the business bridging course.

Business Bridging Course (3 credit hours)
- BUS 507 Quantitative Analysis for Business Decisions

Waiver Policy
Students may qualify to waive the business bridging course. In general, the bridging course may be waived if the student has completed comparable course work at the undergraduate or master’s levels. The waiver is evaluated at the time of admission. For more information, consult the Course Waiver in the Admission to Graduate Studies section earlier in this catalog.

Course Timings
MBA courses are offered in the evenings, with classes typically beginning at 6:00 p.m. and ending at 9:00 p.m.

Degree Requirements
To be awarded an MBA degree, students must successfully complete 33 credit hours in core courses and electives as follows:

- 21 credit hours in core courses
- a minimum of six credit hours in elective courses
- a zero-credit-hour seminar
- six credit hours in Professional Research Project

Students must complete the degree requirements within five years from the time of initial enrollment in the program. A minimum cumulative grade point average of 3.00 is required.

Graduation residence requirements must be met. For more information, refer to Graduation Requirements in
Required Courses (27 credit hours)

Core Courses Requirement (21 credit hours)

Students must successfully complete the following MBA core courses:

- MBA 601 Economics for Managers
- MBA 603 Introduction to Business Analytics
- MBA 609 Operations and Supply Chain Management
- MBA 610 Financial Statement Analysis and Capital Budgeting
- MBA 614 Marketing in the 21st Century
- MBA 618 Strategic Management
- MBA 640 Leadership and Change Management
- MBA 695 Seminar

Professional Research Project (6 credit hours)

- MBA 699 Professional Research Project (6 credit hours)

Elective Courses (6 credit hours)

Students must successfully complete a minimum of six credit hours in courses selected from the following:

- MBA 602 Organizational Theory and Behavior
- MBA 605 Financial Management
- MBA 613 Managerial Accounting
- MBA 641 Innovation and Entrepreneurship
- MBA 642 Knowledge Management
- MBA 661 Strategic Human Resources Management
- MBA 680 Project Management
- MBA 681 Technology, Innovation and Digital Strategy
- MBA 697 Business Co-op

any approved MBA special topic courses. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

Academic Advising

The MBA program curriculum draws from several departments in SBA, with students having backgrounds in different disciplines. The Associate Dean for Graduate Programs provides academic and career advising to students. Faculty teaching in the MBA program may also advise continuing students.

Master's Thesis

A student must complete his/her master's thesis under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for preparing the master's thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master's Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of the AUS Graduate Catalog.

Master of Science in Accounting (MSA)

Abed Al-Nasser Abdallah, Head, Department of Accounting

The Master of Science in Accounting (MSA) degree program is offered by the Department of Accounting.

The MSA degree program is designed to provide students with knowledge and preparation to pursue professional careers in public and private accounting; develop skills necessary to solve accounting problems that are of contemporary relevance and more challenging in the fields of accounting, finance and other business areas; and teach the required technical and nontechnical accounting competencies. Although pre-class readings and in-class lectures remain essential for presenting key accounting theories and concepts, the reinforcement and assessment methods are oriented toward experiential exercises that require the students to apply the material to real-life cases. Thus, the degree program makes extensive use of case studies, individual and team projects and other "real-world" opportunities to use the material covered.

The MSA degree program creates additional employment opportunities and promotes the career success of our graduates. Career options for graduates will include positions in public accounting such as auditors, controllers, financial analysts and management consultants.

This degree program will allow students to meet the current 150-semester-hour education requirement to take the Certified Public Accountant (CPA) Examination in most US states. The objective of the MSA degree program is to give our students an edge in passing the CPA exam and to prepare them for careers in professional accountancy. Courses in the MSA degree program will strengthen students' competencies in business in general and accounting in particular. This knowledge is needed to achieve professional certifications such as CPA, CMA, CFE and CIA—qualifications expected of top professionals in the accounting field. The Big Four accounting firms in the region and other top employers will hire graduates from the MSA degree program particularly because of its solid auditing/assurance component.

Program Goals

MSA graduates will have achieved the following goals:

- proficiency in the core knowledge required to pursue careers in private and public accounting
- mastery of the knowledge required to pass the CPA exam
- ability to solve challenging accounting problems that are of contemporary relevance in finance and other business areas
- development of the accounting skills needed to facilitate career advancement in business or pursuit of further advanced study in accounting
- professional sophistication required to manage business complexities using leadership and critical-thinking skills
- development of technical and non-technical accounting competencies

Program Learning Outcomes

Upon graduation from the MSA degree program, students will be able to:

- demonstrate advanced knowledge of financial statements, regulations, auditing standards and procedures, standards of ethical conduct and their applications
- critically assess the financial, ethical and social implications of selecting various accounting policies to support decisions made by internal and external user of accounting information
- integrate accounting skills and knowledge to resolve current complex accounting issues
- implement judgment in selecting financial reporting standards in relation to a set of financial statements

American University of Sharjah Graduate Catalog 2022–2023
School of Business Administration

- apply appropriate professional skepticism in evaluating financial assertions
- critique technical accounting concepts in written and oral form
- apply research skills and knowledge to identify, examine, analyze and construct solutions to accounting and market-based accounting issues

**Admission Requirements**

Applicants to the MSA degree program must meet the general university requirements for graduate admission. Applicants who lack the necessary prerequisite knowledge in accounting may be required to complete accounting bridging courses prior to matriculating in the major.

**Bridging Courses**

Students admitted to the MSA degree program may be required to successfully complete a maximum of nine credit hours in accounting bridging courses that serve as prerequisites to the MSA degree requirements. The number of bridging courses required will normally depend on courses completed by the student as an undergraduate and is determined by the program at the time of admission.

Bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete bridging courses are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Bridging courses may be waived when the waiver policy requirements are met. Matriculation into the major requires successful completion or waiver of the bridging courses.

**Bridging Courses (9 credit hours)**

- ACC 510 Financial Accounting for Managers
- ACC 520 Managerial Accounting
- ACC 530 Auditing for Managers

**Waiver Policy**

Students may qualify to waive any or all of the bridging courses. In general, a course may be waived if the student has completed comparable course work at the undergraduate or master’s levels. Waivers are evaluated by the Head of the Department of Accounting at the time of admission. For more information, consult the Course Waiver in the Admission to Graduate Studies section earlier in this catalog.

**Accelerated Master’s Program—AUS Undergraduate Students**

AUS undergraduate degree seeking students interested in pursuing an MSA degree may register for a maximum of six credit hours from MSA courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program (AMP) of the MSA degree program. The master’s-level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

1. be enrolled in the accounting major
2. have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
3. have achieved a minimum cumulative GPA of 3.50
4. have successfully completed the following courses:
   - ACC 302 Intermediate Financial Accounting II
   - ACC 303 Cost Accounting

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSA courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

**Course Timings**

MSA courses are offered in the evenings, with classes typically beginning at 6:00 p.m. and ending at 9:00 p.m.

**Degree Requirements**

To be awarded an MSA degree, students must successfully complete 30 credit hours in MSA core courses and electives as follows:

1. 18 credit hours in core courses
2. a minimum of six credit hours in ACC elective courses
3. a zero-credit-hour seminar
4. six credit hours in Professional Research Project

Students must complete the degree requirements within five years from the time of initial enrollment in the program. A minimum cumulative grade point average of 3.00 is required.

Graduation residence requirements must be met. For more information, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

**Required Courses (24 credit hours)**

**Core Courses Requirement (18 credit hours)**

Students must successfully complete 18 credit hours in core courses:

- ACC 610 Topics in Financial Accounting
- ACC 611 Auditing and Attestation
- ACC 612 Advanced Topics in Managerial and Cost Accounting
- ACC 614 Regulatory Environment in Accounting
- ACC 615 Enterprise Database Systems and Analytics
- ACC 616 Advanced Topics in Financial Reporting
- ACC 695 Seminar

**Professional Research Project (6 credit hours)**

**Elective Courses (minimum of 6 credit hours)**

Students must successfully complete two accounting (ACC) elective courses (for a minimum of six credit hours) selected from the following:

- ACC 620 Forensic Accounting and Fraud Examination
- ACC 622 Internal Auditing
- ACC 623 Financial Statement Reporting and Analysis
- ACC 628 Fraudulent Financial Reporting
- ACC 694 approved special topic ACC courses. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

**Academic Advising**

The Department of Accounting provides academic and career advising to MSA students through the head of the department. Department of Accounting faculty teaching in the MSA program may also advise continuing students.

**Master’s Thesis**

A student must complete his/her master’s thesis under the direct
supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of the AUS Graduate Catalog.

Master of Science in Finance (MSF)
Osamah Alkhaazali, Head, Department of Finance

The Master of Science in Finance (MSF) degree program is offered by the Department of Finance.

The MSF degree program offers graduate-level business finance education to meet the needs for financial analysis, and analytical and technical expertise in the Gulf region. The program also provides research training for students following the thesis option who wish to consider future PhD study.

The MSF degree program at American University of Sharjah prepares students with the analytical skills needed for a successful professional career in today’s global financial environment.

Featuring a rigorous curriculum that provides cutting-edge training in finance—focusing on all dimensions of learning that include knowledge, attitudes, values, skills, understanding and analysis—the program endows students with the necessary quantitative and theoretical expertise for analytical jobs in the finance sector. Because the curriculum covers the CFA body of knowledge, it also encourages students to prepare for the CFA exams.

A concentration in corporate finance and investments prepares students to effectively utilize their analytic skills to project earnings, conduct valuations, construct and manage portfolios, and assess an organization’s assets and liabilities to identify opportunities for global business growth.

Program Goals
The MSF degree program prepares graduates to:

• meet the highest levels of proficiency in the functional or technical knowledge required for professional finance careers
• address key issues in professional decision making through the application of critical analysis and integration of knowledge relevant to changing environments
• be at the forefront of academic and professional research related to the practice of finance and investment

Program Learning Outcomes
Graduates of the MSF degree program will be prepared to:

• evaluate risk in investments and devise risk management strategies
• price major financial assets and securities, including in complex environments
• assess and devise alternative financing decisions and strategies, based on advanced analysis and the application of research skills
• use financial modeling and problem-solving techniques to facilitate financial decision making
• analyze advanced financial statements to inform high-level strategic thinking.

Concentration in Corporate Finance and Investment

Upon graduation from the MSF degree program with a concentration in corporate finance and investment, graduates will be able to:

• solve key decision problems including valuation of corporate securities, capital budgeting under certainty, capital budgeting under uncertainty, investment decisions, corporate capital structure decisions, dividend decisions and policy, capital raising decisions, leasing decisions and analysis of takeovers
• critically assess risk-return relationship, demonstrating the ability to create an investment policy statement, and show how the financial markets operate
• examine the principles of modern portfolio theory and the effect of diversification on investment portfolios
• measure and evaluate portfolio performance demonstrating the key features of futures and options and how they can be used to manage the risk of the portfolio

Admission Requirements
In addition to meeting the general university requirements for graduate admission, applicants to the MSF degree program must hold a bachelor’s degree in business-related areas from an independently accredited university recognized by the UAE Ministry of Education’s Higher Education Affairs Division and by AUS.

Business Bridging Course
Students admitted to the MSF degree program may be required to complete a three-credit-hour bridging course that serves as the foundation for the core MSF program. The requirement for the course will normally depend on the major requirements of the student as an undergraduate and is determined by the program at the time of admission.

The business bridging course does not generate credit hours towards completion of the degree program graduation requirements. Students required to complete the bridging course are normally not eligible to register for degree program courses prior to successful completion of the bridging course. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

The business bridging course may be waived when the waiver policy requirements are met. Matriculation into the major requires successful completion or waiver of the business bridging course.

Business Bridging Course (3 credit hours)
• BUS 506 Introduction to Finance and Econometrics

Waiver Policy
Students may qualify to waive of the business bridging course. In general, a course may be waived if the student has completed comparable coursework at the undergraduate level. Waivers are evaluated at the time of admission. For more information, consult the Course Waiver in the Admission to Graduate Studies section earlier in this catalog.

Accelerated Master’s Program—AUS Undergraduate Students
AUS undergraduate degree seeking students interested in pursuing an MSF degree may register for a maximum of six credit hours from MSF FIN courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master’s Program.
School of Business Administration

(AMP) of the MSF degree program. The master’s-level courses may be counted towards meeting the graduation requirements for both the bachelor’s and master’s degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the finance or economics (BSBA or BAE) majors
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed the following courses:
  - ECO 201 Principles of Microeconomics
  - ECO 202 Principles of Microeconomics
  - FIN 201 Fundamentals of Financial Management
  - FIN 310 Analysis of Financial Statements
  - FIN 320 Banking
  - FIN 330 Investments

For further details on the AMP, refer to Accelerated Master’s Program in the Academic Policies and Regulations section of the AUS Undergraduate Catalog. For the list of MSF FIN courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Course Timings

MSF courses are offered in the evenings, with classes typically beginning at 6:00 p.m. and ending at 9:00 p.m.

Degree Requirements

To qualify for graduation with an MSF degree, students must successfully complete a minimum of 30 credit hours consisting of program core courses, concentration courses, program elective courses and a master’s thesis, with a minimum grade point average of 3.00.

The expected minimum duration for completion of the MSF degree program for a full-time student is 18 months. Part-time students may need more time to complete the degree. All students must successfully complete the degree program graduation requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, please refer to the Graduation Requirements in the Academic Policies and Regulations section of the AUS Graduate Catalog.

To be awarded an MSF degree, students must successfully complete the following requirements:

- 12 credit hours in core courses
- nine credit hours in concentration courses
- a minimum of three credit hours in elective courses
- six credit hours in Master’s Thesis

Required Courses (27 credit hours)

Core Courses (12 credit hours)

Students must successfully complete the following courses:

- FIN 681 Advanced Financial Statements Analysis
- FIN 682 Advanced Corporate Finance
- FIN 683 Applied Econometrics Methods
- FIN 684 Investment Analysis and Portfolio Management

Concentration Courses

Corporate Finance and Investment Concentration (9 credit hours)

Students must successfully complete the following courses:

- FIN 685 Advanced Asset Valuation
- FIN 686 Pricing and Hedging of Financial Derivatives
- FIN 687 Financial Markets and Institutions

Master’s Thesis (6 credit hours)

- FIN 699 Master’s Thesis (6 credit hours)

Elective Courses (minimum of 3 credit hours)

Students must complete a minimum of three credit hours in elective courses. Students may select their elective course from the following list:

- FIN 688 Private Equity and Venture Capital
- FIN 689 Risk Management
- FIN 691 International Financial Management
- FIN 692 Islamic Finance
- FIN 694 Special Topics in Finance

Academic Advising

The Department of Finance provides academic and career advising to MSF students through the head of the department. Department of Finance faculty teaching on the MSF program may also advise continuing students.

Master’s Thesis

The thesis allows in-depth specialization in a particular topic area and provides students with the opportunity to receive individualized attention from their thesis faculty supervisor, equipping them with the research skills required for a PhD degree. MSF students will select a thesis advisor after successfully completing the core courses.

A student must complete his/her master’s thesis under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student’s examining committee. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for preparing the master’s thesis/professional project is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of the AUS Graduate Catalog.

Doctor of Philosophy in Business Administration (PhD-BA)

Taisier Zoubi, Coordinator

The Doctor of Philosophy in Business Administration (PhD-BA) degree program is an interdisciplinary program offered by the School of Business Administration (SBA) that draws on the expertise of faculty from all the SBA departments.

The PhD-BA offers advanced business education to enable students in the program to develop strong knowledge and skills in identified research areas of primary importance to the UAE. In particular, these research areas align closely with the UAE Economic Vision 2030.

Students pursuing the PhD-BA may apply for acceptance to the dual PhD degree program where they may receive two doctoral degrees, one from AUS and one for the University of South Carolina (UoSC). For details, consult Dual Degree at the end of the program section.
Mission Statement
The PhD-BA degree program fosters excellence in teaching, learning and research using the American model of higher education, while recognizing the distinctive culture and organizational forms and practices of the Gulf region. The nature of the program will generate both professors and experts employed outside of academia who are able to further the development and publication of their knowledge while training a new generation of scholars steeped in innovative thinking.

Program Goals
The PhD-BA will prepare graduates to:
- meet the highest challenges of scholarship, and become distinguished faculty members
- be at the forefront of creating and disseminating knowledge
- lead in creating strategies, proposing structures and developing operations for corporate organizations as well as government agencies

Program Learning Outcomes
Graduates of the PhD-BA degree program will be prepared to:
- critique methods of research and academic inquiry in the field of business administration
- reconcile the results of research in the business field of study with extant theory
- identify, investigate and synthesize complex issues within the field by applying a range of analytical tools and theoretical models
- communicate research outcomes effectively to academic and practitioner audiences both orally and in writing
- publish scholarship in peer-reviewed journals related to business administration and economics
- teach effectively and disseminate fundamental knowledge in the field of study and related areas in business administration
- uphold standards of ethical academic conduct

Admission Requirements
In addition to meeting the university’s general requirements for admission to PhD degree programs, applicants to the PhD-BA degree program must meet the following program admission requirements:
- applicants must have completed a master of science relevant to the concentration applied for, or a Master of Business Administration degree
- applicants must submit an official Graduate Record Examination (GRE) score or Graduate Management Admission Test (GMAT) score
- applicants to the PhD-BA with a concentration in finance will be required to have completed a graduate-level course in applied econometrics.

Bridging Courses
Students admitted to the PhD-BA degree program with a concentration in finance may be required to complete a maximum of 15 credit hours in bridging courses that serve as the foundation for the PhD-BA degree program with a concentration in finance. The number of bridging courses required will normally depend on courses completed by the student as an undergraduate or master’s student and is determined by the program at the time of admission. Bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete bridging courses are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Bridging courses may be waived when the waiver policy requirements are met. Matriculation into the major requires successful completion or waiver of the bridging courses required for the concentration.

Business Core Courses (12 credit hours)
Students must successfully complete the following required business core courses:
- BUS 701 Philosophical Foundations of Business Research
- BUS 702 Seminar in Business Administration
- BUS 703 Advanced Applied Econometrics
- BUS 704 Applied Time Series Analysis

Concentration Required Courses (15 credit hours)
Students must successfully complete the following finance concentration required courses:
- FIN 711 Finance Theory
- FIN 712 Contemporary Issues in Financial Research
- FIN 713 Advanced Topics in Financial Markets and Institutions
- FIN 714 Empirical Research Methods in Finance: Asset Pricing
- FIN 715 Advanced Corporate Finance Research

Degree Requirements
To qualify for graduation with a PhD-BA degree, students must successfully complete a minimum of 60 credit hours with a minimum cumulative GPA of 3.00 as follows:
- a minimum of 33 credit hours (11 courses) of required and elective coursework:
  - 12 credit hours (four courses) of business core courses
  - 15 credit hours (five courses) of required courses in the area of concentration
  - a minimum of six credit hours (two courses) of elective courses in the area of concentration
  - a minimum of 27 credit hours of research work (Dissertation)

The expected minimum duration for completion of the PhD-BA degree program is four years. All graduation requirements must be completed within 10 years of admission to AUS as a doctoral student, inclusive of any leave.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.
PhD Dissertation
- BUS 799 Dissertation (for a minimum 27 credit hours)

Elective Courses
(minimum of 6 credit hours)

Finance Concentration
Students must successfully complete two elective courses (for a minimum of six credit hours) selected from the following list of courses. The elective courses must be approved by the program coordinator.
- BUS 794 Special Topics in Business Administration (finance-related topic)
- FIN 721 Seminar in International Finance
- FIN 722 Corporate Restructuring and Reorganization
- FIN 723 Advanced Topics in Corporate Governance and Compensation

Qualifying Examination
To be considered as a candidate for the PhD-BA degree, a student must pass a written and an oral qualifying examination (BUS 790). Registration for the qualifying examination is conditional upon meeting the following requirements:
- The student must be in good academic standing.
- The student must have successfully completed a minimum of 18 credit hours of course work, including at least six credit hours from the concentration required courses.

The qualifying examination may result in a pass or a fail grade. A student who fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the program coordinator one month ahead of the registration of the semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the program coordinator, who will make a written recommendation to the Associate Dean for Graduate Studies. The associate dean will then provide a recommendation to the Vice Provost for Research and Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Research and Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once. Students need to seek guidance from the program coordinator regarding the qualifying examination requirements and deadlines.

Further details on the qualifying examination are provided in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

PhD Dissertations
The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation.

A PhD-BA candidate develops his/her dissertation research proposal and completes the dissertation under the direct supervision and guidance of a principal advisor. The principal advisor serves as the chair of the student’s Dissertation Advisory Committee (DAC). The DAC also includes at least two additional faculty members. The student may request the appointment of an external committee member.

A PhD-BA candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed. PhD candidates are expected to successfully complete the dissertation proposal within three semesters of first registering for the dissertation. Failure to complete the dissertation proposal within the specified time frame or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation must be publicly defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC is formed by the program coordinator in consultation with the DAC chair; it is approved by the Associate Dean for Graduate Studies and appointed by the Vice Provost for Research and Graduate Studies.

A complete guide for forming the DAC and the FODC, and preparing the dissertation, including the dissertation research proposal, the dissertation defense schedule and deadlines, is given in the Graduate Studies Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Graduate Studies-Graduate Studies Policies and Procedures.

For registration details, please refer to Master’s Thesis, Professional Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Dual Degree
Students pursuing the PhD-BA degree program with a concentration in finance may apply for the dual degree program offered by AUS and the University of South Carolina (UoSC) Darla Moore School of Business (DMSB), one of the United States’ most renowned business schools. Upon successful completion of the degree requirements of both institutions, students in the dual degree program will be awarded two doctoral degrees, one from AUS and one from UoSC.

Acceptance in the dual degree program occurs every two years. Due to limited places, admission to the program is competitive. Students may contact the SBA Associate Dean of Graduate Programs for more details about the application process and the study plan for the dual PhD program.

AUS students who are selected to be part of the dual degree program will spend the second year of their PhD program at UoSC. Upon approval of the SBA Associate Dean of Graduate Programs, they could transfer up to 15 credit hours of the coursework successfully completed at UoSC. For their dissertation work, dual degree students will be under the supervision of faculty from both universities, and they will complete a single dissertation that contributes to both the AUS and the UoSC degree programs graduation requirements. Further details on transfer of credits in provided in Transfer of Credit Hours within the Admission to Graduate Studies section earlier in this catalog.
College of Architecture, Art and Design

Courses with titles in italic are available to undergraduate students in the Accelerated Master’s Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master’s Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

UPL Urban Planning

UPL 600 Planning History, Theory and Principles (3-0-3). (Blended learning mode). Introduces the profession of urban planning and its cardinal doctrines. Surveys the history of the profession and its links to other environmental design fields. Reviews basic procedural and substantive theories that inform planning practice. Previews planning specializations, what planners do, and the tools they use and need to nurture sustainable cities. Prerequisite: admission to the MUP program.

UPL 602 Computer Applications in Planning (4-0-3). Introduces key concepts and technical skills involved in analyzing spatial phenomena. Includes the following topics: spatial inferences, cartographic quality, geospatial data and exploratory spatial data analysis. Introduces and applies key software tools in urban and regional contexts. Prerequisite/concurrent: UPL 600. Lab/Tech fee rate A applies.

UPL 604 Urban Planning Research and Analysis (3-0-3). Introduces quantitative and qualitative research and analysis methods used in urban planning practice. Considers various sources of primary and secondary data (surveys, interviews and observations; national and international data repositories) and associated analytical skills (statistical analysis, qualitative analysis, forecasting, analysis of local economies). Emphasizes effective presentation of data and analyses. Prerequisite/concurrent: UPL 600.

UPL 621 Environmental and Land Use Planning (3-0-3). (Blended learning mode). Provides a comprehensive overview of the field of sustainable environmental and land use planning, focusing on key principles, processes and skills for assessing, managing and protecting environmental resources—land, air, water, flora and fauna. Reviews the social, economic, political and legal dimensions of environmental and land use planning through case studies and best practices worldwide. Prerequisite/concurrent: UPL 600.

UPL 623 Urban Design Principles, Processes and Skills (4-0-3). (Blended learning mode). Examines urban design principles, processes and necessary skill-sets. Differentiates between urban design as a discipline and as a profession and gives an overview of its evolution in the West. Examines the applicability and limitations of discussed concepts, processes and skills by engaging in projects ranging from problem formulation and analysis to spatial solutions and recommendations in the local/regional context. Prerequisite/concurrent: UPL 600.

UPL 625 Plan Making, Communication and Process (4-0-3). Introduces skills relevant to making useable plans. Reviews the need for and logic of plans, the challenges of collective choice, and the institutional context of plan making. Covers topics such as problem formulation and decision analysis; forecasting, impact assessment and scenario development; and facilitation, negotiation and mediation. Emphasizes effective presentation of data, analyses and recommendations. Requires individual and group work on applied tasks. Prerequisite/concurrent: UPL 600.

UPL 633 Urban Infrastructure Planning (3-0-3). (Blended learning mode). Explores the challenges and prospects for planning sustainable urban infrastructure. Examines the conceptual basis of infrastructure planning, as well as empirical cases of planning, financing and managing sustainable urban infrastructure. Reviews case studies and best practices of infrastructure planning worldwide and locally. Prerequisite: UPL 600.

UPL 634 Tourism and Hospitality Planning (3-0-3). (Blended learning mode). Covers the history of tourism and hospitality planning as a specialized field of study. Critiques tourism and hospitality concepts, trends, genres and case studies. Analyzes the political, economic, environmental and social-cultural dimensions and implications of the tourism and hospitality industry. Assesses the links between tourism and sustainable development. Prerequisite: admission to the MUP program.

UPL 639 Urban Planning and Housing Policy (3-0-3). Provides an overview of housing policy as it relates to urban planning. Reviews different approaches to housing provision from around the world including housing finance mechanisms. Considers housing typologies as well as policy issues specific to the UAE. Prerequisite: UPL 600.

UPL 651 Negotiation Strategies (3-0-3). Introduces key principles, strategies and dynamics of negotiation in the governmental, corporate, non-profit and grassroots sectors. Reviews relevant social theories and simulates experiences in negotiation and conflict resolution. Highlights relevance of negotiation to urban planning. Prerequisite: UPL 600.

UPL 655 Ecological Urbanism (3-0-3). Examines the history, theory and debates on urban environmental sustainability, based on the notion of cities as human ecosystems. Introduces an environmentally led approach to urban planning and design to achieve a symbiotic relationship between the built environment and natural systems. Covers current knowledge on ecological urban design including sustainable urban forms and densities, sustainable mobility, urban biophilia, new public spaces for food production, non-fossil fuel energy production, and wastewater and organic waste recycling. Reviews case studies of sustainable neighborhoods worldwide. Prerequisite/concurrent: UPL 600.

UPL 680 Urban Research and Planning Workshop (8-0-6). (Blended learning mode). Requires application of research skills and substantive knowledge of urban planning to a question associated with a planning project followed by formulation of plan components using outcomes from that research. Culminates in an individual research paper and plan poster. Prerequisites: UPL 602, UPL 604, UPL 621, UPL 623 and UPL 625.

Special Topic Courses

Special Topic (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/ttech fee may apply.

Special topic courses are numbered as 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the college during registration.
College of Arts and Sciences

Courses with titles in italic are available to undergraduate students in the Accelerated Master's Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master's Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

ELT TESOL

ELT 501 Advanced English Grammar (3-0-3). Examines the structure, function and meaning of contemporary English. Discusses issues relative to descriptive/prescriptive approaches to language and ESL instruction.

ELT 507 Culture, Society and Language Learning (3-0-3). Explores the influence of cultural diversity on teaching and learning an additional language and the implications of language use in social contexts, like world, regional and international Englishes. Analyzes methods and approaches for intercultural research and prepares language teachers in practical and theoretical areas of pragmatics and sociolinguistics, providing an opportunity to prepare, present and evaluate authentic lessons that enrich intercultural competence.

ELT 511 Linguistics for ESL Teachers (3-0-3). Focuses on areas in linguistics relevant to ESL teachers. Explores ways of utilizing research and generalizations described from linguistics to improve ESL teaching practice.

ELT 513 Language Acquisition and Development (3-0-3). Examines the theoretical perspectives explaining acquisition and analyzes the factors that affect language development and learning. Explores the implications of SLA research in ESL classroom contexts.

ELT 515 Methods and Materials Development (3-0-3). Examines traditional and contemporary approaches to English language teaching. Various aspects of classroom practice are analyzed, including teacher and learner roles, classroom management, and integrated versus separate teaching of the language skills.

ELT 517 Curriculum Design (3-0-3). Introduces the principles of ESL course design. Examines the stages of developing and evaluating learning centered curricula and materials. Prerequisite: admission to the MATESOL program.

ELT 521 Reading and Writing in ESL (3-0-3). Discusses various theoretical models dealing with teaching literacy skills in a second language to children and adults. Explores ways to adapt and apply these models for effective ESL instruction.

ELT 523 Bilingual Education (3-0-3). Reviews different models of bilingual education and issues in biculturalism. Discusses how to achieve a balanced bilingual education system by examining the challenges posed by cultural and linguistic diversity in a bilingual education setting.

ELT 551 Language Testing and Evaluation (3-0-3). Covers the fundamental goals, principles, standards and uses of language assessment and language assessment research. Reviews the factors involved in assessing proficiency in second language skills and in selecting appropriate testing instruments and evaluation tools.

ELT 617 Quantitative, Qualitative and Action Research in ELT (3-0-3). Surveys quantitative, qualitative and action research approaches in language learning and teaching. Examines the role of research design, data collection and the interpretation of results. Graduate students pursuing the thesis option may use this course to develop their proposals. Prerequisite: admission to the MATESOL program.

ELT 619 Practicum in TESOL (3 credit hours). Provides the opportunity to observe, explore and implement effective ESL teaching strategies. Involves weekly seminars in which the students discuss their classroom experiences and reflect on their personal growth as ESL teachers. Prerequisites: ELT 511 and ELT 513; prerequisite/concurrent: ELT 515.

ELT 699 Master's Thesis (6 credit hours). Requires completion of individual and original research work on a topic related to some aspect of TESOL that addresses both theoretical and practical aspects of ELT. The thesis is supervised by the thesis faculty supervisor and is defended to the satisfaction of the thesis committee. Graded as Pass/No Pass. Prerequisite: good academic standing.

MSE Materials Science and Engineering

MSE 500 Fundamentals of Materials Science and Engineering (3-0-3). Provides advanced description for the structure of different materials including metals, ceramics and polymers. Examines material defects, and the fundamentals of mechanical, electrical, magnetic and optical properties. Covers the connection between material properties, structure and function.

MSE 510 Thermodynamics in Materials Science and Engineering (3-0-3). Covers the basic concepts and laws of thermodynamics and their applications. Focuses on the use of internal energy, enthalpy, entropy and Gibbs free energy; Maxwell relations; ideal and real cycles and processes; chemical equilibrium; phases and solutions, phase equilibrium and other applications. Graded as Pass/No Pass. Prerequisite: admission to the PhD-MSE program.

MSE 700 Research Methods in Materials Science and Engineering (3-0-3). Covers qualitative and quantitative methods employed in materials science and engineering research. Introduces the basic tenets of research, knowledge, methods, and success in research. Covers problem formulation, literature review, hypotheses formulation and proposal preparation. Explores open-source databases and software libraries developed for materials, programming for data analysis, modeling, instrument design and control, and statistical methods. Prerequisite: approval of program coordinator.

MSE 705 Diffraction and Crystallography (3-0-3). Introduces the fundamentals of X-ray crystallography and diffraction. Provides knowledge on how X-ray diffraction can be used to determine the crystal structure for both single and poly crystalline materials. Covers reciprocal lattices, space groups, Ewald sphere construction, elements of diffraction measurements and instrumentation, and the interpretation of diffraction data. Discusses diffraction studies using synchrotron radiation and neutrons sources. Requires knowledge in differential equations analysis techniques. Prerequisite: MSE 500.

MSE 707 Magnetic Materials and Devices (3-0-3). Introduces basic concepts of magnetism, experimental methods, and applications of magnetic materials. Describes order and excitations in magnetic materials using quantum mechanics. Covers magnetic moment, types of magnetic materials.
and their properties, domains and effects of nanostructuring, soft and hard magnetic materials, magnetoresistance, spintronics and magnetic superconductors. Explores applications in magnetic memories and magnetic data storage devices. Requires knowledge in differential equations analysis techniques. Prerequisite: MSE 500.

MSE 710 Advanced Thermodynamics in Materials Science and Engineering (3-0-3). Explores applications of the laws of thermodynamics in materials science and engineering. Covers chemical reactions, magnetism, polarizability, models and properties of solutions; thermodynamic analysis of the phase diagrams of different materials; thermodynamic activities in solid and liquid systems; equilibrium constant; and phase equilibria. Prerequisite: MSE 510.

MSE 711 Kinetics of Materials (3-0-3). Covers topics related to analysis of kinetic processes in materials including irreversible thermodynamics and diffusion. Explores mechanisms of materials processing, microstructural behavior and phase transformations. Introduces equations for diffusion, reaction rates and rate theories. Prerequisites: MSE 500 and MSE 510.

MSE 718 Materials for Energy Production and Storage (3-0-3). Provides comprehensive knowledge about the importance of the physical and chemical properties of materials as applied in energy generation and storage. Describes the effects of materials structure, chemistry and defects on performance and efficiency in energy production, conversion, storage and utilization. Covers topics related to materials used in solar cells and solar heat, batteries, hydrogen technology and fuel cells. Prerequisites: MSE 500 and MSE 510.

MSE 720 Advanced Characterization and Analytical techniques (3-0-3). Focuses on advanced characterization and analytical techniques in materials science and engineering research. Explores the operating principles and applications of electron microscopes and their spectroscopical tools. Covers X-ray diffraction (XRD), X-ray Photoelectron Spectroscopy (XPS), Scanning Probe Microscopy (SPM) and Raman spectroscopy. Addresses the utility and the limitation of each analytical tool. Requires advanced undergraduate laboratory in physical sciences or engineering. Prerequisite: MSE 500. Lab/Tech fee rate A applies.

MSE 721 Surface Science and Technology (3-0-3). Provides advanced knowledge of the properties of surfaces and interfaces, with focus on their structure, electronic and chemical properties. Covers surface fabrication and modification methods, surface characterization techniques, adsorption/desorption isotherms, and surface reactions for catalytic applications. Discusses a range of applications including the shape of nanostructures, hydrophobic surfaces, electrochromic and thermochromic coatings, self-cleaning, self-healing and eco-inspired structures. Prerequisites: MSE 500 and MSE 510.

MSE 730 Advanced Mechanics of Materials (3-0-3). Covers fundamental concepts of solid mechanics with focus on elastic deformable bodies. Includes tensor algebra, kinematics, strain-displacement relationship, compatibility, stress and traction, equilibrium equations, constitutive relationships, linear elasticity, and solutions to selective boundary value problems. Explores the necessary mechanics background needed for other specific areas of solid mechanics, including plasticity, fatigue and fracture mechanics. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 731 Plasticity (3-0-3). Focuses on constitutive laws of plasticity, yield criteria, stress-strain relations, flow rules and formulation for rate-dependent and rate-independent plasticity. Covers basic numerical implementation of constitutive models and solutions for boundary value problems. Introduces advanced topics including crystal plasticity and applications of plasticity concepts in materials science and engineering. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 732 Fatigue of Materials and Structures (3-0-3). Covers materials response under cyclic loading with focus on predicting the fatigue life of materials and structural components. Focuses on stress-life, strain-life and fracture mechanics approaches to fatigue life. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 733 Mechanics of Laminated Composite Structures (3-0-3). Introduces the continuous fiber-reinforced composite materials with emphasis on equations of anisotropic elasticity, environmentally induced stresses, and constitutive equations of a lamina. Covers micromechanics of stiffness and expansional coefficients. Discusses transformation of stresses, strains and material coefficients. Explores the classical and first order theories of laminated composite plates, bending, buckling and the vibrations of composite plates using selected analytical solutions. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 734 Physical Metallurgy (3-0-3). Focuses on structure-property relationship of metals and alloys based on composition and processing. Covers types of solid solutions, ferrous and non-ferrous phase diagrams with focus on cooling curve and heat treatment. Examines Fe-C phase diagrams, steel and its types, and the microstructure associated with the individual phases. Explores design of alloys and the effect of alloying element and heat treatment in different applications. Prerequisites: MSE 500 and MSE 510.

MSE 740 Computational Methods in Materials Science and Engineering (3-0-3). Covers advanced computational methods and simulation in materials science and engineering. Focuses on modeling techniques from the microscopic up to the macroscopic structural scale. Explores molecular dynamics, classical mechanics, potentials for solids, Monte-Carlo simulation for atomic systems, and finite element method applications in materials and solids. Introduces computer aided design and simulation software. Requires knowledge in differential equations techniques or numerical analysis. Prerequisite: admission to the PhD-MSE program.

MSE 750 Nanomaterials: Science and Applications (3-0-3). Provides detailed knowledge of the physical phenomena, theoretical concepts and experimental techniques to fabricate and manipulate nanostructures. Covers the preparation, testing and the physical properties (mechanical, electrical, magnetic, optical) of nanomaterials. Explores a wide spectrum of applications such as catalysis, adsorption, sensors, high wear resistant and corrosion resistant coatings, nanophotonics and...
MSE 760 Advanced Corrosion (3-0-3). Provides a strong foundation in electrochemical thermodynamics and kinetics related to corrosion processes. Covers the principles behind corrosion and methods for prevention and control. Addresses materials selection, testing, design consideration and practical high-temperature corrosion problems. Requires knowledge in physical chemistry or electrochemistry. Prerequisite: admission to the PhD-MSE program.

MSE 761 Advanced Polymers and Composite Materials (3-0-3). Provides an overview of polymers, polymer composites, plastics, elastomers and fibers with concentration on specialty polymeric materials and hybrid polymer composites and their applications. Discusses the processing, fabrication and characterization techniques of polymers and polymer composites. Explores the characteristics, compatibility, as well as morphology and properties of polymers and polymer composites. Prerequisites: MSE 500 and MSE 510.

MSE 790 Qualifying Examination (0-0-0). Includes written and/or oral parts to test the student's breadth of knowledge, understanding of fundamentals, and ability to perform independent research work in one of the research areas in materials science and engineering. Graded as Pass/Fail. Prerequisites: successful completion of at least 12 credit hours, good academic standing and approval of program coordinator.

MSE 795 Doctoral Seminar (1-0-0). Provides a unique discussion forum for all doctoral students to interact with a diverse group of faculty from different departments, as well as outside presenters. Encompasses a wide variety of pertinent topics from different MSE research areas. Graded as Pass/Fail. Prerequisite: admission to the PhD-MSE program.

MSE 799 Dissertation (a minimum of 30 credit hours). Includes the preparation, presentation and defense of the research proposal, as well as the write-up, presentation and defense of the dissertation. Graded as Pass/No Pass. Prerequisites: MSE 790, DAC appointment and approval of program coordinator.

MTH Mathematics

MTH 500 Mathematical Statistics with Applications (3-0-3). Introduces formulation of statistical models, transformations and expectations, methods of estimation and optimal theory, hypothesis testing and methods of evaluations, nonparametric statistics, and Monte Carlo simulation and applications using statistical packages. Prerequisite: approval of department head.

MTH 505 Ordinary Differential Equations (3-0-3). Covers the following topics: scalar and planar autonomous systems, nonlinear systems and linearization, existence and uniqueness of solutions, matrix solution of linear systems, series solutions, phase plane analysis, stability analysis, bifurcation theory, Liapunov’s method, limit cycles and Poincare Bendixon theory. Prerequisite: admission to the MSMTH program.

MTH 506 Partial Differential Equations (3-0-3). Covers the classification of first- and second-order partial differential equations and analyzing its applications. Introduces eigenfunction expansions, separation of variables, and transform methods for solving PDEs, Green’s functions for PDEs, and the method of characteristics. Prerequisite: admission to the MSMTH program.

MTH 507 Financial Mathematics I (3-0-3). Provides a basic introduction to financial mathematics. Introduces mathematical models of the valuation of financial instruments such as futures and options, and their risk-management using the Cox-Ross-Rubenstein framework. Introduces the stochastic techniques employed in derivative pricing. Prerequisite: approval of department head.

MTH 508 Mathematical Biology (3-0-3). Explores continuous and discrete methods for modeling biological systems. Covers ordinary differential equations models, multistate logical systems, and some applications. Prerequisite: admission to the MSBME or MSMTH programs.

MTH 511 Real Analysis (3-0-3). Covers Riemann integration and the associated convergence theorems, Lebesgue measure on the real line, Lebesgue measurable functions and Lebesgue integration on the real line. Addresses bounded convergence theorem, Fatou’s lemma, monotone convergence theorem, Lebesgue dominated convergence theorem, Vitali convergence theorem, absolute continuity, differentiation and integration, LP spaces, Holder and Minkowski inequalities, and the Riesz Fischer Theorem. Prerequisite: admission to the MSMTH program.

MTH 512 Advanced Linear Algebra (3-0-3). Covers the proof-based theory of matrices, determinants, vector spaces, linear spaces, linear transformations and their matrix representations, linear systems, linear operators, eigenvalues and eigenvectors, invariant subspaces of operators, spectral decompositions, functions of operators, and applications to science, industry and business. Prerequisite: admission to the MSMTH program.

MTH 520 Complex Analysis (3-0-3). Covers the following topics: analytic functions, Cauchy’s theorem and consequences, singularities and expansion theory, maximum modulus principle, residue theorem and its application, compactness and convergence in space of analytic and meromorphic functions, elementary conformal mappings, Riemann mapping theorem, elliptic functions, analytic continuation and Picard’s theorem. Prerequisite: admission to the MSMTH program.

MTH 532 Abstract Algebra (3-0-3). Covers basic properties of groups, normal subgroups and direct sum of groups; homomorphism and isomorphism between groups; classification of finite abelian groups; and applications of Sylow’s Theorems. Introduces rings, ideals, polynomial rings, irreducible and prime elements of rings, unique factorization domains, fields and their extensions including finite fields. Prerequisite: admission to the MSMTH program.

MTH 551 Methods of Applied Mathematics (3-0-3). Covers integral equations, Volterra and Fredholm type equations, relation to differential equations, solutions by Neumann series, Green’s functions, asymptotic analysis of solutions, and perturbation techniques with eigenvalue problems. Prerequisite: admission to the MSMTH program.

MTH 555 Loss and Risk Models (3-0-3). Covers severity models, frequency models, aggregate models, the impacts of coverage modifications, and risk measures. Prerequisite: admission to the MSMTH program.

and metric spaces. Introduces algebraic topology: homotopy, fundamental groups, covering spaces and applications such as the Brouwer Fixed Point theorem and the Borsuk-Ulam theorem. Prerequisite: admission to the MSMTH program.

**MTH 565 Numerical Analysis (3-0-3).** Covers interpolation, numerical evaluation of definite integrals and solution of ordinary differential equations, stability and convergence methods, and error estimates. Prerequisite: admission to the MSMTH program.

**MTH 570 Optimal Control Theory (3-0-3).** Introduces deterministic optimal control. Covers examples involving calculus of variations, optimal trajectories, and engineering control problems. Prerequisite: admission to the MSMTH program.

**MTH 595 Seminar (1-0-0).** Explores the planning, realization and presenting of research projects. Provides a unique forum for the students to discuss mathematical research and interact with the faculty. Covers a wide variety of contemporary topics from different research areas in mathematics and statistics. Discusses the requirements for preparing and writing a thesis. Graded as Pass/Fail. Prerequisite: admission to the MSMTH program.

**MTH 599 Master’s Thesis (6 credit hours).** Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member from the department serving as advisor and thesis coordinator, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of department head; prerequisite/concurrent: MTH 595.

**TRA Statistics**

**STA 501 Advanced data mining: theory and applications (3-0-3).** Covers foundation and theory of supervised and unsupervised machine learning methods including linear and logistic regressions, regularization, neural networks, support vector machines, decision trees, ensembling, k-means and hierarchical clustering, principal component analysis, Naïve Bayes. Covers some related recent research topics. Requires Knowledge of probability theory and statistical inference and basic programming skills. Prerequisite: approval of department head.

**TRA English/Arabic/English Translation and Interpreting**

**TRA 500 Principles and Strategies of Translation (3-0-3).** Provides advanced training in principles and strategies of translation from English to Arabic and vice versa. A variety of text types are covered, ranging from legal to journalistic genres.

**TRA 503 Theoretical Models of Translation (3-0-3).** Provides a conceptual map of translation studies and outlines the various theoretical approaches and trends that impact the practice of translation. Introduces the range of factors that govern the process of translation and the theoretical underpinnings that have motivated different attitudes to translating and translations. Requires functional knowledge of Arabic and English.

**TRA 505 Interpreting and the Profession I: Consecutive Interpreting (3-0-3).** Provides high-level training in those interpreting skills most relevant to the translator at work. Provides advanced training in liaison and consecutive interpreting with a focus on professional standards and community needs. Presents theoretical insights into the process of interpreting and places them within an overall, practice-driven model of the process.

**TRA 509 Interpreting and the Profession II: Simultaneous Interpreting (3-0-3).** Builds on TRA 505 and provides high-level training in those skills most relevant to Simultaneous Interpreting (SI), including professional standards and international conventions as well as equipment simultaneous interpreters use. Theoretical insights into the process of interpreting are presented and placed within an overall, practice-driven model of the process. Prerequisite: TRA 505.

**TRA 510 Research Methods and Academic Writing (3-0-3).** Examines academic writing conventions and research methods. Addresses quantitative and qualitative research approaches. Deals with the requirements of preparing/writing MA theses.

**TRA 512 Terminology, Arabization and the Translator (3-0-3).** Introduces the field of terminology and reviews it within the work of the translator. Explains term formation, standardization, term banks and coordination, among others. Reviews the process and problems of Arabization and its impact on translation into Arabic. Demonstrates the application of theoretical framework of terminology and Arabization on translation work.

**TRA 557 Translation of Administrative and Legal Documents (3-0-3).** Addresses the practical translation of administrative and legal documents such as contracts, certificates, court and police documents, laws, and more. Analyzes specialized and diplomatic language of administrative and legal documents in the context of translation and market requirements. Prerequisite: TRA 500.

**TRA 558 Contrastive Linguistics and Translation (3-0-3).** Deals with how English and Arabic compare and contrast at various levels of linguistic organization: phonology, morphology, syntax and semantics. Promotes a discourse pragmatic perspective, together with a functional approach to the lexicogrammar to look at the way texts are organized functionally. Requires functional knowledge of Arabic and English.

**TRA 560 Audiovisual Translation (3-0-3).** Introduces different genres of audiovisual translation. Includes the semiotic, linguistic and cultural issues involved in multimedia productions and their translation. Covers translating the scripts of various cinema and TV productions into and out of Arabic and English and deals with the linguistic and cultural problems of audiovisual translation. Introduces research areas in audiovisual translation. Prerequisite: TRA 500.

**TRA 580 Translating Quranic Pragmatics (3-0-3).** Pursues three major lines of enquiry: pragmatics from a textual perspective, Arabic rhetoric (balagha) from a pragmatic perspective, and translation studies from the perspective of preserving textual pragmatics in translating the Holy Quran into English. Emphasizes the practical aspects and hands-on experience in dealing with sacred sensitive texts in general and the Quranic text in particular. Prerequisite: TRA 500.

**TRA 610 Intercultural Communication and Translation (3-0-3).** Addresses the interface between culture and translation in intercultural communication between Arabic and English. Examines macro and micro culture and the translational strategies used in cross-cultural communication through translation. Prerequisite: approval of department head.

**TRA 630 Practicum (0-0-0).** Provides the opportunity for practical hands-on experience in translation and/or interpreting. Involves working within a translation and/or interpreting organization and reporting back weekly to the practicum supervisor over a period of four weeks. Graded as Pass/No
Pass. Prerequisite: approval of department head.

**TRA 699 Master’s Thesis (6 credit hours).** Requires completion of an extended piece of individual research on a topic within translation/interpreting studies, or an extended translation (c. 5,000 words) and a commentary, chosen in consultation with the thesis faculty supervisor. Emphasis is placed on the theoretical and practical aspects of translating or interpreting. The thesis must be completed within two consecutive academic semesters. An extension may be allowed if a candidate presents acceptable mitigating circumstances. The thesis is defended to the satisfaction of a committee. Graded as Pass/No Pass. Prerequisites: TRA 500, TRA 510, good academic standing and approval of department head.

### Special Topic Courses

**Special Topic (1 to 4 credit hours).** Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 594 or 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the college during registration.
College of Engineering

Courses with titles in italic are available to undergraduate students in the Accelerated Master’s Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master’s Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

BME Biomedical Engineering

BME 511 Human Anatomy and Physiology (3-0-3). Provides an overview of the human body structures and their functions. Covers the basic structure of cells, tissues, anatomical body organization, and several organ systems including the cardiovascular, nervous, sensory, digestive, skeletal, muscular and urinary systems. Highlights the structure-function relationships and how abnormalities in structure and/or function of tissues and organs lead to diseases. Presents engineering approaches for the diagnosis and prevention/treatment of various diseases. Prerequisite: admission to the MSBME program.

BME 533 Microfluidics and Lab-on-a-Chip Devices (3-0-3). Covers liquid manipulation on the microscale and introduces the field of Lab-on-a-Chip. Includes the following topics: laminar flow inside microchannels, hydraulic circuit analysis, electric double layer, electroosmotic flow, electrowetting on dielectric and direct microfluidics. Introduces microfabrication techniques including thin film deposition, photolithography and soft lithography. Prerequisite: admission to the MSBME or MSME program.

BME 541 Biomedical Measurements and Devices (3-0-3). Covers biomedical sensors and transducers, signal acquisition, amplifiers and real-time biomedical signal processing, measurement of biopotentials, blood flow and pressure, chemical biosensors and clinical laboratory instrumentation. Prerequisite: admission to the MSBME program.

BME 543 Biomedical Imaging Technologies (3-0-3). Introduces several medical imaging modalities, including X-ray imaging, computerized tomography, magnetic resonance imaging, ultrasound imaging and positron emission tomography. Explores the clinical applications for the medical imaging modalities. Prerequisite: admission to the MSBME program.

BME 544 Neuroengineering (3-0-3). Covers field potential generation, electrode design and electrophysiological neuroimaging. Introduces seizure detection and prediction of epilepsy, and quantitative assessment of brain injury and spinal cord injury. Includes deep brain stimulation, visual prosthetics, cochlear implants and brain machine interface. Prerequisite: admission to the MSBME program.

BME 551 Biofluid Mechanics (3-0-3). Cover the flow of biofluids, measurement methods and modeling for biomedical engineering applications. Applications include respiratory flow, blood flow in physiological and in artificial environments, pulse propagation and rheology of blood flow in the microcirculation. Prerequisite: admission to the MSBME program.

BME 552 Drug Delivery (3-0-3). Discusses cells signaling mechanisms. Introduces the calculations of drug dosages, drug clearance and receptor binding kinetics. Explains the various ways a drug can be administered to the body, and discusses various types of drug delivery administration paths including ingestion, inhalation, surgical implantation, transdermal, intravenous injection, peritoneal, pulmonary and targeted routes. Researches different targeting techniques and drug delivery carriers. Models pharmacokinetics in the human body. Requires undergraduate-level knowledge in organic chemistry. Prerequisite: admission to the MSBME program.

BME 561 Healthcare Operations Management (3-0-3). Covers topics in the application of quantitative and operations research techniques to healthcare planning, control and decision. Includes scheduling, productivity, decision making, quality management, project management, supply chain and inventory management, and financial performance. Prerequisite: admission to the MSBME program.

BME 562 Healthcare Planning and Risk Management (3-0-3). Covers how to plan for new or existing health services, programs or facilities. Presents role of health planner, managers, providers and governing boards. Introduces the concept of risk management in health. Provides a historical perspective on the development of healthcare risk management, the role of the healthcare risk manager, the principles of healthcare risk management and the connection between risk management, quality improvement and corporate compliance in various healthcare settings. Covers practical approaches to healthcare problems using case analysis of actual healthcare projects and programs. Requires basic knowledge in math and management. Prerequisite: approval of the program coordinator.

BME 571 Biomechanics Engineering (3-0-3). Provides an overview of musculoskeletal anatomy, the mechanical properties and structural behavior of biological tissues, and biodynamics. Includes application of stress and strain analysis to biological tissues, analysis of forces in human function and movement, energy and power in human activity, and introduces modeling viscoelasticity of tissues. Covers classification and bulk properties of implantable materials. Prerequisite: admission to the MSBME program.

BME 572 Biomaterials Engineering (3-0-3). Gives students the background concepts in biology, biochemistry and medicine relating to biomaterials. Covers the fundamental classes of materials used in medicine, foreign body reactions to biopolymers, and bioceramics. Discusses the degradation of materials in a biological environment, and outlines methods used for biomaterial testing and implant sterilization. Prerequisite: admission to the MSBME program.

BME 581 Biomedical Informatics (3-0-3). Gives students the theoretical and practical knowledge in the application of informatics in healthcare. Emphasizes data management issues in healthcare, gives students practical experience and introduces the principles of developing, implementing, and training projects in healthcare informatics. Prerequisite: admission to the MSBME program.

BME 694/695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems.
Addresses ethical issues in biomedical engineering. Graded as Pass/Fail. Prerequisite: admission to the MSME program.

**BME 699 Master's Thesis (9 credit hours).** Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: approval of the program coordinator; prerequisite/concurrent: BME 695.

**CHE** Chemical Engineering

**CHE 510 Transport Phenomena (3-0-3).** Covers mechanisms of molecular transport; momentum, heat and mass transfer analyses; shell and the equations of change; mathematical solutions using separation of variables, Laplace transform and similarity solutions for solving PDDES; dimensional analysis; flow of inviscid fluids and potential flow of heat in solids; boundary-layer theory. Requires background in chemical engineering. Prerequisite: approval of the department head.

**CHE 511 Advanced Chemical Engineering Thermodynamics (3-0-3).** Investigates advanced concepts in thermodynamics. Includes in-depth study of the following topics: fundamental laws of thermodynamics, equations of state, property relations for pure materials and mixtures, phase equilibria and intermolecular forces. Requires background in engineering thermodynamics. Prerequisite: approval of the department head.

**CHE 512 Advanced Kinetics and Reactor Design (3-0-3).** Covers the following principles of chemical reaction and reactor analysis and design: non-elementary reaction kinetics, deviations from ideal reactor performance, fundamentals of catalytic chemical reactions, coupled chemical kinetics and transport phenomena in fluid-solid reaction systems, heterogeneous non-isothermal reactor design, design and analysis of multiphase chemical reactors, dynamics and stability of heterogeneous chemical reaction systems. Requires background in undergraduate reaction engineering. Prerequisite: approval of the department head.

**CHE 594/CHE 694 Special Topic in Chemical Engineering (1 to 4 credit hours).** Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

**CHE 610 Catalysis and Reaction Engineering (3-0-3).** Introduces the fundamental concepts underlying catalytic processes and their application in reactor design. Covers the following topics: molecular theories of adsorption and surface reactions on catalysts; catalyst characterization techniques; transport in catalysts and shape selective catalysts; and applications in fixed-bed catalytic reactors, fluidized bed reactors and multiphase reactors. Prerequisite: admission to the MSChE program.

**CHE 611 Biomedical Engineering and Biotechnology (3-0-3).** Explores chemical engineering concepts related to the human body. Covers the following topics: body material balances, blood properties and rheology, circulatory dynamics, neuroprosthetics, body heat exchange, body thermoregulation, heat transfer in tumors, pharmacokinetic models, non-invasive imaging, orthopedics, biomaterials, membrane transport, tissue engineering and drug delivery systems. Assumes a basic understanding of physiological functions. Prerequisite/concurrent: CHE 510.

**CHE 613 Advanced Materials Science (3-0-3).** Introduces advanced materials for engineers, emphasizing process-structure-property relations and strengthening of materials, phase transformations and mechanical properties. Covers concepts in materials science, engineering and technology dealing with traditional and advanced materials, surface science and engineering, nanotechnology and processing of engineering materials, evaluation and standards. Requires undergraduate background in material science. Prerequisite: approval of the department head.

**CHE 614 Environmental Engineering (3-0-3).** Provides a review of fundamentals, applied knowledge and recent advances in environmental engineering. Covers the following topics: causes of environmental pollution; environmental regulations; mass and energy balance for environmental systems under steady state and transient conditions; and contaminant transport in air, water and solids. Focuses on microbiology and reaction kinetics related to the environment and the application of environmental principles to water and wastewater treatment, air pollution control and solid waste management. Prerequisite: admission to the MSChE program.

**CHE 615 Particle Technology and Fluidization (3-0-3).** Covers advanced topics in particle technology and fluidization. Includes the following topics: particle processing technology and characterization, design of fluidized beds, unit operations used to process powders and particles, and operations to modify particle properties. Requires background in fluid flow. Prerequisite: approval of the department head.

**CHE 695 Seminar (1-0-0).** Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSChE program.

**CHE 698 Professional Project (3 credit hours).** Requires an approved professional project on selected area of chemical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CHE 695.

**CHE 699 Master’s Thesis (9 credit hours).** Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CHE 695.

**CMT** Construction Management

**CMT 500 Management of Construction Projects (3-0-3).** Covers both the fundamental concepts and the contemporary applications of construction management. Covers construction contracts, bidding, delivery methods, construction funding, changes, claims, disputes, productivity, ethics and safety. Covers the development of project execution plans. Utilizes digital data communication tools and software to manage construction projects. Provides the opportunity to simulate construction management problems and apply acquired skills in their solution through case studies and team projects. Prerequisite: admission to the MSCM program.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMT 510</td>
<td>Construction Automation (3-0-3)</td>
<td>Introduces automation technology in construction and the built environment, including all stages of the construction project life cycle, design, construction, operation and maintenance. Reviews computer aided engineering and design tools. Evaluates robot-oriented design and smart systems integration, assesses modular construction and efficiency techniques, and building operation systems. Project-based learning (PBL) techniques are used. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 520</td>
<td>Advanced Construction Scheduling (3-0-3)</td>
<td>Covers the application of planning, scheduling and control techniques critical to the success of construction projects, resource allocation and leveling, time-cost optimization, project monitoring, updated scheduling, contractual implications of construction schedules, analysis of time-related change orders and delays, schedule diagnostics, and advanced use of construction planning and scheduling software. Employs case studies from the construction industry. Prerequisite: admission to the MSCM program or MSCE program.</td>
</tr>
<tr>
<td>CMT 600</td>
<td>Cost Analysis and Control (3-0-3)</td>
<td>Discusses different types of estimating techniques in relation to various stages in a construction project. Covers productivity analysis, measurement of progress and techniques of cost control; responsibilities of different personnel in different aspects of cost control; the relationship between the degrees of accuracy of an estimate and the different stages of the construction project; and cost control, starting from the conceptual stage through the end of construction. Uses case studies to demonstrate the key concepts of cost analysis and control. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 610</td>
<td>Building Information Modeling (3-0-3)</td>
<td>Provides a thorough review of the concept of BIM and the development of digital programs principles and processes. Explores benefits, costs, risks and currently unsolved challenges in the area of BIM for developing client-facing integrated project information systems. Introduces Revit Architecture, BIM clash detections, basic technical product modelling and interoperability issues. Explores BIM as a driving force for innovation and sustainability. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 620</td>
<td>Construction Project Risk Management (3-0-3)</td>
<td>Covers the application of project risk and procurement planning, monitoring and control techniques critical to the success of construction projects, risk management strategy, risk identification, risk qualitative assessment, risk quantitative assessment, procurement planning, risk response planning, risk and procurement execution process, risk monitoring and control, procurement monitoring and control, closing risk and procurement, and use of risk analysis software. Employs case studies from the construction industry. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 630</td>
<td>Construction Contracting (3-0-3)</td>
<td>Covers the set of skills, knowledge and conceptual tools needed to successfully own or manage a construction company, as well as to undertake construction projects. Covers construction company ownership and organization, the bid process, bid documents, construction contracts, bonds and insurance, business methods, project management and administration, and construction ethics. Employs case studies from the construction industry. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 640</td>
<td>International Construction (3-0-3)</td>
<td>Covers various topics in international construction, including contracts, financial issues, financing options, cultural differences, legal considerations, negotiation strategies, international trade agreements, and project delivery systems. Uses case studies to supplement the course materials. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 650</td>
<td>Sustainable Infrastructure Management (3-0-3)</td>
<td>Covers the following topics: sustainable infrastructure planning for sustainable infrastructure projects, environmental and social impact assessment, life cycle assessment, economic and financial analysis, design and construction, asset management, operation and maintenance for infrastructure, smart technologies for infrastructure, risk management and disaster preparedness for critical infrastructure. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 660</td>
<td>Sustainable Development and Construction (3-0-3)</td>
<td>Discusses the construction industry within its multinational component. Analyzes the impact of construction activity worldwide and bridges the knowledge gap with sustainable development concepts and national economic indicators. Explains the difference between economic growth and economic development. Addresses the nature of construction projects and its influence on industry. Examines national competitiveness, human capital, labor markets, environmental outlook and future policies. Introduces the industry's importance in improving the human condition. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 665</td>
<td>Construction Safety Management (3-0-3)</td>
<td>Covers safety and health concerns in the construction worksite. Concentrates on safety process development and management in construction. Provides a comprehensive background in worksite hazard assessment, safety and health program development, and risk management in the construction industry. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 670</td>
<td>Construction Equipment Management (3-0-3)</td>
<td>Covers both the conceptual and quantitative methods in selecting and managing construction equipment. Analyzes various types of construction equipment including earthmoving equipment, lifting and loading equipment, equipment used in concrete and asphalt construction. Covers equipment selection, economic analysis, ownership and operating costs, depreciation, replacement studies. Includes use of simulation to optimize equipment selection. Prerequisite: admission to the MSCM program.</td>
</tr>
<tr>
<td>CMT 689</td>
<td>Professional Project (3 credit hours)</td>
<td>Requires completion of an approved professional project on a selected area of construction management. Requires demonstration of the ability to integrate the information and skills accumulated through rigorous written and oral communication. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the program coordinator.</td>
</tr>
<tr>
<td>CMT 699</td>
<td>Master's Thesis (9 credit hours)</td>
<td>Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisite: good academic standing and approval of the program coordinator.</td>
</tr>
<tr>
<td>COE 505</td>
<td>Cloud Computing Infrastructure (3-0-3)</td>
<td>Presents the theoretical and practical aspects of cloud computing. Covers key topics including web services, large-scale infrastructure management, business continuity and security. Examines frameworks, techniques and existing...</td>
</tr>
</tbody>
</table>
solutions that support the key characteristics of cloud computing such as elasticity, resource pooling and on-demand self-service. Studies recent research challenges in cloud computing infrastructure such as scheduling, fault tolerance and security. Requires undergraduate-level knowledge of object-oriented programming. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 530 Advanced Computer Networks (3-0-3).** Focuses on advanced topics in computer networking and performance modeling. Covers the following: performance modeling and simulation, congestion control and quality of service (QoS) techniques, overview of computer networks security, and recent advances in computer networks. Requires undergraduate-level knowledge of computer networks. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 533 Advanced Computer Architecture (3-0-3).** Covers techniques of quantitative analysis and evaluation of modern computing systems. Emphasizes the major component subsystems of high-performance computers: pipelining, instruction level parallelism, memory hierarchies, input/output and network-oriented interconnections. Requires an undergraduate course in computer architecture. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 555 Cyber Security (3-0-3).** Covers advanced topics in cyber security, including information security and risk management, disaster recovery planning, operations security, access control, applied cryptography and public key infrastructure, network security, and laws and regulations in computer security. Requires an undergraduate course in networking and computer security. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 570 Big Data and Analytics (3-0-3).** Covers the end-to-end process for big data analytics including Extract-Transform-and-Load (ETL), descriptive analytics, supervised and un-supervised learning methods, deep learning, and big data storage and clustering ecosystems. Includes model evaluation techniques. Prerequisite: approval of the department head.

**COE 594/COE 694 Special Topic in Computer Engineering (1 to 4 credit hours).** Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

**COE 632 Advanced Database Systems (3-0-3).** Covers the following advanced topics in database systems: file structures, indexing techniques, query processing and optimization, concurrency control and backup and recovery Extensible Markup Language (XML) databases and languages, and mobile databases and data mining. Covers advanced database concepts such as parallel and distributed databases, transaction management, commit protocols and replicated databases. Requires an undergraduate course in database systems. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 633 Advanced Internet Computing and Internet of Things (3-0-3).** Covers advanced topics in Internet computing and Internet of Things (IoT) including client-side and web-server technologies, Internet-specific big data technologies, edge analytics and resource off-loading, middleware, IoT architectures and IoT applications of deep learning. Requires basic knowledge of Internet programming. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 635 Optical Networks (3-0-3).** Covers the following concepts in optical communications and networking: single-mode and multi-mode fibers, fiber loss and dispersion, fiber nonlinearities, lasers and optical transmitters, photodetectors and optical receivers, single-channel system design, SONET/SDH networks, WDM components and networks design issues. Requires undergraduate-level knowledge of physics and data communication. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 636 Advanced Multicore and GPU Computing (3-0-3).** Covers software development on multicore systems and many-core systems, including CPUs, GPUs and hybrid systems. Covers performance metrics and performance prediction of parallel algorithms. Examines models of parallel computation and associated software architectures such as master-worker, pipelining, data-flow and streaming. Studies advanced load-balancing mathematical models and algorithms. Uses selected applications as case-studies as well as state-of-the-art software tools such as CUDA and OpenCL. Requires operating systems background and basic Linux/Unix experience. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 637 Advanced Machine Learning and Data Mining (3-0-3).** Presents the principles of machine learning and data mining. Covers key topics including data preparation and visualization, supervised and unsupervised learning, experimental validation and model interpretation. Examines various techniques from decision trees and rule induction to probabilistic methods and regression as well as association mining and clustering. Studies examples of data mining applications using state-of-the-art software such as R or Weka. Requires undergraduate-level knowledge of statistics and programming. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 639 Digital Video Compression (3-0-3).** Covers the theory and applications of digital video compression. Introduces lossless and lossy compression algorithms. Covers transform coding. Introduces international compression standards such as JPEG and MPEG. Examines digital video transcoding and error resiliency. Requires undergraduate-level courses in statistics and probabilities, and C/C++ programming. Prerequisites: admission to the MSCOE program and approval of the department head.

**COE 695 Seminar (1-0-0).** Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSCOE program.

**COE 698 Professional Project (3 credit hours).** Requires an approved professional project on a selected area of computer engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: COE 695.

**COE 699 Master’s Thesis (9 credit hours).** Requires completion of complete original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as
Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: COE 695.

**CVE Civil Engineering**

**CVE 520 Sustainable Construction and Methods (3-0-3)**. Covers several emerging sustainable constructions that have impact on new and existing infrastructures. Introduces design concepts related to advanced composites by combining two or more new materials including advanced concrete material, fiber reinforced matrix, cementitious composites, and heavy concrete. Covers principles and applications of building and heavy construction methods including safe formwork, sustainable/green concrete and methods for the built environment. Requires an undergraduate course on reinforced concrete design or equivalent course. Prerequisites: admission to the MSCE program or MSCM program, and approval of the department head.

**CVE 521 Finite Element Method for Solids and Structures (3-0-3)**. Introduces the theory and application of modern structural analysis. Emphasizes finite element formulations for truss, frame, plate stress, plate strain and axisymmetric problems. Covers variational principles and isoparametric formulation. Introduces fundamentals of nonlinear analysis concepts. Covers computer modeling and practical analysis of large structural systems. Requires undergraduate courses on theory of structures or mechanical design or equivalent. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 522 Advanced Water Resources Engineering (3-0-3)**. Presents advanced hydrologic and hydraulic principles in planning, modeling and designing storage, irrigation, drainage, flood control and related water resource facilities. Covers the following topics: unsteady and non-uniform flow, conveyance channels and spillways, control and diversion structures, outlet works, energy dissipation, hydraulic machinery, flow measurements and reservoir hydraulics. Employs applicable case studies. Requires background in water resources engineering. Prerequisite: admission to the MSCE program and approval of the department head.

**CVE 524 Design of Strengthened Concrete Structures (3-0-3)**. Covers basic mechanics of composites. Introduces different strengthening methods for existing reinforced and prestressed concrete structures. Covers general design philosophies using relevant codes; strengthening of structural elements in flexure, shear, axial and combined loadings; emphasizes the use of computers in the analysis and design of concrete structures strengthened with composites. Requires an undergraduate course on reinforced concrete design. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 525 Structural Earthquake Engineering (3-0-3)**. Introduces structural dynamics of single and multi-degree-of-freedom (SDOF/MDOF) systems. Provides an overview of how earthquake causes and effects are traced from source to structure, as well as features and representations of strong ground motion. Presents pseudo-static and dynamic nonlinear analyses for quantifying the response of structural systems and components. Explores estimation of structural damage and hysteretic damping from inelastic deformations and rotations. Covers assessments of structural integrity and stability during seismic events. Introduces performance-based earthquake engineering (PBEE), incremental dynamic analysis (IDA) and structural fragility relationships. Requires background in dynamics, structural analysis and ODE. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 526 Advanced Structural Steel Design (3-0-3)**. Covers behavior and design of connections and members used in steel and composite structures including bolted and welded connections under shear and combined forces; simple shear connections, partially restrained and fully restrained moment connections; composite beams, composite columns, and built-up plate girders. Introduce seismic provisions for design of steel structures. Requires background in structural steel design. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 527 Optimization Techniques for Civil Engineering Systems (3-0-3)**. Introduces operations research (OR) techniques and their applications in civil engineering systems. Focuses on network problem, transportation models, formulation of transportation models, formulation of standard assignment problems, and shortest path models. Includes the use of software packages for solving Operations Research problems. Prerequisite: admission to the MSCE program.

**CVE 531 Dynamics of Machine Foundations (3-0-3)**. Introduces industrial machines, dynamic loads on foundations and types of foundations for industrial machines. Reviews major laboratory and field tests for evaluation of dynamic properties of soils. Introduces calculation of stiffness and damping coefficients for horizontal and coupled modes of vibrations. Covers design of shallow and deep foundations of vibrating machines and shock producing machines, and base isolation systems. Prerequisite: admission to the MSCE program.

**CVE 551 Wastewater Treatment (3-0-3)**. Covers wastewater characterization; different stages in wastewater treatment; preliminary, primary, secondary and tertiary treatment of wastewater; sludge treatment and disposal; small wastewater treatment systems; ecological wastewater treatment systems; and site visits to wastewater treatment plant(s). Prerequisites: admission to the MSCE program.

**CVE 572 Satellite Remote Sensing (3-0-3)**. Covers the concepts of satellite remote sensing, spectral reflectance, electromagnetic radiation, aerial photography, image interpretation and analysis, image enhancement, land observation satellite systems, filtering, image rectification, land use/land cover mapping, and examples of case studies in civil engineering and urban planning. Prerequisite: admission to the MSCE or MSCM or MUP programs.

**CVE 594/CVE 694 Special Topic in Civil Engineering (1 to 4 credit hours)**. Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

**CVE 621 Analysis and Design of Tall Buildings (3-0-3)**. Covers design strategies for tall buildings. Covers the following topics: structural analysis of tall buildings subjected to gravity and lateral loads; wind and earthquake loads determination based on design codes; differential shortening effects and column length corrections; stability of tall buildings and P-Delta effects. Introduces wind-tunnel techniques, progressive collapse resistance design and structural fire resistance design. Emphasizes the use of computer methods and modeling techniques for tall buildings. Requires background in reinforced concrete and structural steel design. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 622 Physical and Chemical Processes in Water Treatment (3-0-3)**. Explores theoretical and engineering aspects of chemical and physical phenomena and processes.
applicable to the removal of impurities from water. Includes advanced analysis and design of water treatment processes. Covers the following topics: mixing, mass transfer, chemical kinetics, oxidation-reduction, separation processes, disinfection, emerging contaminants and water reuse. Requires background in environmental engineering including water treatment. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 624 Advanced Geotechnical Engineering (3-0-3).** Covers advanced field investigation techniques and their use in geotechnical engineering problems. Includes topics of excavation support and retention systems, advanced cases of shallow and deep foundation, foundation for special cases, and tests for deep foundation under static vertical and lateral loads. Requires undergraduate courses in soil mechanics and foundation engineering. Prerequisite: admission to the MSCE program and approval of the department head.

**CVE 625 Highway Bridge Design (3-0-3).** Presents a modern approach to highway bridge design based on the American Association of State Highway and Transportation Officials (AASHTO), load factor resistance design (LRFD), and bridge design specifications. Covers identification of bridge components, classification of bridges, bridge loading, structural analysis, influence lines and envelopes, deck slab design, composite steel girder design and prestressed concrete girder design. Requires background in reinforced concrete and structural steel design. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 626 Bridge Management Systems (3-0-3).** Presents an approach to performance-based assessment of highway bridges for planning, programming and overall management of a transportation network. Course topics include bridge management modules with emphasis on inspection, structure condition assessment, load rating and decision-making process. Requires background in reinforced concrete and structural steel design. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 630 Designing with Geosynthetics (3-0-3).** Addresses various types of geosynthetics for geotechnical engineering. Covers physical and engineering properties of the geosynthetic materials, their applications and testing methods. Includes design of reinforced soil retaining walls and slopes, embankments on reinforced soft soils, geosynthetics applications in foundations, reinforced base and subgrade support, and applications in drainage and filtration. Requires undergraduate knowledge of geotechnical soil mechanics. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 651 Biological Treatment Process Control (3-0-3).** Presents bacterial growth kinetics in wastewater, biochemical oxygen demand (BOD) tests for wastewater treatment; design and control of activated sludge with nitrification process; determination of wastewater treatment process performance criteria and monitoring methods; nutrient removal and recovery; and aeration in water. Includes evaluation of wastewater treatment plant efficiency through sampling and testing of process parameters. Introduces the use of software in modeling wastewater treatment plant. Requires undergraduate course(s) on wastewater treatment or equivalent course(s). Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 663 Traffic Flow Theory (3-0-3).** Covers the fundamental properties of traffic flow: microscopic and macroscopic flow, microscopic and macroscopic speed, microscopic and macroscopic density, demand-supply analysis, capacity analysis, traffic flow models, network flow, shockwave analysis, queuing analysis and control of congested systems. Requires background in traffic engineering. Prerequisites: admission to the MSCE program and approval of the department head.

**CVE 695 Seminar (1-0-0).** Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of advanced research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSCE program.

**CVE 698 Professional Project (3 credit hours).** Requires an approved professional project on selected area of civil engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CVE 695.

**CVE 699 Master’s Thesis (9 credit hours).** Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CVE 695.

**ELE Electrical Engineering**

**ELE 540 Principles of Digital Communications (3-0-3).** Reviews probability concepts and random processes. Covers representation of bandpass signals and systems, baseband and bandpass digital modulation schemes, memory-less and memory-based modulation schemes, power spectral density calculations, optimum receiver design and performance analysis over AWGN, and optimum detection in presence of uncertainty. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 542 Applied Electromagnetics (3-0-3).** Explores concepts and applications of Maxwell’s equations for electromagnetism. Topics covered include Maxwell’s equations, boundary conditions, power flow, wave equation and its solutions, plane wave propagation and polarization, reflection and transmission, auxiliary potentials, theorems of field calculations (uniqueness, image, reciprocity, duality and equivalence), transmission lines, waveguides, and antennas and radiation. Prerequisite: admission to the MSEE program.

**ELE 543 Analog Integrated Circuits Design (3-0-3).** Covers analysis and design of advanced integrated circuits. Explores topics such as device modeling, circuit layout, current mirrors, amplifiers design, noise analysis, bandgap voltage reference, opamp and OTA design, and filter circuits. Requires undergraduate-level knowledge in the area of electronic circuits. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 544 Advanced Signal Processing (3-0-3).** Explores topics such as signal representation and system response, signal sampling and reconstruction, convolution, transfer function and system characteristics, digital filter design and realization, adaptive filters, spectral analysis,
multirate signal processing, MMSE filters and array signal processing. Prerequisite: admission to the MSEE or MSBME or MSMTR programs.

**ELE 545 Power System Operation and Control (3-0-3).** Introduces economic operation, and unit commitment of power systems. Covers modeling of system components and control equipment, automatic control of generation and frequency regulation, and aspects of interconnected operation. Prerequisite: admission to the MSEE program.

**ELE 546 Advanced Power Electronics (3-0-3).** Covers operation and modeling of power electronic devices, DC/DC converters, single phase and three phase inverters, different type of PWM techniques, theory of space transformation, space vector representation and space vector PWM inverters. Includes DSP based control and implementation of power converters and power electronics applications in renewable energy systems. Prerequisite: admission to the MSEE program.

**ELE 547 Distributed Energy Resources in Smart Grids (3-0-3).** Covers operation, modeling, economics, and planning of different distributed energy resources such as dispatchable generation systems, photovoltaic energy systems, wind energy systems, energy storage systems, and electric vehicles. Includes introduction to smart grid, microgrids, and demand response concepts. Prerequisite: admission to the MSEE program.

**ELE 548 Photovoltaic Energy Systems (3-0-3).** Covers the following topics: physical and technological principles of photovoltaic (PV) energy systems, solar energy resources, assessment and measurement techniques for available insolation, comparison of on-grid and off-grid PV systems, power electronics converters for PV systems and cost assessment of PV systems. Requires undergraduate-level background in electronics and power. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 549 Optimization in Electrical Engineering (3-0-3).** Covers principles of various optimization models for real world engineering applications; methods for solving linear and nonlinear programming optimization problems in different electrical engineering fields; theory and methods for the solution of integer and mixed-integer programming optimization problems applied to electrical power and communication applications; sensitivity analysis; and introduction to heuristic optimization applications to electrical engineering. Requires undergraduate-level knowledge of calculus and linear algebra. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 594/ELE 694 Special Topic in Electrical Engineering (1 to 4 credit hours).** Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: admission to the MSEE program and topic specific. Lab/Tech fee may apply.

**ELE 641 Advanced Microwave Engineering (3-0-3).** Explores concepts related to microwave engineering and its applications. Topics covered include transmission-line theory, microstrip lines, Smith charts, impedance matching, microwave network analysis, microwave amplifiers, microwave filters, power dividers, radar systems and microwave radiometry, microwave measurements and calibration, and simulations using CAD tools. Requires an undergraduate course in electromagnetics. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 644 Dynamics and Control of Electrical Drives (3-0-3).** Covers dynamic models of DC and AC machines, torque and speed control of DC motors, PWM inverters, scalar control, field-oriented control, and direct flux/torque control of induction motors. Prerequisite: admission to the MSEE program.

**ELE 645 High Voltage Engineering (3-0-3).** Covers the following topics: destructive and non-destructive testing of power system components; breakdown mechanism of gas, liquid and solid insulating materials; generation and measurement of high-voltage AC and DC and impulse voltages and non-destructive testing such as surface and internal discharges, capacitance and loss factor. Prerequisite: admission to the MSEE program.

**ELE 646 Radio Frequency Integrated Circuits (3-0-3).** Covers design of advanced radio frequency integrated circuits as it applies to contemporary electronic systems. Includes RFIC systems and architectures, low-voltage MOS, transceiver complex circuits, RF signal processing, RF power amplifiers and linearization, PLL topologies, frequency synthesizers, phase noise analysis, layout considerations, packaging of RF circuits and design case studies. Use of software tools and analytical techniques for circuit design and simulations. Prerequisite: admission to the MSEE program.

**ELE 647 Digital Protection of Power Systems (3-0-3).** Covers digital relay hardware, phasor computations, frequency estimation techniques, digital protection algorithms, fault location techniques, signal processing and artificial intelligence for relays, relay testing, relay modeling and simulation. Prerequisite: admission to the MSEE program.

**ELE 648 Pattern Classification (3-0-3).** Covers description of the elements of pattern recognition systems, Bayesian decision theory and parameter estimation, maximum likelihood estimation, linear or discriminant analysis, dimensionality reduction techniques, neural networks, clustering techniques, and Gaussian Mixture Models. Provides a description of decision trees, support vector machines and Hidden Markov Models. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 649 Power System Transients (3-0-3).** Covers transient analysis, travelling waves on transmission lines, lightning and switching surges, insulation coordination, grounding and surge protection devices. Prerequisite: admission to the MSEE program.

**ELE 650 Deep Learning (3-0-3).** Explores the following topics: basics of machine learning, neural networks, deep convolutional neural networks, long short-term memory networks, autoencoders, convolutional autoencoders, variational autoencoders, Generative Adversarial Networks, Siamese networks, and recent developments in deep learning. Involves implementation of several projects and hence, laboratory training in the subject. Requires undergraduate-level knowledge of linear algebra and computer programming. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 660 RF Power Amplifiers for Wireless and Satellite Communications (3-0-3).** Introduces the theory and design principles of power amplifiers for modern wireless and satellite applications; circuit level design of linear and switching mode amplifiers; and system level design of advanced amplifier structures including load and bias modulations techniques. Covers power amplifiers characterization, modeling and linearization techniques. Requires undergraduate-level knowledge in electronics. Prerequisites: admission to the MSEE program and approval of the department head.

**ELE 695 Seminar (1-0-0).** Introduces research methodologies. Explores the planning and realization of research projects. Examines current research.
issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSESM program.

**ELE 698 Professional Project** (3 credit hours). Requires an approved professional project on selected area of electrical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: ELE 695.

**ELE 699 Master’s Thesis** (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis examining, and a final defense to the advisory committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: ELE 695.

**ESM Engineering Systems Management**

**ESM 520 Management for Engineers** (3-0-3). (Blended learning mode). Explores a full range of integrated topics for individuals in both public and private sector organizations who coordinate and manage engineering projects, personnel, resources and systems. Covers human resources, communication skills, leadership styles, team building, the basics of marketing management and financial management, and the management needs in multicultural and multinational environments. Integrates the core management principles with engineering experiences using case studies and applications. Prerequisite: admission to the MSESM program.

**ESM 535 Introduction to Management Science** (3-0-3). Introduces deterministic and stochastic operations research methods including formulation and applications of linear network and integer problems. Covers basic probability concepts, distributions, forecasting methods, Markov chains and simulation. Emphasizes problem formulation, solution methods using suitable software and interpretation of results. Uses various optimization, statistics, and simulation software to solve problems and case studies. Prerequisite: admission to the MSESM program.

**ESM 570 Project Management** (3-0-3). (Blended learning mode). Covers the elements of project management critical to the success of engineering projects: project management framework, strategic management and project selection, scope management, time management, cost management, time-constrained scheduling, resource-constrained scheduling, risk management, and project monitoring and control. Integrates and clarifies the principles and tools through case studies from a variety of disciplines. Prerequisites: admission to the MSESM program and approval of the department head.

**ESM 575 Advanced Engineering Economy** (3-0-3). (Blended learning mode). Covers the theory and application of advanced engineering economy principles and methods. Studies the evaluation of project, depreciation and taxes, cost estimation, sensitivity analysis, risk and uncertainty, capital budgeting, multi-attribute decision making, advanced asset replacement analysis and real option analysis. Includes case studies and a term project related to the topic. Prerequisites: admission to the MSESM program and approval of the department head.

**ESM 594/ESM 694/ESM 794 Special Topic in Engineering Systems Management** (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

**ESM 600 Research Methodology** (3-0-3). (Blended learning mode). Introduces the methodology of scientific research including research problem formulation and justification, critical literature review, definition and formulation of research questions, and selection research tools and methods. Covers quantitative, qualitative and mixed research methods; internal and external construct validity and reliability issues; introduction to quasi-experimental design and case study methodologies; effective academic writing using various style guidelines; delineation of research directions for the future, ethics, academic fraud and plagiarism. Prerequisite: admission to the MSESM program.

**ESM 615 Big Data and Business Analytics** (3-0-3). Introduces application of descriptive analytics, data mining and predictive analytical methods to address business problems. Covers analytical methods including nearest neighbor, classification trees, naive Bayes, linear regression, logistic regression, support vector machines, and TFIDF. Shows how to apply model evaluation techniques including cross-validation, attribute selection, pruning, and profit and AUC curves. Discusses alignment of data science applications to corporate strategy. Prerequisite: ESM535.

**ESM 625 Enterprise Resource Planning Systems** (3-0-3). (Blended learning mode). Provides an overview of ERP systems and their implementation in practice. Covers various applications within the enterprise framework such as supply chain, production, inventory management and material planning. Includes real examples on ERP implementation and hands-on experience using an ERP software. Prerequisite: admission to the MSESM program.

**ESM 630 Quality Engineering and Management** (3-0-3). Covers the techniques and applications of quality control and management. Includes total quality management, quality award models, service quality, statistical process control charts, process capability analysis, Taguchi methods, and six sigma. Includes case studies from both the service and industrial sectors. Prerequisite: ESM 535.

**ESM 636 Human Resources Management for Engineers** (3-0-3). Covers human resource planning processes, tools and techniques, job specification and methods of job analysis for engineering organizations. Describes the requirements and ethical context of HRM methods of recruitment, evaluation, career training and development programs, salary systems and employee benefits, HR information systems and international HR issues. Integrates HR management practices and methodologies with engineering experiences. Prerequisite: ESM 520.

**ESM 640 Supply Chain Management** (3-0-3). Explores key issues related to the design, planning and operation of supply chains. Covers supply chain structure, supply chain performance metrics, network design and facility location in a supply chain. Discusses aggregate planning, planning and managing inventory in a supply chain,
transportation, pricing and revenue management, green supply chain and supply chain risk management. Prerequisite: ESM 535.

ESM 644 Financial Management for Engineers (3-0-3). Provides engineers with financial management knowledge necessary for value-added decision making. Covers structure and analysis of financial statements, corporate valuation, capital structure, securities analysis and financial markets, and forecasting financial markets. Includes practical financial management case studies in technical organizations. Prerequisite: ESM 575.

ESM 660 Legal Aspects of Engineering (3-0-3). Introduces the fundamentals of the UAE legal system, rules of evidence, property laws (both tangible and IP), technology transfer regulations, product liability, and professional liability for engineers. Discusses partnering among organizations, business and government agencies, labor laws, international construction contracts, FIDIC, and insurance and surety industry regulations. Covers strategies for avoiding or terminating litigation, alternative dispute resolution techniques such as mediation, arbitration and mock trials, in addition to claims presentation and cost evaluation. Prerequisite: ESM 570 or approval of the department head.

ESM 670 Project Risk Management (3-0-3). Focuses on the process of risk management including risk management planning; identifying risks; qualitative risk analysis; quantitative risk analysis; risk response planning and monitoring and control. Covers the tools and techniques for managing risks associated with various stages of the project life cycle. Provides a methodology for a systematic approach to risk management in addition to the related ISO standards. Prerequisite: ESM 570.

ESM 675 Project Procurement Management (3-0-3). Covers elements of structured procurements, including procurement planning, competitive solicitations, negotiations, legal considerations of procurement, contract management and administration, dispute resolution, and procurement ethics. Discusses the standards of ISO 20400: sustainable procurement and ISO 44001: collaborative business relationship management systems. Includes an in-depth explanation of the roles of the procurement professionals on the project team. Prerequisite: ESM 570.

ESM 685 Capstone Course in Engineering Systems Management (3-0-3). Presents an opportunity to showcase accumulated theoretical and practical knowledge in ESM. The general intent of the engineering capstone is to demonstrate knowledge of the integrative aspects of ESM tools through rigorous written and oral communication of case analysis and a team project. Uses case studies to demonstrate the integrative aspects of ESM applications. Prerequisite: ESM 600.

ESM 699 Master’s Thesis (6 credit hours). Requires completion of original research work in a multidisciplinary area in engineering systems management. Requires demonstration of the ability to integrate the information and the skills accumulated through rigorous written and oral communication. The thesis is completed under the supervision of a faculty member serving as the thesis advisor, and a final defense to the examining committee is required. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head.

ESM 701 Research Methods (3-0-3). Equips PhD students with a good understanding of qualitative and quantitative research methods at both conceptual and applied levels to prepare them to undertake substantial and rigorous scholarly research work, particularly dissertation and research papers. Familiarizes students with basic tenets of research, knowledge, methods, and success in research. Includes problem formulation, literature review, hypotheses formulation, proposal preparation, and empirical testing techniques. Enables students to formulate empirical research using experimental or descriptive research approaches. Utilizes commonly used statistical models such as nonparametric association and correlation measures and Analysis of Variance to analyze and interpret actual data. Prerequisites: admission to the PhD-ESM program and approval of the program coordinator.

ESM 702 Multivariate Data Analysis (3-0-3). Discusses techniques for analyzing multivariate experimental and observational data. Provides a working knowledge of several multivariate data analysis techniques to conduct empirical research. Covers exploratory multivariate data analysis, multivariate analysis of variance, multivariate regression analysis, principal components analysis, factor analysis, clustering analysis, and structural equation modeling. Utilizes commonly used statistical software for data analysis, such as Minitab, STATA, and the R free open-source package. Prerequisites: admission to the PhD-ESM program and approval of the program coordinator.

ESM 710 Advanced Decision Making Analysis (3-0-3). Provides the necessary theoretical knowledge towards analyzing and making decisions. Covers multiple objectives, influence diagrams, decision trees, risk assessment and quantification, single and multi-attribute utility, techniques for multi-criteria decision making (MCDM) and game theory. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 711 Deterministic Optimization Techniques (3-0-3). Covers deterministic operations research techniques that support decisions in research. Includes advanced topics in large scale optimization, integer programming, non-linear programming, and meta-heuristic optimization techniques. Prerequisites: ESM 701, 702 and consent of the instructor.

ESM 712 Advanced Supply Chain Management (3-0-3). Covers leading edge topics in global supply chain management including latest supply chain strategies, technological advances in supply chain management, supply chain risk management approaches, sustainable supply chain, ethical issues in supply chain management, and humanitarian supply chain. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 713 Supply Chain Modeling (3-0-3). Explores how optimization techniques can support decisions in the design, planning and operation of a supply chain. Covers deterministic and stochastic models in supply chain management. Includes advanced topics in supply chain design, supply chain coordination, closed loop supply chains, supply chain risk and sustainability. Prerequisites: ESM 711 and consent of the instructor.

ESM 714 Modeling and Analysis of Logistics Systems (3-0-3). Discusses the modeling and analysis of logistics and physical distribution systems. Includes location and design of facilities, tactical and operational decisions related to warehousing, management of logistics systems and management of ports operations and container terminals. Prerequisites: ESM 711 and consent of the instructor.

ESM 720 Sustainable Development for Engineers (3-0-3). Covers both the rudimentary and radical concepts of sustainable development and economic growth in a social and environmental context. Discusses, analyzes and evaluates patterns of development. Investigates the impacts of engineering projects in local and international communities via well-structured research questions utilizing theoretical and empirical research techniques. Evaluates contemporary trends in
sustainable technology in relation to the different project settings. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 721 Sustainable Development and Global Competitiveness (3-0-3). Introduces students with technical backgrounds to the macro realm of sustainable development, international economics, and urban planning and regeneration. Highlights the role of multinational corporations and mega projects in global competitiveness. Presents the subtle overlap between design patterns, development, and regulations in sustainable development projects. Deliberates the latest UN sustainable development goals and their expected aftermath in the international setting. Uses case studies and research workgroups to demonstrate the comprehensive link between economic growth and social progress. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 722 Sustainable Analytics and Resource Management (3-0-3). Focuses on sustainability data analyses and covers current and innovative methodologies in optimal energy and water resource management in construction projects. Explores data-driven resource management techniques during design, construction, and operation. Utilizes regression analysis, economic impact analysis, and feasibility studies in answering research questions through a series of case studies and projects. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 723 The Living Building (3-0-3). Focuses on the Living Building Challenge performance areas. Introduces the "beyond regenerative" concept of an organic, living building envelope for commercial and residential construction. Explains the core construction practices in relation to net zero energy and net zero water techniques. Presents traditional and renewable grid balance techniques through a series of projects and seminars. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 724 Sustainable Ecosystems (3-0-3). Covers integrated ecological planning and sustainable land management in coastal ecosystems. Discusses fundamental concepts and practical quantitative problem-solving techniques dealing with contamination, environmental toxicology, and ecosystem turbulence due to manmade construction projects. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 725 Programs and Portfolio Management (3-0-3). Presents a view of managing projects from an organizational perspective. Discusses strategic alignment, project and program selection techniques, the role of effectively managing organizational assets through an enterprise project management office as a governance entity, portfolio management and program management. Covers schedule integration, resource management and portfolio risk management. Covers tools such as Analytic Hierarchy Process, Earned Value Management and Monte Carlo Simulation. Uses specific examples and case studies to explore and apply practices to create and manage portfolios of programs and projects to efficiently leverage organizational assets. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 730 Tools for Big Data (3-0-3). Covers software tools for manipulating, storing and analyzing Big Data in various formats like sensor and web logs, videos, speech recordings, images, emails, tweets, etc. Covers the use of data science software tools for Big Data manipulation, analytics and machine learning. Explains the use of MapReduce/Hadoop for scalable data processing in conjunction with Hive/Pig. Introduces NoSQL databases like MongoDB and CouchDB. Includes techniques for processing streaming real-time data. Discusses tools for visualizing large data and integration strategies for various Big Data tools. Prerequisites: ESM 701 and ESM 702.

ESM 731 Smart Cities Infrastructure and Services (3-0-3). Identifies and investigates smart cities major infrastructure pillars. Discusses smart cities physical layer and enabling technologies, developing smart cities conceptual model and multi-criteria assessment transformation models on SWOT analysis. Studies smart cities resources and services such as smart energy, smart buildings, smart transportation, smart water, smart waste, smart physical safety and security, smart health care and smart education. Explores smart cities social impact and ethical issues. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 732 Networking Architectures for Smart Cities (3-0-3). Introduces communication networks for smart cities. Discusses architectures, models, protocols and the emerging new Internet of Things (IoT) paradigm. Addresses the principles of flow and congestion control, addressing, signaling switching and routing, multiple access approaches, convergence sublayer solutions and standards, physical layer technologies, and network security. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 733 Electronic, Social and Sensor Network Applications for Smart Cities (3-0-3). Covers the foundations of electronic, social and sensor network applications including infrastructure, sensor network layers with special emphasis on sensors and mobile devices. Explores harvesting and processing techniques for large-scale near real-time data from smart cities. Discusses the role of Geographical Information Systems (GIS) and associated spatial analysis. Covers design of networks for capturing resource consumption and mobility patterns. Discusses the use of statistical and big data techniques to improve city services based on harvested data, and business models for sustainable deployment of smart city applications. Covers Ethics of data-driven urbanism. Includes case studies in selected areas of learning, recreation, energy, production, and health. Prerequisite: ESM 730.

ESM 734 Trust and Security for Smart Cities (3-0-3). Covers advanced security and trust concepts and implementation in wired and wireless computer networks and computer systems especially in the context of smart cities. Includes malware defenses, impact of channel fragility, node mobility, cooperative functionality, and resource constraints on security and trust at the different layers of the Internet protocol stack. Discusses special topics in privacy of personal data such as mobility patterns, resource consumption (food, water, energy) and individualized health profiles. Prerequisite: ESM 731.

ESM 740 Advanced Quality Engineering (3-0-3). Covers emerging issues with quality engineering and management such as innovation, happiness, and process re-engineering with a focus on both quantitative and qualitative analytical skills essential to conducting research. Examines organizational development and deployment of service management systems utilized in achieving service quality. Includes analysis of business case, enablers, and detractors of Six Sigma and quality awards deployment in both manufacturing and service sectors through critical articles reviews. Prerequisites: ESM 701, ESM 702 and consent of instructor.

ESM 741 Organizational Performance Management (3-0-3). Explores traditional and contemporary Performance Management (PM) frameworks and models at the organization level, unit level, and the individual level. Focuses on designing PM systems that integrate strategy, execution, methodologies, and risk. Details the design of the added-value PM systems including goals and objectives, the operational process,
support process, evaluation and control, and organization behavior. Covers PM measurements system’s design and analysis using the various Key Performance Indicators, Key Risk Indicators, and Key Control Indicators. Includes PM implementation pitfalls and Critical Success Factors. Prerequisites: ESM 701 and ESM 702.

ESM 742 Strategic Human Resources Management (3-0-3). Explores how Human Resources Management (HRM) policies and procedures can add value to an organization. Covers state-of-the-art HMR approaches to become a strategic partner in improving resource utilization and help companies achieve their goals. Includes the processes of developing and implementing human resources (HR) strategies to promote a healthy social and psychological environment for the workforce. Discusses the link between HRM and outcomes at the firm and individual level; the roles and capabilities of the HR department and of individual HR professionals; and HRM in multinational corporations, comparative HRM, and global mobility. Examines the particularities of HRM in the public sector and in the GCC countries. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 743 Strategic Management (3-0-3). Covers analysis of internal and external environments of an organization. Explores the development of appropriate strategies, objectives, and key performance indicators (KPIs). Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 790 Qualifying Examination (0-0-0). Includes written and oral exams to test breadth of knowledge, understanding of fundamentals, and ability to perform independent research work in an engineering systems management specific area. Can only be repeated once with approval of the VPRGS. Graded as Pass/Fail. Prerequisites: completion of 12 credit hours including ESM 701 and ESM 702, good academic standing and approval of the program coordinator.

ESM 795 Doctoral Seminar (1-0-0). Provides a unique discussion forum for interaction with a diverse group of faculty from the different departments of the College of Engineering, as well as outside presenters. Encompasses a wide variety of pertinent topics from different ESM research areas. Graded as Pass/Fail. Prerequisite: admission to the PhD-ESM program.

ESM 799 Dissertation (a minimum of 24 credit hours). Includes the preparation, presentation and defense of the research proposal, as well as the write-up, presentation and defense of the dissertation. Graded as Pass/No Pass. Prerequisites: Qualifying Examination, DAC appointment and approval of the program coordinator.

MCE 540 Advanced Dynamics (3-0-3). (Formerly ESM 650). Covers the following topics: kinematics and kinetics of three-dimensional rigid bodies and multibody systems, momentum and energy methods, and holonomic and non-holonomic constraints. Introduces Hamilton’s principle for holonomic systems, Lagrange’s equations, relativistic dynamics, central force motion, Euler equations of motion, Hamilton’s equations and phase space, and the Hamilton-Jacobi equation. Requires undergraduate background in dynamics. Prerequisite: admission to the MSME program and approval of the department head.

MCE 550 Mechanical Systems Design (3-0-3). Introduces the design methodology applicable to mechanical systems. Includes the following topics: specialized design methods such as design for manufacture, design for reliability and life cycle design; applications of optimization techniques; and finite element analysis to solve typical mechanical engineering problems. Prerequisite: admission to the MSME program.

MCE 551 Advanced Materials Science and Engineering (3-0-3). (Formerly MCE 651). Explores advanced topics in materials science. Covers the following topics: fatigue, fracture, experimental techniques, nondestructive evaluation, inelastic behavior, and the effect of processing and environmental conditions on mechanical properties. Requires undergraduate background in materials science or equivalent. Prerequisites: admission to the MSME program and approval of the department head.

MCE 552 Modeling and Simulation of Mechanical Systems (3-0-3). Addresses the importance of modeling and simulation and the interface between computer models and actual processes. Covers the formulation of systems of equations representing linear and non-linear mechanical systems behavior, and black box modeling of mechanical systems such as artificial intelligence schemes. Employs commercial software applied to the different fields of mechanical engineering. Prerequisite: admission to the MSME program.

MCE 554 Advanced Fluid Dynamics (3-0-3). (Formerly MCE 654). Examines the conservation equations for viscous fluids and Navier-Stokes equations. Covers advanced topics such as Stokesian flow, boundary layer concept, laminar boundary layer equations and methods of solutions, theory of stability of laminar flows and introduction to turbulent flow. Prerequisite: admission to the MSME program; prerequisite/concurrent: NGN 550.

MCE 562 Modeling and Simulation of MEMS (3-0-3). Addresses micro-electromechanical systems (MEMS), their genesis and unique features, and some of their modeling and simulation challenges and needs. Examines the common sensing and actuation methods deployed in MEMS. Covers basic principles of nonlinear dynamics and stability analysis as applied to MEMS. Discusses concepts of mechanics and electric circuits necessary to develop effective lumped-parameter and distributed-parameter multi-physics models needed to simulate the behavior of MEMS devices and microstructures. Requires background in modeling of dynamic system and mechanical vibrations. Prerequisites: approval of the department head.

MCE 594/MCE 694 Special Topic in Mechanical Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: admission to the MSME program and topic specific. Lab/Tech fee may apply.

MCE 652 Advanced Topics in Manufacturing (3-0-3). Covers quantitative analysis and modeling of advanced manufacturing processes including high-speed machining, machining by abrasion, electrochemical and thermal erosion for ferrous and non-ferrous alloys. Introduces contemporary manufacturing topics including additive manufacturing, micro/nano manufacturing and
MCE 653 HVAC Systems Design (3-0-3). Aims at developing a solid background in the practical design and analysis of HVAC systems. Covers building load using transfer functions and energy estimation methods, renewable energy technologies (solar, wind, geothermal, photovoltaics) and their applications on HVAC systems, solar thermal energy and wind energy conversion systems, passive design strategies, HVAC system controls, thermal energy storage, absorption chillers, energy efficiency for buildings, and design of large commercial and industrial HVAC systems w/without renewable energy.

MCE 656 Advanced Fuel Cell System (3-0-3). Covers advanced modern-day fuel cell technologies and their application. Examines contemporary topics such as thermodynamics, transport phenomena, electrochemistry and performance characterization of various fuel cell types such as proton exchange membrane, solid oxide and direct methanol fuel cells. Requires undergraduate-level knowledge of thermochemistry and electrochemistry. Prerequisite: approval of the department head.

MCE 695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MS program.

MCE 698 Professional Project (3 credit hours). Requires an approved professional project on selected area of mechanical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: MCE 695.

MCE 699 Master’s Thesis (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: MCE 695.

MTR 501 Introduction to Mechatronics (2-3-3). Covers applied mechanical and electrical engineering principles used in mechatronics products. Introduces the modeling and analysis of electromechanical systems, hydraulic systems, signal processing and conditioning, power amplifiers and switches. Develops design skills in system integration using mechanisms, electronic devices, CAD tools, and information technology in order to create, test and verify mechatronics systems. Includes laboratory projects. Graded as Pass/Fail. Prerequisite: admission to the MS program.

MTR 520 Embedded Systems for Mechatronics (2-3-3). Explores microcontroller and microcontroller hardware and software architectures, microcontroller programming and interfacing with real-time mechatronic systems. Introduces new microcontroller-based devices and design of stand-alone embedded systems for mechatronics products. Includes labs and course projects. Requires basic background knowledge of C programming and digital electronics. Prerequisite: admission to the MS program.

MTR 540 Advanced Control Systems (3-0-3). Covers state variable models, design of control systems in state space, full state observers, reduced order observers, digital compensator design, state and output feedback control. Introduces stability of non-linear systems, Lyapunov stability, observer stability, and state-set stability. Requires undergraduate background in linear control systems or equivalent. Prerequisites: admission to the MS program.

MTR 550 Robotic Systems (2-3-3). Covers homogenous coordinates and transform representations, kinematic chains, Forward and Inverse Kinematics, differential kinematics: Jacobian computation, singular configurations, Motion planning in robotics, and robot control strategies. Prerequisite: admission to the MS program.

MTR 594/MTR 694 Special Topic in Mechatronics Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: admission to the MS program and topic specific. Lab/Tech fee may apply.

MTR 610 Automated Manufacturing Systems (3-0-3). Describes and demonstrates automated machine tools and machining cells. Covers basic machining center configuration and operation, machine tool controller, machining code generation, in-process sensing and control, cell controllers and system simulation. Prerequisite: admission to the MS program.

MTR 615 Artificial Intelligent Systems for Mechatronics (3-0-3). Covers artificial intelligent systems for mechatronics engineering, concepts of expert and fuzzy logic decision-making systems, fuzzy logic modeling and control, artificial neural networks, genetic algorithms, decision trees and applications. Prerequisite: admission to MS program.

MTR 644 Electric Drives for Mechatronics Systems (3-0-3). Provides an overview of modern electrical machines in terms of their dynamic and steady state behavior. Covers power electronic conversion and modulation principles, magnetic systems, dynamic models of AC and DC machines, and pulse-width modulated power electronic converters. Includes case studies with practical current control techniques. Prerequisite: MTR 501.

MTR 650 Applied Linear Estimation (3-0-3). Introduces linear algebra and presents a review of probability and stochastic processes. Introduces deterministic and stochastic least squares estimators. Defines the innovation process and its properties. Introduces state space models, Weiner-Kalman filters for scalar and vector processes as well as extended Kalman estimators, and non-linear parameter estimation. Introduces fast array algorithms. Includes a project that applies the estimation algorithms on mechatronics application case studies. Prerequisite: admission to the MS program.

MTR 670 Adaptive Control Systems (3-0-3). Reviews state space modeling of dynamic systems. Discusses linear time invariant (LTI) system stability, solving for system trajectory, observability, controllability and state feedback control. Introduces stability and solution of linear time-varying (LTV) systems. Covers Lyapunov stability theory, control and design of invariant sets, stability of non-autonomous systems, LaSalle extensions and Barbalat’s lemma. Covers direct and indirect model reference adaptive control (MRAC). Explores robustness of...
MRAC and disturbance rejection. Requires basic background knowledge of control systems. Prerequisites: admission to the MSMTR program and approval of the program coordinator.

**MTR 690 Mechatronics Design (2-3-3).** Covers actuators and sensors modeling and presents different types of modeling and simulation of mechatronic systems. Requires individual and team projects involving the development and integration of hardware and software into a smart system, which includes sensing, processing and controlling functions. Prerequisite: MTR 520; prerequisite/concurrent: MTR 695.

**MTR 695 Mechatronics Seminar (1-0-0).** Explores project planning development and realization, case studies of engineering systems design and realization, and current research topics in mechatronics engineering, including areas such signal processing, image processing, control, robotics, intelligent systems, computer vision and MEMS. Prerequisites: admission to the MSMTR program and approval of the program coordinator.

**MTR 699 Master’s Thesis (9 credit hours).** Requires completion of extended and original research work on a topic related to elements of computing, mechanics, electronics and intelligence. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the program coordinator; prerequisite/concurrent: MTR 695.

**NGN Engineering**

**NGN 500 Advanced Engineering Mathematics (3-0-3).** Covers analysis of linear and nonlinear physical systems described by ODEs and PDEs, Sturm-Liouville problems, tensors, partial differential equations of mathematical physics (wave, diffusion, Laplace, Poisson Equations), transform and integral methods for solving boundary and initial value problems for ordinary and partial differential equations. Prerequisite: admission to the MSBME or MSChE or MSCE or MSCoE or MSEE or MSME programs.

**NGN 505 Random Variables and Stochastic Processes (3-0-3).** Covers the following topics: random variables, transformation of functions of random variables, vectors of random variables, random processes: correlation and power spectral density, LTI systems with stochastic signals, Markov chains and queuing theory. Prerequisite: admission to the MSBME or MSCE or MSCoE or MSEE or MSME programs.

**NGN 509 Computational Methods for Engineers (3-0-3).** Covers numerical error analysis; solving system of linear and nonlinear algebraic equations; nonlinear regression and optimization techniques; numerical solutions of ordinary and partial differential equations; applications of numerical methods for engineering problems using MATLAB. Prerequisite: admission to the MSBME or MSChE or MSCE or MSCoE or MSEE or MSME programs.

**Special Topic Courses**

**Special Topic (1 to 4 credit hours).** Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 594 or 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the college during registration.
School of Business Administration

Courses with titles in italic are available to undergraduate students in the Accelerated Master’s Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master’s Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

ACC Accounting

ACC 510 Financial Accounting for Managers (3-0-3). Focuses on the meaning, analysis and interpretation of financial statements for the purpose of making managerial and investment decisions. Emphasizes the importance of communication and leadership for the practice of accounting. Graded as Pass/Fail. Prerequisite: admission to the MSA program.

ACC 520 Managerial Accounting (3-0-3). Explains the role of accounting information in facilitating the functions of management. Covers decision making, planning, performance evaluation, budgeting and international transfer prices. Graded as Pass/Fail. Prerequisite: admission to the MSA program.

ACC 530 Auditing for Managers (3-0-3). Introduces external and internal auditing concepts and practices that are relevant to managers as part of the entity’s corporate governance apparatus; suitable for those who have no background in accounting and auditing. Graded as Pass/Fail. Prerequisite: admission to the MSA program.

ACC 610 Topics in Financial Accounting (3-0-3). Focuses on contemporary financial reporting issues, including development of the conceptual framework as presented by the Financial Accounting Standards Board (FASB), contemporary accounting research and recent financial accounting pronouncements. Examines theories relevant for financial accounting and reporting. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 510.

ACC 611 Auditing and Attestation (3-0-3). Focuses on current developments in auditing and attestation standards as promulgated by the American Institute of Certified Public Accountants (AICPA). Covers international auditing standards promulgated by the International Federation of Accountants (IFAC) as well. Provides preparation for the CPA exam section on Auditing and Attestation. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 530.

ACC 612 Advanced Topics in Managerial and Cost Accounting (3-0-3). Addresses advanced issues in cost allocation and pricing strategies. Considers the various management control systems used by companies for strategy implementation and evaluation by applying financial and nonfinancial measurements. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 520.

ACC 614 Regulatory Environment in Accounting (3-0-3). Examines the sources, rules, regulations and laws covering business transactions including leases, contracts, loans, contingencies, commitments and purchases. Evaluates authoritative regulations and standards issued by the Securities and Exchange Commission (SEC) and AICPA. Emphasizes development of procedures for identifying applicable accounting issues and locating appropriate laws/standards. Restricted to MSA students who matriculated into the major.

ACC 615 Enterprise Database Systems and Analytics (3-0-3). Focuses on building information systems that meet multiple needs for transaction-level processing, control specification and financial statement preparation, while simultaneously supporting the needs of a variety of other decision-makers in finance, management, marketing and supply chain logistics. Emphasizes the design and use of conceptually modeled databases. Applies data analytics tools and techniques to enhance the decision-making process and improve internal and external audits. Restricted to MSA students who matriculated into the major.

ACC 616 Advanced Topics in Financial Reporting (3-0-3). Focuses on principles and elements associated with financial statements. Covers income measurement, valuation of assets and equities, long-term liabilities, stockholders equity, cash flow analysis and financial statements. Not open to students who have completed ACC 616. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 510.

ACC 620 Forensic Accounting and Fraud Examination (3-0-3). Considers fraud as a cost for businesses and society as a whole. Focuses on examining fraud committed by corporate crime. Addresses questions of why and how fraud is committed and identifies red flags that may indicate the presence of fraud. Examines methods for deterring, investigating and uncovering fraud schemes. Discusses empirical surveys on the extent and nature of occupational fraud worldwide, considering real-life cases in which managers are caught manipulating company records and committing widespread fraud. Restricted to MSA students who matriculated into the major.

ACC 622 Internal Auditing (3-0-3). Focuses on the theory and practice of internal auditing. Addresses the role of internal auditing in strengthening the corporate governance system in business and nonprofit organizations. Provides a foundation for accounting and auditing students to be objective professionals. Provides students with knowledge of the relationship between internal audit and corporate governance. Covers planning and performing the internal auditing engagement process. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 530.

ACC 623 Financial Statement Reporting and Analysis (3-0-3). Emphasizes the analysis of financial statements and related footnotes from the standpoint of the different users of financial reporting. Covers assessment of financial statements for fairness and completeness in reporting. Develops skills in using tools and in analysis and interpretation of financial reports for assessing financial performance of firms in relation to investment, lending and other financial decisions in a variety of business contexts. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 510.

ACC 628 Fraudulent Financial Reporting (3-0-3). Focuses on financial reporting schemes utilized to mislead investors and influence investment actions. Covers accounting methods employed to provide misleading information, as well as accounting standards used to induce fraudulent financial reporting behavior. Examines landmark fraudulent cases and their impact on society. Restricted to MSA students who matriculated into the major. Prerequisite: ACC 530.

ACC 695 Seminar (1-0-0). Covers the requirement for planning, conceptualizing and executing a professional research project. Provides a unique forum for exploring and discussing business research and its application to professional practice in a range of business fields. Familiarizes
students with a range of contemporary research topics and relevant research methodologies through interaction with faculty in a seminar-based setting. Graded as Pass/Fail. Restricted to MSA students who matriculated into the major.

**ACC 699 Professional Research Project (3-0-3).** Requires completion of original professional research work in the field of study. Requires the professional research project to be completed under the supervision of a faculty member from the accounting department serving as a professional research project advisor, and a final defense to the examining committee. Graded as Pass/Fail. Prerequisite: ACC 610, good academic standing and approval of department head; prerequisite/concurrent ACC 695.

**BUS 506 Introduction to Finance and Econometrics (3-0-3).** Covers financial statements analysis, risk and return, stock and bond valuation, and evaluation of capital projects. Introduces both cross section and time series, regression estimation and inference. Discusses data properties, detection and remedies of model violations, in addition to forecasting techniques. Graded as Pass/Fail. Restricted to MSF and PhD-BA Finance concentration students.

**BUS 507 Quantitative Analysis for Business Decisions (3-0-3).** Examines the decision-aiding tools that can be applied by managers to gain insight into decision-making problems, ranging from simple graphic displays of data to sophisticated statistical tests. Uses real-world data sets and PC-based software to describe sets of measurements, construct probability distributions, estimate numerical descriptive measures and build multiple regression models. Restricted to MBA students.

**BUS 701 Philosophical Foundations of Business Research (3-0-3).** Covers the philosophical foundations of social science research. Explores the different stages of the research process, including the formulation of a research problem, writing and publishing the research results. Presents key differences in qualitative and quantitative research, and explains the relationship between theory and practice. Restricted to PhD-BA students who matriculated into the major.

**BUS 702 Seminar in Business Administration (3-0-3).** Covers the different sub-areas of business administration including accounting, finance, management and marketing from a researcher’s perspective. Introduces students to the different theories, literature reviews and research areas in their respective fields. Uses an interactive seminar-based forum for students to gain knowledge of the main research challenges in, and across, these disciplines. Restricted to PhD-BA students who matriculated into the major.

**BUS 703 Advanced Applied Econometrics (3-0-3).** Builds a range of quantitative research skills using tools required to do empirical research. Covers a variety of methods commonly employed in empirical business research, including panel data, discriminant analysis, non-parametric methods, and introduction to GMM estimation techniques. Requires a strong background in quantitative methods. Restricted to PhD-BA students who matriculated into the major.

**BUS 704 Applied Time Series Analysis (3-0-3).** Examines the characteristics of time series data, moving average models and partial autocorrelation as foundations for analysis of time series data. Draws on the use of exploratory data analysis techniques to explore trends in time series data, forecast using time series data, implement ARMA and ARIMA time series models, and identify and interpret various patterns for intervention effects. Incorporates ARCH and AR models in multivariate time series contexts. Requires a strong background in quantitative methods. Restricted to PhD-BA students who matriculated into the major.

**BUS 790 Qualifying Examination (0-0-0).** Includes written and oral parts to test breadth of knowledge, understanding of fundamentals and ability to perform independent research work in business administration area relevant to the PhD-BA program. Graded as Pass/Fail. Can be repeated once with approval of the Vice Provost of Research and Graduate Studies. Prerequisite: completion of 18 credit hours of coursework, including six credit hours from the required concentration.

**BUS 799 Dissertation (a minimum of 27 credit hours).** Includes the preparation, presentation and defense of the research proposal, as well as the write-up, presentation and defense of the dissertation. Prerequisite: passing the Qualifying Examination and approval of the SBA Associate Dean for Graduate Studies.

**FIN**

**FIN 681 Advanced Financial Statements Analysis (3-0-3).** Provides a rigorous exposure to modern financial analysis and applications to business challenges in valuation, risk analysis, corporate investment decisions, and basic securities analysis and investment management. Covers earnings management models. Prepares for CFA Level 2. Requires background in business courses, including finance. Restricted to MSF students who matriculated into the major.

**FIN 682 Advanced Corporate Finance (3-6-3).** Covers advanced topics in corporate finance along three dimensions: investment, financing and corporate governance. Emphasizes the empirical evidence in the field of corporate finance, as well as the most recent developments in the field. Requires background in business courses, including finance. Restricted to MSF students who matriculated into the major.

**FIN 683 Applied Econometrics Methods (3-0-3).** Covers the evaluation of quantitative information and how to use data to answer quantitative questions in the financial economics field. Focuses on econometric techniques, including cross sectional and panel techniques, financial forecasting techniques and time series analysis. Builds competency in the use of various modeling procedures, including structural equation modeling (SEM), and ARCH and GARCH models. Requires background in business courses, including finance. Restricted to MSF students who matriculated into the major.

**FIN 684 Investment Analysis and Portfolio Management (3-0-3).** Covers quantitative techniques relating to financial market structure and financial asset valuation. Emphasizes key aspects of investment analysis and portfolio management, including arbitrage, portfolio selection and portfolio theory, equilibrium asset pricing (CAPM), fixed income securities and derivative pricing. Requires background in business courses, including finance. Restricted to MSF students who matriculated into the major and MBA students approved by department head.

**FIN 685 Advanced Asset Valuation (3-0-3).** Provides a rigorous exposure to different company valuation models, from fundamentals, to multiples, to cash flow valuation models. Covers cost of capital calculation techniques, and applies these concepts to different situations, including acquisitions.
private firms, public firms, financial distress and IPO. Includes material relevant to CFA Levels I, II and III. Prerequisite: FIN 681.

FIN 686 Pricing and Hedging of Financial Derivatives (3-0-3). Places emphasis on market operations and the valuations of forward, futures, swaps, and options contracts and their interrelations. Covers topics of trading strategies include hedging, arbitrage and speculation, and of market operations on stock index, interest rate instruments, and foreign currencies. Addresses binomial and Black-Sholes option pricing models, as well as recent innovations in derivative markets. Prerequisite: FIN 684.

FIN 687 Financial Markets and Institutions (3-0-3). Emphasizes the understanding of financial institutions, markets and instruments. Includes commercial banking, expansion process of money, central banking and other financial institutions, as well as the types of financial markets and instruments, and interest rates. Requires background in business courses, including finance. Restricted to MSF students who matriculated into the major.

FIN 688 Private Equity and Venture Capital (3-0-3). Provides a framework for understanding the venture capital and private equity industry in today’s finance. Explores the evolution of this asset class and the characteristics that contributed to its success. Analyzes the risk and return, analysis and valuation of high growth companies and the capital structure specific to venture backed companies. Prerequisite: FIN 681.

FIN 689 Risk Management (3-0-3). Covers risk management practices in the corporate world with special attention to financial institutions. Covers different topics in market risk and credit risk, as well as various types of risk faced by corporations, such as operational and liquidity risks. Prerequisite: FIN 684 (concurrency requires the approval of department head).

FIN 691 International Financial Management (3-0-3). Provides an overview of topics in international finance in the context of globalization and international trade and finance. Builds on the basic theories of exchange rate determination and how arbitrage leads to purchasing power and interest rate parity. Emphasizes the financial management activities of the multinational firm. Prerequisite: FIN 684.

FIN 692 Islamic Finance (3-0-3). Provides a critical understanding of Islamic finance and banking, including the foundation of traditional Islamic financial tools and practices and the development of modern Islamic banking and financial instruments and institutions. Relates the theory of Islamic finance to current development in Islamic banking and the finance industry. Examines the compliance of various financial products with Islamic (Sharia’a) law, and considers the risk factors associated with the Islamic banking and finance industry. Requires background in business courses, including finance. Restricted to MSF students who matriculated into the major.

FIN 699 Master’s Thesis (6-0-6). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/Fail. Prerequisites: good academic standing and approval of department head.

FIN 711 Finance Theory (3-0-3). Develops a firm foundation in financial theory and covers fundamental and complex issues in both asset pricing and corporate finance. Develops skills in the appraisal of finance theory and the critical assessment of key issues in finance. Restricted to PhD-BA students with a concentration in finance who matriculated into the major. Prerequisite: BUS 703.

FIN 712 Contemporary Issues in Financial Research (3-0-3). Examines a range of research areas in finance while focusing on empirical approaches to addressing research questions. Covers the event study approach, long-term returns calculations, cross sectional and panel approaches applied to areas such as capital structure, board of directors, IPOs and SEOs, agency problems, financial constraints and payout policies. Restricted to PhD-BA students with a concentration in finance who matriculated into the major. Prerequisite: BUS 702.

FIN 713 Advanced Topics in Financial Markets and Institutions (3-0-3). Covers several recent developments in banking and financial markets research that include financial crises, bank regulation, bank liquidity creation and monetary policy, and bank governance and efficiency. Restricted to PhD-BA students with a concentration in finance who matriculated into the major. Prerequisite: BUS 703.

FIN 714 Empirical Research Methods in Finance: Asset Pricing (3-0-3). Covers topics related to asset pricing including return predictability, testing traditional and modern asset pricing models, liquidity, short-selling, microstructure and portfolio evaluation. Restricted to PhD-BA students with a concentration in finance who matriculated into the major. Prerequisite: BUS 703.

FIN 715 Advanced Corporate Finance Research (3-0-3). Builds an integrated framework for understanding the issues in corporate finance. Introduces theoretical and conceptual scholarship on a given topic with a focus on identifying empirically testable hypotheses. Presents extensive empirical work on issues related to capital structure, payout policies, agency theory, bankruptcy and financial distress, mergers and acquisitions, executive compensation, IPOs and corporate governance and control. Restricted to PhD-BA students with a concentration in finance who matriculated into the major. Prerequisite: BUS 704.

FIN 721 Seminar in International Finance (3-0-3). Introduces topics related to international finance and international business. Focuses on multinational corporations’ risk management, corporate international diversification, foreign exchange markets, global portfolio flows, financial development issues and determinants, and foreign investments determinants. Prerequisites: FIN 711 and FIN 712.

FIN 722 Corporate Restructuring and Reorganization (3-0-3). Surveys leading academic research in the areas of corporate restructuring with a focus on the evaluation of the determinants and outcomes of corporate restructurings including mergers, acquisitions, divestitures, financial distress and recapitalizations. Prerequisite: FIN 711.

FIN 723 Advanced Topics in Corporate Governance and Compensation (3-0-3). Covers advanced topics in corporate governance and executive compensation. Particular emphasis is on the ownership structure of corporations, the role of institutional investors, the board of directors, incentive structures and executive compensation determinants, structure and outcomes. Prerequisite: FIN 711.

MBA Business Administration

MBA 601 Economics for Managers (3-0-3). Provides managers with a toolbox to analyze the micro and macroeconomic environments in which a firm operates, to facilitate informed decisions with or without uncertainty. Raises awareness of the importance of making sound business decisions compatible with the behavior of all
economic agents (namely, households, firms, government and the rest of the world) where markets provide a mechanism to achieve reconciliation among such agents. Admires the need for choice implied by the scarcity of resources in relation to wants. Restricted to MBA program, excluding Pre-MBA students.

MBA 602 Organizational Theory and Behavior (3-0-3). Applies management theory to factors that influence individual and group performance while incorporating current management theory and research. Emphasizes the total organization and its subsystems with topics including structure and design, organizational culture, communication, individual and group dynamics, teamwork, power and influence, decision-making, and the role of leadership. Restricted to MBA program, excluding Pre-MBA students.

MBA 603 Introduction to Business Analytics (3-0-3). Presents an overview of data driven decision-making. Emphasizes the business analytics life cycle of understanding the business problem, collecting and integrating data, preprocessing data, exploring and visualizing data, choosing modeling techniques and algorithms, evaluating the model, reporting to stakeholders, and deploying the model in an operational environment. Includes theoretical and conceptual explanation as well as practical instruction using business analytics software packages. Restricted to MBA program, excluding Pre-MBA students.

MBA 605 Financial Management (3-0-3). Covers financial theory and techniques of analysis, including valuation theory, theories of risk measurement, managing a firm’s investment decisions and capital structure, sources of financing for a firm, and financial planning and analysis. Prerequisite: MBA 610.

MBA 609 Operations and Supply Chain Management (3-0-3). Takes an analytical approach to solving problems in production and operations management. Explores basic principles, functions and concepts involved in the design, operation and control of operations in contemporary organizations as well as key elements of supply chain management. Covers development of operations strategy, the application of linear programming, quality management, supply chain design and procurement, inventory management, lean production, and introduces basic concepts of logistics and supply chain management ranging from supplier selection and collaboration, performance measurement along the supply chain, strategic outsourcing, just-in-time partnership and distribution, customer relationship management, logistics, procurement, inventory and warehousing strategies, and service supply chains. Prerequisite: MBA 603.

MBA 610 Financial Statement Analysis and Capital Budgeting (3-0-3). Introduces financial statement analysis and capital budgeting, including analysis of the balance sheet and shareholders’ equity; analysis of the income statement; analysis of the cash flows statement; analysis of growth and sustainable earnings; time value of money; discounted cash flow; risk and return; cost of capital; and capital budgeting. Restricted to MBA program, excluding Pre-MBA students.

MBA 613 Managerial Accounting (3-0-3). Explains the role of accounting information in facilitating the functions of management. Covers decision making, planning, performance evaluation, budgeting, cost control and international transfer prices. Restricted to the MBA program, excluding Pre-MBA students. Prerequisite: MBA 610.

MBA 614 Marketing in the 21st Century (3-0-3). Introduces current marketing management techniques and tools necessary for effective marketing decision-making. Provides global perspectives on marketing management and international marketing issues. Interactive learning techniques include the case method and active class participation. Incorporates issues such as ethics, minorities and the ecological environment. Restricted to MBA program, excluding Pre-MBA students.

MBA 618 Strategic Management (3-0-3). Focuses on developing and applying strategic management to successfully position organizations in a competitive global environment. Integrates previous course experiences to hone decision-making, analysis, and oral and written communication skills. Requires work in small teams to analyze a real company’s external environment, perform an internal corporate audit and build detailed action plans including implementation issues and financial forecasting. Normally taken during the last semester in the MBA program. Prerequisite: completion of a minimum of five core MBA courses; prerequisite/concurrent: MBA 609.

MBA 640 Leadership and Change Management (3-0-3). Investigates the role of leadership in the context of global change. Given particular attention to leadership issues as they pertain to organizational development, culture and the dynamics of change. Restricted to MBA program excluding Pre-MBA students.

MBA 641 Innovation and Entrepreneurship (3-0-3). (Formerly MBA 615). Introduces business innovation and explores the entrepreneurial process through which new ideas become the basis for viable enterprises. Considers the development of a product or concept, assessment of technical and commercial feasibility, preparation of a business plan, and the need for funding. Requires the completion of an interdisciplinary, team-based project whereby students will develop a proposal for the prospective commercialization of a product, process or other business concept. Examines the constant interplay between innovation and risk, feasibility and function, ownership and financing, marketing and delivery. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 642 Knowledge Management (3-0-3). Evaluates the different theories, constructs, methodologies and practices related to knowledge management and its role in organizations. Areas covered include communities of practice, knowledge space, epistemologies of possession and practices, and related constructs such as organizational learning, forgetting, and memory. Uses a combination of articles and cases for students to gain knowledge about organizational challenges and opportunities within the area of knowledge management. Restricted to MBA program, excluding Pre-MBA students.

MBA 661 Strategic Human Resources Management (3-0-3). Focuses on the strategic role of HRM, i.e., the role of HRM in strategy formulation, strategy implementation and measuring and improving HRM effectiveness. Examines how to align HRM practices with organizational business goals, using job analysis and design, HR planning, recruitment and selection, training and development, performance management and compensation practices. Also addresses the special topics of Emiratization and diversity issues, talent management, the role of HR in mergers and acquisitions, and high commitment practices. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 680 Project Management (3-0-3). Examines the concepts and techniques associated with managing projects in business organizations. Considers project design, planning, scheduling, systems engineering, cost estimation and control. Explores the relationship between innovation and risk. Restricted to MBA program, excluding Pre-MBA students. Prerequisite: MBA 603.
MBA 681 Technology Innovation and Digital Strategy (3-0-3). Takes an analytical approach to assessing the latest trends in information technology (IT) and information systems (IS), and determining competitive digital strategies. Explores the relationship between innovation and IT. Builds capabilities for evaluating strategies to achieve competitive advantages for organizations. Presents topics such as cloud computing, AI, e-commerce, business analytics and virtual reality from case studies to highlight key concepts and emphasize best practices. Includes concepts and theories of technology and innovation, as well as practical skills that can be applied to real-world business problems. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 695 Seminar (1-0-0). Covers the requirement for planning, conceptualizing and executing a professional research project. Provides a unique forum for the students to explore and discuss business research and its application to professional practice. Familiarizes students with a range of contemporary research topics and relevant research methodologies through interaction with faculty in a seminar-based setting. Graded as Pass/Fail. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 697 Business Co-op (3-0-3). Provides opportunities for application of theory to actual problems in real-life business settings. Enhances research, writing, technical, presentation and soft skills through practical experience. Reinforces objective-setting and performance measurement through a structured reporting process. Requires a minimum of one semester of on-the-job experience with an approved sponsor organization. Graded as Pass/No Pass. Restricted to MBA and MSA programs, excluding Pre-MBA students. Prerequisites: good academic standing and the permission of the MBA program coordinator.

MBA 699 Professional Research Project (6-0-6). Covers the application of substantive skills across one or more organizational areas. Focuses on the comprehensive analysis of an organizational problem or new initiative, involving problem formulation, fieldwork and data collection, and hands-on analysis/application. Emphasizes the application of appropriate methods for addressing the various components of the project. Addresses the identification of organizational problems or potential for new initiatives, based on the analysis of existing conditions and future trends. Involves the review of relevant information to justify the exploration of the organizational problem or initiative; collection and analysis of data, using appropriate methods; drawing of conclusions; and development of soundly justified recommendations culminating in a written professional research project report and oral presentation. Graded as Pass/Fail. Restricted to MBA program, excluding Pre-MBA students. Prerequisite: good academic standing and the permission of the MBA program coordinator; prerequisite/concurrent: MBA 695.

Special Topic Courses

Special Topic (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 694 or 794 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the school during registration.
Full-Time Faculty

The following pages list the full-time AUS faculty members with their terminal degrees, the conferring institution, the AUS department they are members of, as well as administrative positions they hold in addition to their faculty title. This information is also available at www.aus.edu/faculty-hub.

For details on the research achievements, research interests and experience of full-time AUS faculty members, visit www.aus.edu/research/impact/faculty-research.

A

Abdalia, Jamaleldin, PhD, University of California at Berkeley, 1989; Professor in Civil Engineering and Riad T. Sadek Chair in Civil Engineering

Abdallah, Abal Al-Nasser, PhD, University of Lancaster, 2004; Professor in Accounting and Head, Department of Accounting

Abelfatah, Akmal, PhD, University of Texas at Austin, 1999; Professor in Civil Engineering and PhD-ESM Program Academic Coordinator

Abdelgawad, Mohamed, PhD, University of Toronto, 2009; Associate Professor in Mechanical Engineering

Abdel-Hafez, Mamoun, PhD, University of California at Los Angeles, 2003; Professor in Mechanical Engineering; Head, Department of Mechanical Engineering and MTR Program Academic Coordinator

Abdel-Jabbar, Nabil, PhD, University of Michigan, 1996; Professor

Abdel Naby, Shahi, PhD, Western Michigan University, 2010; Assistant Professor in Physics

AbdulHadi, Zayid, PhD, Laval University, 1987; Professor in Mathematics and Statistics

Abed, Farid, PhD, Louisiana State University, 2003; Professor in Civil Engineering

Aboueleish, Mohamed Yehia, PhD, Tennessee Technological University, 2003; Professor in Biology, Chemistry and Environmental Sciences

Abu Al-Foul, Bassam, PhD, University of Utah, 1994; Professor in Economics

Abualrub, Taheer, PhD, University of Iowa, 1998; Professor in Mathematics and Statistics

Abukhaled, Marwan, PhD, Texas Tech University, 1995; Professor in Mathematics and Statistics

Abu-Lebdeh, Ghassan, PhD, University of Illinois at Urbana-Champaign, 1999; Professor in Civil Engineering

Abu-Nabah, Bassam, PhD, University of Cincinnati, 2007; Associate Professor in Mechanical Engineering

Abu-Rubka, Raafat, PhD, Western University, 2013; Assistant Professor in Computer Science and Engineering

Abusaimi, Alanoud, MA, Southern Illinois University, Carbondale, 2006; Senior Instructor in English

Abu-Yousef, Imad, PhD, McGill University, 1996; Professor in Biology, Chemistry and Environmental Sciences

Abuzaid, Wael, PhD, University of Illinois, 2012; Associate Professor in Mechanical Engineering (on sabbatical Fall 2022)

Agha, Albert, C. Phil, University of California, Los Angeles, 2017; Assistant Professor in Performing Arts

Aghasi, Maya, PhD, University of Wisconsin Madison, 2012; Assistant Professor in English

Aguir, Iness, PhD, University of Texas at San Antonio, 2013; Associate Professor in Finance

Ahmad, Norita, PhD, Rensselaer Polytechnic Institute, 2001; Professor in Marketing and Information Systems, Director, Center for Innovation in Teaching and Learning

Ahmed, Khawla, PhD, State University of New York at Buffalo, 1998; Professor in English

Ahmed, Rana, PhD, Duke University, 1991; Professor in Computer Science and Engineering

Ahmed, Vian, PhD, Loughborough University, 2000; Professor in Industrial Engineering and Director, Alternative Delivery Graduate Education

Ajić, Adnan, PhD, Northern Arizona University, 2015; Associate Professor in English

Al-Ali, Abdul-Rahman, PhD, Vanderbilt University, 1990; Professor in Computer Science and Engineering

Alaali, Bacim, PhD, Louisiana State University, 2008; Visiting Associate Professor in Mathematics and Statistics

Al-Asheh, Sameer, PhD, University of Ottawa, 1997; Professor in Chemical Engineering; Head, Department of Chemical and Biological Engineering and MSBME Academic Coordinator

Al-Assadi, Wesam, MA, American University of Sharjah, 2004; Instructor in Arabic and Translation Studies

Al-Attar, Mariam, PhD, University of Leeds, 2008; Lecturer in Arabic and Translation Studies

Albasha, Lutfi, PhD, University of Leeds, 1995; Professor in Electrical Engineering

AlHamaydeh, Mohamed, PhD, University of Southern California, 2005; Professor in Civil Engineering

Ali, Ahmed, PhD, University of Durham, 1999; Professor in Arabic and Translation Studies and Head, Department of Arabic and Translation Studies

Ali, Tarig, PhD, The Ohio State University, 2003; Professor in Civil Engineering

Al-Issa, Ahmad, PhD, Indiana University of Pennsylvania, 1998; Professor in English and Associate Dean for Undergraduate Affairs, College of Arts and Sciences

Al-Kaisi, Meis, PhD, University of London, 2006; Assistant Professor in Arabic and Translation Studies

Al-Khader, Maen, PhD, Illinois Institute of Technology, 2008; Associate Professor in Mechanical Engineering

AlKhzazli, Osamah, PhD, University of Memphis, 1997; Professor in Finance and Head, Department of Finance

Almonde, Paul, PhD, New York University, 2001; Professor in English; Head, Department of English and TESOL Program Academic Coordinator

Al-Najjar, Abeer, PhD, University of Edinburgh, 2003; Associate Professor in Mass Communication

Alnaser, Ali Sami, PhD, Western Michigan University, 2002; Professor in Physics; Head, Department of Physics and PhD MSEP Program Academic Coordinator

Al-Nashash, Hasan, PhD, Kent University, 1988; Professor in Electrical Engineering

Alobaidi, Ghada, PhD, University of Western Ontario, 2000; Associate Professor in Mathematics and Statistics

Al-Othman, Amani, PhD, University of Ottawa, 2012; Associate Professor in Chemical Engineering

Aloul, Fadi, PhD, University of Michigan, 2003; Professor in Computer Science and Engineering and Dean, College of Engineering

Al-Sayah, Mohamed, PhD, University of Alberta, 2002; Professor in Biology, Chemistry and Environmental Sciences

Al Shaar, Nuha, PhD, University of Cambridge, 2010; Associate Professor in Arabic and Translation Studies

Alshatnawi, Ali, PhD, Concordia University, 1996, Visiting Professor in Computer Science and Engineering

Alshraideh, Hussam, PhD, The Pennsylvania State University, 2011; Associate Professor in Industrial Engineering

Al-Tamimi, Adil, PhD, Strathclyde University, 1990; Professor in Civil Engineering

Alzaatreh, Ayman, PhD, Central Michigan University, 2011; Associate Professor in Mathematics and Statistics

Al-Zinati, Mohammad, PhD, University of Texas, 2015; Visiting Associate Professor in Computer Science and Engineering

American University of Sharjah Graduate Catalog 2022–2023 98
Anabtawi, Mahmoud, PhD, University of Texas, 1996; Professor in Mathematics and Statistics and Dean, College of Arts and Sciences

Anderson, Pia-Kristina, PhD, University of California at Berkeley, 2001; Assistant Professor in International Studies

Angelii, Linda, DBA, Boston University, 1996; Associate Professor in Marketing and Information Systems

Anwar, Sofia, MBA, American University of Sharjah, 2005; Visiting Instructor in Management

Aqeeq, Mohammed Taher, MA, Jawaharlal Nehru and Delhi University, 1993; Professor of Practice in Civil Engineering

Arif, Omar, PhD, Georgia Institute of Technology, 2010; Visiting Associate Professor in Computer Science and Engineering

Arzaghi, Mohammad, PhD, Brown University, 2005; Associate Professor in Economics

As'ad, Rami, PhD, Concordia University, 2011; Associate Professor in Industrial Engineering

Asa'd, Randa, PhD, University of Cincinnati, 2012; Associate Professor in Physics

Ashdown, Brien, PhD, Saint Louis University, 2009; Associate Professor in International Studies

Atabay, Serter, PhD, University of Birmingham, 2001; Professor in Civil Engineering (on sabbatical Fall 2022)

Attom, Mousa, PhD, Kansas State University, 1989; Professor in Civil Engineering (on sabbatical Spring 2023)

Audi, Diana, MS, American University of Beirut, 2005; Senior Instructor in Mathematics and Statistics

Aveyard, Mark, PhD, Florida State University, 2007; Associate Professor in International Studies (on sabbatical Fall 2022)

Awad, Mahmoud, PhD, Wayne State University, 2005; Professor in Industrial Engineering

Ayish, Mohammad, PhD, University of Minnesota, 1986; Professor in Mass Communication

B

Badawi, Ayman, PhD, University of North Texas, 1993; Professor in Mathematics and Statistics

Badran, Sammy, PhD, University of Kansas, 2018; Assistant Professor in International Studies

Baghestani, Hamid, PhD, University of Colorado, 1982; Professor in Economics

Bahroun, Zied, PhD, University of Franche-Comté, Besançon, 2000; Associate Professor in Industrial Engineering

Baker, Cynthia, MBA, Texas Tech University, 1997; Senior Instructor in Management

Baker, Jeffrey, PhD, Texas Tech University, 2008; Professor in Marketing and Information Systems; Faculty Advisor, Student Council

Barlas, Gerassimos, PhD, National Technical University, Athens, 1996; Professor in Computer Science and Engineering

Bartholomew, Aaron, PhD, College of William and Mary, 2001; Professor in Biology, Chemistry and Environmental Sciences

Basco, Rodrigo, PhD, Universidad Complutense de Madrid, 2005; Professor of Management and Sheikh Saoud bin Khalid bin Khalid Al-Qassimi Chair in Family Business

Beheiry, Salwa, PhD, University of Texas at Austin, 2005; Professor in Civil Engineering

Bejarano Rodriguez, Ivonne, PhD, University of Puerto Rico, 2013; Assistant Professor in Biology, Chemistry and Environmental Sciences

Bejtlic, Zinka, PhD, International University of Sarajevo, 2018; Associate Professor in Art and Design and Head, Department of Art and Design

Belhamadia, Yousef, PhD, Laval University, 2004; Associate Professor in Mathematics and Statistics (on sabbatical Spring 2023)

Beikhodja, Omar, PhD, Laval University, 2006; Professor in Management

BenDaya, Mohamed, PhD, Georgia Tech USA, 1998; Professor in Industrial Engineering

Bilkizkoen, Nesilhan, PhD, University of Exeter, 2016; Assistant Professor in English

Bodolica, Virginia, PhD, HEC Montreal Business School, 2006; Professor in Management; Head, Department of Management and Said T. Khoury Chair in Leadership Studies

Boisvert, Jean, PhD, Macquarie Graduate School of Management, 2007; Professor in Marketing and Information Systems

Bonin, Christianna, PhD, Massachusetts Institute of Technology, 2021; Instructor in Art and Design

Boubaki, Narjess, PhD, Laval University, 2000; Professor in Finance and Dean, School of Business Administration

Bou-Mehdi, Randa, MA, American University of Sharjah, 2010; Senior Instructor in English

Breslow, Harris, PhD, University of Illinois, Chicago, 1995; Associate Professor in Mass Communication

Brodtkorb, Tor, LLM, University of Leicester, 2008; Assistant Professor in Management

Bryan, Christopher, PhD, University of Limerick, 2020; Assistant Professor in International Studies

Buck, Rachel, PhD, University of Arizona, 2018; Assistant Professor in English (on leave Fall 2022)

C

Carlow, Jason, MArch, Yale University, 2002; Associate Professor in Architecture

Castillo Melo, Roberto, PhD, University of Kansas, 2015; Assistant Professor in Architecture

Cerro, Camilo, MArch, Columbia University, 1997; Associate Professor in Architecture

Chan, Stephen, PhD, University of Manchester, 2016; Assistant Professor in Mathematics and Statistics

Chatoth, Prakash, PhD, Virginia Polytechnic Institute and State University, 2002; Professor in Marketing and Information Systems

Chazi, Abdelaziz, PhD, University of North Texas, 2004; Professor in Finance

Chebbi, Rachid, PhD, Colorado School of Mines, 1991; Professor in Chemical Engineering

Chiozza, Giacomo, PhD, Duke University, 2004; Associate Professor in Political Studies and Sir Easa Saleh Al Gurg Professor in International Studies

Christodoulides, Georgios, PhD, University of Birmingham, 2016; Professor in Marketing and Information Systems and Chalhoub Professor in Luxury Brand Management

Cobo-Reyes Cano, Ramon, PhD, University of Granada, 2006; Professor in Economics (on leave Fall 2022)

Conty, Arianne, PhD, University of California, 2009; Associate Professor in International Studies

Craven, Laurence, MA, Oxford Brookes University, 2010; Senior Lecturer in English (on leave Fall 2022)

Curabba, Brad, MAT, SIT Graduate Institute, 2006; Senior Instructor in English

Curiel, Igor, PhD, Kumamoto University, 1989; Professor of Practice in Architecture

Curran, Paula, MFA, University of Illinois at Urbana-Champaign, 1993; Associate Professor in Art and Design

D

Daghfous, Abdelkader, PhD, Pennsylvania State University, 1997; Professor in Marketing and Information Systems (on sabbatical Spring 2023)

Dahdal, Suheil, PhD, University of Technology, Sydney, 2000; Associate Professor in Mass Communication and Head, Department of Mass Communication

Dalibalta, Sarah, PhD, University of Leicester, 2008; Associate Professor in Biology, Chemistry and Environmental Sciences

Dandridge, Damon, PhD, Michigan State University, 2020; Assistant Professor in Performing Arts

Darayseh, Musa, PhD, University of Nebraska-Lincoln, 1990; Professor in Accounting

Darras, Basil, PhD, University of Kentucky, 2008; Professor in Mechanical Engineering

Darwish, Naif, PhD, Oklahoma State University, 1991; Professor in Chemical Engineering

De Barros, Eric, PhD, University of Illinois at Urbana-Champaign, 2011, Assistant Professor in English

De Barros, Khym, PhD, Indiana University, 2008; Visiting Assistant Professor, in International Studies

Dhaouadi, Rached, PhD, University of Sharjah, 2008; Professor in Mass Communication and Sir Easa Saleh Al Gurg Professor in International Studies

Dhauadi, Rached, PhD, University of Sharjah, 2008; Professor in Mass Communication
Engineering and Petrofac Research Chair in Renewable Energy

Dhou, Salam, PhD, Virginia Commonwealth University, 2013; Assistant Professor in Computer Engineering

Dougan, Brian, MArch, Texas A&M University, 1999; Professor in Architecture

Dupuis, Daniel, PhD Concordia University 2014; Associate Professor in Finance (on sabbatical Fall 2022)

E

Egőmez, Mehmet, PhD, University of Alberta, 2009; Associate Professor in Physics

El-Assadi, Ahmad, MBA, American University of Sharjah, 2009; Senior Instructor in Management

El Bakhour, Hoda, MA, American University of Beirut, 2010; Instructor in English

Elefteriou, Maria, PhD, University of Leicester, 2011; Assistant Professor in English

El-Emam, Magdi, PhD, Queen’s University, 2003; Professor in Civil Engineering

El-Fakih, Khaled, PhD, University of Ottawa, 2002; Professor in Computer Science and Engineering (on sabbatical Fall 2022)

El-Kadri, Oussama, PhD, Wayne State University, 2006; Professor in Biology, Chemistry and Environmental Sciences

El-Khatib, Sami, PhD, New Mexico State University, 2007; Associate Professor in Physics

El-Sakran, Tarawat, PhD, University of Bangor, 1990; Professor in English

El-Sayegh, Sameh, PhD, Texas A&M University, 1998; Professor in Civil Engineering and Head, Department of Civil Engineering and MSCM Program Academic Coordinator

El-Tarhuni, Mohamed, PhD, Carleton University, 1997; Professor in Electrical Engineering and Vice Provost of Research and Graduate Studies

Emam, Samir, PhD, Virginia Polytechnic Institute and State University, 2002; Professor in Mechanical Engineering

Enache, Cristian, PhD, Laval University, 2005; Associate Professor in Mathematics and Statistics

F

Faiq, Said, PhD, Salford University, 1991; Professor in Arabic and Translation Studies

Farr, Marcus, MArch, Rice University, 2004; Associate Professor in Architecture

Fattah, Kazi, PhD, University of British Columbia, 2010; Associate Professor in Civil Engineering

Filipović, Zlatan, MFA, Alfred University, 2001; Associate Professor in Art and Design

Fredrick, Daniel, PhD, Texas Christian University, 2003; Associate Professor in English

G

Gahramanov, Emin, PhD, Colorado State University, 2007; Professor in Economics

Gaibulloev, Khusrav, PhD, University of Texas at Dallas, 2009; Professor in Economics

Gazley, Aaron, PhD, Victoria University, 2009; Associate Professor in Marketing and Information Systems

Genc, Ismail, PhD, Texas A&M University, 1999; Professor in Economics

Ghani, Usman, PhD, University of Exeter, 2013; Associate Professor in Arabic and Translation Studies

Ghommem, Mehdi, PhD, Virginia Polytechnic Institute and State University, 2011; Associate Professor in Mechanical Engineering

Gibbs, Joseph, PhD, Boston University, 1994; Professor in Mass Communication

Gleason, Kimberley, PhD, Southern Illinois University, 1999; Professor in Finance

Golley, Nawar Al-Hassan, PhD, Nottingham University, 1994; Professor in English

Graham, Joseph, PhD, Loughborough University, 2015; Assistant Professor in Art and Design

Gregersen, Tammy, PhD, Universidad Católica de Valparaíso, 1998; Professor in English

Griffin, James, PhD, University of London, 2004; Associate Professor in Mathematics and Statistics and Vice Provost for Undergraduate Affairs and Instruction

Gross, James, MFA, Wayne State University, 1994; Assistant Professor in Performing Arts

Guessoum, Nidhal, PhD, University of California at San Diego, 1988; Professor in Physics

Gunatillake, Gajath, PhD, Purdue University, 2005; Associate Professor in Mathematics and Statistics

H

Hallal, Hicham, PhD, McGill University, 2008; Senior Lecturer in Computer Science and Engineering

Hamade, Alaa, MBA, American University of Sharjah, 2010; Senior Instructor in Management

Hamadi, Dalia, MArch, Columbia University, 2011; Visiting Assistant Professor in Architecture

Hamdan, Mohammad, PhD, University of Cincinnati, 2003; Professor in Mechanical Engineering

Hamdan, Nasser, PhD, Middle East Technical University, 1993; Professor in Physics

Hamdan, Rana, MS, Accounting, American University of Sharjah, 2019; Visiting Instructor in Accounting

Hammi, Oualid, PhD, University of Calgary, 2009; Professor in Electrical Engineering

Hariga, Moncer, PhD, Cornell University, 1989; Professor in Industrial Engineering

Hassan, Mohamed, PhD, University of Arizona, 2003; Professor in Electrical Engineering

Hawaw, Karen, CPA, Colorado State Board of Accountancy, 2005; Senior Instructor in Accounting

Hawileh, Rami, PhD, University of Wisconsin-Milwaukee, 2005; Professor in Civil Engineering

Heintz, W. Eirik, MArch, Harvard University, 1994; Professor in Architecture

Highland, Kristen, PhD, New York University, 2015; Assistant Professor in English

Horger, Christopher, MA, University of Arizona, 1992; Senior Instructor in English

Hughes, Michael, MArch, Princeton University, 1993; Professor in Architecture

Husni, Ronak, PhD, University of St. Andrews, 1986; Professor in Arabic and Translation Studies

Husseini, Ghaleb, PhD, Brigham Young University, 2001; Professor in Chemical Engineering and Dana Gas Chair in Chemical Engineering

Hussein, Noha, PhD, Virginia Polytechnic Institute and State University, 2005; Associate Professor in Industrial Engineering

I

Ibahrine, Mohammed, PhD, Hamburg University, 2006; Professor in Mass Communication

Ibrahim, Mahmoud, PhD, University of Mississippi, 2006; Associate Professor in Electrical Engineering

Ibrahim, Riem, MFA, The University of Chicago, 2013; Visiting Assistant Professor in Design

Ibrahim, Taleb, PhD, Auburn University, 1997; Professor in Chemical Engineering

Izwaini, Sattar, PhD, University of Manchester, 2004; Professor in Arabic and Translation Studies

J

Jaidi, Asad Hasan, PhD, University of Kansas, 1993; Professor in Physics

Jaradat, Mohammad, PhD, Texas A&M University, 2005; Professor in Mechanical Engineering

Jarrah, Abdul Salam, PhD, New Mexico State University, 2002; Professor in Mathematics and Statistics and Head, Department of Mathematics and Statistics

Jeschull, Liane, MA, University of Leipzig, 2000; Visiting Instructor in English

K

Kallel, Sodak, PhD, Stanford University, 1995; Professor in Mathematics and Statistics

Kalo, Amar, MS, University of Michigan, 2014; Associate Professor in Architecture and Director, CAAD Labs (on sabbatical Spring 2023)

Kalentench, Christopher, PhD, RMIT University, 2019; Associate Professor in Art and Design
Kanan, Sofian, PhD, University of Maine, 2000; Professor in Biology, Chemistry and Environmental Sciences
Kanann, Satish, PhD, University of New Brunswick, 2006; Assistant Professor in Mechanical Engineering
Katodrtyis, George, AADip, Architectural Association School of Architecture, 1985; Professor in Architecture and Head, Department of Architecture
Katsos, John, JD, George Washington University, 2011; Associate Professor in Management
Katsos, Kristina, MS, Georgetown University, 2010; Lecturer in International Studies
Kaya, Iker, PhD, University of Georgia, 2009; Associate Professor in Economics
Kaya, Ozgur, PhD, University of Georgia, 2009; Professor in Economics (on sabbatical Spring 2023)
Khalidi, Bouthaina, PhD, Indiana University, 2008; Professor in Arabic and Translation Studies
Khalil, Reem, PhD, City University of New York, 2013; Associate Professor in Biology, Chemistry and Environmental Sciences
Khaliyarov, Alisher, PhD, The Ohio State University, 2021; Assistant Professor in International Studies
Khalaf, Ashraf, PhD, Florida Atlantic University, 2004; Professor in Accounting
Khamis, Mustafa, PhD, University of California, 1987; Professor in Biology, Chemistry and Environmental Sciences
Khan, Sajid, PhD, University of Manchester, 2001; Professor in Marketing and Information Systems and Head, Department of Marketing and Information Systems
Khan, Zahid, PhD, University of Western Ontario, 2007; Associate Professor in Civil Engineering
Khawaja, Ali, MBA, American University of Sharjah, 2004; Senior Instructor in Management
Kherfi, Samer, PhD, Simon Fraser University, 2002; Associate Professor in Economics and Head, Department of Economics
Khoury, Suheil, PhD, Michigan State University, 1994; Professor in Mathematics and Statistics
Khoury, Saadia, PhD, Laval University, 1997; Senior Instructor in Mathematics and Statistics
King, Jeffrey, PhD, University of Missouri, 2017; Assistant Professor in International Studies
Knott, David Lee, EdD, University of Exeter, 2020; Visiting Assistant Professor in English
Knuteson, Sandra, PhD, Clemson University, 2004; Senior Lecturer in Biology, Chemistry and Environmental Sciences
Kolo, Jerry, PhD, University of Waterloo, 1986; Professor in Architecture and MUP Program Academic Coordinator
Kumra, Savita, PhD, Cranfield University, 2003; Associate Professor in Management

L
Landolsi, Taha, PhD, University of Texas at Dallas, 1999; Professor in Computer Science and Engineering
Leduc, Guillaume, PhD, Carleton University, 1995; Associate Professor in Mathematics and Statistics
Lopes, Adrian, PhD, Cornell University, 2014; Associate Professor in Economics
Louhichi, Issam, PhD, University of Bordeaux 1, 2005; Associate Professor in Mathematics and Statistics
Lusk, Jeneice, PhD, Baylor University, 2010; Assistant Professor in International Studies

M
Maitner, Angela, PhD, University of California, 2007; Professor in International Studies and Psychology Program Coordinator
Majdalawieh, Amin, PhD, Dalhousie University, 2006; Professor in Biology, Chemistry and Environmental Sciences and Head, Department of Biology, Chemistry and Environmental Sciences
Majeed, Tariq, PhD, York University, 1991; Associate Professor in Physics
Makkawi, Yassin, PhD, Herriot-Watt University, 2004; Professor in Chemical Engineering
Marchi Travares El Melo, Isabel, MFA, Virginia Commonwealth University, 2014; Assistant Professor in Performing Arts
Mariano, Stefania, PhD, University of Molise, 2006; Associate Professor in Management
McAllister, Brian, PhD, The Ohio State University, 2013; Assistant Professor in English
McCarthy, Philip, PhD, University of Memphis, 2005; Assistant Professor in English
McClelland, Patrick, PhD, University of Kansas, 2008; Associate Professor in Management
Menon, Jayasree Anitha, PhD, University of Nottingham, 2009; Visiting Professor in International Studies
Mertel, Kurt, PhD, North Western University, 2016; Assistant Professor in International Studies
Mesarovic, Mujo, MS, Syracuse University, 2006; Senior Instructor in Mathematics and Statistics
Milic, Nebojsa, PhD, Baylor University, 2017; Assistant Professor in Marketing and Information Systems
Miller, Joel Eric, PhD, University of California Los Angeles, 2013; Visiting Assistant Professor in International Studies
Mir, Hasan, PhD, University of Washington, 2005; Professor in Electrical Engineering
Mirzaei, Ali, PhD, Brunel University, 2013; Associate Professor in Finance
Mitchell, Kevin, MArch, University of Washington, 1996; Professor in Architecture

Mitra, Sreya, PhD, University of Wisconsin Madison, 2012; Associate Professor in Mass Communication
Mokhtar, Ahmed, PhD, Concordia University, 1998; Professor in Architecture
Montague, John, PhD, Trinity College Dublin, 2009; Associate Professor in Architecture
Morita, MD Maruf, PhD, University of Dalhousie, 2006; Professor in Civil Engineering
Morad, Mona, PhD, the University of Manchester, 2015; Assistant Professor in Marketing and Information Systems
Mukhopadhyay, Shayok, PhD, Georgia Institute of Technology, 2014; Associate Professor in Electrical Engineering
Mumm, Susan, DPhil, University of Sussex, 1993; Professor in International Studies and Chancellor
Munday, Susan, MPhil, University of Glasgow, 2002; Assistant Professor in English

N
Najjar, Jasmina, MA, University of London, 2002; Senior Instructor in English
Nam, Kichan, PhD, State University of New York at Buffalo, 1995; Professor in Marketing and Information Systems
Nancarrow, Paul Damian, PhD, Queen's University Belfast, 2005; Professor in Chemical Engineering
Nashef, Hania, PhD, University of Kent, 2008; Professor in Mass Communication
Nazzal, Mohammad, PhD, University of Kentucky, 2007; Associate Professor in Mechanical Engineering (on sabbatical Spring 2023)
Ndiaye, Malick, PhD, University of Burgundy, 1986; Associate Professor in Industrial Engineering
Newlands, George, MArch, University of New Mexico, 1994; Assistant Professor in Architecture
Nsir, Imed, PhD, Indiana University, 2010; Associate Professor in Arabic and Translation Studies

O
Okandan, Hatice, PhD, Istanbul University, 2008; Visiting Associate Professor in Art and Design
Oliver, Maria, MArch, Columbia University, 1990; Assistant Professor in Architecture
Orhan, Mehmet, PhD, University of Ontario, 2011; Associate Professor in Mechanical Engineering
Osman-Ahmed, Ahmed, PhD, University of Calgary, 2003; Professor in Electrical Engineering

P
Pallathurcheril, Varkki, PhD, The Ohio State University, 1992; Professor in Architecture and Dean, College of Architecture, Art and Design
Pappalardo, Lucia, PhD, Syracuse University, 1998; Associate Professor in...
Biology, Chemistry and Environmental Sciences

Park, Juana, PhD, University of Alberta, 2020; Assistant Professor in International Studies

Parlak, Özgür, MA, Northern Arizona University, 2010; Senior Instructor in English

Pasquier, Michel, PhD, National Polytechnic Institute of Grenoble, 1989; Associate Professor in Computer Science and Engineering

Pedersen, Vernon, PhD, Georgetown University, 1993; Professor in International Studies (on sabbatical Spring 2023)

Pizarro, Rafael, PhD, University of Southern California, 2005; Associate Professor in Design (on leave Fall 2022)

Q

Qaddouni, Nasser, PhD, Colorado State University, 1998; Professor in Electrical Engineering

Qazi, Abroon, PhD, Strathclyde Business School, 2017; Associate Professor in Marketing and Information Systems

Qudourah, Feryal, PhD, Florida State University, 2018; Assistant Professor in Performing Arts

R

Rabeea, Hala, MDes, University of Illinois at Chicago, 2016; Assistant Professor in Art and Design

Rauch, Christian, PhD, Goethe University in Frankfurt-on-Main, 2011; Associate Professor in Finance

Rehman, Habib-ur, PhD, The Ohio State University, 2001; Professor in Electrical Engineering

Rhodes, Patrick, MArch, Southern California Institute of Architecture, 1999; Associate Professor in Architecture

Roldán, Juan, MArch, ETSAM Madrid, 2003; Associate Professor in Architecture

Romdhane, Lotfi, PhD, University of Florida, 1989; Professor in Mechanical Engineering and Associate Dean for Graduate Affairs and Research, College of Engineering

Roy, Sanket, MA, Cornell University, 2015; Assistant Professor in Economics

Saad, Mohsen, PhD, University of Delaware, 2003; Professor in Finance and Associate Dean for Undergraduate Programs, School of Business Administration

Sabouni, Rana, PhD, University of Western Ontario, 2013; Associate Professor in Chemical Engineering

Saeed Osman, Mojahid, PhD, North Carolina A&T University, 2010; Assistant Professor in Industrial Engineering

Sagahyroon, Assim, PhD, University of Arizona, 1989; Professor in Computer Science and Engineering and Associate Dean for Undergraduate Affairs, College of Engineering

Sakhi, Said, PhD, University of Montreal, 1994; Professor in Physics

Salama, Mohamed Feras, PhD, University of Texas, 2008; Associate Professor in Accounting

Salamin, Yousef, PhD, University of Colorado, 1987; Professor in Physics

Salvadore, Matteo, PhD, Temple University, 2010; Associate Professor in International Studies (on sabbatical Academic Year 2022–2023)

Samara, Fatin, PhD, State University of New York, 2007; Professor in Biology, Chemistry and Environmental Sciences

Samet, Anis, PhD, HEC Montreal, 2009; Professor in Finance

Sarnecky, William, MArch, University of New Mexico, 1999; Professor of Practice in Architecture

Sayed, Sana, MA, California State University, 2004; Senior Instructor in English

Sayidina, Aisha, PhD, University of Exeter, 1993; Assistant Professor in English

Semaan, Rania, PhD, City University of New York, 2012; Associate Professor in Marketing and Information Systems

Shaaban, Mostafa, PhD, University of Waterloo, 2014; Associate Professor in Electrical Engineering and Interim Head, Department of Electrical Engineering

Shady, Stephanie, PhD, University of North Carolina, 2022; Visiting Assistant Professor in International Studies

Shakra, Zena, PhD, University of Leicester, 2003; Visiting Assistant Professor in English

Shamayleh, Abdullah, PhD, Arizona State University, 2010; Associate Professor in Industrial Engineering and Head, Department of Industrial Engineering

Shanableh, Tamer, PhD, University of Essex, 2001 Professor in Computer Science and Engineering

Sharawi, Ziyad, PhD, Central Michigan University, 2006; Associate Professor in Mathematics and Statistics

Shareefdeen, Zarook, PhD, New Jersey Institute of Technology, 1994; Professor in Chemical Engineering

Sheil, Philip, MFA, University of Calgary, 1995; Senior Lecturer in Art and Design and Director, CAAD Foundations Year

Shih, Shou-Hsing, PhD, University of South Florida, 2008; Assistant Professor in Mathematics and Statistics

Shim, Ji Young, PhD, City University of New York, 2013; Assistant Professor in English

Shockley, Sammy, PhD, Texas A&M University, 2014; Assistant Professor in International Studies

Simonet, Daniel, DBA, University of Paris IX Dauphine, 1998; Professor in Management (on sabbatical Fall 2022)

Singh, Kamal, PhD, Indian Institute of Technology, 2006; Senior Lecturer in Chemical Engineering

Siry, Isra, MPhil, University of Keele, 1994; Instructor in Physics

Smith, Susan, MA, University of Southern California, 1994; Associate Professor in Mass Communication

Spaw, Gregory, MArch, Harvard University, 2009; Associate Professor in Architecture

Squill, Jay, PhD, University of Delaware, 2004; Professor in Economics

Suleiman, Hana, PhD, Queen's University, 1998; Professor in Mathematics and Statistics and Associate Dean for Graduate Affairs, College of Arts and Sciences

Syed, Raza, PhD, Northeastern University, 2005; Assistant Professor in Physics

T

Tabbarah, Faysal, MArch, Architectural Association School of Architecture, 2011; Associate Professor in Architecture and Associate Dean, College of Architecture, Art and Design

Tabsh, Sami, PhD, University of Michigan, 1990; Professor in Civil Engineering

Taha, Mustafa, PhD, Ohio University, 2001; Associate Professor in Mass Communication

Tairi, Tatiana, PhD, City University, 2007; Associate Professor in International Studies

Tanovic, Una, PhD, University of Massachusetts, 2021; Visiting Assistant Professor in English

Tariq, Usman, PhD, University of Illinois at Urbana–Champaign, 2013; Associate Professor in Electrical Engineering

Tasneem, Dina, PhD, McGill University, 2015; Associate Professor in Economics

Tassa, Anthony, MFA, The University of Tennessee, Knoxville, 1995; Professor in Performing Arts and Performing Arts Program Academic Coordinator

Teng, Ming Foey, PhD, University of South Australia, 2012; Senior Lecturer in Electrical Engineering

Thani, Salma, PhD, Monash University, 2019; Visiting Assistant Professor in International Studies

Thompson, Seth, MFA, Vermont College of Norwich University, 1997; Associate Professor in Art and Design

Toledo, Hugo, PhD, Auburn University, 1999; Professor in Economics

Troian, Jais, PhD, Aix-Marseille University 2019; Assistant Professor in International Studies

Tufaha, Amjad, PhD, University of Virginia, 2007; Professor in Mathematics and Statistics (on sabbatical Fall 2022)

U

Ursomarzo, Tania, MArch, Cranbrook Academy of Art, 2012; Assistant Professor in Architecture

V

Vadlamudi, Sundara, PhD, University of Texas at Austin, 2016; Assistant Professor in International Studies

Vanderpl, Gregory, MA TESOL, SIT Graduate Institute, 2012; Senior Instructor in English
Viriyavipart, Ajalavat, PhD, Texas A&M University, 2015; Associate Professor in Economics

W

Wang, Yuting, PhD, University of Notre Dame, 2009; Professor in International Studies and Head, Department of International Studies

Watson, Gregory, MArch, Washington University, 1985; Professor in Architecture

Waxin, Marie-France, PhD, IAE Aix-en-Provence, 2000; Professor in Management

Weagle, Christopher, MA, University of New Brunswick, 2002; Senior Instructor in English

Wilmsen, David, PhD, University of Michigan, 1995; Professor in Arabic and Translation Studies

Wunderli, Thomas, PhD, University of Florida, 2003; Associate Professor in Mathematics and Statistics

Y

Yehia, Sherif, PhD, University of Nebraska-Lincoln, 1999; Professor in Civil Engineering

Younas, Javed, PhD, West Virginia University, 2007; Professor in Economics

Yousef, Abdel Rahman, PhD, The University of Toledo, 2009; Visiting Associate Professor in Mathematics and Statistics

Z

Zakaria, Amer, PhD, University of Manitoba, 2012; Associate Professor in Electrical Engineering

Zaki, May, PhD, Middlesex University, 2011; Associate Professor in Arabic and Translation Studies

Zantout, Zaher, PhD, Drexel University, 1990; Professor in Finance

Zhang Perry, Yumin, PhD, City University of Hong Kong, 2017; Assistant Professor in Accounting

Zoubi, Taisier, PhD, University of North Texas, 1992; Professor in Accounting and Associate Dean for Graduate Programs, School of Business Administration

Zualkernan, Imran, PhD, University of Minnesota, 1991; Professor in Computer Science and Engineering

Zuccato, Marco, PhD, the University of Melbourne, 2005; Assistant Professor in International Studies

Zytkoskee, Adrian, PhD, University of Nevada, Reno, 2020; Assistant Professor in English
