His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi

Supreme Council Member, Ruler of Sharjah
President of American University of Sharjah

Chancellor's Message

Since its founding by His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, Member of the Supreme Council of the United Arab Emirates and Ruler of Sharjah, American University of Sharjah (AUS) has earned a reputation for providing transformative educational experiences and a rich multicultural campus environment. The diverse AUS campus community offers a range of opportunities for intellectual growth and personal development.

A dedicated staff and accomplished full-time faculty members distinguish the university. As an AUS student, you will benefit from the faculty's commitment to teaching and their engagement in research, scholarship and creative activity.

This catalog provides an overview of the university's programs and policies, and will serve as your guide to academic life. If you require additional information about the programs or policies, please contact the relevant office and we will assist you.

I am pleased to welcome you to AUS, and I look forward to your contributions to enriching the campus community.

Kevin Mitchell
Chancellor

Board of Trustees

His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, Member of the Supreme Council and Ruler of Sharjah, United Arab Emirates, Chairman of the Board and President of AUS

Ms. Bedour Al Raqbani, Director and Founder, Kalimati Communication and Rehabilitation Center, Dubai, UAE

Mr. Charles Cotton, Director, Cambridge Enterprise, University of Cambridge, UK

Professor Dame Sandra Dawson, DBE, KPMG Professor Emeritus of Management Studies, University of Cambridge, UK

Dr. Hani Findakly, Vice Chairman, Clinton Group Inc., NY, USA

Mr. Hamid D. Jafar, Chairman and CEO, Crescent Petroleum Company, Sharjah, UAE

Dr. Cornelius M. Kerwin, President Emeritus and Professor of Public Administration and Policy, American University, Washington DC, USA

Dr. Dale T. Knobel, President Emeritus, Denison University, Ohio, USA

Professor Kevin Mitchell (Ex-Officio), Chancellor, American University of Sharjah, UAE

Ms. Susan Kaufmann Nash, Senior Counsel, Chrysalis LLP, Abu Dhabi, UAE

Mr. Varouj Nerguizian, Executive Director and General Manager, Bank of Sharjah, Sharjah, UAE

Dr. S. Georgia Nugent, Interim President, College of Wooster, Ohio, USA; President Emerita, Kenyon College, Ohio, USA

Dr. G.P. "Bud" Peterson, President Emeritus and Regents Professor of Mechanical Engineering, Georgia Institute of Technology, Atlanta, USA

Mr. Riad T. Sadek, Chairman, RTS Investments Group, Dubai, UAE

Dr. Choon Fong Shih, University Professor, National University of Singapore, Singapore

Emeriti

Dr. Leroy S. Fletcher, Trustee Emeritus

Dr. Roderick S. French, Chancellor Emeritus, Trustee Emeritus

Dr. Leland T. Blank, Dean Emeritus

Dr. Yusuf Abu-Muhanna, Professor Emeritus

Dr. Fatima Badry, Professor Emerita

Dr. Ibrahim El Sadek, Professor Emeritus

Dr. Fawwaz Jumean, Professor Emeritus

Dr. Ali Saifi, Professor Emeritus

University Administrators

Professor Kevin Mitchell, Chancellor

Mr. Saeed Al-Shamsi, Chief of Protocol, Protocol and Security
 Ms. Rania Morsi, Director, Administrative Services, Advancement and Alumni Affairs
 Mr. Ahmed Aboubaker, Director, Institutional Research and Analysis
 Mr. Kevin Fairbotham, Director, Internal Audit
 Ms. Sue Mainey, Director, Strategic Communications and Marketing

Dr. Juan M. Sanchez, Provost and Chief Academic Officer

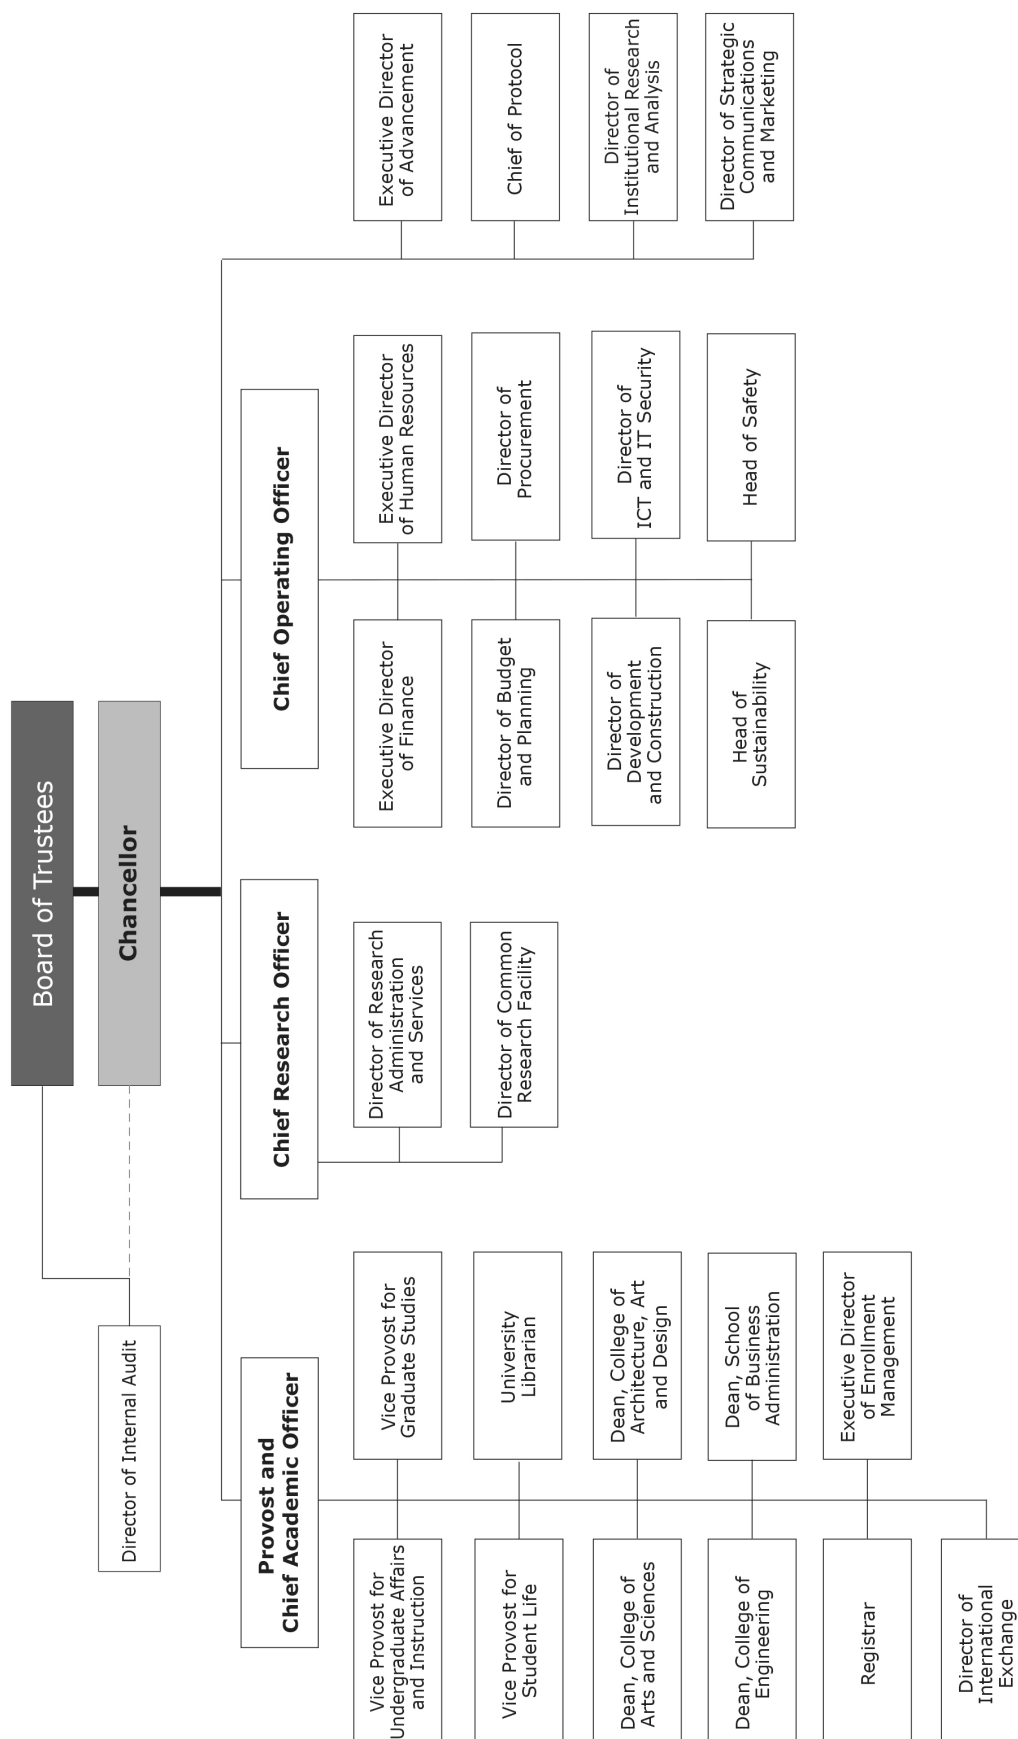

Dr. Mohamed El-Tarhuni, Vice Provost, Graduate Studies
 Dr. James Griffin, Vice Provost, Undergraduate Affairs and Instruction
 Dr. Mehvash Ali, Director, Academic Support Center and First Year Experience Program
 Dr. Norita Ahmad, Director, Faculty Development Center
 Dr. Varkki Pallathucheril, Dean, College of Architecture, Art and Design
 Dr. Zinka Bejtlic, Associate Dean, College of Architecture, Art and Design
 Dr. Mahmoud Anabtawi, Dean, College of Arts and Sciences
 Dr. Hana Sulieman, Associate Dean, Graduate Affairs, College of Arts and Sciences
 Dr. Ahmad Al-Issa, Associate Dean, Undergraduate Affairs, College of Arts and Sciences
 Dr. Sirin Tekinay, Dean, College of Engineering
 Dr. Lotfi Romdhane, Associate Dean, Graduate Affairs and Research, College of Engineering
 Dr. Assim Sagahyroon, Associate Dean, Undergraduate Affairs, College of Engineering
 Dr. Narjess Boubakri, Dean, School of Business Administration
 Dr. Valerie Lindsay, Associate Dean, Graduate Programs, School of Business Administration
 Dr. Mohsen Saad, Associate Dean, Undergraduate Programs, School of Business Administration
 Dr. Lisa Moscaritolo, Vice Provost, Student Life
 Mr. Graeme Dobie, Director, Student Athletics and Recreation
 Ms. Haifa Ismail, Director, Student Engagement and Leadership
 Mr. Ali Shuhaimy, Executive Director, Enrollment Management
 Ms. Jessica March, Director, Achievement Academy
 Mr. Rami Mahfouz, Director, Enrollment Services
 Dr. Linda Angell, Director, International Exchange Office
 Ms. Lynda Ataya, Registrar
 Ms. Lina El-Khoury Bendaly, Associate Registrar
 Ms. Kara Louise Jones, University Librarian
 Dr. Alanna Ross, Associate Librarian, Public Services
 Mr. Thomas Allen Hodge, Associate Librarian, Technology and Technical Services

Dr. Jeannette Vinke, Chief Operating Officer

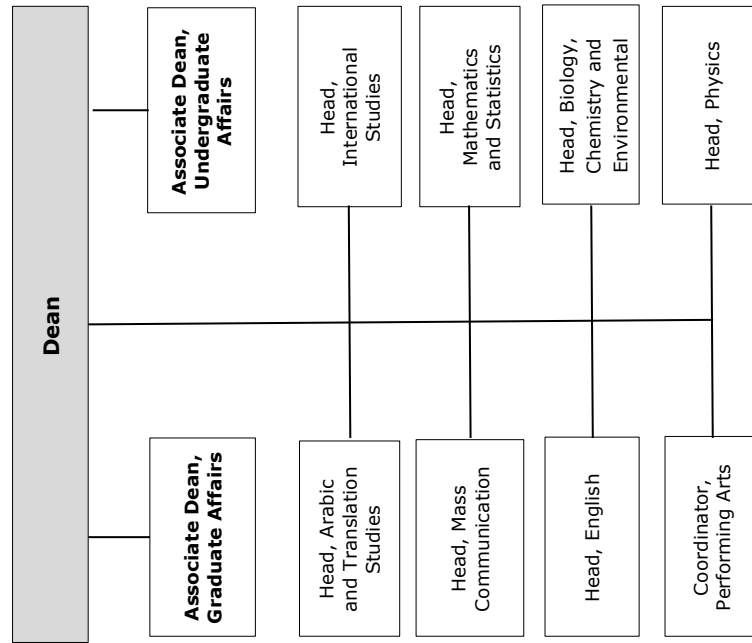

Mr. Julien Carter, Executive Director, Employee Services
 Dr. Lubna Al Saraj, MD, Director, University Health Services
 Mr. Basheer Daoud, Executive Director, Finance
 Mr. Hayder Awni, Director, Development and Construction
 Mr. David Blacklaws, Director, ICT and IT Security
 Mr. Nabeel Amireh, Director, Education Technical Support

The graduation requirements for any individual student are normally determined by the catalog that was effective when the student matriculated in the major. A student may choose to follow the catalog effective for any semester/term in which they were a registered student in their current program of study. A student who changes majors may petition to revert to the catalog in effect at the time of matriculation into the university. The policies, procedures and academic regulations published in the American University of Sharjah catalog are effective at the time of publication but may be subject to change. Students are responsible for adherence to the most up-to-date policies, procedures and academic regulations.

The University

Historical Preamble

American University of Sharjah (AUS) was founded in 1997 by His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi, Member of the Supreme Council of the United Arab Emirates and Ruler of Sharjah. Sheikh Sultan articulated his vision of a distinctive institution against the backdrop of Islamic history and in the context of the aspirations and needs of contemporary society in the UAE and the Gulf region.

AUS was mandated to:

- reinforce the efforts of the leaders of the UAE "to ensure that science and education regain their rightful place in the building and advancement of our society and shaping the lives of our children"
- join other institutions of higher education in seeking "to reshape fundamentally the minds of our youth to enable them to address the challenges of life using the scientific method"
- become a "center of research for educational development and the solution of social problems"
- become "organically linked" to the economic, cultural, scientific and industrial sectors of society in "productive cooperation"
- exercise the "independence and objectivity in teaching and research" necessary for the achievement of these goals

Vision Statement

American University of Sharjah (AUS) aspires to be globally recognized for outstanding and innovative teaching, learning, research and creative work that have a positive and distinctive impact on the region and beyond.

Mission Statement

American University of Sharjah (AUS) is a comprehensive, independent, non-profit, coeducational institution of higher education that promotes excellence in teaching, learning, research and creative work.

Based on an American model of higher education, integrating liberal arts and professional programs, and grounded in the context of UAE culture, AUS prepares engaged and effective members of society who display mastery in their areas of specialization, communicate clearly, think critically and solve problems creatively.

AUS fosters a community that celebrates diversity, and whose members are committed to the ideals of open intellectual inquiry, ethical behavior and civic responsibility.

Institutional Goals

The university is currently guided by the goals outlined in the AUS Strategic Plan 2020–2025 (available at www.aus.edu/about/aus-strategic-plan-2020-2025).

Overview

American University of Sharjah is an independent, not-for-profit, coeducational institution. Although consciously based upon American institutions of higher education, AUS is expected also to be thoroughly grounded in Arab culture and to be part of a larger process of the revitalization of intellectual life in the Middle East.

AUS has succeeded in building a multicultural education environment that brings together people from diverse nations and backgrounds. AUS strives to instill in its students the importance of appreciating and understanding diversity, global issues and their own roles in society.

AUS is a leading comprehensive coeducational university in the Gulf, serving students from the Gulf region and around the world. AUS students are introduced to a culture of high aspiration and achievement to aid them in leading productive and meaningful lives. AUS is also dedicated to the preservation of the physical environment, free from pollution and neglect. This sense of environmental responsibility is passed on to AUS graduates in order to create ecologically aware citizens.

In keeping with its mission, AUS offers students an education that will enable them to comprehend the dynamism and complexity of contemporary global processes. Through the integration of liberal studies and professional education, students are given both breadth of knowledge and specialization in their chosen fields. Education at AUS runs the gamut from art, poetry and religions from past civilizations to the latest skills and technologies of today's information age. These are all presented to students in order to produce future leaders with a firm understanding of how society has reached its present state. The combination of traditional and innovative teaching methods provides an educational environment in which students can realize their individual potential and pursue their goals.

Through the College of Architecture, Art and Design, the College of Arts and Sciences, the College of Engineering, and the School of Business Administration, the university offers 28 majors and 45 minors at the undergraduate level, 16 master's degree programs and two doctoral degree programs.

While Arabic is the official language of the United Arab Emirates, the language of instruction at AUS is English. All classes and administrative functions are conducted in English.

Islam is the official religion of the state, and Arab Islamic culture predominates in the UAE. The nation is also distinguished by its tolerance toward its large expatriate communities, which comprise diverse nationalities, cultures and religious beliefs. Following in this spirit of understanding and acceptance of all peoples, AUS admits students solely on the basis of their academic qualifications regardless of race, color, gender, religion, disabilities, age or national origin. The university's mission is to create a multicultural, international academic community in order to prepare its students to become lifelong learners equipped to adapt to the needs of our changing world.

AUS was established as an "American" university not only in its formal academic and organizational characteristics but also in the recognition that the total culture and philosophy of the educational community is as significant as the formal program of studies. Students learn the lessons of the classroom and the lessons of life in a coeducational, multicultural and multinational environment.

Accreditation and Licensure

AUS, located in the Emirate of Sharjah, is officially licensed from June 19, 1999 to February 25, 2025 by the Ministry of Education of the United Arab Emirates to award degrees/qualifications in higher education.

Degree programs offered by AUS are accredited by the Commission for Academic Accreditation of the Ministry of Education's Higher Education Affairs Division in the United Arab Emirates.

AUS has been accredited in the United States of America by the Middle States Commission on Higher Education (3624 Market Street, Philadelphia, PA 19104, USA, Tel +1 215 662 5606) since June 2004.

The bachelor of science degree programs in chemical engineering, civil

engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering offered by the College of Engineering are accredited by Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

The bachelor of science degree program in computer science offered by the College of Engineering is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org/>.

The School of Business Administration is accredited by the Association to

Advance Collegiate Schools of Business (AACSB International), www.aacsb.edu.

The Bachelor of Architecture program of the College of Architecture, Art and Design is accredited by the National Architectural Accrediting Board (NAAB) of the United States, www.naab.org.

Campus Life

The Campus Complex

American University of Sharjah is situated in University City, which is located 16 kilometers (10 miles) from the center of Sharjah. The distinctive architecture of the domes and arches of the academic and administrative buildings is accentuated with graceful Arab motifs.

The center of the AUS campus comprises 13 academic buildings. These buildings house classrooms and lecture halls of various sizes; a state-of-the-art library; laboratories, workshops and studios; and offices for faculty, academic administrators and support staff.

The campus includes student residential halls (for men and for women) as well as a large Sports Complex and a Student Center. Approximately 27 percent of the student body lives in campus housing. Unlike most American universities, AUS requires faculty members and their families to live on campus. Thus, there is a large and continuous faculty presence at the heart of the campus, providing students with a learning and living environment that allows for ongoing interaction with faculty members and their families.

The City of Sharjah

The location of the university enhances its mission. Sharjah is situated strategically between the Far East and the West, between Africa and Asia. Straddling the breadth of the UAE, which regularly ranks among the world's safest countries, the emirate of Sharjah has beautiful beaches on the shores of both the Arabian Gulf and the Gulf of Oman. Its landscape varies from level plains to rolling sand dunes and mountain ranges.

Today, as in ancient times, Sharjah is a global trade center. Modern Sharjah is also a city of learning and the arts, ranking among the Top 60 Best Student Cities (QS, 2019). Due to its distinctive contributions to Islamic and human culture, Sharjah was selected as the Islamic Culture Capital of the Arab Region for 2014 by the Islamic Organization for Education, Science and Culture. In recognition of its contributions to intercultural dialogue through books and reading, Sharjah was named the 2019 UNESCO World Book Capital. This context facilitates the university's intention to be an academic center at the intersection of ancient cultural traditions and contemporary intellectual currents. Sharjah boasts nearly 30 museums with splendid collections of artifacts and art objects as well as exhibits on science and natural

history. These institutions are sites for field trips, research and possible internships. Sharjah hosts many cultural festivals, programs, educational conferences, fairs and economic expositions, including the annual book fair and the Sharjah International Biennial art exhibition. These resources permit AUS to broaden students' formal education in a way not possible elsewhere in the region.

Campus Services

Miscellaneous service outlets are available on campus to cater for the needs of faculty members, staff members, students and campus residents. These include services such as banking, dining, transportation, laundry, minimarts, a full-service post office and copy center, a bookstore, a travel office, a hairdresser, a barbershop and a pharmacy.

Parking facilities, free and paid, are provided for faculty, staff, students, residents and visitors. AUS reserves the right to restrict or prohibit access to the campus.

The Office of Protocol and Security is responsible for campus security, as well as serving as the university's contact with federal and local government entities, embassies and consulates. The office also provides services such as AUS ID cards, parking stickers, lost and found, assistance with car registration, assistance with procedures related to traffic violations and on-campus accidents, vehicle assistance and official letters required by the federal and local government entities. The Office of Protocol and Security is located in the west Mezzanine Floor of the Main Building (offices MM 29/30/31/32/33) and can be reached at 06 515 2296/515 2074/2075 or at aus_security@aus.edu.

Campus public and occupational health and safety are monitored by AUS Safety and Crisis Management. Safety and Crisis Management provides information on public and occupational health and safety; it also monitors, controls and strives to eliminate health and safety hazards on campus. Safety and Crisis Management is located in the Campus Service Center (office 1022) and can be reached at 06 515 2068.

Immigration-related services are offered for faculty, staff and students, including passport custody, medical test assistance, and the processing of visas and residence permits. For specific details, contact Visa and Equalization Services at ves@aus.edu.

Detailed information on campus services is available in the Life at AUS section of

the AUS website and in the *Student Handbook*, available at www.aus.edu/student-handbook.

Facilities and Resources

Advancement and Alumni Affairs

The Office of Advancement and Alumni Affairs (OAAA) fosters relationships between AUS and its alumni by providing opportunities for mutual involvement that contribute to the missions and interests of both. Since many of the alumni are situated within the neighboring community, OAAA also seeks to publicize the university's programs, goals and achievements to the off-campus community, including alumni, parents and other constituencies of the university.

OAAA promotes a spirit of unity and of possible collaboration among current and former students on current as well as future projects. The alumni are valuable assets, and they are provided ways to aid in the further development of the university by drawing on their knowledge, skills, financial resources and their sense of deep loyalty to their alma mater.

OAAA enhances the financial wellbeing of AUS by raising contributions for the AUS Endowment Fund and establishing fruitful contacts and mutual collaborations with the wider community, which in turn enhances the visibility of AUS and its stature in the UAE and beyond.

OAAA also offers students and alumni comprehensive career services. It works closely with industry in the UAE and the region to promote interaction between potential employers and AUS students and alumni. It organizes corporate briefings, the AUS Careers Forum, the annual Alumni Reunion and the annual Career Fair, and provides information on job opportunities, internships and summer employment. OAAA has a career resource library and an up-to-date database of AUS alumni and employers in the UAE and Middle East.

For more information about OAAA, please visit www.aus.edu/oaaa or contact the office at oaaa@aus.edu.

Architecture, Art and Design Facilities

College of Architecture, Art and Design (CAAD) students benefit from open studios and robust, state-of-the-art facilities. Students accepted into the second-year studio majors have dedicated individual worktables and computer workstations with network connections. Additional spaces, which

are shared by all curricula, include exhibition galleries, a lecture hall, seminar rooms, a media wall, digital classrooms, high-end computing labs and comprehensive printing facilities. CAAD students and faculty also enjoy access to a variety of labs, which are among the most advanced facilities found in universities internationally. CAAD labs cover a wide spectrum of making, both analog and digital, including conventional material fabrication as well as advanced digital technology. The labs are grouped into three categories: Digital Fabrication, Material Fabrication and Media Labs. Digital Fabrication Labs include CNC routers, industrial robotic arms, thermoforming, laser cutting machines and a number of 3D printers. Material Fabrication Labs include a comprehensive woodshop and metalshop, and ceramics studio. The Media Labs contain production spaces, editing suites, photography and printmaking studios, as well as a media equipment center.

AUS Sustainability

AUS understands sustainable resource management is vital to a healthy future and is working to ensure AUS is a sustainability leader in the region.

AUS Sustainability connects across disciplines and departments to provide opportunities for students and faculty to incorporate sustainability into the classroom and address sustainability issues collectively. It envisions the campus as a living lab for new ideas and solutions that address environmental and social issues at AUS and beyond.

AUS Sustainability engages with students to participate in campus campaigns and activities and model a sustainability mindset in their future decision making.

The student EcoRep program plays a key part in AUS achieving a sustainable campus. Student EcoReps act as an important communication channel between the student body and the AUS sustainability team, helping to promote sustainability issues to their peers and raise awareness.

For more information on AUS Sustainability please visit www.aus.edu/sustainability or contact sustainability@aus.edu.

Common Research Facility

The Common Research Facility (CRF) at American University of Sharjah is an organized shared resource that provides access to technologies, equipment (including, but not limited to, instruments, databases, software), services and expert consultation, often on a fee-based or reimbursement basis, to enable, facilitate or enhance the

educational, research and scholarship mission of the university.

The objectives of the CRF are:

- to provide training and basic analytical research support for faculty and students at AUS
- to house and operate multi-user large instruments that require special infrastructure, operational supervision and maintenance
- promote research projects that transcend normal disciplinary boundaries and encourage active collaboration between faculty at AUS and beyond
- to improve faculty's productivity of research and scholarly/creative works and ensure fairness and transparency of access to the CRF resources

Computer Learning Resources

Information Technology (IT) serves the computer-related administrative, instructional, technical and research needs of students, faculty and staff. It also acts as the university's gateway to the Internet for academic and administrative purposes. Services provided include email, learning management system (Blackboard), online collaboration tools, mobile applications, wire/wireless network connections, audio/video conferencing, network storage, telephony, printing services and much more.

All classrooms are networked and equipped with data projectors and other technology that enable faculty members and students to enhance learning with digital and online content. Wireless network access is available in all dormitories and academic areas of the campus.

AUS departments and programs offer a range of specialized and general computer laboratories with software to support student work. Many of these software products are also remotely accessible to students using their own personal devices. Additionally, the library features an information commons with an expanded range of computers, software and related technology along with support for students' research and other academic work.

The university's computer network uses fiber-optic cables that interconnect the entire campus, including the residential halls and faculty housing. Additional information can be found in the IT section of the university website.

Executive Education

AUS provides educational opportunities to lifelong learners who want to refresh their skills and knowledge, display mastery in core competencies of their areas of specialization, stay ahead of

their competition, and communicate clearly, think critically and solve problems creatively. Through its executive education programs, AUS offers individuals and organizations access to the knowledge and expertise of its faculty. Drawing on the resources and facilities of university, AUS executive education programs offer a wide range of non-credit professional certificates and mini-MBAs for executives in addition to custom programs. Executive education at AUS is an essential and continuously expanding activity, connecting academia and industry. The Jafar family has shown in many instances their support to the function of executive education at AUS, as demonstrated with the establishment of the Jafar Center for Executive Education in 2011 (see Jafar Center for Executive Education later in this section). Visit execed.aus.edu or email discoverexeced@aus.edu for more information.

Interactive Trading Floor

The Interactive Trading Floor (ITF) at American University of Sharjah is a technologically advanced 22-seat learning space designed to be the exact duplicate of the trading floor found in typical Wall Street or global investment firms, including the same live feeds, and company- and industry analysis supporting data such as Capital IQ, Thomson Reuters and state-of-the-art Bloomberg terminals.

The ITF allows students to apply analytical models and trading techniques to real time market data, thereby extending theory into practice. Assignments integrating live data, trading simulations, analytical assignments and practical cases as well as trading competitions are used to promote interactive learning and facilitate a profound understanding of the intricacies of financial markets.

Jafar Center for Executive Education

Located in the School of Business Administration, the Jafar Center for Executive Education (JCEE) provides a state-of-the-art facility with equipment and furnishings to support a variety of learning formats, including team activities, video conferences, lectures and seminars. The mission of JCEE is to facilitate interaction between AUS faculty and the business community for the purpose of developing the leadership capacity of enterprises in the UAE and the wider region. Faculty interaction with business leaders also allows professors to take the needs of business and government back into the classroom with graduate and undergraduate students.

Laboratories

Engineering and Computing Laboratories

The College of Engineering has 53 laboratories and workshops. All equipment and instruments are accessible to and extensively used by students. Laboratory focus areas are presented below and may be reviewed in detail on the college's website.

Chemical engineering laboratories focus on unit operations and process control, corrosion, environmental, petroleum, refining, water, materials, thermodynamics, fluid flow, heat transfer, process computer simulation and drug delivery.

Civil engineering laboratories contain equipment and facilities to support teaching and research in structural, geotechnical, geological, water resources and environmental engineering and construction materials.

Computer science and computer engineering laboratories relate to programming, digital systems, microprocessors, very large scale integration (VLSI), embedded systems, industrial computer applications, computer networks, software engineering, operating systems, databases, high-performance computing, Internet of Things (IoT) programming, machine and deep learning, virtual and augmented reality, and mobile and Internet computing.

Electrical engineering laboratories focus on electronics, electric power, control, measurements, machines, communications and signal processing, antennas and microwave, and medical electronics. The Department of Electrical Engineering also has a class 10,000 clean room facility for testing microelectronic chips as well as an advanced EDA lab.

The Engineering Systems engineering laboratory provides students with advanced software to develop their skills in system modeling, system analysis and decision making. The lab has specialized optimization and simulation software to solve practical systems engineering problems in various areas such as supply chain management, production and inventory systems, maintenance engineering, quality engineering, engineering economics, project management and more.

Mechanical engineering has laboratories for advanced manufacturing, aeronautics, computer-aided engineering, control systems, dynamics and mechanical vibrations, engineering measurements, fluid mechanics, heat transfer, internal combustion engines, materials testing, mechatronics,

refrigeration and air-conditioning, thermodynamics and renewable energy.

Mechatronics engineering has a well-equipped center providing an excellent work environment for multidisciplinary teaching and research. Lab activities enable students to integrate, with synergy, contemporary precision mechanics, state-of-the-art control systems, embedded computers and electronics.

The various departments share eight computer labs with 274 stations. All labs have dedicated lab instructors and engineers. Additionally, all engineering facilities offer wireless connectivity.

Interpreting and Translation Laboratory

The Department of Arabic and Translation Studies has a purpose-built interpreting facility. It features simultaneous interpreting booths, a consecutive interpreting table, Internet access and equipment for simulated video conferencing. The department also uses other computer labs, which are equipped with machine translation software, TRADOS and other relevant software, including Internet-based, needed in language engineering as well as subtitling.

Mass Communication Studio and Creative Laboratories

Students in the Department of Mass Communication benefit from an audio-visual studio in news presentations, talk shows and dramatic works. Students also benefit from high-tech digital classroom laboratories with Mac workstations featuring industry-standard graphic design, desktop publishing, video effects, video editing and multimedia software.

Science Laboratories

The science programs benefit from up-to-date laboratories and equipment that provide a rich general and research laboratory experience for AUS students.

The biology laboratories are equipped with the latest light and phase compound microscopes, including a workstation with image analysis capabilities; a laminar flow sterile hood; electrophoresis equipment; cryostat and microtome units; bone densitometer; a freeze drier; growth chambers and incubators; a gel documentation system; a UV trans-illuminator; refrigerated microcentrifuges; a trans-blot semi-dry transfer apparatus; a gel dryer; a CO₂ cell incubator; a -80 °C freezer; a tissue homogenizer; and a thermocycler for DNA amplification.

The environmental sciences and chemistry laboratories are equipped with the latest sampling and analytical instrumentation including AA, GC-MS,

FTIR, TOC, uHPLC, ICP-MS, a 400 MHz Bruker Biospin NMR, various spectrophotometers, a rapid kinetic apparatus and physisorption apparatus.

The physics laboratories are supplied with up-to-date standard equipment, including computer interfaces, motion sensors, current sensors, voltage sensors, magnetic field sensors, linear air tracks, photogates, smart timers, projectile launchers, ballistic pendulums, rotational systems, digitometer, electric field mappers, current balance apparatus, signal/function generators, oscilloscopes, a Hall effect apparatus, lasers, spectral lamps, photoelectric effect apparatus, Geiger-Muller tubes, radiation counters, h/e apparatus, Frank Hertz apparatus, e/m apparatus, spectrometers, interferometers, X-ray machines, a Millikan oil drop apparatus, heat engines/gas law apparatus, a thermal expansion apparatus and an adiabatic gas law apparatus.

Library

The AUS Library, an 11,000-square-meter state-of-the-art facility, provides collections, services and programs to support the curricular and research needs of the university community. The AUS Library provides a wide range of resources and services to meet the specialized needs of graduate students. The library has a growing collection of over 161,000 items that includes reference materials, books, DVDs, and magazines and scholarly journals. In addition to its print collections, the library provides access to over 280,000 e-books, thousands of electronic journals and over 90 online databases. Through the library's website, AUS users can search the online catalog, access databases, read e-books and full-text journal articles, and find other digital resources whether on or off campus. The website also provides instructional aids such as subject guides and tutorials to help students use the library more effectively. Library facilities include a technology-intensive Information Commons, group study rooms, media viewing rooms, and an abundance of reading and study areas. For students who need a silent study environment, the library offers two quiet study areas in which talking, whispering and mobiles are prohibited. Working with professors, AUS librarians offer hands-on workshops on performing library research, conducting a literature review, evaluating sources and websites, and using both print and electronic tools more effectively. Graduate students can request books or journal articles not available in the library through the interlibrary loan service. Further information regarding the library is available at <http://library.aus.edu>.

Office of Strategic Communications and Marketing

The Office of Strategic Communications and Marketing is responsible for developing, overseeing and implementing a comprehensive marketing and communication strategy that strengthens AUS's reputation and positioning both nationally and internationally. Aligned with the university's vision, mission and strategic directions, the office is responsible for achieving AUS's short- and long-term marketing objectives by successfully targeting and communicating with key stakeholders and core constituencies. The office works closely with the institution's leadership to advance AUS's local, regional and international positioning aspirations by actively supporting all aspects of its institutional advancement agenda; efficiently manage its media, print and electronic communication tools to engage and inform internal and external stakeholders; and ensuring campus-wide communications processes.

Research and Grants

AUS supports and promotes research, creative and scholarly work, in addition to private consulting activities of its faculty members. AUS offers both its undergraduate and graduate students' opportunities to work on faculty research projects, to present papers with faculty at international conferences, and to assist faculty in developing their own research grants.

All internal or external research activity conducted at AUS is subject to the Policy on Research Administration, Research and Scholarly Misconduct, and Protection of Human Subjects, in addition to a multitude of financial compliance policies and procedures. Students' creative intellectual property is governed by the policy on Protection of US Students' Creative Intellectual Property. All relevant research policies and procedures are available on ilearn.aus.edu/Community/Office_of_Research/AUS_Policies.

AUS upholds its ethical responsibility to administratively review all proposed research projects involving human and animal subjects. All research studies at AUS involving the participation of humans must be submitted to and approved by the AUS Institutional Review Board (IRB) before any study is undertaken. All studies involving animal subjects undergo protocol evaluation by the Institutional Animal Care and Use Committee (IACUC) before any study is undertaken.

For further information on the university's research and grant opportunities, please visit the AUS website or email research@aus.edu.

Research Centers

AUS has established a number of research centers as part of its commitment to research and community outreach.

Earthquake Observatory

The AUS Earthquake Observatory uses state-of-the-art equipment and software to analyze the region's earthquake activity. The Earthquake Observatory also provides expertise on earthquake hazards and related risk in the UAE and the Gulf region; assessment of seismic hazards at construction sites and petrochemical and industrial facilities; assessment of seismic risk of existing structures and recommendations for strengthening and retrofitting; evaluation of local site effects; preparation of macrohazard and microhazard zonation maps; evaluation of dynamic soil properties in laboratory and field; and noise and vibration analysis.

The Earthquake Observatory provides training for engineers on seismic hazard and site response analysis, liquefaction analysis, geophysical techniques, structural analysis and design for earthquake loading, geotechnical analysis and design of foundations for earthquake loading, and the development of earthquake-resistant design codes.

Institute of Urban and Regional Planning and Design

The Institute of Urban and Regional Planning and Design advances urban planning as it relates to the local culture and identity of the UAE and the Arab Gulf region, and promotes sustainability as integral to all activities pertinent to urban planning and urban design. The institute's objectives are to advance production and accumulation of knowledge in urban and regional planning and urban design; develop and offer educational and training opportunities in urban and regional planning and urban design; collaborate with local governmental, not-for-profit, non-governmental and private agencies concerned with urban planning and development to advance quality of practice and research; advance public discourse on urban planning through public forums (e.g., seminars, conferences, symposia); and increase public awareness in urban planning and urban design.

Mechatronics Research Lab

The Mechatronics Research Lab leads research and development in advanced engineering systems to address high-tech technology transfer in the region. It promotes multidisciplinary research activities between faculty members and graduate students at AUS, and industry

and governmental agencies that require extensive integration of instrumentation, control systems, electronics, intelligent software and computers. The Mechatronics Research Lab offers excellent networking opportunity with leading industries in the region as well as top academic institutions worldwide. Areas of expertise within the research lab include embedded and distributed process control, remote monitoring, nonlinear and intelligent control systems, robotics, autonomous systems and unmanned vehicles.

Testing Center

The AUS Testing Center serves as a central point of testing for both the AUS campus and the community.

The center administers placement tests for newly admitted AUS students and facilitates general university testing. The center also offers internationally recognized tests and vocational tests. In addition, it offers proctoring services for external tests, such as distance-learning examinations.

The Testing Center has professional, trained proctors certified by ETS and Pearson VUE®. It is an authorized TOEFL iBT Test Center and a Pearson VUE® authorized Test Center (PVT Select). AUS' main testing partners are ETS, AMIDEAST and the British Council.

Tests offered by the center include the Institutional paper-based TOEFL (ITP), Internet-based TOEFL (iBT), paper-based IELTS, computer-delivered IELTS, SAT, TWE, TOEIC, Fundamentals of Engineering Exam (FE), Principles and Practice of Engineering Exam (PE), Graduate Management Admission Test (GMAT) and CISCO exams.

For more information, visit www.aus.edu/testing-center.

University Health Services

University Health Services (UHS) provides primary health care services to all AUS students, faculty, staff members and their dependents. The health center is open Sunday–Thursday from 8:30 a.m. to 4:30 p.m. and also provides 24-hour emergency care. Depending on the severity of the illness, patients are referred to a hospital for further treatment if required. Great emphasis is placed on making the campus a healthy and safe place to study, work and live by providing preliminary physical examinations to all students and employees as a mandatory part of registration/employment process, followed by continued quality care throughout their time at AUS, including sport team fitness checks.

UHS is a Ministry of Health licensed facility and is staffed with a qualified licensed medical team, which includes general practitioners and registered

nurses. On-site counseling services are also available.

UHS is equipped with an observation room (day care) to closely monitor patients for short stays before transferring to a hospital if required. UHS has access to an on-campus laboratory and pharmacy to assist in serving the AUS community. An ambulance is on standby 24 hours a day within University City.

Health Education Programs

As part of an educational institution, UHS plays an active role in educating the university community and promotes on-campus health and wellness activities throughout the academic year. UHS programs include awareness campaigns on health-related issues such as first-aid training and CPR courses.

Health Insurance Plans for Students

Health insurance is available for graduate students. It is compulsory for AUS-sponsored (visa sponsored by AUS) graduate students, unless covered by private insurance (proof of coverage must be submitted to UHS). It is optional for graduate students who are not sponsored by AUS.

Students must visit UHS during the semester/term registration period and submit the required health insurance registration documents (for a list of these documents, see www.aus.edu/healthcenter) by the semester/term registration deadline to avoid incurring government fines at the time of UAE residence visa renewal. University Health Services will not be liable for any such fines.

For information on the health insurance plans coverage, visit www.aus.edu/healthcenter.

University Sports Facilities

Student Athletics and Recreation manages the sports facilities, including the Sports Complex and the Sports Pavilion. The Sports Complex consists of indoor facilities such as basketball, tennis, squash and volleyball courts; multipurpose halls; a 50-meter swimming pool; saunas; fitness centers with free weights and exercise machines; an aerobics hall and a multipurpose hall for table tennis/martial arts. Outdoor sports facilities include the Sports Pavilion, a 400-meter running track, a soccer field, a cricket ground, a cricket practice net and a baseball field.

The AUS Sports Facilities are to benefit the entire AUS community. Students, staff, faculty members and their dependents enjoy free usage of these facilities.

Details on the AUS sports facilities are available in the *Student Handbook* and

at www.aus.edu/osa/athletics. Interested AUS community members can also visit the Sports Complex reception or call 515 2778.

Student Life on Campus

Student Code of Conduct

American University of Sharjah is a community of individuals living, working and studying together in order to create the ideal conditions for learning. Mutual respect and responsibility are imperative if each individual is to flourish and grow in this environment.

In order for the purpose of the university and its community to be realized, the rights, responsibilities and reasonable standards of conduct essential to a university community must be delineated. The principles, rules and regulations of the university constitute the basic standards and guidelines for conduct on and off campus. The Office of Student Affairs (OSA) establishes and enforces those rules and regulations. The full text of the Student Code of Conduct is provided in the *Student Handbook* and at www.aus.edu/student-handbook.

As part of OSA, Student Conduct and Conflict Resolution is responsible for educating students about their rights and responsibilities, creating awareness within the AUS community about the Student Code of Conduct, and implementing the code in a fair and consistent manner. Allegations of misconduct under the Student Code of Conduct are resolved by Student Conduct and Conflict Resolution in a manner consistent with the core values of fairness, honesty and integrity. Student Conduct and Conflict Resolution also offers mediation services, which assist students in resolving conflicts through mediation. Students are trained in mediation and awarded a certificate on successful completion of mediation training and mock sessions. Student Conduct and Conflict Resolution is located on the first floor of the Student Center in offices A254–256 and 233.

For more information, please refer to the *Student Handbook* or visit www.aus.edu/osa/studentconduct.

Community Service and Outreach

AUS Community Service and Outreach (CSO) links students with civic engagement and service opportunities through community partners. CSO allows students to experience first-hand the value of serving others through charity, awareness and outreach programs. Throughout the year, CSO organizes a number of events and initiatives that promote a variety of volunteer programs that encourage and empower students who are driven by social impact. Current volunteer

programs are listed in the Student Life section of the university website (www.aus.edu/life-at-aus/student-life/community-involvement/volunteer-communities) and in the *Student Handbook*.

Students who are interested to learn more about volunteer opportunities can visit Community Service and Outreach in the Student Center (office A222), call 515 2794 or email osacom-services@aus.edu.

Cultural Events

Theatre performances and musical events, ranging from classical and regional to jazz and rock, are brought to campus through the Cultural Events Committee. For more information, visit www.aus.edu/events.

The Performing Arts Program also presents a wide array of student productions in theatre, dance and music in the Arts Building rotunda. For more information, visit www.aus.edu/cas/performing-arts-program or email paevents@aus.edu.

Graduate Student Association

The Graduate Student Association (GSA) is an interest-oriented association under Students Clubs and Organizations. GSA represents the interests and concerns of AUS graduate students. It strives to support and promote the identity and values of the graduate student body. Through various activities and initiatives, such as meetings, networking events, sports, research discussion groups and more, the GSA enriches the lives of graduate students and enhances the quality of their educational experience, building a strong sense of community both on and off campus.

Graduate students are automatically members of the GSA for each semester they are enrolled. The GSA is managed by the GSA Council, an elected group of students.

For more information about the GSA, please contact gsa@aus.edu.

Graduate Student Employment Opportunities

AUS offers graduate students several employment/learning opportunities on campus: employment through graduate assistantships, as research assistants on faculty research projects (both internally and externally funded grants) and as work-study students. For more information, please see www.aus.edu/graduate_assistantship (master's students) or www.aus.edu/admissions/doctorddegrees/graduate-assistantships (doctoral students).

Office of Student Affairs

The mission of the Office of Student Affairs (OSA) is to provide high-quality services and programs facilitating informal learning that is in congruence with the Middle Eastern culture; complements formal learning; and promotes aesthetic, ethical, intellectual, personal, social and talent growth in a safe environment.

The Office of Student Affairs provides a host of out-of-class learning opportunities in extracurricular areas for students to engage and develop the student life experience at AUS. Student Affairs transforms student life with a purpose, engaging students in activities that facilitate their holistic development. Student involvement in OSA-initiated activities enables them to accomplish their personal and educational goals. Students are engaged in diverse programs, activities and events and provided services through Student Athletics and Recreation, Student Engagement and Leadership, Student Clubs and Organizations, Community Services and Outreach, On-Campus Student Employment, Student Leadership Programs, Student Residential Life, and Student Conduct and Conflict Resolution.

More information on Student Affairs is available at www.aus.edu/student-affairs. Students can also visit the Office of the Vice Provost for Student Life (M-217 on the Second Floor of the Main Building), call 06 515 2166 or email studentaffairs@aus.edu.

Student Athletics and Recreation

The Office of Student Affairs offers students many opportunities to develop their abilities in a variety of sports. Full-time and part-time coaches and trainers in Student Athletics and Recreation help develop student's fundamental skills in athleticism, strength and conditioning, and overall sportspersonship, as well as support and encourage students to adopt a disciplined and healthier approach to sports. AUS offers a variety of individual and group fitness classes, general leisure activities and a broad-base of competitive and recreational programming. For more information, visit the Sports Complex reception or www.aus.edu/osa/athletics or call 515 2778.

The university's intramural sports program complements students' academic, social and cultural education. Involvement in intramural sports activities reduces stress, promotes team bonding and provides an excellent opportunity for students to socialize.

Student Athletics and Recreation also offers students the opportunity to participate in local, regional and

international intercollegiate sports tournaments.

Student Center

The Student Center plays an important role in the extracurricular life at the university by serving as a central hub for student activities. It is primarily dedicated to serving the cultural, social and recreational interests of the student body as well as to providing students with a comfortable and inviting atmosphere to unwind.

The Student Center is more than just a place for students to socialize and relax; Student Engagement and Leadership's offices are located at the center to provide students with non-academic support services and facilities under one roof. The Student Center provides a wide array of amenities and facilities. These include an information desk, a meeting room, club workstations, TV lounges, a floating theatre and a multipurpose room.

Student Engagement and Leadership manages the Student Center facilities and all events and activities that take place at the center throughout the year. For more information about the Student Center call 06 515 2716.

Student Clubs and Organizations

Student-sponsored organizations are an integral part of the learning process at AUS. The academic experience is enriched by participation in activities that allow students to pursue their personal interests outside the classroom while providing opportunities for leadership development and for involvement in university life.

Student Engagement and Leadership is the central support for the numerous student organizations on campus. Its role includes supervising and providing assistance with program planning and implementation.

The student organizations at AUS span a wide range of interests and reflect the varied cultural backgrounds of AUS students. Interest-oriented and clubs organize numerous professional and cultural activities throughout the academic year and play a vital role in fostering a rich multicultural environment on campus. For a complete listing of student clubs, visit www.aus.edu/osa/studentorganizations.

Participation in student clubs and organizations is strongly encouraged. Students are also encouraged to form organizations/clubs that promote their interests and hobbies.

For more information, read the Student Clubs and Organizations Manual available at www.aus.edu/student-clubs-and-organizations-manual or visit

Student Clubs and Organizations in the Student Center (A244, A246 and A247).

Student Council

His Highness Sheikh Dr. Sultan bin Muhammad Al Qasimi strongly encouraged AUS students to establish a Student Council in order to ensure student representation on campus.

The AUS Student Council is an elected body that articulates undergraduate students' views and interests in the university. The Student Council is a vehicle for ensuring that undergraduate students can have a voice in formulating university priorities and policies. It also provides a structure for greater student involvement on campus. The Student Council follows its constitution and by-laws in decisions made by members and the council. The constitution and by-laws are written and amended by the Student Council and approved/endorsed by the Vice Provost for Student Life and the Chancellor. The Vice Provost for Student Life advises the Student Council. For information, please see the Student Handbook, visit the Student Council office in the Student Center (office A107) or visit www.aus.edu/student-council.

Student Engagement and Leadership

Student Engagement and Leadership promotes students' intellectual growth, skills and all-round personality development by engaging them in registered student organizations, volunteer programs, on-campus student employment, and varied events and activities locally, regionally and internationally. Student Engagement and Leadership offers resources and services that aid student participation and development and builds university reputation through student achievements. For more information, please see the *Student Handbook* or visit the Student Engagement and Leadership office in the Student Center (office A252).

Student Leadership Programs

Student Leadership Programs (SLP) fosters a wide range of opportunities for students to develop their leadership, personal and communication skills, and prepares them for a lifelong commitment to leadership and good citizenship. SLP engages students in local, regional and international conferences and Model United Nations simulations that aid in the development of character, public speaking skills, confidence, mindset and overall leadership capabilities. Students can choose to get involved in programs such as the Peer Leaders Program, Emerging Leaders Program, Women's Leadership and Enrichment Program, and the Youth

Leadership Training Program. They can also participate in the AUS Student Lecture Series and attend workshops under the Student Training and Workshop Series.

For more information, visit office A249 in the Student Center, go to www.aus.edu/leadership-program, email osasp@aus.edu or call 515 4771.

Student Residential Life

The main objective of Student Residential Life of OSA is to support and complement the mission of the university and its academic programs by creating a comfortable and safe environment that contributes to the success of resident students' educational progress and personal growth. The AUS residential halls offer a unique multicultural environment in which students from different parts of the world can learn from one another.

AUS has a dedicated residential hall for male graduate students and researchers separate from undergraduate students. This is to enable more interaction between the graduate students and researchers and to provide a conducive living-learning environment. Students have the option to choose between two room categories: private rooms and sharing rooms.

Because residential hall living is seen as a positive educational experience, students are encouraged to live on campus. Living on campus complements the overall learning experience by fostering independence and tolerance of others in students. Furthermore, living on campus allows students to make the most of what AUS has to offer, such as sports and dining facilities, the library and laboratories; it also gives students convenient access to the many activities that take place during the day and in the evening. The university offers a convenient bus service between the residential halls and other areas on campus.

The residential halls for male and female students are completely separate. All hall residents are expected to spend every night in the halls. To ensure the security of all students, the residential halls are protected by security patrols.

Residential halls staff members are available around the clock for the safety and comfort of all residents. Resident Assistants (RAs) in each resident hall foster a sense of community among students living on campus. Each floor of a residence hall has one or more RA. In addition to connecting residential halls students to the residential community, RAs inform students about university resources, help them understand the policies outlined in the *Student Handbook* and introduce them to extracurricular opportunities at AUS.

Regulations for the residential halls are available in the *Student Handbook* and at www.aus.edu/residential-halls.

Students with Mobility Issues

AUS students who require support due to mobility issues should contact the Office of Student Affairs at studentaffairs@aus.edu.

Student Educational Services

Study Abroad

The International Exchange Office (IXO) works with AUS students who wish to study at universities in other countries either for a semester or for one academic year. For information on study abroad opportunities for AUS students, please see the section entitled AUS Students Studying Abroad under Registration and Course Information in the Academic Policies and Regulations section of this catalog.

The office also facilitates the admission of international students coming to AUS to study abroad for a semester or up to one academic year. For more information on study abroad students' admission to AUS, please see the Other Admission Categories section in Admission to Undergraduate Studies later in this catalog. IXO also welcomes, orients and supports international degree-seeking students during their time studying at AUS.

In addition to facilitating student exchanges and study abroad, IXO also administers processes enabling faculty-led study tours, visiting guests-in-residence, visiting guests and delegations, tuition exchange programs, and the dissemination of information regarding international scholarships and internships.

For more information, visit www.aus.edu/ixo.

University Counseling Services

University Counseling Services (UCS) provides psychological services that are designed to help students achieve their educational goals, learn the process of problem solving and decision making, develop the capacity for satisfying relationships, and learn to make full use of their potential for continued growth beyond their educational experience.

Counseling

Counselors at UCS help students explore any academic or personal problems or concerns that they may be experiencing. Some common issues that bring students to UCS include adjusting to university life, time management issues, confusion about life or career goals, identity concerns, relationship conflicts, eating issues, anxiety, depression or dealing with grief and loss.

Our counselors are prepared to deal with a multitude of issues or concerns and encourage students to identify personal goals and help them develop coping skills and generate solutions for current difficulties. Students may receive help for any social, emotional, educational or vocational issues.

Counseling is strictly confidential. The information shared with a student counselor will not be disclosed to another individual or organization without the written consent of the student. Services are free, voluntary and available to all undergraduate and graduate students currently enrolled at AUS.

Students can schedule appointments by calling 06 515 2100 or by emailing ucsappointments@aus.edu or by stopping at the University Health Services reception.

Further details are available at www.aus.edu/life-at-aus/student-life/student-support-services/counseling-services.

Self-Help Resources

UCS has extensive self-help resources on many subjects in the form of handouts, books, videos and links on its section of the university library website at <https://aus.libguides.com/well-being>. Topics include coping with stress, depression, sleep disturbance, loneliness, anxiety, eating disorders, grief and loss, substance abuse, relationship building, assertiveness, career choices, study skills, concentration and memory, motivation, time management, and test-taking strategies.

Student Workshops

Workshops are conducted throughout the academic year on topics such as time management, study skills, communication skills, anxiety and stress management, anger management, clinical anxiety and depression, personality assessment and disorders, treatment for posttraumatic stress disorders and trauma therapy, adjusting to university life, personal development, positive psychology, motivational exercises and memory improvement. Workshop topics and dates are advertised around campus, or students can email UCS at ucsappointments@aus.edu to learn about future workshops. Students are encouraged to contact UCS with ideas for future workshops.

Writing Center

The AUS Writing Center, located on the ground floor of the AUS Library building (room LIB 024), helps students become independent, confident writers. Available to all AUS students, the Writing Center offers one-on-one writing conferences

by appointment or on a drop-in basis. Consultations may include thesis development, organization, outlining, paragraph development, vocabulary, sentence structure and mechanics. Students may visit the Writing Center to work on drafts, to do research or to work with a consultant on particular aspects of their writing. The Writing Center also offers workshops on a variety of writing topics throughout the academic year.

For more information, visit www.aus.edu/cas/writing-center.

Admission to Graduate Studies

American University of Sharjah is a center for high-quality graduate education and research as well as a resource for sustainable development and advancement for the Gulf region and internationally. Students in AUS graduate programs find career advancement opportunities and personal enrichment. These programs foster a stimulating intellectual environment of collaborative research and intellectual exchange. The university's cross-disciplinary graduate courses and specialized programs attract excellent students who pursue creative and original work under the guidance of highly qualified, dedicated faculty members recruited from the most prestigious universities in the United States, Canada and around the world.

Degree Offerings

AUS currently offers 18 programs of graduate studies: 16 master's degree programs and two PhD degree program. These are:

College of Architecture, Art and Design

- Master of Urban Planning

College of Arts and Sciences

- Master of Arts in English/Arabic/English Translation and Interpreting
- Master of Arts in Teaching English to Speakers of Other Languages
- Master of Science in Mathematics
- Doctor of Philosophy in Materials Science and Engineering

College of Engineering

- Master of Science in Biomedical Engineering
- Master of Science in Chemical Engineering
- Master of Science in Civil Engineering
- Master of Science in Computer Engineering
- Master of Science in Construction Management
- Master of Science in Electrical Engineering
- Master of Science in Engineering Systems Management
- Master of Science in Mechanical Engineering
- Master of Science in Mechatronics Engineering
- Doctor of Philosophy in Engineering - Engineering Systems Management

School of Business Administration

- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Finance

Application Process

Admission to all AUS graduate programs is processed through the Office of Enrollment Management/Graduate Admissions. Applicants should address all inquiries, requests for application forms and correspondence to:

American University of Sharjah
Office of Enrollment Management
Graduate Admissions
PO Box 26666
Sharjah, United Arab Emirates
+971 800 ASKAUS
<https://infodesk.aus.edu>

To apply to graduate studies at AUS, applicants must:

- complete the online application (www.aus.edu/apply)
- submit the official transcript, graduation diploma and TOEFL or IELTS (Academic Version or IELTS Indicator) or Cambridge English Linguaskill online or EmSAT (Achieve) scores to the Office of Enrollment Management/Graduate Admissions
- meet all program specific requirements
- pay the application fee

Incomplete applications are not processed.

Some diplomas might require attestation from the Ministry of Education's Higher Education Affairs Division in the UAE. For details, consult www.aus.edu/required-attestations.

Applicants to a master's degree program who earned their undergraduate degree from universities outside the UAE and applicants to a PhD degree program who earned their undergraduate degree and/or their graduate degree from universities outside the UAE must present a Certificate of Equivalency for their graduation certificates from the UAE Ministry of Education's Higher Education Affairs Division. Applicants who earned their degrees from universities inside the UAE may be required to present a Certificate of Equivalency for their graduation certificates from the UAE

Ministry of Education's Higher Education Affairs Division. In such cases, Graduate Admissions will notify the applicants. For details, refer to www.aus.edu/uae-certificate-of-equivalency.

Applicants must satisfy both the general university requirements for graduate admission and the degree program-specific admission criteria. The Office of Enrollment Management/Graduate Admissions determines if the applicant meets the general university requirements for graduate admission. Recommendations for admission to a specific degree program are made by the pertinent degree program's graduate admission committee.

The Office of Enrollment Management/Graduate Admissions will notify the applicant of the university's final decision.

Waiver of English Language Proficiency Requirement

Applicants to AUS graduate degree programs may be exempted from the English language proficiency admission requirement provided the conditions below are met. Decisions regarding exemptions are made by the Office of Enrollment Management/Graduate Admissions. Applicants are required to present supporting documents.

Applicants to a Master's Degree Program

Applicants who completed all their schooling (K-12) as well as their undergraduate education in an English-medium institution located in an English-speaking country may be considered for exemption from the English language proficiency admission requirement.

Holders of a bachelor's degree awarded by AUS are exempted from the English language proficiency admission requirement.

Applicants to a PhD Degree Program

Applicants who have earned a master's degree from an institution where English is the language of instruction and who have met the AUS English language proficiency requirement for full graduate admission at the time of their admission to that master's degree program are exempt from the English language proficiency admission requirement.

International Applicants

International applicants are required to present an equivalency of their degree from the UAE Ministry of Education's

Higher Education Affairs Division. The ministry provides this service at both its Abu Dhabi and Dubai offices. This necessitates that applicants prepare and attest all the required documents before leaving their home country or the country they have graduated from. For information regarding attestations, refer to www.aus.edu/attestations-1. For information on the equivalency processes, consult www.aus.edu/uae-certificate-of-equivalency. Applicants may also contact the Office of Enrollment Management/Graduate Admissions.

Admitted international students who need visas for the UAE should submit the visa application at least two months prior to the first day of class. For further details and for the visa application form, please refer to www.aus.edu/international-students.

Application Deadlines

Applicants should submit complete online applications by the following dates:

Master's Degree Programs

Spring Semester 2021

December 24, 2020

Summer Term 2021

May 20, 2021

Fall Semester 2021

July 29, 2021

PhD Degree Programs

Fall Semester 2021

May 30, 2021

General University Requirements for Graduate Admission

Full Admission

For full admission to a graduate program at AUS, an applicant must meet the general university admission requirements detailed in the sections below. Some degree programs may require additional specific admissions requirements. For details, please refer to the relevant degree program section of this catalog.

Master's Degree Programs

Applicants to a master's degree program must:

- hold a four-year bachelor's degree from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Applicants with a bachelor's degree obtained outside the UAE must submit an equivalency of their degree from

the UAE Ministry of Education's Higher Education Affairs Division.

- have attained a minimum undergraduate cumulative grade point average (CGPA) of 3.00 (on a scale of 4.00) or its equivalent
- have attained a minimum iBT score of 80 or a minimum IELTS score of 6.5 (Academic Version or IELTS Indicator) or a minimum Cambridge English Linguaskill online score of 176 or a minimum EmSAT (Achieve) score of 1550

PhD Degree Programs

Applicants to a PhD degree program must:

- hold a master's degree from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Applicants with a master's degree obtained outside the UAE must submit an equivalency of their degree from the UAE Ministry of Education's Higher Education Affairs Division.
- have achieved a minimum master's degree cumulative grade point average (CGPA) of 3.00 (on a scale of 4.00) or its equivalent. Some programs may require a higher CGPA.
- have attained a minimum iBT score of 80 or a minimum IELTS score of 6.5 (Academic Version or IELTS Indicator) or a minimum Cambridge English Linguaskill online score of 176 or a minimum EmSAT (Achieve) score of 1550

Only applicants meeting the full admission requirements will be considered for PhD degree program admission.

Conditional Admission

Applicants to a master's degree program, holding a four-year bachelor's degree from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS, but who otherwise do not meet the general university requirements for full admission to a master's degree, may be granted conditional admission, provided one of the following requirements is met:

- the applicant has achieved a minimum undergraduate cumulative GPA of 3.00 (on a scale of 4.00) or its equivalent, and an iBT score of less than 80 but greater or equal to 71, or an IELTS score (Academic Version or IELTS Indicator) less than 6.5 but greater or equal to 6.0, or a Cambridge English Linguaskill online score less than 176 but greater or equal to 169, or an EmSAT (Achieve)

score less than 1550 but greater or equal to 1400

- the applicant has achieved an undergraduate cumulative GPA less than 3.00 but greater or equal to 2.50, and have attained a minimum iBT score of 71 or a minimum IELTS score of 6.0 (Academic Version or IELTS Indicator) or a minimum Cambridge English Linguaskill online score of 169 or a minimum EmSAT (Achieve) score of 1400

Note: The MBA and MATESOL degree programs require a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version or IELTS Indicator) score of 6.5 or a minimum Cambridge English Linguaskill online score of 176 or a minimum EmSAT (Achieve) score of 1550. Conditional admission to these two degree programs may only be granted accordingly.

Conditional admission applicants may be required to meet additional requirements as specified by their requested master's degree program. Applicants should consult the relevant master's degree program section of this catalog.

Achieving Full Admission Status

To be accorded full admission into their master's degree program, conditional admission students must satisfy the following requirements and any other conditions imposed by the degree program:

- Students who did not meet the minimum English language proficiency scores for full admission must achieve, before the beginning of the second semester of study, the required minimum scores.
- Students who did not meet the minimum undergraduate cumulative GPA required for full admission must achieve a cumulative GPA of at least 3.00 in the first two graduate-level courses (for a minimum of six credit hours). Remedial/bridging courses do not satisfy this requirement. (For details on remedial/bridging courses, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section later in this catalog.) Courses must be completed over a maximum period of two consecutive semesters, with the summer term considered as a semester. Students who fail to meet this requirement by the conclusion of the second semester of study may petition the Office of Enrollment Management/Graduate Admissions for an extension of one semester/term. Petitions must be submitted for the semester/term immediately following the completion of the first six credit

hours of graduate-level courses. Extensions are granted only in exceptional circumstances. Students granted an extension of one semester/term are not eligible for further extensions.

If the above provisions and additional specific conditions imposed by the master's degree program are not met, the student will not be allowed to continue master's degree studies at AUS.

Conditionally admitted students are not eligible to register for more than two graduate-level courses (a maximum of six credit hours) per semester. Further details on student's course load are provided in Student Course Load under the Academic Policies and Regulations section later in this catalog.

Transfer Applicants

Applicants transferring from independently accredited universities recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS and offering learning experiences equivalent to those offered at AUS may be considered for transfer admission, provided the following conditions are met:

- Applicants have successfully completed one or more semesters at their institution.
- Applicants are in good standing (i.e., not on any probation or dismissal from the institution from which they are transferring).
- Applicants achieved at the institution they are transferring from a minimum cumulative grade point average (CGPA) of 3.00 or its equivalent.
- Applicants meet the AUS General University Requirements for Graduate Admission/Full Admission (for the full list of admission requirements, refer to Full Admission earlier in this section).

Transfer applicants may not be granted conditional admission.

In addition to the complete graduate application, transfer applicants must submit official transcripts of their university studies along with the syllabi for and descriptions of courses they seek to transfer. For details on transfer of credit hours, see Transfer of Credit Hours later in this section.

Applicants for a Second Master's Degree

Holders of a master's degree awarded by AUS or another independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS

may apply for admission to an AUS master's degree program.

Applicants for a second master's degree must complete the New Applicant online application by the dates specified in the Application Deadlines section. The official transcript of the previously earned master's degree must be submitted. After completing their application, applicants should contact graduateadmissions@aus.edu to request admission as applicants for a second degree.

To be considered for admission, applicants must satisfy the General University Requirements for Graduate Admission (refer to Full Admission and Conditional Admission earlier in this section), as well as any specific requirements set by the master's degree program they are applying to. For details on program-specific admission requirements, please refer to the relevant degree program section of this catalog. Holders of a master's degree awarded by AUS are considered to have met the AUS General University Requirements for Graduate Admission.

Graduate courses applied towards a previously earned master's degree may be considered for transfer of credit hours. Whether the first master's degree was awarded by AUS or by another university, the grades earned for courses completed to fulfill the requirements of the first master's degree program will not count in the calculation of the cumulative GPA for the second master's degree program. Approved courses that meet the graduation requirements of the second master's degree program will be recorded as transferred courses. For more information on transfer of credit hours, see Transfer of Credit Hours later in this section.

Policies and regulations governing registration, grades and graduation requirements apply.

Non-degree Admission

Non-degree status is assigned to students who enroll in courses at AUS without pursuing a degree. Non-degree status does not apply to exchange, transient and visiting students.

Non-degree graduate applicants must meet the same minimum admission criteria established for full or conditional admission and must complete the online New Applicant application by the dates specified in the Application Deadlines section. Applicants must apply to the graduate degree program offering the courses they wish to take. After submitting their application, applicants should contact graduateadmissions@aus.edu to

request admission as non-degree seeking graduate students.

AUS graduate students who have been dismissed or who interrupt their studies may not apply for admission as graduate non-degree seeking students.

AUS graduate students enrolled in a degree program may not change their status to graduate non-degree seeking students.

Non-degree graduate students may enroll in any graduate course for which they have the necessary academic background and qualifications. They must register for courses through the Office of the Registrar. In courses with enrollment limits, priority is given to AUS degree-seeking students.

Non-degree graduate students may register for a total of nine credit hours in graduate courses. Non-degree graduate students who do not meet the requirements for full admission may register for no more than two graduate courses (a maximum of six credit hours) in their first semester of study. If all requirements for achieving full admission status of graduate conditionally admitted students are met (refer to the Conditional Admission section earlier in this section), registration in a subsequent semester/term will be allowed. Registration in courses is subject to approval by the relevant graduate program coordinator. Standard graduate tuition and fees apply.

Non-degree graduate students may request to change status to graduate degree seeking students. For details, please refer to the Change of Status section hereafter.

Returning Students Admission

Graduate students in good academic standing who leave AUS for more than two consecutive semesters, inclusive of semesters of complete course withdrawal, who wish to resume studies must complete the online Returning Applicants application.

Readmission of returning students is subject to AUS academic rules and regulations on readmitting students. All admission requirements in place at the time of applying for readmission must be met.

Students on academic probation and dismissed students may not apply for readmission.

Applicants with Mobility Issues

Depending on available facilities and the type of physical condition, the university may provide special services to applicants with mobility issues. Applicants are requested to contact the Office of Student Affairs at

studentaffairs@aus.edu to determine if a specific service can be provided by AUS. This information will be treated confidentially.

The Offer of Admission

The offer of admission, regardless of type, is valid only for the semester for which the candidate has applied. Applicants can defer their admission for one semester. Deferral requests should be submitted online on apply.aus.edu. Applicants who wish to defer the application for one academic year or longer must submit a new application; a new application fee will apply.

Applicants wishing to change the degree program they were admitted to after receiving the admission offer must submit a new application. A new application fee will apply. Applicants applying for graduate assistantship under the new degree program must submit new reference letters addressed to the new degree program.

Falsified Admission Documents

AUS reserves the right to take disciplinary action up to and including the revocation of admission or permanent dismissal if the university determines that information has been misrepresented in application documents or falsified documents have been submitted in support of an application for admission or matriculation to a program.

Other Admission Categories

Exchange Students Admission

An exchange student is not formally admitted to American University of Sharjah but is allowed to take courses at AUS in the context of a semester exchange program. Exchange students should check with their home institutions about the transferability of AUS credit hours to their programs.

To be admitted as an exchange graduate student, a student must be enrolled in a graduate degree program at an accredited institution and be in good academic standing in his/her current institution. In addition, students must have attained a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version or the IELTS Indicator) score of 6.5 or a minimum Cambridge English Linguaskill online score of 176, or they must have successfully completed the CEFR English C1 level. Exchange students coming from institutions located in an English-speaking country and where English is the language of instruction, or from institutions with an English language proficiency admission requirement higher than at AUS, are exempt from this requirement.

Students must first apply through the study abroad office at their home institutions. In addition, they must submit to the AUS International Exchange Office (IXO) a complete online application, accessible through www.aus.edu/ixo, along with an official university transcript showing courses in progress at the time of application. To secure seats in courses, applications should be submitted by the first Saturday of March for summer and fall enrollment and the first Saturday of October for spring enrollment.

Exchange graduate students register through IXO. They may enroll in any university graduate-level course for which they have the necessary academic background and qualifications, subject to the approval of the relevant graduate program coordinator or college/school associate dean for graduate studies. In courses with enrollment limits, priority is given to AUS students. Tuition and fees are governed by exchange agreements. Details are available with AUS IXO.

Normally, a student is allowed to register as an exchange student for not more than one academic year.

For further information, please contact IXO at ixo@aus.edu.

Graduate students admitted as exchange students may request to change status to graduate degree seeking students. For details, please refer to the Change of Status section hereafter.

Transient Students Admission

Transient student status is assigned to students who have obtained their undergraduate or graduate degrees from AUS and have returned to take extra course(s) at AUS.

Applicants seeking graduate transient student status at AUS and meeting the above criteria could be considered for graduate transient student admission. Applicants must submit to the Office of the Registrar the complete Transient Student Application available at www.aus.edu/registration/forms.

Graduate transient students may enroll in any university graduate-level course for which they have the necessary academic background and qualifications. They must register for courses through the Office of the Registrar. In courses with enrollment limits, priority is given to AUS students.

Normally, a student can register as a transient student for no more than one academic year. Standard graduate tuition and fees apply.

For further information, please contact the Office of the Registrar at registration@aus.edu.

Visiting Students Admission

A visiting student is one who is not formally admitted to American University of Sharjah but is allowed to take courses at AUS for transfer back to the student's home institution. Visiting students are not registered in the context of a semester exchange program between AUS and the student's university. Visiting students should check with their home institutions about the transferability of AUS credit hours to their programs.

To be admitted as a visiting graduate student, a student must be enrolled in a graduate degree program at an accredited institution and be in good academic standing in his/her current institution. In addition, students must have attained a minimum Internet-Based TOEFL score of 80 or a minimum IELTS (Academic Version or the IELTS Indicator) score of 6.5 or a minimum Cambridge English Linguaskill online score of 176 or a minimum EmSAT (Achieve) score of 1550, or they must have successfully completed the CEFR English C1 level. Visiting students coming from institutions located in an English-speaking country and where English is the language of instruction, or from institutions with an English language proficiency admission requirement higher than at AUS, are exempt from this requirement.

Applicants seeking visiting student status must submit to the AUS International Exchange Office (IXO) a complete online application accessible through www.aus.edu/ixo and an official university transcript showing courses in progress at the time of application. To secure seats in courses, applications should be submitted by the first Saturday of March for summer and fall enrollment and the first Saturday of October for spring enrollment.

If the application is approved, registration is completed through IXO. Visiting graduate students may enroll in university graduate-level courses for which they have the necessary academic background and qualifications, subject to approval by the relevant graduate program coordinator or college/school associate dean for graduate studies. In courses with enrollment limits, priority is given to AUS students. Tuition and fees of visiting students coming through third-party providers are governed by annual financial agreements. Details are available with AUS IXO. Visiting students applying directly to AUS are charged the standard graduate tuition and fees.

Normally, a student is allowed to register as a visiting student for not more than one academic year.

For further information, please contact IXO at ixo@aus.edu.

Graduate students admitted as visiting students may request to change status to graduate degree seeking students. For details, please refer to the Change of Status section hereafter.

Change of Status

Students may request a change of status from non-degree to graduate degree status or from exchange/visiting to graduate degree status by submitting a complete Transfer Applicants online application by the deadlines specified in Application Deadlines earlier in this section. All admissions requirements for transfer admission in place at the time of the change of status request must be met. In addition, students wishing to transfer to degree status must have achieved a minimum cumulative GPA of 3.00 in courses completed at AUS.

Courses taken at AUS while under exchange/non-degree/visiting status can be used to satisfy registration and graduation requirements where applicable. Grades earned in such courses will count in the cumulative GPA.

Courses completed outside AUS prior to admission to the degree program are evaluated for transfer of credit hours at degree program admission time. The university rules and regulations governing transfer courses and credit hours will apply.

The degree program graduation requirements are determined by the catalog effective when the student is admitted to the degree program. For more information, please refer to the Catalog section under Graduation Requirements in Academic Policies and Regulations later in this catalog.

Transfer of Credit Hours

Transfer credit hours may be awarded to applicants from the following categories:

- transfer applicants from recognized graduate schools at independently accredited universities recognized by the UAE Ministry of Education's Higher Education Affairs Division who meet the General University Requirements for Graduate Admission/Full Admission
- second degree applicants with a master's degree awarded by AUS or by recognized graduate schools at independently accredited universities recognized by the UAE Ministry of Education's Higher Education Affairs

Division who meet the General University Requirements for Graduate Admission/Full Admission

- applicants to a master's degree program with a bachelor's degree awarded by AUS who have completed master's-level courses while at the undergraduate level in the context of the AUS Accelerated Master's Program (AMP), and who meet the General University Requirements for Graduate Admission/Full Admission

Applicants for transfer of credit hours must submit their official transcripts, syllabi and other material required by the program to the Office of Enrollment Management/Graduate Admissions by the application deadlines specified earlier in this section.

Applicants with transcripts from two or more institutions of higher education are eligible for transfer evaluation of only the courses completed at the institutions meeting the AUS transfer admission requirements.

Transfer credit hours are evaluated at the time of admission. Transcripts of transfer students will be evaluated only once.

To be evaluated for transfer, the course work must have been taken for graduate credit and applied toward a graduate degree at the host institution. Courses successfully completed in the context of the AMP qualify for evaluation towards transfer of credit hours. Only graduate-level courses completed with a grade of B or higher will be evaluated for transfer of credit hours.

Courses identified as equivalent in content and level to AUS courses will be transferred as the equivalent AUS course. Other appropriate graduate-level courses may be transferred as electives. Transfer of credit hours will not be accepted for research and thesis hours, travel experience or work/life experience.

Courses completed more than five years from the start date of the first semester of study of the current graduate degree program at AUS are not transferable.

Courses related to areas taught within the School of Business Administration will be evaluated for transfer of credit hours only if completed within institutions accredited by the Association to Advance Collegiate Schools of Business (AACSB International), the European Quality Improvement System (EQUIS) or from universities approved by the School of Business Administration.

Grades earned in transferred courses do not count in the student's

cumulative GPA. Credit hours of transferred courses count in the cumulative earned hours and may apply towards meeting registration and graduation requirements.

Applicants to a master's degree program may be granted up to six credit hours in master's-level courses. Applicants to a PhD degree may be granted up to nine credit hours in doctoral-level courses. Students granted transfer credit hours must satisfy the university's graduation residence requirements as outlined in the Academic Policies and Regulations section of this catalog.

While credit hours will be temporarily transferred, the student will not be awarded his/her graduate degree until AUS receives the UAE Ministry of Education's Higher Education Affairs Division verification of the host institution's transcript.

Students will be notified of their transferred credit hours by the Office of the Registrar.

Decisions regarding the award of transfer credit hours are made by the appropriate academic divisions at AUS with input from faculty with expertise in the subject area. The Office of the Registrar maintains and updates the transfer students' records.

Course Waiver

A graduate student may qualify to waive any or all of the discipline-bridging courses of a degree program. In general, a course may be waived if the student has completed comparable undergraduate-level course work at an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division. Students may be required to submit course documentation. Waivers are only granted after an official, sealed transcript is received by the AUS Office of Enrollment Management/Graduate Admissions.

Students with professional experience and/or holders of professionally recognized certificates (e.g., CPA or CFA) that indicate mastery of the content of a discipline-bridging course may be granted a waiver.

The waiver must be established at the time of admission.

Decisions regarding the waiver of a course are made by the appropriate degree program at AUS. The Office of the Registrar maintains and updates the students' records.

Tuition and Fees

Graduate Tuition and Fees

Tuition of graduate students is determined based on the number of credit hours registered by the end of the Add and Drop period of a given semester/term, inclusive of the credit hours of audited courses. Graduate student tuition, additional fees and housing charges are given in the tables below.

Non-degree and transient students must pay the same tuition and fees as regular students.

Tuition and fees of visiting students coming through third-party providers are governed by annual financial agreements. Visiting students applying directly to AUS are charged the same tuition and fees as regular students.

Tuition payment for exchange students attending AUS is governed by the specific terms of the exchange agreement.

The tuition payment of AUS students studying abroad at universities with which AUS has a semester exchange program is governed by the exchange

agreement. For details on payment procedures, please check with the International Exchange Office.

AUS students who have received approval to study abroad at a university that does not have a semester exchange program with AUS make their payments directly to their study abroad host university.

AUS reserves the right to revise tuition and fees. Tuition schedules are published prior to the beginning of the fall semester each academic year.

| Graduate Tuition (in AED) | |
|---|-----------------------|
| College of Architecture, Art and Design | 4,750 per credit hour |
| College of Arts and Sciences | |
| Master's degree programs | 3,790 per credit hour |
| PhD degree program | 4,750 per credit hour |
| College of Engineering | 4,750 per credit hour |
| School of Business Administration | 4,750 per credit hour |

| Conditional Fees (in AED) | | |
|---------------------------|---|-------|
| Lab/Technology Fee A | Applies for each registered course that has Lab/Tech Fee Rate A noted in its course description | 1,340 |
| Lab/Technology Fee B | Applies for each registered course that has Lab/Tech Fee Rate B noted in its course description | 1,480 |

| Other Fees (in AED) | |
|--|--|
| Application Fee | 450* |
| Student Activities | 100 per regular semester* |
| Thesis/Project Extension Fee | 200 |
| Health Insurance <i>Health insurance is mandatory for AUS-sponsored graduate students, unless covered by private insurance. It is optional for graduate students who are not sponsored by AUS. Graduate students with insurance coverage through AUS will be assigned to Plan I. For information on the health insurance plans coverage, visit www.aus.edu/healthcenter.</i> | |
| Students joining AUS or renewing their insurance plan in a Fall semester | 600 per semester* 300 for the summer term* |
| Students joining AUS in a Spring semester | 600 for the spring semester* 300 for the summer term* |
| Students joining AUS in a summer term | 300 for the summer term only* |

* 5% VAT charge applies

| Student Housing Fees (in AED) | | |
|-------------------------------------|--|-------|
| Room Reservation Fee | First time residential hall application fee. Non-refundable. Deductible from the student residential hall fees | 500 |
| Utilities Service Fee | Fee automatically added to any residential hall room reserved (except in summer) | 290* |
| Refundable Dorm Maintenance Deposit | One-time fee applied when students first register for residential halls—refundable after cancellation | 1,000 |

* 5% VAT charge applies

| Student Housing Fees (in AED) | | | |
|-------------------------------|--|------------------|-------------|
| Room Type | Description | Regular Semester | Summer Term |
| Private | Single occupancy with private bath and kitchenette | 17,230 | 6,890 |
| Semi-Private | Single occupancy with a shared bath and kitchenette (females only) | 12,200 | 4,880 |
| Sharing | Double occupancy with a shared bath and kitchenette | 9,280 | 3,710 |

| Fines/Charges (in AED) | |
|---|------|
| Late Registration | 500* |
| Late Payment (if tuition and fees are not settled by the first due date) | 500* |
| Returned Check Penalty (per check – if returned by bank) | 500* |
| Declined Credit Card (per transaction for deferred payments – if credit card is declined upon charging) | 500* |

* 5% VAT charge applies

Payment Methods

Tuition and fees are due each semester at or before the time of registration and form an integral part of registration. For information on the deferment of tuition and fees, please see the Deferment of Tuition and Fees section below.

AUS accepts the methods of payment listed below. For the updated payment terms of a specific semester/term, please consult the published payment guide of the relevant semester/term (available at www.aus.edu/payment-guide).

- cash in UAE Dirhams (AED) only
- checks drawn on local banks in UAE Dirhams (If two or more checks return due to insufficient funds, checks will no longer be accepted.)
- credit cards (including online payment)
- direct transfers to Sharjah Islamic Bank Account No. 0011-200170-001, IBAN number: AE02 0410 0000 11200170 001 (student's name and ID number must be noted on transfer)
- direct cash deposit at Al Ansari Exchange (student's name and ID number must be noted on the transfer)

A charge of AED 500 + 5% VAT is added if a check is returned for insufficient funds or if a credit card authorization payment is declined.

All student financial transactions with the university are processed through the cashiers and/or the Student Accounts office located on the mezzanine floor of the Main Building. Questions concerning student accounts should be directed to Student Accounts by calling 515 2282/515 2039 or

sending an email to studentaccounts@aus.edu.

Deferment of Tuition and Fees

Students are expected to pay their tuition and fees or to make arrangements for deferred payment during the registration period. The deferment of tuition and fees is approved only if all of the following conditions are met:

- 60 percent of the tuition and fees have been paid by the payment deadline
- The student does not have access to checks or credit cards
- The student has a clean payment history
- The Fee Deferment Request form is completed and signed by the student and is authorized by a Finance department official.

Late Fees and Fines

All university students must adhere to university deadlines, rules and regulations. Late fees and fines, with 5% VAT if applicable, may apply for late book returns, parking violations, breakage, late registration, late tuition payment, etc.

Graduate Student Employment Opportunities

AUS offers graduate students two types of on-campus employment: graduate assistantships as research assistants on faculty research projects and graduate work-study positions.

Assistantships are available to qualified graduate students and are competitively awarded and merit-based.

Graduate students granted an assistantship opportunity are required to be available on campus during work hours.

A variety of student work-study opportunities are available through specific departments, graduate programs and AUS internal research grants to faculty members.

For information on eligibility and application guidelines, please visit www.aus.edu/graduate-assistantships-and-employment for master's students' assistantships and www.aus.edu/admissions/doctral-degrees/graduate-assistantships for PhD students' assistantships.

Sponsorship Liaison Services

Sponsorship Liaison Services is the main link between external organizations and their sponsored AUS students. Sponsorship Liaison Services provides various support services to both the sponsoring organizations and sponsored students, including coordinating admission and orientation, communicating progress reports, offering guidance, coordinating financial-related matters with the AUS Finance Department, and arranging for meetings between sponsors and students.

For more information, please contact Sponsorship Liaison Services at +971 6 515 1111, submit a query on infodesk.aus.edu or visit www.aus.edu/sponsorship-liaison-services.

Academic Integrity

Student Academic Integrity Code

Academic integrity lies at the heart of intellectual life. As an institution committed to the advancement of knowledge in a manner consistent with the highest ethical standards, AUS affirms the importance of respecting the integrity of academic work. The AUS Student Academic Integrity Code (referred to herein as Code) describes standards for academic conduct, students' rights and responsibilities as members of an academic community, and procedures for handling allegations of academic dishonesty.

In order to establish within the AUS student body a sense of ethical responsibility, honor and mutual respect, prior to registration, every student must sign the following Academic Integrity Pledge.

I [student's name] pledge my commitment to the following values:

- *I will hold myself accountable for all that I say and write;*
- *I will hold myself responsible for the academic integrity of my work;*
- *I will not misrepresent my work nor give or receive unauthorized aid;*
- *I will behave in a manner that demonstrates concern for the personal dignity, rights and freedoms of all members of the community;*
- *I will respect university property and the property of others; and*
- *I will not tolerate a lack of respect for these values.*

Students are responsible for becoming familiar with their rights and responsibilities as defined by the Code and for ensuring that they understand the requirements for their particular courses (e.g., regarding issues such as collaborative work, use of study aids or take-home examinations, etc.).

Attempts to violate or to assist others in violating the Code, including unsuccessful attempts, are prohibited and will be treated as actual violations.

Definition of Academic Violations

Members of the AUS academic community are expected to conduct themselves with integrity in their work and actions. Violations of the Code include, but are not limited to, the following categories.

Plagiarism

To plagiarize is to use the work, ideas, concepts, images or words of someone

else without fully acknowledging the source in all academic work, including assignments, quizzes, examinations, papers and projects. Plagiarism may involve using someone else's wording—a distinctive name, a phrase, a sentence or an entire passage or essay—without using quotation marks and appropriately citing the source. Plagiarism may also involve misrepresenting the sources that were used or expressing the ideas of someone else in your own words without the appropriate citation.

Inappropriate Collaboration

Collaboration on academic work may be encouraged, but it is important to ensure that contributions are acknowledged. Inappropriate collaboration includes working with someone else in developing, organizing or revising a project (such as a paper, an oral presentation, a research or design project or a take-home examination) without acknowledging that person's help. The use of unauthorized assistance must be avoided in the production of all academic work.

Specific requirements related to collaborative work, peer review, the use of an external entity in the production of work, the use of tutors and editing may vary among courses and students must ensure that faculty members explicitly provide approval in advance of the collaboration.

Impersonation

Students must attend their own classes, be present and sit for all tests and examinations, and personally attend other events associated with a course. The individual impersonated and the impersonator may be subject to sanctions.

Dishonesty in Examinations and Submitted Work

All academic work and materials submitted for assessment must be the sole original work of the student, unless otherwise directed by the instructor. Students are prohibited from submitting any material prepared by or purchased from another person or company.

Communication is not allowed between or among students, nor are students allowed to consult books, papers, study aids or notes without explicit permission by the faculty member responsible for the course. Dishonesty includes, but is not limited to, communication with another student or an external party using electronic devices during an examination or in-

class assignment, copying from another's paper, giving unauthorized assistance, obtaining unauthorized advance knowledge of examination questions, and the use of mechanical or marking devices or procedures for the purpose of achieving false scores on machine-graded examinations.

Specific policies regarding examinations may vary among individual professors.

Work Completed for One Course and Submitted to Another

Students may not present the same work for more than one course. Under exceptional circumstances, faculty members may permit a significant piece of research to satisfy requirements in two courses. However, both professors must agree in advance to this arrangement. If past research is incorporated into current projects, previous work must be appropriately referenced.

Deliberate Falsification of Data

Students may not deliberately falsify data or distort supporting documentation for course work or other academic activity.

Interference with Other Students' Work

Students may not intentionally interfere with the work of others, such as sabotaging laboratory experiments, creative work, research or digital files, or by giving misleading information or disrupting class work.

Copyright Violations

Copyright laws must be observed. These laws govern practices such as making use of printed materials, duplicating computer software, duplicating images, photoduplicating copyrighted materials and reproducing audio/visual works. The Code prohibits theft and the unauthorized use of documents and requires adherence to the laws of Sharjah and the federal laws of the UAE.

The AUS library offers a Copyright and Permissions Service and can assist students with issues and questions related to copyrighted materials and their use. Students may contact copyright@aus.edu for assistance.

Complicity in Academic Dishonesty

Complicity in academic dishonesty consists of helping or attempting to help another person commit an act of academic dishonesty or willfully assisting another student in the violation of the Code. Complicity in

academic dishonesty is pre-meditated and intentional. This can include, but is not limited to, the following:

- doing work for another student
- designing or producing a project for another student
- willfully providing answers during an exam, test or quiz
- communicating with another student or external party on a computer, mobile phone or other device while an exam is in progress
- providing a student with an advance copy of a test
- posting of notes or other materials from a class (whether the student is enrolled in the class or not) on the Internet, whether or not for a fee, without express permission from the faculty member
- leaving inappropriate materials behind at the site of an exam or test

Adjudication of Academic Offenses

Jurisdiction

Academic cases resulting from alleged violations of the Code are within the jurisdiction of the dean (or appointed designee) of the college/school in which the alleged Code violation occurred.

Faculty members who have knowledge of an alleged violation should report the incident to the dean (or appointed designee) of the college/school in which the alleged Code violation occurred.

A faculty member may exercise discretion in those cases involving a student's judgmental error rather than willful violation of the Code.

Students who wish to bring charges against other students must do so through the faculty member in whose course or academic activity the alleged Code violation occurred. The student who brings the charges must identify himself/herself to the faculty member.

Violations of the Code that involve admission and/or placement testing fall within the jurisdiction of the Vice Provost for Graduate Studies and may result in the revocation of admission or dismissal from the university.

The Adjudication Process

An allegation of dishonesty must be reported to the dean (or appointed designee) within five working days of the date of discovery of the alleged offense. Normally an allegation of academic dishonesty must be reported during the semester in which it occurred, however there may be situations in which a violation is discovered after the semester has

ended. Reports of an alleged violation must be supported by appropriate documentation.

Once the alleged violation has been reported, faculty members must not submit grades for the work in question or for the course until the case has been adjudicated. If the semester grades are due before the adjudication process is complete, a temporary grade of N will be assigned and a "Pending Conduct Investigation" statement will be recorded on the student's academic transcript.

The student must remain enrolled in the course in which an infraction has been reported until the adjudication process is complete.

Legal counsel or involvement of any parties other than the student and relevant university personnel is not permitted at any point during the adjudication process.

After receiving complete information, the dean (or appointed designee) will follow the adjudication process outlined below:

- a. the dean (or appointed designee) will promptly notify the student of the allegation and inform the student of the date and time of a formal meeting to discuss the charge.
- b. The dean (or appointed designee) will meet with the student to explain the adjudication process and present the charge and the evidence. If the student fails to attend the meeting, the dean (or appointed designee) will proceed with the process.
- c. The student will be given the opportunity to respond to the allegation in writing within two working days.
- d. After the deadline for the student to respond to the allegation has passed, the dean (or appointed designee) will consider all evidence and, depending on whether a preponderance of evidence supports the allegation of academic misconduct, take one of the following actions:
 - i) dismiss the case
 - ii) request that the student resubmit the work in question or retake an examination
 - iii) assign a penalty.
- e. If a student resubmits the work in question or retakes an examination, the results will be considered in determining whether a preponderance of evidence exists to support the allegation of academic

misconduct and the assignment of a penalty.

Penalties

Violations of the Code will be treated seriously, with increasingly severe penalties considered for repeat offenders. A second violation may result in suspension or dismissal.

In assigning a penalty, the dean will take into account both the seriousness of the offense and any particular circumstances involved.

Penalties for an academic offense may include one or more of the following:

- a. a lowered grade or loss of credit for the work found to be in violation of the Code (to be specified at the time that the penalty is assigned)
- b. a lowered overall grade for the course in which the offense occurred (to be specified at the time that the penalty is assigned)
- c. a failing grade of XF for the course in which the offense occurred (to be specified at the time that the penalty is assigned)
- d. suspension for the semester/term in which the offense occurred with a possible addition of one or more academic semester(s)/term(s)
- e. dismissal from the university

Penalties (a)–(e) will result in non-academic sanctions that may include prohibition from extracurricular activities and the loss of graduate assistantship. See the AUS Student Handbook for details.

For penalties (d) and (e), the student is assigned a grade of N for all semester/term registered courses, with a provision for a grade penalty for the course where the academic offense was reported. No refund or cancellation of tuition fees will be permitted in such cases.

Students are solely responsible for any financial implications resulting from an academic integrity violation.

Students found guilty of an academic integrity violation will not be allowed to complete a course evaluation for the course in which the offense occurred.

Suspension and Dismissal

The decision as to whether suspension or dismissal is appropriate in a given instance will necessarily depend on the circumstances of each case.

Suspension

(temporary separation from the university)

Suspension is effective for not less than the semester/term in which the penalty

is levied or for not more than one calendar year. The length of a suspension must be specified in writing when the student is notified of the outcome of the adjudication process.

A student who is suspended is entitled to resume studies in the same college/school at the conclusion of the period of suspension if all academic requirements are met. The student must submit a Reactivation Request Form to the Office of the Registrar. The form is available at www.aus.edu/registration/forms.

Courses completed outside AUS while on suspension do not transfer.

Dismissal

(permanent separation from the university)

Dismissal is invoked in cases of serious infractions of rules and regulations and when circumstances indicate that a student's association with the university should be terminated in the interest of maintaining the standards of behavior and conduct normally expected in a university community. In instances where the dean (or appointed designee) hearing the case has recommended dismissal, the Academic Appeals Review Committee will review the case and make a recommendation to the Provost.

Notification of Penalty

The dean (or appointed designee) hearing the case will notify the student in writing of the outcome of the adjudication process and, if applicable, the assigned penalty.

In addition to the faculty member bringing the charge, the following university officials have a legitimate need to know and will be informed of the outcome of the adjudication process at the time that the student is notified:

- The program coordinator/head of department in which the offense occurred
- The dean of the college/school and the program coordinator/head of department responsible for the degree program in which the student is enrolled (if applicable)
- The Vice Provost for Student Life
- The Office of the Registrar
- The Academic Support Center
- The Vice Provost for Graduate Studies

For record keeping of documents pertaining to the infringement of the Code, please refer to the appropriate section under Student Records herein.

Appeal of Penalty

In cases concerning notation to the student's record [penalties (c)–(e)], students will be notified in writing of their right of appeal. Appeals must be submitted in writing to the Vice Provost for Graduate Studies within five working days of the date of notification of the outcome of the adjudication process by the dean (or appointed designee).

Appeals are limited to grounds of excessive sanction, improper procedure and unavailability of relevant evidence at the time of the meeting with the dean (or appointed designee) to discuss the charge with the student.

The Vice Provost for Graduate Studies may affirm, modify, or remand the case to the dean (or appointed designee) with instructions for further action. The decision of the Vice Provost is final.

For penalty (e), the Academic Appeals Review Committee will review the case and make a recommendation to the Provost. The Provost may affirm, modify, or remand the case to the dean with instructions for further action. The decision of the Provost is final.

Notation of an Academic Integrity Code Violation Penalty

A student's standing that impacts his or her eligibility to continuously enroll at AUS affects academic progress and, for this reason, is deemed transcript-appropriate. The general type of infraction, academic or disciplinary, is noted on the student's transcript as well as the office responsible for issuing the student's separation from the institution.

Penalties (c)–(e) will become a permanent part of the student's file maintained by the Office of the Registrar, with appropriate notation on the student's academic transcript indicating that there has been a violation of the Code.

For penalties (d) and (e), the student is assigned a grade of N for all semester/term registered courses, with a provision for a grade penalty for the course where the academic offense was reported.

The student may petition to replace an XF grade resulting from a category (d) penalty with an F grade at the time of graduation or following complete withdrawal from the university. For details, please refer to the Appeal of an XF Grade section under Student Petitions and Appeals.

For tracking purposes, all academic integrity violations will be recorded in

the university's academic integrity database maintained by the Office of the Vice Provost for Graduate Studies.

Student Records

Custody of Records

All transcripts and other documents students submit from other institutions at the time of admission or later are the property of AUS, and, as such, are part of the student record that is under the custody of the Office of the Registrar. The university is not required to provide (or allow the making of) copies of these documents. Transcripts submitted to AUS for admission or credit hours transfer cannot be returned to the student or forwarded to other institutions.

The academic record of an individual student is maintained by the Office of the Registrar for a maximum period of five years after the student graduates or leaves AUS. Beyond this retention limit, documents in a student's record are managed in accordance with the AUS Office of the Registrar policy on file retention, which could entail permanent destruction of some of these documents.

Student Privacy Rights

The university reserves the right to disclose students' records to the private or public authority sponsoring the student, if applicable. AUS is required to comply with requests for student information originating from the UAE Government and the Sharjah Government.

Students have the right to:

- inspect and review information contained in their educational records. The university is not required to provide (or allow the making of) copies of these documents. Under specific circumstances, the university may allow specific documents included in a student's record to be provided. Requests for copies of such documents will be reviewed after submission of a signed request from the student concerned.
- request changes or updates to their personal data. Registered students are given access to update their emergency telephone/mobile contact numbers and their personal email address via the secured online student information system. For mailing address updates, an official request signed by the student concerned must be submitted to the Office of the Registrar/Student Records section. The form is available at www.aus.edu/registration/forms.
- request non-disclosure, within the extent of UAE federal and local laws, of personally identifiable and/or

academic information from education records.

For further information on students' records, please check with the Office of the Registrar/Student Records section.

Academic Transcripts

The Office of the Registrar maintains and updates the academic records of all students who register at the university. The permanent record reflecting the academic achievements of each student throughout his/her entire study period at the university is referred to as academic transcript or transcript.

At the end of every semester/term, the Office of the Registrar updates the academic transcripts of the students who were registered in that semester/term. Students may access their transcripts through the secure online student information system. Students are encouraged to review their records online periodically. Online transcripts are not official and are only intended to update students on their academic achievement.

Students may obtain copies of their academic transcripts at AUS from the Office of the Registrar. Transcripts will only be released with a signed request from the student concerned (request form is available at www.aus.edu/registration/forms) or an online request submitted by the student via the secured student information system. A nominal fee applies. The university will issue only complete transcripts, not parts of the student record.

A brief explanation of the university's grading system is provided on the back of every official transcript. The detailed explanation is included in the Grades and Academic Standing section herein.

Records on Academic Integrity Code Violations

The retention of records on academic integrity code violations is governed by the following:

- In cases where penalties (a)–(c) were assigned: All records pertaining to the infringement of the Student Academic Integrity Code are maintained by the student's college/school. If the student does not graduate from AUS, the records are retained for five years after the student's last registration. If the student graduates from AUS, these records are destroyed by the college/school upon the student's graduation.

- In cases where penalties (d)–(e) were assigned: The notation indicating a violation of the Student Academic Integrity Code will become a permanent part of the student's file maintained by the Office of the Registrar.
- For tracking purposes, all violations are recorded on the university's academic integrity database maintained by the Office of the Vice Provost for Graduate Studies.

Records on Student Academic Integrity Code violations maintained by the Office of the Registrar are subject to university regulations concerning the confidentiality of student records. Upon written request, students have the right to inspect their records related to violations of the integrity code.

Enrollment Verifications and Certifications

Students may need different types of official certificates pertaining to their academic record at AUS. These certificates must be requested from the Office of the Registrar using the request forms available at www.aus.edu/registration/forms. A nominal fee applies.

Registration and Course Information

Course Registration

Orientation Program

Prior to registration, each college/school holds an orientation session to familiarize students with its specific regulations and assist them with the registration process. These sessions are also to inform the students about research areas available within the program as well as existing resources, to offer them the opportunity to meet their program coordinator/head of department, and to introduce them to the graduate level academic policies and regulations.

Registration Process

Before the registration period begins, the Office of the Registrar posts the registration guide at www.aus.edu/registration. The guide provides pertinent information and indicates the registration steps along with the place, date and time for each step. A continually updated list of courses offered is posted on the online student information system as well.

Students must register in a course prior to attending classes. It is the responsibility of the individual student to monitor his/her registration status, which may be done by accessing his/her records through the AUS student information system.

Students who register after the designated date are charged a late registration fee.

New students and transfer students register with their respective college/school. New and transfer students must ensure that all documents required for finalizing their admission, particularly those indicated in the letter of admission, are submitted to the Office of Enrollment Management/Graduate Admissions by the file completion deadlines announced by the office and published in the admission package. Transfer files completed by the deadlines will be evaluated for transfer of credit hours. For details, refer to Transfer of Credit Hours under Admission to Graduate Studies earlier in this catalog.

Exchange and visiting students register through the International Exchange Office (IXO). Non-degree, study abroad and transient students register with the Office of the Registrar. Registration in courses as an exchange, non-degree or a visiting student requires the approval of the relevant graduate program coordinator/head of department. For further details, see the corresponding

sections under Admission to Graduate Studies earlier in this catalog.

Continuing and returning students register through the AUS student information system.

Registration by way of proxy is not permitted.

For thesis, final project and dissertation registration, see Thesis, Final Project and Dissertation within the Graduation section herein.

Academic Advisors

Academic advising is an essential element of the educational process. American University of Sharjah requires advisor-student meetings at least once per semester/term. Students on academic probation or facing academic difficulties are guided by academic advisors and might be required to have more frequent meetings with their advisors. However, students are responsible for selecting their courses, meeting course prerequisites and adhering to the most recent university policies and procedures. The program coordinator/head of department assists the student in interpreting university policies and procedures. Students are required to consult with their program coordinator/head of department on issues regarding degree requirements.

Some programs require that students have a graduate advisory committee, which has specific responsibilities identified by each graduate program in accordance with university policy.

Doctoral programs require the PhD candidate to form a Dissertation Advisory Committee (DAC), the chair of which is the principal dissertation advisor of the student guiding the candidate develop the PhD proposal and dissertation.

Student Course Load

A graduate student's course load comprises the total number of credit hours of master's or PhD courses registered in a semester/term.

Some master's degree students may be required to complete specific undergraduate-level courses; credit hours generated by these courses are not considered in the calculation of the student's semester/term course load. Likewise, some PhD degree students may be required to complete specific master's courses; the credit hours generated by these courses are not considered in the calculation of the student's semester/term course load.

Semester Course Load

Good Academic Standing Students

The maximum course load of a graduate student in good academic standing is nine credit hours per semester. The program coordinator/head of department may approve a student in good academic standing to register for up to 12 credit hours per semester.

Academic Probation Students

The maximum course load of a graduate student on academic probation is six credit hours per semester.

Summer Term Course Load

A maximum total of six credit hours is allowed during a six-week summer term.

The program coordinator/head of department may further restrict the maximum credit hours of a student on academic probation in a summer term.

A graduate student may not register for more than three credit hours of thesis/final project/dissertation during a six-week summer term.

Conditional Admission Students

The maximum course load of a conditionally admitted graduate student is six credit hours per semester/term.

Add and Drop

Students are allowed to add and/or drop courses at the beginning of every semester/term. The add and drop period begins on the first day of class. The duration of the add and drop period may vary, and the actual dates are published in the registration guide for each semester/term, available at www.aus.edu/registration.

Courses dropped during the add and drop period are not recorded in a student's transcript. The semester/term tuition is recalculated accordingly with no fee penalty charged. Students interested in adding and/or dropping courses should first consult with their respective advisors.

Auditing Courses

A student who wishes to attend a course but who does not wish to take examinations, receive a final grade and earn credit hours for the course may register to audit the course. The instructor may establish standards of class participation and attendance that must be met.

Registration to audit a course is managed through the Office of the Registrar. In courses with enrollment limits, priority is given to students registering for credit.

Changes to or from audit status must be made before the last day of the add and drop period.

The audited course will appear on a student's transcript as audited.

Tuition and fees for audit students are the same as those for students registering for credit hours.

Auditing a Graduate Course

With the permission of the instructor and the student's program coordinator/head of department, a graduate student may audit a graduate course.

Credit hours of an audited course are included in the calculation of the student's course load for the semester/term.

Auditing an Undergraduate-Level Course

With the permission of the instructor, the student's program coordinator/head of department and the approval of the associate dean for undergraduate studies of the college/school offering the course, a graduate student may register to audit an undergraduate course.

Credit hours of an audited undergraduate course are not included in the calculation of the student's course load for the semester/term.

Study Abroad Opportunities for AUS Students

AUS offers students the opportunity to study abroad at other institutions during a regular semester and gain full AUS course credit. The International Exchange Office (IXO) aims to provide students the opportunity to immerse themselves in a different culture, to enhance their language skills, to build international work connections and to gain further insight into their field of expertise. With this in mind, students must choose to attend accredited institutions that provide learning experiences similar to those offered by AUS and which meet the following additional requirements:

- The host institution is recognized by the UAE Ministry of Education's Higher Education Affairs Division.
- The host institution is not located in a country the student is a citizen/resident of. Students will be permitted to study in a country in which they hold citizenship/residency provided the total period of residency in the country has not exceeded five

years, and no more than two years of secondary education were completed in the intended host country.

- The language of instruction of the course(s) taken at the host institution must be English, except for foreign language courses conducted in other languages. Certified translations of syllabi or other relevant material may be required.
- With the approval of the graduate program coordinator/head of department and the student's associate dean, a student pursuing a study abroad experience at colleges and universities recognized by the United States Department of Education regional accreditation authorities and the UAE Ministry of Education's Higher Education Affairs Division, or at an official AUS exchange partner university, may take course(s) at the host university that are taught in languages other than English. Courses taught in languages other than English must be determined to be equivalent in content to AUS courses or approved to meet specific degree requirements. Certified translations of syllabi or other relevant material may be required.

Of particular interest might be institutions with which AUS has study abroad agreements. Details are available with AUS IXO at www.aus.edu/ixo.

Requirements

Students who wish to study abroad during a regular semester must have, at application time, a minimum cumulative GPA of 3.30 and have completed at least six credit hours of graduate courses in residence at AUS.

Contact hours for courses at the host institution must be equivalent to or greater than the contact hours required for equivalent courses at AUS.

Courses taken at AUS cannot be repeated in the context of a study abroad program.

For study abroad courses equivalent to AUS courses, course prerequisites, as specified in the AUS catalog in effect at the time of registration at the host institution, must be met prior to starting the course at the host institution.

For courses with a laboratory component at AUS, both lecture and laboratory must be taken concurrently at the host institution.

Courses related to areas taught within the School of Business Administration will be evaluated for transfer of credit hours only if completed within institutions that are accredited by

AACSB or EQUIS, or at universities approved by the School of Business Administration.

Graduation residence requirements must be met. For details, see Graduation Residence Requirements under Graduation/Graduation Requirements later in this section.

Application Process

Interested students must apply online to IXO. Information related to application fees and deadlines is available at www.aus.edu/ixo. Students who are approved by the AUS International Exchange Office, the relevant graduate program coordinator/head of department and the associate dean for graduate studies will be guided by the office through the rest of the application process. Students should be aware that further admission requirements might exist at the host institution.

Students must submit the completed Course Permission Form–Outgoing Students to IXO by the deadlines specified on the application form. The IXO approved application form must be deposited at the Office of the Registrar by the end of the third week of classes of the AUS summer term for study abroad in a fall semester, and prior to the student's departure for study abroad in a spring semester. Failure to do so will result in no credit hours being awarded for the work completed abroad.

Registration

AUS students who plan to study abroad must register with the AUS Office of the Registrar in addition to registering with the study abroad host institution.

AUS students studying abroad are not eligible to be enrolled for any type of course work at AUS for the semester overlapping with the study abroad semester.

Transfer of Credit hours

Credit hours earned in study abroad courses will transfer provided the following conditions are met:

- Upon completion of the course(s), the student submits to the AUS Office of the Registrar an official transcript from the host institution demonstrating that the student met the minimum course passing grade requirement, as indicated on the study abroad form.
- The student had a 3.30 cumulative GPA at the time study abroad courses are taken at the host institution.
- The student earned the equivalent of a B grade or higher on the study abroad course.

- The student had passed the AUS course prerequisites prior to starting the course at the host institution (for study abroad courses equivalent to AUS courses).

Grades earned in courses completed outside AUS do not count in the student's cumulative GPA (CGPA). Credit hours of transferred courses count in the cumulative earned hours and may apply towards meeting graduation requirements.

While credit hours will be temporarily transferred, the student will not be awarded his/her graduate degree until AUS receives the UAE Ministry of Education's Higher Education Affairs Division verification of the host institution's transcript.

For further information on studying abroad, please contact IXO at ixo@aus.edu.

Summer/Winter Courses outside AUS

Requirements

An enrolled student is eligible to apply to take courses at another college/university during the summer or in the period between the fall semester and the spring semester (herein referred to as winter) with the aim of transferring credit hours to AUS. To this end, students must choose institutions meeting the following conditions:

- The host institution is located outside the UAE.
- The host institution provides learning experiences similar to those offered by AUS.
- The host institution is recognized by the UAE Ministry of Education's Higher Education Affairs Division.
- The language of instruction of the course(s) taken at the host institution must be English, except for foreign language courses conducted in other languages. Certified translations of syllabi or other relevant material may be required.
- With the consent of the relevant graduate program coordinator/head of department and associate dean for graduate studies, a student taking summer courses at colleges and universities recognized by the United States Department of Education Regional Accreditation Authorities and the UAE Ministry of Education's Higher Education Affairs Division, or at an official AUS exchange partner university, may take course(s) at the host university that are taught in languages other than English. Such courses must be determined to be equivalent in content to AUS courses or approved to meet specific degree

requirements. Certified translations of syllabi or other relevant material may be required.

- The summer term at the host institution must not begin prior to the end of the spring semester examination period at AUS. The winter term at the host institution must not begin prior to the end of the fall semester examinations period at AUS.
- The summer term at the host institution must end before the first day of classes of the fall semester at AUS. The winter term at the host institution must end before the first day of classes of the spring semester at AUS.

Requirements

Students wishing to take summer/winter courses outside AUS must be in good academic standing at AUS at the time their application is reviewed.

Contact hours for courses at the host institution must be equivalent to or greater than the contact hours required for equivalent courses at AUS.

The summer/winter courses at the host institution must not be taken as attempts to repeat AUS courses.

For courses equivalent to AUS courses, course prerequisites, as specified in the AUS catalog in effect at the time of registration at the host institution, must be met prior to starting the course at the host institution.

For courses with a laboratory component at AUS, both lecture and laboratory must be taken concurrently at the host institution.

Courses related to areas taught within the School of Business Administration will be evaluated for transfer of credit hours only if completed within institutions that are AACSB accredited or EQUIS accredited, or at universities approved by the School of Business Administration.

Graduation residence requirements must be met. For details, see Graduation Residence Requirements under Graduation/Graduation Requirements later in this section.

Some programs may reserve the right not to allow any courses to be taken at another college/university.

Amount of Credit hours

Students may transfer no more than six credit hours for a six-week summer session conducted at a host institution.

For summer sessions of a different duration and for winter terms, AUS allows no more than the equivalent

credit hours of the six-week summer term at AUS.

Students may register for more than one summer term between spring and fall semesters with approval of the relevant graduate program coordinator/head of department and the student's associate dean. Students may not be concurrently registered in more than one summer term.

A college/school may place further restrictions on the allowable maximum number of credit hours. Students must consult with the relevant graduate program coordinator/head of department when planning for summer/winter courses outside AUS.

Application Process

Prior to registering for courses at the host institution, students must complete the Permission to Take Summer/Winter (Mini-Mester) Courses Outside AUS form available at www.aus.edu/registration/forms and submit it to the Office of the Registrar. Forms must be submitted by the end of the 14th week of classes of the preceding spring semester for a summer term and by the end of the 14th week of the preceding fall semester for a winter term. Credit hours will not be awarded if the completed form is not submitted to the Office of the Registrar by the specified deadlines.

Registration

AUS students taking courses outside AUS in the summer are not eligible to be enrolled for any type of course work at AUS for the overlapping AUS summer term.

Transfer of Credit hours

Credit hours earned in summer courses taken outside AUS will transfer provided the following conditions are met:

- Upon completion of the summer course(s), and before the end of the following fall semester (end of the following spring semester for winter courses), the student submits to the Office of the Registrar an official transcript from the host institution demonstrating that the student met the minimum course passing grade requirement, as indicated on the permission form.
- The student was in good academic standing at AUS at the time summer/winter courses were taken at the host institution.
- The student had passed the AUS course prerequisites prior to starting the course at the host institution (for summer abroad courses equivalent to AUS courses).

Grades earned in summer/winter courses completed outside AUS do not count in the student's cumulative GPA (CGPA). Credit hours of transferred courses count in the cumulative earned hours and may apply towards meeting graduation requirements.

While credit hours will be temporarily transferred, the student will not be awarded his/her graduate degree until AUS receives the UAE Ministry of Education's Higher Education Affairs Division verification of the host institution's transcript.

For further information related to transfer of credit hours, please contact the Office of the Registrar.

Tuition and Fees

For specific information on tuition, fees, deferment of tuition, and fees and payment methods, please refer to the Tuition and Fees section earlier in this catalog.

Attendance, Withdrawal and Interruption of Studies

Attendance and Lateness

Attendance and participation in all class, workshop and laboratory sessions are essential to the process of education at AUS. Students benefit from the lectures and discussions with their instructors and fellow students. For this reason, students are expected to attend class regularly.

Lateness or absence hinders progress for the individual and the class and affects the student's academic achievement.

Students are fully responsible for dropping or withdrawing from courses that they are not attending.

Course Withdrawal

Students may withdraw from courses without grade penalty by submitting the Withdrawal Form (available at www.aus.edu/registration/forms) to the Office of the Registrar. The student must submit the form in person or through the student's AUS email account.

Withdrawal from courses must occur no later than the end of the 10th week of classes (end of the fourth week of classes for a 6-week summer term). A grade of W will be recorded on the transcript for the course from which the student has withdrawn. A W grade does not impact the student's GPA. The semester/term tuition is not recalculated following course withdrawal.

As of the 11th week of classes and up to the end of the 13th week of classes,

a grade of WF will be recorded for those who withdraw from a course. The student will receive 0.00 grade points (F grade) for the WF, and this will be used in calculating the student's GPA. Students are not eligible to withdraw from course past the 13th week of classes.

If a student with a documented medical condition (e.g., operation, hospital stay, serious illness, etc.) is withdrawn from a course after the established withdrawal deadline, the student may submit a Student Petition Form (available at www.aus.edu/registration/forms) to the Office of the Registrar with the appropriate original medical documents. The Office of the Registrar will verify the claims and approve the change of status from a WF to a W.

Students are fully responsible for dropping or withdrawing from courses that they are not attending.

A student may not withdraw from a course in which an academic integrity offense was committed until the case has been reviewed and the adjudication process is complete.

Withdrawal from the University

Students seeking to withdraw from the university must submit the Complete Withdrawal Form (available at www.aus.edu/registration/forms) to the Office of the Registrar. The student must submit the form in person.

If complete withdrawal occurs during the add and drop period, the courses are dropped and are not recorded in the student's transcript. If withdrawal occurs prior to the end of the 10th week of classes (end of the fourth week of classes for a six-week summer term), a grade of W is assigned to the student for the specific course. In addition, the refund schedule outlined in the table below will apply.

| Withdrawal from the University* | |
|--|--|
| Before the end of the first week of classes | |
| 100% refund excluding non-refundable deposits | |
| During the second week of classes | |
| 50% refund of tuition | |
| During the third week of classes | |
| 25% refund of tuition | |
| After the third week of classes | |
| 0% refund | |

As of the 11th week of classes, a grade of WF will be assigned.

Students are fully responsible for dropping or withdrawing from courses

that they are not attending prior to withdrawal from the university. Students who do not complete the withdrawal process prior to withdrawing from the university will not be eligible for any otherwise applicable tuition refund or adjustment.

Withdrawal of PhD Candidacy

PhD candidates who do not successfully defend their dissertation proposal or their final dissertation are requested to withdraw their PhD candidacy. For details, refer to Withdrawal of PhD Candidacy under Academic Dismissal in Grades and Academic Standing later in this section of the catalog.

Interrupted Studies and Reactivation of Student Record

Graduate students are expected to maintain continuous enrollment (fall and spring semesters) until they complete their program. For the purpose of this policy, AUS students studying abroad at an institution with which AUS has a study abroad agreement for a regular semester are considered to be in residence. A summer term abroad at an institution with which AUS has a study abroad agreement is not considered as a term in residence.

Enrollment in zero-credit hours courses only does not establish residency for the purpose of this policy.

Master's-level students on conditional admission and students registered in bridging (remedial) courses are not eligible to interrupt their studies unless approved by their program coordinator/head of department and their associate dean.

Students Away for up to Two Semesters

- A graduate student may take up to two semesters off from graduate studies but must inform the Office of the Registrar in writing of their intention to do so. Students with thesis/final project/dissertation work in progress must first secure the approval of their college associate dean for graduate studies. For the purpose of this policy, a semester of complete course withdrawal is considered as a semester of leave.
- Graduate students who were on probation prior to interrupting studies and graduate students whose thesis/final project/dissertation work was in progress prior to interrupting studies must petition for resuming studies by submitting the Reactivation Request Form (available at www.aus.edu/registration/forms) to the Office of the Registrar, one month prior to registration. Reactivation of the student's record must be

approved by the student's program coordinator/head of department.

Students Away Longer than Two Semesters

- Graduate students in good academic standing who leave AUS for more than two consecutive semesters, inclusive of semesters of complete course withdrawal, must submit a new application for admission to the Office of Enrollment Management/Graduate Admissions.
- Students on academic probation who have been away longer than two consecutive semesters, may not apply for readmission.

Transfer of Credit hours

Courses taken at another institution while on leave from AUS will not be transferred.

Course Information

Bridging Courses

Students who lack some background knowledge required by a graduate degree program but who otherwise, meet all the degree program admission requirements, may be required to complete bridging (or remedial) courses as prescribed by the specific degree program they are admitted to.

Bridging (or remedial) courses must be successfully completed within a maximum period of two consecutive semesters, which may include a summer term, from the time of first registration in the program. Failure to meet this requirement may result in dismissal from the program.

Students required to complete bridging (or remedial) courses are not eligible to register for program courses prior to successful completion of the required bridging (or remedial) courses. However, with the prior approval of the program coordinator/head of department, a student may register for one program course while completing the required bridging (or remedial) courses. Withdrawal from the bridging (or remedial) course will entail withdrawal from the program course.

Required and Elective Courses Definitions

In meeting degree programs graduation requirements, students are expected to complete a set of required and elective courses.

Required courses are courses that are prescribed by the degree program. Students must complete all the required courses identified by their degree program. A choice is sometimes allowed between required courses,

provided the minimum number of credit hours in required courses is met.

Elective courses are courses selected at the student's discretion, after consultation with their academic advisor. Electives may be selected from a list of courses identified by the degree program. Some degree programs might allow students, with the approval of their advisor and the program director/head of department, the option to complete a maximum number of elective courses from outside the identified list of elective courses.

Course Code

Every course in each discipline or field of study offered by the university is represented by a three-letter prefix denoting the discipline or field of study, followed by a three-digit number. Courses offered by master's degree programs are assigned 500 and 600-level numbers; courses offered by PhD degree programs are assigned a 700-level number.

Reserved Course Numbers

Certain course numbers denote the course type or the course delivery mode. These numbers are reserved three-digit numbers; the first digit indicates the level of the course and the last two digits indicate the type of the course. Reserved course numbers are listed in the table below:

| Course Number | Reserved for |
|---------------|------------------------|
| 790 | Qualifying Examination |
| x94 | Special topic courses |
| x95 | Seminar courses |
| x98 | Professional project |
| x99 | Thesis/Dissertation |

A 2-digit suffix could be appended to the reserved course number to allow the offering of multiple differentiated sections of the same course type, e.g., COE 59401, COE 59402. In this example, 594 indicates a special topic offering; 01 and 02 are the 2-digit suffixes differentiating the two offerings.

Course Credit hours Definition

All courses are valued in credit hours. Normally, each credit hour represents 50 minutes of class instruction per week each semester, two 50-minute recitation sessions per week each semester, or three 50-minute laboratory sessions per week each semester. Due to the unique nature of labs in different content areas, one credit hour may be assigned for as few as two 50-minute laboratory sessions per week or as many as four.

The numbers in parentheses following the title of a course indicate the course

contact hours' distribution per week and the course credit hours' information. The first digit in parentheses refers to the number of class contact hours per week the course requires, the second digit denotes the number of laboratory or practice hours required weekly, and the third digit refers to the number of credit hours the student will earn upon successfully completing the course.

Credit hours earned in bridging (or remedial) courses do not count towards meeting a graduate degree program graduation requirements.

Course Descriptions and Syllabi

Except for special topic courses, descriptions of courses offered by AUS are listed in the Course Descriptions section of this catalog. Courses are grouped by college/school and sorted by course subject and course code. Descriptions of courses are also accessible online via the AUS student information system. Descriptions of special topic courses are made available during registration in the college/school offering the course.

Course syllabi are available from the department or the graduate program's office. They include course title and course code; prerequisites (if any) and co-requisites (if any); name, contact information and office hours of the instructor; course description; course outcomes; course schedule; assignments and due dates; assessment methods and the weights assigned to them; and reading material and course texts.

Course Prerequisites

Certain courses require a minimum background of knowledge, as indicated by prerequisite courses cited in individual course descriptions. Titles and numbers refer to AUS courses. Equivalent courses satisfactorily completed at other institutions may also meet prerequisite requirements by transfer credit hours.

Courses Offerings and Schedules

Courses are offered at the discretion of the individual programs. Students should check with the respective graduate programs for information on when courses will be offered.

To accommodate graduate students' work schedules, most programs offer their courses in the evening or over the weekend. Each course usually meets once a week for a three-hour duration. For details on course schedules, please refer to the semester/term online course offerings or check with the graduate program offering the course.

Fields of Study

Degree Offerings

American University of Sharjah has three colleges and one school that offer bachelor's, master's and PhD degree programs. Undergraduate degree offerings are listed in the *AUS Undergraduate Catalog*. Master's and PhD degree programs are listed below.

College of Architecture, Art and Design

- Master of Urban Planning

College of Arts and Sciences

- Master of Arts in English/Arabic/English Translation and Interpreting
- Master of Arts in Teaching English to Speakers of Other Languages
- Master of Science in Mathematics
- Doctor of Philosophy in Materials Science and Engineering

College of Engineering

- Master of Science in Biomedical Engineering
- Master of Science in Chemical Engineering
- Master of Science in Civil Engineering
- Master of Science in Computer Engineering
- Master of Science in Construction Management
- Master of Science in Electrical Engineering
- Master of Science in Engineering Systems Management
- Master of Science in Mechanical Engineering
- Master of Science in Mechatronics Engineering
- Doctor of Philosophy in Engineering – Engineering Systems Management

School of Business Administration

- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Finance

Major Offerings

Major offerings are determined by the degree offerings. Students declare their major by applying to a particular degree program offered by a college/school.

A major constitutes the student's main field of study. It requires students to complete a core of courses that are distinctive to that subject area, inclusive of a research component. Students could choose to specialize in a

maximum of two majors (see Declaration of a Second Major herein).

Students pursuing a double major will be awarded the degree of their primary major with a notation of their second major added to their diploma (see Degree Information on Diplomas in the Graduation part later in this section of the catalog).

Change of Degree Program

Graduate students seeking to change their degree program must apply for admission to the new degree program through the Office of Enrollment Management/Graduate Admission. Applications must be submitted by the assigned application deadlines (refer to Application Deadlines in the Admission to Graduate Studies section earlier in this catalog). To be eligible for a change of degree program, the student must meet the requirements for admission to the new degree program. Please refer to the relevant degree program's catalog section for information on admission requirements.

A change of degree program might entail a change in a student's catalog. Please refer to the Catalog section under Graduation Requirements for more details.

In addition, students seeking a change of degree program must consult the graduation requirements of the new degree program, as stipulated in the new student's catalog, to identify specific program graduation requirements and consult with the program coordinator/head of department to determine how completed courses correspond to the graduation requirements of the new degree program.

Concentrations and Themes

Some degree programs allow students the choice of an area of concentration or a choice of a theme. This option offers students more in-depth knowledge of a subject area constituting a particular aspect of their major. Please refer to the relevant program section for concentration and theme requirements. Where the concentration or theme is mandatory, a student must declare his/her choice when applying to the program. Where the concentration or theme is an option, a student must indicate his/her choice by filling in the appropriate information on the Change of Major Form (available at www.aus.edu/regISTRATION/forms).

The Change of Major Form must be submitted to the graduate program coordinator/head of department by the last day of the 12th week of classes of the fall or spring semester. The program coordinator/head of department will forward the approved forms to the Office of the Registrar. Forms must be received by the Office of the Registrar by the end of the Add/Drop period of the following semester/term. Forms received after the end of the Add/drop period of a semester/term will be effective as of the following semester/term. However, declaration forms of prospective candidates for graduation must be received by the Office of the Registrar no later than the end of the 10th week of classes of the semester preceding their graduation semester/term.

Students approved to declare a concentration that is not listed in their degree program, as described in their catalog of record, but listed in the same degree program as described in the most recent academic catalog will have their catalog of record changed to the first academic catalog where the approved concentration was introduced.

Declaration of a Second Major

Master's degree students may select to enroll in two separate majors offered by two different master's degree programs. To declare a second major, the student must submit to the Office of Enrollment Management, within the announced admission deadlines, an application for admission to the program housing the second major. The Office of Enrollment Management will forward the approved application to the Office of the Registrar. Applications received by the Office of the Registrar after the end of the add and drop period of a semester/term will be effective as of the following semester/term.

One of the two majors must be designated as the primary major, but the student's rights and responsibilities are the same in both majors. The advisor of the primary major will serve as the student's registration advisor. The student's diploma and transcript will indicate all majors completed at the time of graduation.

For graduation information, please refer to Requirements for a Double Major under the Graduation Requirements section.

Grades and Academic Standing

Examinations

Information about final examination schedules is published by the Office of the Registrar at www.aus.edu/registration. Final examinations of graduate courses are administered within the semester/term examination period published dates and are scheduled by the faculty members teaching these courses.

Failure to Appear for a Final Examination

A student who fails to appear for the examination will not be permitted to take a make-up examination unless the associate dean for graduate studies of the school/college responsible for the course determines that extraordinary circumstances exist and a make-up examination is warranted. The associate dean will then determine whether a make-up examination can be completed or an I grade should be awarded and the make-up examination should be scheduled at the beginning of the next semester or summer term. For further details, refer to Incomplete Grades later in this section.

Illness Prior to and During Final Examinations

Students are responsible for taking final examinations during the published examination period. If an incapacitating illness prohibits taking a final examination, the student must notify his/her graduate program coordinator/head of department and provide complete documentation to the University Health Center in advance of the scheduled examination.

Students who begin a final examination are expected to complete it unless a sudden and incapacitating illness requires urgent medical attention. A student whose condition is so serious that medical care is necessary must report immediately to the University Health Center.

If the University Health Center determines that the medical condition prior to or during the scheduled examination period is serious enough to render a student incapable of taking or completing the examination then, based on the recommendation of the University Health Center, the relevant associate dean for graduate studies will determine whether a make-up examination can be completed or an I grade should be awarded and the make-up examination should be scheduled at the beginning of the next semester or summer term. For further

details, refer to Incomplete Grades later in this section.

The opportunity to complete a make-up examination will not be provided if compelling medical evidence indicates that taking or completing the examination was an option.

Tardiness

If an instructor allows a student who arrives late for a final examination to take the examination as scheduled, no additional time beyond the period assigned for the examination will be provided.

Grading System

Courses are graded using letter grades. The grade point average (GPA) is based on a four-point scale. The AUS grading system is provided below:

| Excellent | |
|-----------------------------------|--------------------------|
| A | equals 4.00 grade points |
| Exceeds Expectation | |
| A- | equals 3.70 grade points |
| Meets Expectation | |
| B+ | equals 3.30 grade points |
| B | equals 3.00 grade points |
| Below Expectation | |
| B- | equals 2.70 grade points |
| C+ | equals 2.30 grade points |
| C | equals 2.00 grade points |
| Fail | |
| F | equals 0.00 grade points |
| Academic Integrity Violation Fail | |
| XF | equals 0.00 grade points |
| Withdrawal Fail | |
| WF | equals 0.00 grade points |

Grades not calculated in the grade point average are:

| | |
|------------|--------------------------------|
| AUD | Audit |
| AW | Administrative Withdrawal |
| I | Incomplete |
| IP | In Progress |
| N | No Grade |
| NP | No Pass |
| P | Pass; credit hours counted |
| TR | Transfer; credit hours counted |
| W | Withdrawal |
| WV | Waive; no credit hours |

The minimum passing grade for a graduate course is C. Students who receive an F grade in a graduate course will not be allowed to continue in the university.

Incomplete Grades

The work for a course must be completed by the end of the final examination period of the corresponding registration semester/term. In the case of unexcused incomplete work, an F grade is given for the missing work and the final course grade is computed accordingly.

Only in exceptional cases, such as a compelling medical or other emergency certified in writing by a medical or other professional, is a student assigned an incomplete grade I in a given course, provided the student has been in attendance up until the end of the withdrawal period of the semester/term (also see Examinations earlier in this section). The instructor of the course will then process an Incomplete Grade Form (available from the office of the associate dean) and submit it to the Office of the Registrar for final approval and implementation. The Incomplete Grade Form must be submitted no later than the last day of the examination period of the corresponding semester/term.

An I grade pending beyond the end of the fourth week of classes of the next regular semester will revert into the alternative grade indicated by the instructor of the course on the Incomplete Grade Form. In the event where no alternative grade was indicated on the form, the I grade will revert into an F grade. It is the responsibility of the student to find out from his/her professor the specific dates by which requirements must be fulfilled.

A student who is on academic probation and who was approved for an I grade in a specific semester/term is not eligible for early registration for an upcoming semester/term.

Prospective candidates for graduation with incomplete grades will be awarded their degrees in the semester/term where their courses are successfully completed.

In Progress Grades

A thesis/final project/dissertation normally requires longer than one semester/term to be completed. An In Progress (IP) grade is recorded until completion of the thesis/final project/dissertation. Once the thesis/final project/dissertation is completed, the student's associate dean will inform the Office of Graduate Studies and the Office of the Registrar of the final grade.

Prospective candidates for graduation with In Progress grades will be awarded their degrees in the semester/term where the courses are successfully completed.

Graduate students who fail to maintain thesis/final project continuation in a semester without their program coordinator/head of department prior approval of thesis/final project registration discontinuation, will be assigned an NP grade, resulting in academic dismissal from the master's degree program. Likewise, PhD candidates who fail to maintain dissertation continuation in a semester without their program coordinator/head of department prior approval of dissertation registration discontinuation, will be assigned an NP grade, resulting in an automatic withdrawal of candidacy from the PhD degree program.

An IP grade will be changed to an N grade in the following situations:

- the student is approved to discontinue thesis work in order to pursue a final project (or vice versa)
- the student fails to complete the degree program graduation requirements within the time limit on residency and is denied an extension of the residency time limit
- the student is asked to withdraw PhD candidacy
- the student withdraws from the university.

No Grade Entries

A No Grade (N) grade is assigned to a course when an academic integrity violation has been reported and the adjudication process cannot be concluded before the course grade is due for the semester/term. In such cases, the N grade is temporary and the final grade for the course will be entered once the adjudication process is concluded. If a violation of the Student Academic Integrity Code or the Student Code of Conduct results in suspension or dismissal effective for the semester/term in which the offense occurred then an N grade will be entered for all courses except for those that were subject to an XF grade penalty. If suspension or dismissal occurs at the end of a regular semester or summer term and a letter grade has been assigned in a course, the letter grade will revert to an N grade. The Semester GPA and the Cumulative GPA will be recalculated accordingly and a Suspended or Dismissed academic standing will be assigned for the semester/term. For details on transcript notations, refer to Notation of an Academic Integrity Code Violation

Penalty under Academic Integrity earlier in this section of the catalog.

An N grade is also assigned as a replacement of an IP grade. For details, refer to the preceding In Progress Grades section.

Repeating Courses

Graduate courses may not be repeated. With the recommendation of the program coordinator/head of department and the approval of the appropriate dean (or appointed designee), a graduate student may be allowed to repeat up to two graduate courses in a degree program. The original grade and the new grade will appear in the transcript, but only the new grade will be calculated into the GPA. No course may be taken more than twice.

Students may not repeat AUS courses at another institution with the aim of transferring credit hours.

Note: Graduate students who receive an F grade in a graduate course will not be allowed to continue in the university.

Class Standing

Master's Degree Students

The class standing of a Master's degree student in a specific semester/term is determined by the number of credit hours the student has earned up until and excluding that semester/term. The following table summarizes the earned credit hours to class standing equivalencies:

| Credit Hours Earned | Class Standing |
|---------------------|-----------------|
| 0–15 | Master's Year 1 |
| 16 and above | Master's Year 2 |

PhD degree Students

The class standing of a PhD degree student in a specific semester/term is determined by passing the qualifying exam. PhD degree students who pass the qualifying exam are classified as PhD-Advanced to Candidacy; students who have not yet passed the qualifying exam are classified as PhD-Not Advanced to Candidacy

Grade Point Average

AUS uses two grade point averages: the semester grade point average (SGPA) and the cumulative grade point average (CGPA).

Quality Points

The quality points earned in a course are calculated by multiplying the grade point value of the letter grade by the number of credit hours the course is worth.

Semester Grade Point Average (SGPA)

The SGPA is the grade point average of grades earned in a particular semester/term. It is calculated by dividing the sum of the quality points of courses taken in a particular semester/term by the total number of credit hours of the courses taken in that same semester/term.

$$SGPA = \frac{\text{sum (quality points of courses taken in semester/term X)}}{\text{sum (credit hours of courses taken in semester/term X)}}$$

Cumulative Grade Point Average (CGPA)

The CGPA is calculated by dividing the sum of the quality points of courses taken in all semesters/terms by the total number of credit hours of all courses taken in all semesters/terms. Only the last entry of a repeated course is considered in the CGPA calculation.

$$CGPA = \frac{\text{sum (quality points of courses taken in all semesters/terms)}}{\text{sum (credit hours of courses taken in all semesters/terms)}}$$

Academic Standing

A student's academic standing is determined by his/her CGPA.

Good Academic Standing

In order to be considered in good academic standing, graduate students must maintain a CGPA of at least 3.00 out of 4.00.

A student must be in good academic standing to be eligible for graduation.

Academic Probation

If a graduate student's cumulative GPA falls below 3.00 at the end of any given semester, the student is placed on academic probation. A graduate student placed on academic probation, who fails to remove his/her academic probation by the end of the immediately following summer term, will maintain his/her academic probationary status.

During probationary status, the following conditions apply:

- A graduate student on academic probation may not register for more than six credit hours in a semester. The program coordinator/head of department may restrict the summer course load of a graduate student on academic probation to three credit hours.
- A graduate student on academic probation may not register for thesis, final project or dissertation.

An academic probation is removed at the end of any semester/term in which the student attains a CGPA of 3.00.

Academic Dismissal

A graduate student on academic probation who does not achieve good academic standing by the end of the regular semester following the semester in which the cumulative GPA fell below 3.00, with the academic probationary status maintained at the end of the interim summer term, is academically dismissed from the university.

Graduate students who receive an F grade in a graduate course are academically dismissed from the university.

PhD degree seeking students who fail the qualifying examination are academically dismissed from the university.

Students who have been academically dismissed may petition for reinstatement to the student's program

coordinator/head of department, one month ahead of registration of the semester immediately following academic dismissal. The Student Petition Form is available at www.aus.edu/registration/forms. Petitions will be reviewed by the graduate program coordinator/head of department who will make a written recommendation to the appropriate dean (or appointed designee). The dean (or appointed designee) will then provide a recommendation to the Vice Provost for Graduate Studies. Decisions regarding continuation in the program will be made by the Vice Provost for Graduate Studies in consultation with the appropriate dean (or appointed designee). Reinstatement following academic dismissal is granted only in exceptional circumstances.

Academically dismissed students who have been away longer than two

consecutive semesters may not apply for readmission.

Withdrawal of PhD Candidacy

Doctoral students who do not successfully defend their dissertation proposal or their final dissertation are asked to withdraw their PhD candidacy. Doctoral students who are asked to withdraw their PhD candidacy are not eligible to continue at AUS, do not qualify for reinstatement and may not apply for readmission. For details, refer to *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

Student Petitions and Appeals

Student Responsibility

All official university communications are distributed through the AUS-issued email address. These are considered official notifications. Students are responsible for checking their AUS email accounts and for responding to or acting upon messages accordingly.

Students should keep their own records of all transactions with the university (e.g., registration schedules and forms, grade reports, payment records, etc.). It is also advisable to keep copies of all tests, digital files, papers and so forth submitted in fulfillment of course work. Students should keep copies of all course syllabi.

Petitions

Students may petition for exceptions to academic policies of the university. Petitions are processed through the Office of the Registrar. The Student Petition Form is available at www.aus.edu/registration/forms.

Registration related petitions must be submitted to the student's program coordinator/head of department by the first day of the semester/term the exception is requested for. The office of the associate dean for graduate studies will forward the approved petitions to the Office of the Registrar.

Appeal of Academic-Related Issues

If a student wishes to discuss an issue pertaining to a course, instructor or other academic-related issues, the student may direct his/her concern to the involved faculty member. If the

issue or grievance is not resolved, the student should contact the program coordinator/head of department and/or dean (or appointed designee) of the college/school.

If, in the judgment of the dean (or appointed designee) of the college/school, the grievance is of such gravity or its resolution would have such impact on the welfare of students generally or on the conduct of professional responsibilities in the university as to require even more formal safeguards for the aggrieved student and faculty member involved, the dean (or appointed designee) will prescribe an appropriate procedure consonant with the university's mission or refer the matter to the Graduate Appeals Review Committee through the Office of the Vice Provost for Graduate Studies. Academic appeals requests must be submitted one week before the first day of the following semester.

Appeal of a Grade

Students are entitled to objective, professional evaluation of their academic work and to fair, equitable treatment in the course of their academic relationships with members of the faculty. These criteria are observed by the members of the AUS faculty as a part of their professional responsibilities.

A student who believes that he/she has a legitimate concern regarding a final course grade must inform the professor responsible for the course in writing and then discuss the matter with the professor. If a resolution cannot be

reached, the student should contact the program coordinator/head of department in writing to file a formal grade appeal no later than two working days after the grade has been made available on the student information system. If the matter cannot be resolved at the department level, a grade appeal review will be conducted by a college/school committee appointed by the dean (or appointed designee). Based on the committee's formal recommendation, the dean (or appointed designee) may grant or deny the appeal and notify the student and the professor responsible for the course of the decision. If a change of grade is warranted, the dean (or appointed designee) will inform the Registrar of the grade change.

If a student believes that the grade appeal review by the college/school was affected by procedural errors or the lack of consideration of factors relevant to the case, the student may submit an appeal to the Graduate Appeals Review Committee through the Office of the Vice Provost for Graduate Studies. The student must clearly state the reasons for the appeal and submit all relevant material to the Office of the Vice Provost for Graduate Studies within five working days from the date of notice of the outcome of the grade appeal review by the college/school. The Graduate Appeals Review Committee will consider the case to determine if due process was followed by the college/school and make a formal recommendation to the Provost. The Provost may deny the appeal and notify the student and the college/school of the outcome or, in the

event of improper procedure or new evidence, remand the matter to the appropriate dean (or appointed designee) for review at the college/school level.

Appeal of an XF Grade

In cases where a failing grade of XF was assigned to a course as a result of

an academic offense penalty, a student may petition during the semester/term of graduation, or at the time of complete withdrawal from AUS, to have the grade converted to an F on the academic transcript. The petition is submitted to the Office of the Registrar along with the Application for Graduation or the Complete Withdrawal Form. The final decision will be made

by the Vice Provost for Graduate Studies.

The F grade resulting from an XF grade will be reverted into an XF grade if the student reactivates his/her record at AUS.

Graduation

Master's Thesis, Professional Project and Dissertation

Master's theses, professional project reports and PhD dissertations document research conducted by AUS graduate students under the guidance and supervision of AUS faculty members. They are the culmination of the students' programs of study and are expected to reflect appropriate scholarly depth and rigor.

The Office of the Vice Provost for Graduate Studies in collaboration with the Graduate Programs Committee establishes and oversees the regulations and requirements for master's theses, professional projects and PhD dissertations at AUS. Degree candidates are responsible for adhering to these requirements as published in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures. In addition, degree candidates are responsible for familiarizing themselves with and adhering to the standards and regulations of the latest edition of the *AUS Guide to Writing and Formatting Dissertation-Thesis-Final Project Reports* available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Writing and Formatting Guidelines .

It is AUS policy to maintain master's theses and PhD dissertations in the AUS Archives and to make them available to other students and scholars. The AUS Library is responsible for the archiving of the master's theses and PhD dissertations. Detailed procedures and requirements for submitting master's theses and PhD dissertations to the AUS Library and Archives are outlined in the *Office of Graduate Studies Policies and Procedures* document

AUS also has a stringent policy regarding research involving humans as subjects. Detailed information on such research activities may be found on

iLearn and accessible using the following path: iLearn-Community-Office of Research-Institutional Review Board (IRB).

Master's Thesis and Professional Project

Registering for Master's Thesis/Professional Project Credit hours

Master's degree students registering for master's thesis/professional project credit hours must register through the Office of the Registrar.

Only students in good academic standing may register for thesis/project credit hours.

Master's Thesis/Professional Project First Registration

In the first semester/term of master's thesis/professional project work (no earlier than the second semester/term of enrollment in the master's degree program), a student normally registers for three master's thesis/professional project credit hours. Before the end of the add and drop period, graduate programs coordinators/head of departments must provide the Office of the Registrar with a list of all students who will be registered for master's thesis/professional project (XXX 699/XXX 698), along with their thesis/project titles and the names of their advisors.

Students in the thesis option and students in the project option where a six credit hours professional project is required must prepare and orally present the proposal of their master's thesis/professional project to the satisfaction of a master's thesis/project committee by the end of the first semester/term of registration in their master's thesis/professional project. Students who do not demonstrate adequate thesis/project work progress by the end of the 10th week of the semester will be withdrawn from the master's thesis/professional project course by their advisors.

The master's thesis/project committee is normally constituted of up to three members — the master's

thesis/professional project advisor and two additional members as examiners. The committee is formed by the program coordinator/head of department in consultation with the master's thesis/professional project advisor and is approved by the student's associate dean. Each committee member must hold a terminal degree in their discipline and must have a demonstrated record of scholarly activities related to the thesis/project research topic. The master's thesis/professional project advisor must be research-active and must have prior supervisory experience at the graduate level.

For details on the master's thesis/professional project proposal preparation and submission, and on the master's thesis/project committee formation and related deadlines, please refer to the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

Master's Thesis/Professional Project Continuous Enrollment

Graduate students who have completed one semester/term of master's thesis/professional project work must maintain continuous thesis/project enrollment until successful defense of the master's thesis/ professional project and the submission of the approved master's thesis/professional project final report. Students who fail to maintain thesis/ project continuation in a semester without their program coordinator/head of department prior approval of master's thesis/professional project registration discontinuation, will be assigned an NP grade, resulting in academic dismissal from the master's degree program.

Master's Thesis/Professional Project Continuous enrollment in a regular semester

Continuous enrollment in a regular semester is ensured by the Office of the Registrar. Changes to the master's thesis/professional project registration

details (thesis/ project title, name of advisor, credit and billing hours) are emailed to the Office of the Registrar by the program coordinator/head of department before the end of the add and drop period of the corresponding registration semester. In addition, and before the end of the add and drop period of the registration semester, the program coordinator/head of department will email the Office of the Registrar a list of the names and ID numbers of those students approved to interrupt their master's thesis/professional project continuous enrollment.

Master's Thesis/Professional Project Continuous Enrollment in a Summer Term

Continuous enrollment in master's thesis/professional project in a summer term is optional. The program coordinator/head of department will email the Office of the Registrar, by the end of the add and drop period of the corresponding summer term, a list of the names and ID numbers of students wishing to maintain continuous master's thesis/professional project enrollment in the summer term, along with their respective thesis/project title, advisors' names and appropriate credit and billing hours.

Master's Thesis/Professional Project Time Extensions

Students who do not complete the master's thesis/professional project after registering for thesis/ project full credit hours must maintain continuous master's thesis/professional project enrollment until defense of the master's thesis/professional project.

Likewise, students who have successfully defended their master's thesis/professional project and have already registered for the master's thesis/professional project full credit hours must maintain continuous enrollment until submission of the approved master's thesis/professional project final report.

A master's thesis/professional project extension fee (see Other Fees in the Tuition and Fees section earlier in this catalog) is charged for the first extension and every subsequent summer term extension; however, further extensions in a regular semester will be charged the tuition rate of one graduate credit hour.

Students must be registered in the semester/term in which they defend their thesis.

Note: A student must complete the master's degree program graduation requirements within five years from initial enrollment into the program, inclusive of any leave.

Switching from Master's Thesis to Professional Project and Vice Versa

Graduate students who wish to switch from master's thesis to professional project (or vice versa) must submit the Request to Change Program Option – Graduate Level Students (available at www.aus.edu/registration/forms) within the published deadlines. The request form must be approved by the student's program coordinator/head of department and the student's associate dean.

A student who switches from master's thesis to professional project (or vice versa) will be given an N for no grade for the master's thesis/professional project credit hours (i.e., XXX 698 or XXX 699) completed for the first option selected.

Switching from master's thesis to professional project could require the student to take additional courses. The student must pay for any additional credit hours or courses required as a result of switching from master's thesis to professional project (or vice versa). In switching from master's thesis to professional project (or vice versa) while maintaining the topic of research and working with the same master's thesis/professional project advisor, tuition paid towards the master's thesis will be applied towards the professional project and vice versa.

Grading of Master's Thesis/Professional Project

The master's thesis/six-credits professional project normally requires longer than one semester/term to be completed. An In Progress (IP) grade is recorded by the Office of the Registrar until completion of the master's thesis/professional project.

A master's thesis/professional project grade will be assigned after defense of the master's thesis/professional project and submission of the approved master's thesis/professional project final report. The master's thesis/professional project defense has two parts: an open public session followed by a closed session with the master's thesis committee. The associate dean for graduate studies will inform the Office of Graduate Studies and the Office of the Registrar of the master's thesis/professional project final grade.

PhD Dissertation

PhD degree seeking students are required to pass a qualifying examination and complete a major research work in the form of a PhD dissertation.

Qualifying Examination

To advance to candidacy for a PhD degree and become eligible to register for the PhD dissertation, a doctoral student must pass a qualifying examination. The qualifying examination may have a written and/or oral part to test the student's breadth of knowledge, understanding of fundamentals, and ability to perform independent research work in a specific area.

Registration for the qualifying examination is conditional upon meeting the following minimum requirements:

- the student must be in good academic standing
- the student must have successfully completed a minimum of 12 credit hours of doctoral-level course work.

Further eligibility requirements may be imposed by the individual PhD degree programs. For details, consult the degree program section later in this catalog. Students need to seek guidance from their program coordinator/head of department regarding the qualifying examination requirements and deadlines.

The qualifying examination may result in a pass or a fail grade. The program coordinator/head of department will notify the Office of Graduate Studies of the result of the qualifying examination within two weeks of the examination completion date. The Office of Graduate Studies will officially notify the student and the Office of Registrar of the outcome of the exam.

A doctoral student who fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the program coordinator/head of department, one month ahead of the registration of the semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the program coordinator/head of department who will make a written recommendation to the associate dean for graduate studies. The associate dean will then provide a recommendation to the Vice Provost for Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once.

Further details on the qualifying examination are provided in the *Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

Registration for Dissertation Credit hours

The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation. PhD degree candidates registering for dissertation credit hours must register through the Office of the Registrar.

Dissertation First Registration

Prior to registering for dissertation credit hours, PhD degree candidates must officially request the appointment of their Dissertation Advisory Committee (DAC) or, otherwise, the DAC chair. The DAC is constituted of the DAC Chair and two other members, at a minimum. In addition to the DAC chair, at least two of the DAC members must hold a full-time faculty position at AUS. All DAC members must hold doctoral degrees and must have a demonstrated record of scholarly activities related to the dissertation topic. In addition, the DAC chair must have prior supervisory experience at the graduate level.

The DAC chair is the principal dissertation advisor of the PhD degree candidate, guiding the candidate develop the dissertation research proposal and completing the dissertation.

In the first semester/term of dissertation work, a student normally registers for six dissertation credit hours working on the dissertation research proposal. Before the end of the add and drop period, the program coordinator/head of department must provide the Office of the Registrar with a list of all doctoral students who will be registered for dissertation credit hours (XXX 799), along with their dissertation titles, the names of their advisors and the number of dissertation credit hours.

For details on the DAC formation and the dissertation research proposal preparation and submission, please refer to the *Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

Dissertation Continuous Enrollment

PhD candidates who have completed one semester/term of dissertation work must maintain continuous dissertation enrollment until defense of the dissertation. Candidates who successfully defend their dissertation must remain enrolled until submission of the approved dissertation final report.

Students who fail to maintain dissertation continuation in a semester, without their program coordinator/head of department prior approval of dissertation registration discontinuation, will be assigned an NP grade, resulting in an automatic withdrawal of candidacy from the PhD degree program.

Dissertation Proposal

Students are expected to successfully complete the dissertation proposal within three semesters of dissertation first registration. A PhD candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed.

Failure to complete the dissertation proposal within the specified time frame or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation proposal report must be submitted and orally presented to the dissertation review panel. The dissertation review panel is composed of the DAC in addition to two more members who hold a doctorate degree and are active in the research field of the proposal. The proposal must be approved in writing by the review panel. Details on the dissertation proposal review process are provided in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

Dissertation Continuous enrollment in a regular semester

Dissertation continuous enrollment in a regular semester is ensured by the Office of the Registrar. Candidates are automatically enrolled in three incremental credit hours.

Changes to the dissertation registration details (dissertation title, name of advisor, registration credit hours and billing hours) are emailed to the Office of the Registrar by the program

coordinator/head of department before the end of the add and drop period of the corresponding registration semester.

In addition, and before the end of the add and drop period of the registration semester, the program coordinator/head of department will email the Office of the Registrar a list of the names and ID numbers of those students approved to interrupt their dissertation continuous enrollment.

Dissertation Continuous Enrollment in a Summer Term

Continuous enrollment in the dissertation in a summer term is optional. The program coordinator/head of department will email the Office of the Registrar, by the end of the add and drop period of the corresponding summer term, a list of the names and ID numbers of students wishing to maintain continuous dissertation enrollment in the summer term, along with their respective dissertation title, advisors' names and appropriate credit hours and billing hours.

Dissertation Time Extensions

PhD candidates who have registered for the dissertation minimum credit hours but have not yet defended their dissertation must maintain continuous enrollment by registering and paying for three incremental credit hours per semester/term until defense of the dissertation.

Candidates who have successfully defended their dissertation must remain enrolled until submission of the approved dissertation final report by registering and paying for one incremental credit hour per semester/term until submission of the approved dissertation final report.

Candidates must be registered in the semester/term in which they defend their dissertation.

Note: A student must complete the PhD degree program graduation requirements within 10 years from initial enrollment into the program.

Dissertation Defense and Grading

Up until the defense of the dissertation, an In Progress (IP) grade is recorded by the Office of the Registrar for every registration semester/term.

The dissertation must be defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC consists of the DAC members and at least two additional members. The FODC membership is formed by the program coordinator/head of department in consultation with the DAC chair; it is approved by the associate dean for graduate studies and

appointed by the Vice Provost for Graduate Studies.

The dissertation defense has two parts: an open public session followed by a closed session with the FODC. The outcome of the defense will be either Pass, Fail or Pass with Conditions resulting in a grade of P, NP or IP, respectively. If an IP grade is assigned and the dissertation work continues into a second semester/term, the student must register for one incremental credit hour of dissertation per semester/term, until a final grade is assigned. Candidates with an NP grade may petition to the Vice Provost for Graduate Studies, within one month of receiving the grade, for permission for a second final oral examination. If approved, the student must register for three credit hours of dissertation. The examination must be held with the same FODC, no sooner than four months from the first final oral examination. Failing the second final oral examination will result in an automatic withdrawal of candidacy from the PhD degree program.

For further details, consult the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

Graduation Requirements

Catalog

The graduation requirements for any individual student are determined by the catalog that was effective when the student admitted in the major, referred to as the catalog of record.

A student may choose to follow the catalog effective for any semester/term in which they were a registered student in their current program of study. To change catalogs, a student must file a Change of Academic Catalog Form (available at www.aus.edu/registration/forms) with the Office of the Registrar no later than the end of Add/Drop period of the student's graduation semester/term.

A student who changes his/her degree program may petition to revert to the catalog in effect at the time of matriculation into the university. The Petition Form (available at www.aus.edu/registration/forms) must be approved by the student's graduate program coordinator/head of department or associate dean and submitted to the Office of the Registrar no later than the end of the add/drop period of the student's graduation semester/term.

Every individual student is personally responsible for meeting all graduation requirements as detailed in his/her catalog of record.

If a required course within a degree program changes its number of credit hours, then the number of credit hours required by the degree program for graduation may, at the discretion of the college/school, change by the same amount provided the minimum total number of credit hours for graduation is 30 for a master's degree program and 54 for a PhD degree program, and the CGPA is at least 3.00.

In case of substantial changes in course offerings, equivalent graduation requirements are determined by the dean of the student's college/school.

Disclaimer: Course information, content and prerequisites may be subject to change as a result of the university's commitment to a process of continual improvement in academic programs. Students must comply with the most up-to-date course requirements.

Courses

Courses are considered primary components of the curriculum and should not be split into individual credit hours to be counted in different areas of the degree audit.

Requirements of a Graduate Degree Program

Each student in a graduate degree program must successfully complete a minimum number of credit hours in courses that are specific to the degree program and distinctive to the major subject area of the degree program. The specific requirements are listed as major requirements (that could comprise college core requirements and program core requirements), concentration requirements and electives, and major electives. The minimum number of credit hours of a master's degree is 30 credit hours; the minimum number of credit hours of a PhD degree is 54 credit hours.

Details of the graduation requirements of a degree program are provided under the corresponding degree program section in this catalog.

Requirements for a Double Major

To complete a double major, students must satisfy the degree program requirements of the two majors requested. Some courses may be counted toward the fulfillment of both degrees' requirements. The catalog in effect for the student's primary major will be followed for the degree audit of the second major.

Double-major students will be awarded the degree of the primary major degree program, with a notation on the diploma indicating completion of a second major.

Graduate Courses Completed While at the Undergraduate Level

With the approval of their associate dean and the relevant graduate program coordinator/head of department, AUS senior undergraduate students with a minimum CGPA of 3.00 can register for up to two master's level courses while enrolled at the undergraduate level. Once the student is admitted to an AUS master's degree program, these courses may be counted toward completion of the master's degree program requirements, provided they were completed no more than five years prior to the start date of the first semester of study of the current master's degree program. Where AUS graduate courses taken while at the undergraduate level count towards the student's master's degree program graduation requirements, courses could be used to satisfy registration requirements, as applicable. Grades earned in such courses will also count in the master's-level cumulative grade point average (CGPA).

Undergraduate students accepted to the Accelerated Master's Program (AMP) of an AUS master's-level degree program are eligible to register for a maximum of six credit hours in master's-level courses while completing their undergraduate degree program graduation requirements. These courses may be used towards meeting the undergraduate degree program graduation requirements and may be evaluated for transfer of credit hours towards meeting the master's-level degree program graduation requirements post admission to the program. For full details on the AMP, including eligibility, application process, course registration and tuition fees, refer to the Accelerated Master's Program section of the *AUS Undergraduate Catalog* or consult www.aus.edu/amp.

Graduation Residence Requirements

Candidates for graduation are expected to complete their last semester in residence at the university, unless registered at an institution with which AUS has a study abroad agreement.

In order to obtain a master's degree from AUS, students must complete a minimum of two regular semesters in residence at AUS. Accelerated Master's Program (AMP) students who are admitted to the corresponding master's

degree program and who choose the thesis option of this program must complete a minimum of three regular semesters in residence at AUS as students of that master's degree program.

To earn a PhD degree from AUS, doctoral students must complete a minimum of four semesters in residence at AUS. Coursework completed at an institution with which AUS has a study abroad agreement will meet the graduation residence requirement provided the courses have been pre-approved by the relevant graduate program coordinator/head of department and the associate dean for graduate studies.

Note that coursework completed in the context of a summer term outside AUS does not meet graduation residence requirements.

Master's degree students may transfer up to six credit hours in master's-level courses. PhD degree students may transfer up to nine credit hours in doctoral-level courses. For details, please refer to the Transfer Credit hours Policy under the Admission to Graduate Studies section earlier in this catalog.

Time Limit on Duration of Study

Regardless of the catalog by which the student's graduation requirements are governed, all degree requirements must be completed within five years of admission to AUS as a master's degree student and within 10 years of admission to AUS as a PhD degree student, inclusive of any leave.

Academic Standing Requirement

A student must be in good academic standing to be eligible for graduation.

Graduation Procedures and Diploma Information

Participation in the Commencement Ceremony

The university holds two commencement exercises: a fall commencement ceremony at the end of the fall semester and a spring commencement ceremony at the end of the spring semester.

Prospective candidates for graduation in a fall or spring semester are eligible to participate in the corresponding semester commencement ceremony. Prospective candidates for graduation in a summer term are eligible to participate in the following fall semester commencement ceremony.

Master's degree students registered at the 11th week of a semester for courses/thesis/final project necessary

to complete their degree program graduation requirements may participate in commencement at the end of that semester, unless the college/school notifies the Office of the Registrar that graduation will be delayed because of lack of progress on the thesis/final project.

PhD degree students registered at the 11th week of a semester for their dissertation may participate in commencement at the end of that semester, provided they have successfully completed all their degree program requirements, including earning a P grade on their dissertation. Students whose dissertation passing grade is awarded past the 11th week of the semester may participate in the subsequent commencement ceremony.

Students who do not wish to participate in the commencement exercises of their semester of graduation must complete the Absentia Form, which is available at www.aus.edu/registration/forms or www.aus.edu/commencement. Absentia graduates are not eligible to participate in another commencement ceremony.

Application for Graduation

Candidates for graduate degrees file an Application for Graduation form (available at www.aus.edu/registration/forms or www.aus.edu/commencement) with the Office of the Registrar in their last expected term of study. Only after an Application for Graduation form has been filed can the Office of the Registrar begin processing the necessary information for final certification for graduation.

Students who fail to complete all degree requirements by the end of the semester/term for which they apply to graduate need not reapply for graduation. Their previous application will be automatically moved to the following semester/term.

Conferral of Degrees

Degrees are conferred at the end of the semester/term in which students have successfully completed degree requirements and all master's thesis/professional project/dissertation requirements, including corrections and final submission of the approved master's thesis/professional project/dissertation reports to the AUS Archives.

Conferral of the degree is noted on the academic transcript of the graduate with the date of graduation.

Names on Diplomas

The names of AUS students will be spelled in English exactly as they

appear on their passports or identity cards when printed on diplomas. If a name on a passport or an identity card does not appear in English, then the spelling of the name will be printed according to the personal preference of the student.

Degree Information on Diplomas

The diploma will list the full name of the degree program awarded, as well as the applicable concentration(s).

The diploma of students graduating with a double major will also list the second major.

Attestation of Diplomas and Transcripts

The Office of the Registrar provides information relevant to the attestation of diplomas and transcripts with the UAE Ministry of Education's Higher Education Affairs Division. For details, please visit www.aus.edu/commencement.

College of Architecture, Art and Design

Dean

Varkki Pallathucheril

Associate Dean

Zinka Bejtlic

Master of Urban Planning (MUP)

George Katodrytis, Head, Department of Architecture

Jerry Kolo, Coordinator

The Master of Urban Planning (MUP) degree program is offered by the Department of Architecture.

Urban planning is concerned with creating aesthetically beautiful and functional places where present and future generations can live, work, entertain and engage in community, social, religious and cultural activities.

Urban planning has roots in architecture, engineering, public health, law and the social sciences. Planners today combine design, analytical and communication skills to help communities manage change. Urban planning involves government, private enterprise and local communities taking concerted action toward achieving a common goal.

The MUP degree program at AUS provides a specialized and professional education that enables graduates to plan urban environments and exert leadership in managing urban growth, developing urbanization policies and promoting social development. The program imparts to students' ethical standards compatible with the values of local cultural settings, principles of social justice and concerns for environmental protection and sustainability. More details on the program are available at www.aus.edu/caad/mup.

Program Mission

The MUP degree program prepares individuals to become experts and leaders in the management and planning of urban development; in doing so, they will be guided by professional and ethical standards rooted in values of sustainability, local culture and social justice.

Program Goals

The MUP degree program seeks to:

- offer a high-quality educational setting that integrates theoretical principles of urban planning with practical methods and applications

- pursue approaches to teaching and learning that emphasize dealing with practical real-world issues and problems
- support and promote original interdisciplinary research in urban planning and related fields
- advance cooperation and forge partnerships with local communities, be they governmental, professional, academic and other local groups such as community-based organizations, not-for-profit entities and non-governmental organizations

Program Outcomes

Graduates of the MUP degree program will be able to:

- use quantitative, qualitative and visual techniques to analyze and interpret data and communicate information in support of planning and policy-making for cities and regions
- lead and guide locally relevant processes, which include stakeholder participation, for making and implementing different kinds of plans
- undertake research and analysis in an interdisciplinary setting to foster sound insights into planning for sustainable places

Admission Requirements

Applicants are required to fulfill the university's general admission requirements for graduate studies.

The program admits students from all fields of study including, but not limited to, urban planning, architecture, engineering, business, the humanities and the social sciences. Applicants must submit their most current curriculum vitae (CV) with the application package.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree-seeking students interested in pursuing an MUP degree may register for a maximum of six credit hours from MUP courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MUP degree program. The master's-level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must have satisfied the following requirements at AMP application time:

- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MUP courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

The MUP degree is awarded after the successful completion of a minimum of 33 credit hours consisting of core courses, elective courses and a capstone workshop course, with a minimum cumulative grade point average of 3.00.

To graduate with an MUP degree, students must successfully complete the following minimum requirements:

- 18 credit hours in core courses
- six credit hours in a required capstone workshop course
- a minimum of nine credit hours in elective courses

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Core Courses Requirement (18 credit hours)

Students must successfully complete the following UPL courses:

- UPL 600 Planning History, Theory and Principles
- UPL 602 Computer Applications in Planning
- UPL 604 Urban Planning Research and Analysis
- UPL 621 Environmental and Land Use Planning
- UPL 623 Urban Design Principles, Processes and Skills
- UPL 625 Plan Making, Communication and Process

Required Capstone Workshop Course (6 credit hours)

Students must successfully complete the program's capstone workshop course:

- UPL 680 Urban Planning and Research Workshop

This capstone workshop course involves working as a team on applying substantive urban planning knowledge and skills. It involves fieldwork, hands-on analysis, policy proposals and plan making.

Elective Courses (minimum of 9 credit hours)

Students must successfully complete three elective courses for a minimum of 9 credit hours. Electives are selected from the following list of courses, in consultation with the program academic coordinator:

- UPL 633 Urban Infrastructure Planning
- UPL 634 Tourism and Hospitality Planning
- UPL 639 Urban Planning and Housing Policy
- UPL 641 Urban Economics and Analysis
- UPL 651 Negotiation Strategies
- UPL 694 special topic courses in urban planning

With the approval of the program academic coordinator, students may elect to take one course outside of the list, from any university graduate-level course not counted as a core or capstone course.

Academic Advising

Program advising procedures provide students with orientation and guidance on the program and the profession. Students meet with the program academic coordinator every semester to discuss curricular progress and changes in circumstances, if any, and to confirm course choices for the next semester.

College of Arts and Sciences

Dean

Mahmoud Anabtawi

Associate Dean for Undergraduate Affairs

Ahmad Al-Issa

Associate Dean for Graduate Affairs

Hana Sulieman

Master of Arts in English/Arabic/English Translation and Interpreting (MATI)

David Wilmsen, Head, Department of Arabic and Translation Studies

The Master of Arts in English/Arabic/English Translation and Interpreting (MATI) degree program is offered by the Department of Arabic and Translation Studies.

The MATI degree program responds to the vital role that intercultural communication plays in international encounters and the growing impact of the Arab region on world affairs by equipping graduates with highly specialized translation and interpreting skills in English and in Arabic. The MATI program places the diverse range of skills required for translation and interpreting within a general theoretical framework, which provides students with the conceptual tools to identify, analyze and resolve problems and develop a reflective approach to translation and interpreting. The MATI degree program provides students with advanced training in translation and interpreting techniques, as well as in terminology management, machine translation (MT), translation memory (TM) and language engineering areas most relevant to the work of translators and interpreters in today's complex web of communication.

Program Goals

To fulfill its mission, the MATI degree program aims to:

- equip graduates with highly specialized translation and interpreting skills and techniques in English and in Arabic
- provide students with the conceptual tools to identify, analyze and resolve problems and develop a reflective approach to translation and interpreting
- enhance their knowledge of English and Arabic language and linguistics as they relate to translation and interpreting

- expose students to the relevant technologies for translation and interpreting
- prepare students to respond confidently to the demands of translation and interpreting within the fields of business, science, international relations, law and journalism
- further develop students' knowledge of relevant research methods and academic writing conventions

Program Outcomes

Graduates of the MATI program will be able to:

- demonstrate competence in translation and interpreting into and out of English and Arabic
- demonstrate the ability to reflect upon and use relevant theories of translation and interpreting in the production and assessment of translation and interpreting tasks
- apply knowledge of English and Arabic language and linguistics to the tasks of translation and interpreting
- apply relevant technologies to translation and interpreting activities
- perform competently in translating and interpreting for business, science, international relations, law and journalism
- employ appropriate research methodologies and conventions of academic writing

Admission Requirements

Applicants are required to fulfill the general university requirements for graduate admission. In addition, non-native speakers of Arabic must hold a BA in Arabic.

Conditional admission status may be granted to applicants with a minimum undergraduate cumulative GPA of 2.50 (or equivalent) and a 2.50 or its equivalent in 300- and 400-level courses in discipline(s) relevant to the program, and at least three years of relevant practical experience in translation and/or interpreting. In such cases, students must successfully complete TRA 500 Principles and Strategies of Translation and another course - as specified by the head of the department - in their first semester of study, and must attain a GPA of 3.00 (B) or above for that semester to achieve full admission and to be allowed to proceed.

Conditional admission applicants must also meet the general university

conditional admission requirements as outlined in the Admission to Graduate Studies section earlier in this catalog.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree-seeking students interested in pursuing a MATI degree may register for a maximum of six credit hours from MATI courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MATI degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MATI courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MATI degree program are offered two options: a thesis option and a course option. To graduate with the Master of Arts in English/Arabic/English Translation and Interpreting, students must successfully complete all the requirements of the program, which consist of a minimum of 30 credit hours in required courses and elective courses, inclusive of a research thesis (for students who select the thesis option), with a minimum cumulative GPA of 3.00.

Students must successfully complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in the catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- 18 credit hours of required courses
- a minimum of six credit hours of elective courses
- six credit hours of Master's Thesis

Course Option

Students in the course option must successfully complete the following requirements:

- 18 credit hours of required courses
- a minimum of 12 credit hours of elective courses

Required Courses (18/24 credit hours)

Students in the thesis option must successfully complete all the required courses, for a total of 24 credit hours, inclusive of the practicum. Students in the course option must successfully complete 18 credit hours in required courses, inclusive of the practicum.

- TRA 500 Principles and Strategies of Translation
- TRA 503 Theoretical Models of Translation
- TRA 505 Interpreting and the Profession I: Consecutive Interpreting
- TRA 509 Interpreting and the Profession II: Simultaneous Interpreting
- TRA 510 Research Methods and Academic Writing
- TRA 558 Contrastive Linguistics and Translation
- TRA 630 Practicum
- TRA 699 Master's Thesis (for students in the thesis option)

Practicum Waiver

The practicum requirement (TRA 630) can be waived for students with relevant and documented professional experience in translation and/or interpreting, subject to the approval of the head of the department and the Associate Dean for Graduate Affairs.

Elective Courses (minimum of 6/12 credit hours)

Students in the thesis option must successfully complete a minimum of two elective courses (for a minimum of six credit hours). Students in the course option must successfully complete a minimum of four elective courses (for a minimum of 12 credit hours).

Students select their electives from the following list of courses, in consultation with their advisor:

- TRA 504 Discourse Semantics and Pragmatics in Translation
- TRA 512 Terminology, Arabization and the Translator
- TRA 556 Rhetoric for Translators
- TRA 557 Translation of Administrative and Legal Documents
- TRA 560 Audiovisual Translation
- TRA 580 Translating Quranic Pragmatics
- TRA 594/694 special topic courses in translation and interpreting
- TRA 610 Intercultural Communication and Translation

Master's Thesis

The master's thesis must be prepared under close supervision of the thesis faculty supervisor on a topic within translation/interpreting studies or an extended translation and a commentary, chosen in consultation with the faculty supervisor.

The master's thesis must be completed within two consecutive academic semesters. An extension may be allowed if a candidate presents acceptable mitigating circumstances.

The master's thesis is defended to the satisfaction of a committee composed of three faculty members. A complete guide for forming the thesis committee and for preparing the master's thesis, including the thesis proposal, thesis defense and deadlines, is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For the master's thesis registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Arts in Teaching English to Speakers of Other Languages (MA TESOL)

Roger Nunn, Head, Department of English

The Master of Arts in Teaching English to Speakers of Other Languages (MA TESOL) degree program is offered by the Department of English.

The mission of the MA TESOL degree program is to provide students a balanced foundation of both practical and theoretical knowledge needed to teach English at various proficiency levels, and to prepare them for doctoral studies in areas related to language learning and teaching. By combining theory and practice, the program aims

to produce informed teachers capable of using theory to enhance their teaching practice.

Program Goals

To fulfill this mission, the program goals are:

- to develop in students a critical approach to assessing second language learning models, teaching methodologies and materials appropriate to the UAE cultural context
- to prepare students for positions requiring high levels of proficiency in teaching English as a foreign or second language at the secondary and tertiary levels
- to equip its graduates with the required competencies to contribute to the field and prepare them to enroll in PhD programs

Program Learning Outcomes

Upon graduation from the MA TESOL degree program, students will be able to:

- demonstrate an understanding of the basic models of language learning/teaching
- explain the role of culture in language learning and teaching in an ESL/EFL environment
- demonstrate critical and practical knowledge in the field of computer assisted/enhanced language learning
- apply pedagogical theories in applied linguistics to teaching practices
- apply testing and assessment concepts to real classroom situations
- develop/adapt and evaluate learner-centered curricula and materials for specific language teaching situations
- use effective classroom observation and research skills to improve teaching
- conduct original research

Admission Requirements

Applicants who meet the general university requirements for graduate admission but have not completed at least one undergraduate course in general linguistics may be required to complete an undergraduate course in linguistics.

The undergraduate remedial course does not generate credit hours towards completion of the degree program graduation requirements. Students required to complete the remedial course are normally not eligible to register for degree program courses prior to successful completion of the course. For further details, refer to Bridging Courses in Registration and Course Information within the Academic

Policies and Regulations section earlier in this catalog.

Waiver Policy

The remedial course could be waived by the MA TESOL Admissions Committee depending on the student's background. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog.

Accelerated Master's Program – AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MATESOL degree may register for a maximum of six credit hours from MATESOL courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MATESOL degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MATESOL courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MA TESOL degree program are offered two options: a thesis option and a non-thesis option. To graduate with the MA TESOL, students must successfully complete all the requirements of the program, which consist of a minimum of 30 credit hours in required courses and elective courses, inclusive of a research thesis (for students who select the thesis option), with a minimum cumulative GPA of 3.00.

Students must successfully complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in the catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- 12 credit hours of required courses
- a minimum of 12 credit hours of elective courses
- six credit hours of Master's Thesis

Non-Thesis Option

Students in the non-thesis option must successfully complete the following requirements:

- 12 credit hours of required courses
- a minimum of 18 credit hours of elective courses

Required Courses (18/12 credit hours)

Students in the thesis option must successfully complete all the required courses, for a total of 18 credit hours. Students in the non-thesis option must successfully complete 12 credit hours in required courses.

- ELT 511 Linguistics for ESL Teachers
- ELT 513 Language Acquisition and Development
- ELT 515 Methods and Materials Development
- ELT 619 Practicum in TESOL
- ELT 699 Master's Thesis (for students in the thesis option)

Elective Courses (minimum of 12/18 credit hours)

Students in the thesis option must successfully complete a minimum of four elective courses (for a minimum of 12 credit hours). Students in the non-thesis option must successfully complete a minimum of six elective courses (for a minimum of 18 credit hours).

Students select their elective courses from the following list of courses, in consultation with their advisor:

- ELT 501 Advanced English Grammar
- ELT 507 Culture, Society and Language Learning
- ELT 517 Curriculum Design
- ELT 521 Reading and Writing in ESL
- ELT 523 Bilingual Education
- ELT 551 Language Testing and Evaluation
- ELT 553 Technology in the ESL Classroom
- ELT 617 Quantitative, Qualitative and Action Research in ELT
- ELT 694 Special Topics in ELT

With the approval of the head of the department and the Associate Dean for

Graduate Affairs, students may choose to take one elective course outside of the list of elective courses, provided that the replacement elective meets the educational objectives of the program.

Master's Thesis

Students in the thesis option must complete their master's thesis under close supervision of a faculty supervisor on a topic related to some aspect of TESOL.

The master's thesis/professional project must be defended to the satisfaction of the thesis committee, which is composed of TESOL program faculty and one external member. A complete guide for forming the thesis committee and for preparing the master's thesis is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For the master's thesis registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Mathematics (MSMTH)

Abdul Salam Jarrah, Head, Department of Mathematics and Statistics

The Master of Science in Mathematics (MSMTH) degree program is offered by the Department of Mathematics and Statistics.

The MSMTH degree program provides students with rigorous and thorough knowledge of a broad range of pure and applied areas of mathematics. It is designed to train students with different professional goals, ranging from employment or career advancement in business, industry or government, to basic training in foundations needed to obtain a research career or pursue a PhD in mathematics or mathematics-related fields.

Program Goals

The program seeks to accomplish the following:

- provide the analytical skills necessary to formulate and solve complex mathematical problems that are of contemporary relevance in the fields of pure and applied mathematics
- develop the mathematical skills and knowledge to facilitate career advancement in education, business or industry, or to pursue more advanced study such as a PhD degree in mathematics or mathematics related-fields

- provide the mathematical skills and knowledge to describe and solve complex quantitative problems that arise in business or industry

Program Outcomes

Upon completion of the program, graduates will be able to:

- apply advanced mathematical analysis to mathematical models
- demonstrate a comprehensive understanding of a broad domain of mathematics from (but not all) areas such as analysis, algebra, geometry and applied mathematics
- formulate and construct proofs
- clearly communicate mathematical concepts
- apply advanced mathematical techniques in their professional activities
- conduct independent research in specialized areas of mathematics
- employ mathematical methods to model and solve practical problems
- formulate problems in mathematical terms arising in related areas such as engineering, finance, and the natural sciences

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a bachelor's degree in an area of mathematical science (applied or pure mathematics, actuarial science, statistics, etc.) from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS, or a bachelor's degree from a related field with a minimum of:

- nine credit hours in calculus
- three credit hours in differential equations
- three credit hours in linear algebra
- three credit hours in abstract algebra
- three credit hours in real analysis

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSMTH degree may register for a maximum of six credit hours from MSMTH courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSMTH degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in a science or engineering major, or in the accounting, finance or economics majors
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have a minimum cumulative GPA of 3.50
- have successfully completed MTH 221 (Linear Algebra) and one course from the following subject areas:
 - Differential Equations
 - Abstract Algebra
 - Real Analysis
 - Probability Theory

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSMTH courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSMTH degree program are offered two options: a thesis option and a non-thesis option. To graduate with the MSMTH, students must successfully complete all the requirements of the program, which consist of a minimum of 30 credit hours in required courses and elective courses, inclusive of a research thesis (for students who select the thesis option), with a minimum cumulative GPA of 3.00.

Students must successfully complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in the catalog.

Thesis Option

Students in the thesis option are required to successfully complete the following:

- 12 credit hours in required course work
- a minimum of 12 credit hours in elective courses
- six credit hours in Master's Thesis

Non-Thesis Option

Students in the non-thesis option are required to successfully complete the following:

- 12 credit hours in required course work
- a minimum of 18 credit hours in elective courses

Required Courses (18/12 credit hours)

Students in the thesis option must successfully complete all the required courses for a total of 18 credit hours. Students in the non-thesis option must successfully complete 12 credit hours in required courses.

- MTH 505 Ordinary Differential Equations
- MTH 511 Real Analysis
- MTH 512 Advanced Linear Algebra
- MTH 532 Abstract Algebra
- MTH 599 Master's Thesis (for students in the thesis option)

Elective Courses (minimum of 12/18 credit hours)

Students in the thesis option must successfully complete a minimum of four elective courses (for a minimum of 12 credit hours). Students in the non-thesis option must successfully complete a minimum of six elective courses (for a minimum of 18 credit hours).

Students select their electives from the following list of courses, in consultation with their advisor:

- MTH 500 Mathematical Statistics with Applications
- MTH 506 Partial Differential Equations
- MTH 507 Financial Mathematics I
- MTH 508 Mathematical Biology
- MTH 513 Advanced Probability
- MTH 514 Combinatorics
- MTH 516 Financial Mathematics II
- MTH 517 Numerical Methods for Derivative Pricing
- MTH 520 Complex Analysis
- MTH 525 Functional Analysis
- MTH 540 Algebraic Coding Theory
- MTH 551 Methods of Applied Mathematics
- MTH 555 Loss and Risk Models
- MTH 560 Topology
- MTH 565 Numerical Analysis
- MTH 570 Optimal Control Theory
- MTH 594 Special Topics in Mathematics
- STA 501 Advanced Data Mining: Theory and Applications

- STA 594 approved special topics in statistics. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

With the approval of the head of the department and the Associate Dean for Graduate Affairs, students may choose to take one elective course outside of the list of elective courses, provided that the replacement elective meets the educational objectives of the program.

Master's Thesis

A student in the thesis option must prepare and successfully defend a master's thesis presenting results of independent research performed under the close supervision of a faculty member from the Department of Mathematics and Statistics.

A student who wishes to pursue the thesis option must formally inform the head of the department of the desired research topic and research question no later than the end of the 10th week of classes of the student's second semester of study. If the student is approved to pursue the thesis option, the head of the department will consult with the faculty of the department to identify a master's thesis advisor for the student. The master's thesis advisor will be responsible for supervising all aspects of the student's graduate work, such as course selection, thesis proposal, thesis writing and thesis defense.

A complete guide for forming the thesis committee and for preparing the master's thesis is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For the master's thesis registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Doctor of Philosophy in Materials Science and Engineering (PhD-MSE)

Ali Alnaser, Coordinator

The PhD in Materials Science and Engineering (PhD-MSE) degree program is an interdisciplinary degree program that draws on the expertise of faculty from the College of Arts and Sciences, the College of Engineering and the College of Architecture, Arts and Design. The PhD-MSE degree program offers advanced education in four focus

research areas that are aligned with the UAE Economic Vision 2030:

- Advanced Materials
- Materials for Energy and Environment
- Structures
- Analytical and Computational Modeling.

The PhD-MSE degree program is designed to provide future scholars with the skills and abilities that will allow them to contribute to the advancement of knowledge in the focus research areas of the program.

Mission Statement

The mission of the PhD-MSE degree program is to prepare future researchers and academics equipped with interdisciplinary cutting-edge knowledge and advanced skills that can be utilized in meeting the societal needs and in contributing to promising entrepreneurship in the UAE, the region, and globally.

Program Goals

The PhD-MSE program aims to:

- prepare students to meet the highest challenges of scholarship and become distinguished faculty members
- provide a research-based learning environment that is conducive to acquiring and analyzing data, developing experimental approaches to materials science and engineering, and practicing the proper scientific research methods
- provide students with the latest developments and techniques in the field through a dynamic curriculum that reflects the evolving needs of the region and the world
- prepare students for careers in the government, industry and academia sectors, and train them to lead in creating strategies and developing operations for research and development in corporate organizations as well as in government agencies.

Program Learning Outcomes

Graduates of the PhD-MSE degree program will be prepared to:

- develop advanced knowledge in the core subjects and theories of materials science and engineering
- apply relevant analytical and numerical techniques to model physical phenomena and solve complex problems
- design and conduct experiments, and demonstrate proficiency in data acquisition and analysis using state-of-the-art research techniques

- communicate research outcomes effectively to academic and relevant audiences, both orally and in writing
- carry out original independent research of theoretical and methodological rigor
- uphold standards of ethical academic conduct.

Admission Requirements

In addition to meeting the university's general requirements for admission to PhD degree programs, applicants to the PhD-MSE degree program must meet the following program admission requirements:

- applicants must have completed a Master of Science degree in any of the following fields: materials science, materials engineering, physics, chemistry, mechanical engineering, electrical engineering, chemical engineering or civil engineering, with a minimum CGPA of 3.30. Applicants with a relevant master's degree but not in materials science or materials engineering could be required to complete bridging courses (for details, refer to Bridging Courses hereafter)
- applicants must submit an official Graduate Record Examination (GRE) score
- applicants must submit three letters of recommendation, a statement of purpose and a current vita/resume.

Degree Requirements

To qualify for graduation with a PhD-MSE degree, students must successfully complete a minimum of 54 credit hours with a minimum cumulative GPA of 3.00, as follows:

- a minimum of 24 credit hours of coursework (8 courses), inclusive of a zero-credit hours seminar (MSE 795)
- a minimum of 30 credit hours of research work (MSE 799)

The expected minimum duration for completion of the PhD-MSE degree program is four years. All graduation requirements must be completed within 10 years of admission to AUS as a doctoral student, inclusive of any leave.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Bridging Courses

Applicants with a relevant master's degree but not in materials science or materials engineering could be required to complete the following bridging courses:

- MSE 500 Fundamentals of Materials Science and Engineering

- MSE 510 Thermodynamics in Materials Science and Engineering

The bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete bridging course are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Waiver Policy

A bridging course may be waived if the student has completed comparable course work at the master's level. Students may be required to submit course documentation. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog.

Required Courses (minimum of 30 credit hours)

Students must successfully complete the following required courses:

- MSE 795 Doctoral Seminar
- MSE 799 Dissertation (for a minimum of 30 credit hours)

Elective Courses (minimum of 24 credit hours)

Students must successfully complete a minimum of eight courses (for a minimum of 24 credit hours) selected from the following. The choice of courses must be approved by the program coordinator.

- MSE 705 Diffraction and Crystallography
- MSE 707 Magnetic Materials and Devices
- MSE 708 Electronic Properties of Materials
- MSE 710 Advanced Thermodynamics in Materials Science and Engineering
- MSE 711 Kinetics of Materials
- MSE 718 Materials for Energy Production and Storage
- MSE 720 Advanced Characterization and Analytical Techniques
- MSE 721 Surface Science and Technology
- MSE 730 Advanced Mechanics of Materials
- MSE 731 Plasticity
- MSE 732 Fatigue of Materials and Structures
- MSE 733 Mechanics of Laminated Composite Structures
- MSE 734 Physical Metallurgy

- MSE 740 Computational Methods in Materials Science and Engineering
- MSE 741 Advanced Finite Element Method in Materials Science and Engineering
- MSE 750 Nanomaterials: Science and Applications
- MSE 760 Advanced Corrosion
- MSE 761 Advanced Polymers and Composite Materials
- MSE 794 Special topics in Materials Science and Engineering

Qualifying Examination

To be considered as a candidate for the PhD-MSE degree, a student must pass a written qualifying examination. Registration for the qualifying examination is conditional upon meeting the following requirements:

- the student must be in good academic standing
- the student must have successfully completed a minimum of 12 credit hours of course work.

The qualifying examination may result in a pass or a fail grade. A student who fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the Program Coordinator, one month ahead of the registration of the semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the Program Coordinator who will make a written recommendation to the Associate Dean for Graduate Affairs. The associate dean will then provide a recommendation to the Vice Provost for Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once.

Students need to seek guidance from the Program Coordinator regarding the qualifying examination requirements and deadlines.

Further details on the qualifying examination are provided in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation

under the Academic Policies and Regulations section of this catalog.

PhD Dissertation

The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation.

A PhD-MSE candidate develops his/her dissertation research proposal and completes the dissertation under the direct supervision and guidance of a principal advisor. The principal advisor serves as the chair of the student's Dissertation Advisory Committee (DAC). The DAC also includes at least two additional faculty members. The student may request the appointment of an external committee member.

A PhD-MSE candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed. PhD candidates are expected to successfully complete the dissertation proposal within three semesters of dissertation first registration. Failure to complete the dissertation proposal within the specified time frame or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation must be publicly defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC is formed by the Program Coordinator in consultation with the DAC chair; it is approved by the Associate Dean for Graduate Affairs and appointed by the Vice Provost for Graduate Studies.

A complete guide for forming the DAC and the FODC, and preparing the dissertation, including the dissertation research proposal, the dissertation defense schedule and deadlines, is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

College of Engineering

Dean

Sirin Tekinay

Associate Dean for Undergraduate Affairs

Assim Sagahyroon

Associate Dean for Graduate Affairs and Research

Lotfi Romdhane

Master of Science in Biomedical Engineering (MSBME)

Abdulrahim Shamayleh, Coordinator

The Master of Science in Biomedical Engineering (MSBME) degree program is an interdisciplinary degree program offered by the College of Engineering that draws on the expertise of faculty from the College of Engineering and the College of Arts and Sciences.

The MSBME degree program will prepare professionals in an environment that combines biomedical engineering practice and technical research to contribute to the growing body of biomedical engineering knowledge, research and development, both regionally and internationally.

Mission Statement

The mission of the MSBME degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to biomedical engineering. The program continuously strives to create a stimulating academic environment that promotes excellence in teaching and research, thereby assisting the students to become competent, innovative and responsible professionals.

Program Educational Objectives

Graduates of the MSBME degree program will be prepared to:

- be successful professionals in a specialized area of biomedical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSBME graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of biomedical engineering

- apply advanced mathematics and engineering knowledge in identifying, formulating and solving biomedical engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to biomedical engineering professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science in Biomedical Engineering or Chemical Engineering or Computer Engineering or Electrical Engineering or Civil Engineering or Industrial Engineering or Mechanical Engineering, from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in other engineering fields or a quantitative science field that is closely related to the biomedical engineering field may be considered on a case-by-case basis.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSBME degree may register for a maximum of six credit hours from MSBME courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSBME degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in a science or engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations

section of the *AUS Undergraduate Catalog*. For the list of MSBME courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSBME degree program must choose from three options: the thesis option, the project option and the course option.

To qualify for graduation with an MSBME degree, students must successfully complete a minimum of 30 credit hours consisting of college and program core courses, program elective courses, a seminar, and a master's thesis or a professional project (for students in the thesis and project options only) with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSBME degree program will receive good exposure to the research environment, all students will be required to complete research-oriented class projects within many of the biomedical engineering graduate courses.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- six credit hours of required college core courses
- three credit hours of a required program core course
- a minimum of 12 credit hours in elective courses
- a zero-credit hour seminar including biomedical ethics
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- six credit hours of required college core courses
- three credit hours of a required program core course

- a minimum of 18 credit hours in elective courses
- a zero-credit hour seminar including biomedical ethics
- three credit hours in Professional Project

Course Option

Students in the course option must successfully complete the following requirements:

- six credit hours of required college core courses
- three credit hours of a required program core course
- a minimum total of 21 credit hours in elective courses
- a zero-credit hour seminar including biomedical ethics

Required Courses (18/12/9 credit hours)

College Core Courses (6 credit hours).

Students must successfully complete the following courses:

- NGN 500 Advanced Engineering Mathematics or MTH 508 Mathematical Biology
- NGN 505 Random Variables and Stochastic Processes or NGN 509 Computational Methods for Engineering

Program Core Course (3 credit hours)

Students must successfully complete the following course:

- BME 511 Human Anatomy and Physiology

In addition, all students must successfully complete a seminar course (BME 695).

Master's Thesis/Professional Project (9/3 credit hours).

This requirement applies to students in the thesis and project options:

- BME 698 Professional Project (3 credit hours—project option)
- BME 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 12/18/21 credit hours)

Students in the thesis option must successfully complete a minimum of 12 credit hours. Students in the project option must successfully complete a minimum of 18 credit hours. Students in the course option must successfully complete a minimum of 21 credit hours.

Students may select their elective courses from the following list:

- BME 541 Biomedical Measurements and Devices
- BME 543 Biomedical Imaging Technologies
- BME 544 Neuroengineering
- BME 551 Biofluid Mechanics
- BME 552 Drug Delivery
- BME 561 Healthcare Operations Management
- BME 562 Healthcare Planning and Risk Management
- BME 571 Biomechanics Engineering
- BME 572 Biomaterials Engineering
- BME 581 Biomedical Informatics
- BME 582 Computational Molecular Biology
- BME 594 Special Topics in Biomedical Engineering
- CHE 611 Biomedical Engineering and Biotechnology
- ELE 544 Advanced Signal Processing
- ELE 648 Pattern Classification

Students in the thesis and project options may elect to take one graduate level course outside the list of elective courses with the approval of their advisor and the program coordinator; students in the course option may elect to take up to two graduate-level courses.

Master's Thesis/Professional Project

A student must complete his/her master's thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Chemical Engineering (MSChE)

Sameer Al-Asheh, Interim Head,
Department of Chemical Engineering

The Master of Science in Chemical Engineering (MSChE) degree program is offered by the Department of Chemical Engineering,

The MSChE degree program will prepare professionals in an environment that combines chemical engineering practice and technical research to contribute to the growing body of chemical engineering knowledge, research and development both regionally and internationally.

Mission Statement

The mission of the MSChE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to chemical engineering. The program is continuously striving to create a stimulating academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative, and responsible professionals.

Program Educational Objectives

Graduates of the MSChE degree program will be prepared to:

- be successful professionals in a specialized area of chemical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSChE graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of chemical engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science in Chemical Engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in other engineering fields or a quantitative science field that is closely related to the chemical engineering field may be considered on a case-by-case basis.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSChE degree may register for a maximum of six credit hours from MSChE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSChE degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the chemical engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed all the 300-level major requirements from CHE courses.

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSChE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSChE degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSChE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master's thesis or a professional

project, with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSChE degree program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- six credit hours of required college core courses
- nine credit hours of required program core courses
- a minimum of six credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- six credit hours of required college core courses
- nine credit hours of required program core courses
- a minimum of 12 credit hours in elective courses
- a zero-credit hour seminar
- three credit hours in Professional Project

Required Courses (24/18 credit hours)

College Core Courses (6 credit hours)

Students must successfully complete the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 509 Computational Methods for Engineering

Program Core Courses (9 credit hours)

Students must successfully complete the following courses:

- CHE 510 Transport Phenomena
- CHE 511 Advanced Chemical Engineering Thermodynamics

- CHE 512 Advanced Kinetics and Reactor Design

In addition, all students must successfully complete a seminar course (CHE 695).

Master's Thesis/Professional Project (9/3 credit hours)

- CHE 698 Professional Project (3 credit hours—project option)
- CHE 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 6/12 credit hours)

Students in the thesis option must successfully complete a minimum of six credit hours in elective courses. Students in the project option must successfully complete a minimum of 12 credit hours.

Students may select their elective courses from the following list:

- CHE 594 special topic courses in chemical engineering
- CHE 610 Catalysis and Reaction Engineering
- CHE 611 Biomedical Engineering and Biotechnology
- CHE 612 Advanced Process Analysis and Control
- CHE 613 Advanced Materials Science
- CHE 614 Environmental Engineering
- CHE 694 special topic courses in chemical engineering

Students in the thesis option may elect to take one elective course outside the list of elective courses, with the approval of their advisor and the program coordinator.

Students in the project option may elect to take up to two elective courses outside the list of elective courses, with the approval of their advisor and the program coordinator.

Master's Thesis/Professional Project

A student must complete his/her master's thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies*

Policies and Procedures document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Civil Engineering (MSCE)

Irtishad Ahmad, Head, Department of Civil Engineering

The Master of Science in Civil Engineering (MSCE) degree program is offered by the Department of Civil Engineering.

The MSCE degree program will prepare professionals in an environment that combines civil engineering practice and technical research to contribute to the growing body of civil engineering knowledge, research and development efforts both regionally and internationally.

Mission Statement

The mission of the MSCE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to civil engineering. The program strives to create a conducive academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals with effective communication skills.

Program Educational Objectives

Graduates of the MSCE degree program will be prepared to:

- be successful professionals in a specialized area of civil engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSCE graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of civil engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice

- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science in Civil Engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in other engineering fields or a quantitative science field that is closely related to the civil engineering field may be considered on a case-by-case basis.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSCE degree may register for a maximum of six credit hours from MSCE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSCE degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the civil engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSCE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSCE degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSCE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a

seminar, and a master's thesis or a professional project with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSCE program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. In addition, many of the civil engineering graduate courses have research components that reinforce the research element in the program.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 18 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 24 credit hours in elective courses
- a zero-credit hour seminar
- three credit hours in Professional Project

Required Courses (12/6 credit hours)

College Core Courses (3 credit hours)

Students must successfully complete one of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes
- NGN 509 Computational Methods for Engineering

In addition, all students must successfully complete a seminar course (CVE 695).

Master's Thesis/Professional Project
(9/3 credit hours)

- CVE 698 Professional Project (3 credit hours—project option)
- CVE 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses
(minimum of 18/24 credit hours)

Students in the thesis option must successfully complete a minimum of 18 credit hours in elective courses. Students in the project option must successfully complete a minimum of 24 credit hours.

Students may select their elective courses from the following list:

- CVE 520 Sustainable Construction and Methods
- CVE 521 Finite Element Methods for Solids and Structures
- CVE 522 Advanced Water Resources Engineering
- CVE 524 Design of Strengthened Concrete Structures
- CVE 525 Structural Earthquake Engineering
- CVE 526 Advanced Structural Steel Design
- CVE 527 Optimization Techniques for Civil Engineering Systems
- CVE 531 Dynamics of Machine Foundations
- CVE 551 Wastewater Treatment
- CVE 572 Satellite Remote Sensing
- CVE 594 special topic courses in civil engineering
- CVE 620 Advanced Construction Scheduling
- CVE 621 Analysis and Design of Tall Buildings
- CVE 622 Physical and Chemical Processes in Water Treatment
- CVE 623 Advanced Transportation Planning Techniques
- CVE 624 Advanced Geotechnical Engineering
- CVE 625 Highway Bridge Design
- CVE 626 Bridge Management Systems
- CVE 651 Wastewater Treatment Process Control
- CVE 663 Traffic Flow Theory
- CVE 694 special topic courses in civil engineering
- ESM 570 Project Management

Students in both options may elect to take one course outside the list of elective courses, with the approval of their advisor and the program coordinator.

Master's Thesis/Professional Project

A student must complete his/her master's thesis or professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Computer Engineering (MSCoE)

Fadi Aloul, Head, Department of Computer Science and Engineering

The Master of Science in Computer Engineering (MSCoE) degree program is offered by the Department of Computer Science and Engineering.

The MSCoE degree program prepares professionals in an environment that combines computer engineering practice and technical research to contribute to the growing body of computer engineering knowledge, research and development both regionally and internationally.

Mission Statement

The mission of the MSCoE degree program at AUS is to prepare professionals at advanced careers and/or doctoral studies related to computer engineering. The program strives to create a stimulating academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals with effective communication skills.

Program Educational Objectives

Graduates of the MSCoE degree program will be prepared to:

- be successful professionals in a specialized area of computer engineering

- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSCoE graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of computer engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science in Computer Engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in engineering fields or a quantitative science field that is closely related to the computer engineering field may be considered on a case-by-case basis.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSCoE degree may register for a maximum of six credit hours from MSCoE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSCoE degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the computer engineering or computer science major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)

- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSCoE courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSCoE degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSCoE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master's thesis or a professional project with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSCoE degree program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. In addition, many of the computer engineering courses have research components that reinforce the research element in the program.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 18 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 24 credit hours in elective courses
- a zero-credit hour seminar

- three credit hours in Professional Project

Required Courses (12/6 credit hours)

College Core Courses (3 credit hours)

Students must successfully complete one of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes
- NGN 509 Computational Methods for Engineering

In addition, all students must successfully complete a seminar course (COE 695).

Master's Thesis/Professional Project (9/3 credit hours)

- COE 698 Professional Project (3 credit hours—project option)
- COE 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 18/24 credit hours)

Students in the thesis option must successfully complete a minimum of 18 credit hours in elective courses.

Students in the project option must successfully complete a minimum of 24 credit hours.

Students may select their elective courses from the following list:

- COE 530 Advanced Computer Networks
- COE 533 Advanced Computer Architecture
- COE 555 Cyber Security
- COE 594 special topic courses in computer engineering
- COE 630 Wireless Networks
- COE 632 Advanced Database Systems
- COE 633 Advanced Internet Computing and Internet of Things
- COE 635 Optical Networks
- COE 636 Advanced Multicore and GPU Computing
- COE 637 Advanced Machine Learning and Data Mining
- COE 639 Digital Video Compression
- COE 694 special topic courses in computer engineering

Students in both options may elect to take up to two elective courses outside the program, with the approval of their advisor and the program coordinator.

Master's Thesis /Professional Project

A student must complete his/her master's thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Construction Management (MSCM)

Sameh El-Sayegh, Coordinator

The Master of Science in Construction Management (MSCM) degree program is a multidisciplinary degree program offered by the College of Engineering (CEN) that draws on the expertise of faculty from several departments across CEN and other colleges/schools. The MSCM degree program attracts students from several disciplines including engineering, architecture and construction.

The MSCM degree program is primarily intended for professionals interested in advancing their knowledge and pursuing a career to face contemporary challenges in the construction industry.

Mission Statement

The mission of the MSCM degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to construction management. The program strives to create a stimulating and supportive academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals with effective communication skills.

Program Educational Objectives

Graduates of the MSCM degree program will be prepared to:

- be successful professionals in a specialized area of construction management
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the construction profession

Student Outcomes

Upon graduation, an AUS MSCM graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of construction management
- apply knowledge in solving problems, making decisions and managing risks
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a bachelor's degree in engineering, architecture or construction from an independently accredited university recognized by UAE Ministry of Education's Higher Education Affairs Division and by AUS. Individuals degreed in other fields that are closely related to the construction management field may be considered on a case-by-case basis. Students from disciplines other than civil engineering or construction may be required to complete bridging course(s) at the discretion of the program admission committee and the program coordinator.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSCM degree may register for a maximum of six credit hours from MSCM courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSCM degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the civil engineering, architecture, interior design or design management major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSCM courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSCM degree program must choose from three options: the thesis option, the project option and the course option.

To qualify for graduation with an MSCM degree, students must successfully complete a minimum of 30 credit hours consisting of required core courses, elective core courses, general elective courses, and a master's thesis or a professional project (for students in the thesis and project options only) with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSCM program will receive good exposure to the research environment, many of the construction management graduate courses have research components that reinforce the research element in the program.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- nine credit hours of required program core courses
- a minimum of 12 credit hours in program and/or general elective courses as follows:
 - a minimum of six credit hours in program elective courses

- a maximum of six credit hours in general elective courses
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- nine credit hours of required program core courses
- a minimum of 18 credit hours in program and/or general elective courses as follows:
 - a minimum of nine credit hours in program elective courses
 - a maximum of nine credit hours in general elective courses

- three credit hours in Professional Project

Course Option

Students in the course option must successfully complete the following requirements:

- nine credit hours of required program core courses
- a minimum of 21 credit hours in program and/or general elective courses as follows:
 - a minimum of nine credit hours in program elective courses
 - a maximum of 12 credit hours in general elective courses

Required Courses (18/12/9 credit hours)

Program Core Courses (9 credit hours).

Students must successfully complete the following courses:

- CMT 500 Management of Construction Projects
- CMT 510 Construction Automation
- CMT 520 Advanced Construction Scheduling

Master's Thesis/Professional Project (9/3 credit hours).

This requirement applies to students in the thesis and project options:

- CMT 698 Professional Project (3 credit hours—project option)
- CMT 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 12/18/21 credit hours)

Program Elective Courses (minimum of 6/9/9 credit hours)

Students in the thesis option must successfully complete a minimum of 6 credit hours in program elective courses. Students in the project option must successfully complete a minimum

of 9 credit hours in program elective courses. Students in the course option must successfully complete a minimum of 9 credit hours in program elective courses.

Students may select their program elective courses from the following list:

- CMT 600 Cost Analysis and Control
- CMT 610 Building Information modeling
- CMT 620 Construction Project Risk Management
- CMT 630 Construction Contracting
- CMT 640 International Construction
- CMT 650 Sustainable Infrastructure Management
- CMT 660 Sustainable Development and Construction
- CMT 665 Construction Safety Management
- CMT 670 Construction Equipment Management
- CMT 694 Special Topics in Construction Management

General Elective Courses
(maximum of 6/9/12 credit hours)

Students in the thesis option can successfully complete a maximum of six credit hours in general elective courses. Students in the project option can successfully complete a maximum of nine credit hours of general elective courses. Students in the course option can successfully complete a maximum of 12 credit hours of general elective courses.

Students may select their general elective courses from the following list:

- CVE 520 Sustainable Construction and Methods
- CVE 572 Satellite Remote Sensing
- CVE 594-09 Sustainable Mobility
- ESM 520 Management for Engineers
- ESM 660 Legal Aspects of Engineering
- COE 594-04 Big Data and Analytics
- UPL 651 Negotiation Strategies

Students in all options may elect to take up to two graduate-level courses outside list of the general elective courses, with the approval of their advisor and the program coordinator

Master's Thesis/Professional Project

A student must complete his/her master's thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional

faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Electrical Engineering (MSEE)

Nasser Qaddoumi, Head, Department of Electrical Engineering

The Master of Science in Electrical Engineering (MSEE) degree program is offered by the Department of Electrical Engineering.

The MSEE degree program will prepare professionals in an environment that combines electrical engineering practice and technical research to contribute to the growing body of electrical engineering knowledge, research and development both regionally and internationally.

Mission Statement

The mission of the MSEE degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to electrical engineering. The program is continuously striving to create a stimulating academic environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative and responsible professionals.

Program Educational Objectives

Graduates of the MSEE degree program will be prepared to:

- be successful professionals in a specialized area of electrical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSEE graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of electrical engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science in Electrical Engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in engineering fields or a quantitative science field that is closely related to the electrical engineering field may be considered on a case-by-case basis.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSEE degree may register for a maximum of six credit hours from MSEE courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSEE degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the electrical engineering or computer engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSEE courses available to AMP students, consult the Course Descriptions section of this

catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSEE degree program must choose from three options: the thesis option, the project option and the course option.

To qualify for graduation with an MSEE degree, students must successfully complete a minimum of 30 credit hours consisting of college/program core courses, program elective courses, a seminar, and a master's thesis or a professional project (for students in the thesis and project options only) with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSEE degree program will receive good exposure to the research environment, all students will be required to complete research-oriented class projects within many of the electrical engineering graduate courses.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- six credit hours of required college core courses
- a minimum of 15 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- six credit hours of required college core courses
- a minimum of 21 credit hours in elective courses
- a zero-credit hour seminar
- three credit hours in Professional Project

Course Option

Students in the course option must successfully complete the following requirements:

- six credit hours of required college core courses

- a minimum of 24 credit hours in elective courses
- a zero-credit hour seminar

Required Courses (15/9 credit hours)

College Core Courses (6 credit hours)

Students must successfully complete two of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes
- NGN 509 Computational Methods for Engineering

In addition, all students must successfully complete a seminar course (ELE 695).

Master's Thesis/Professional Project (9/3 credit hours)

This requirement applies to students in the thesis and project options:

- ELE 698 Professional Project (3 credit hours—project option)
- ELE 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 15/21/24 credit hours)

Students in the thesis option must successfully complete a minimum of 15 credit hours in elective courses. Students in the project option must successfully complete a minimum of 21 credit hours. Students in the course option must successfully complete a minimum of 24 credit hours in elective courses.

Students may select elective courses from the following list:

- ELE 540 Principles of Digital Communications
- ELE 542 Applied Electromagnetics
- ELE 543 Analog Microelectronics
- ELE 544 Advanced Signal Processing
- ELE 545 Power System Operation and Control
- ELE 546 Advanced Power Electronics
- ELE 547 Distributed Energy Resources in Smart Grids
- ELE 594 special topic courses in electrical engineering
- ELE 641 Advanced Microwave Engineering
- ELE 642 Digital and Wireless Communications
- ELE 644 Dynamics and Control of Electrical Drives
- ELE 645 High Voltage Engineering

- ELE 646 Radio Frequency Integrated Circuits
- ELE 647 Digital Protection of Power Systems
- ELE 648 Pattern Classification
- ELE 649 Power System Transients
- ELE 694 special topic courses in electrical engineering
- MTR 540 Advanced Control Systems

Students in the thesis and project options may elect to take one course outside the list of elective courses, with the approval of their advisor and the program coordinator.

Students in the course option may elect to take up to two courses outside the list of elective courses, with the approval of their advisor and the program coordinator.

Master's Thesis/Professional Project

A student must complete his/her master's thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Engineering Systems Management (MSESM)

Malick Ndiaye, Coordinator

The Master of Science in Engineering Systems Management (MSESM) degree program is an interdisciplinary degree program offered by the College of Engineering (CEN) that draws on the expertise of faculty from the different CEN departments.

The mission of the MSESM degree program is to considerably increase the opportunities for practicing engineers to be successful in their efforts to build effective teams, lead and manage

major engineering projects, and expand economic development for the private and public sectors of the UAE and the Gulf region countries.

The curriculum provides core courses followed by courses in the theme areas of engineering management (EM) and project management (PM) with quality standards similar to those established in comparable North American institutions. The program offers a multidisciplinary curriculum designed to integrate management skills with technical knowledge from different engineering disciplines for the purpose of accomplishing work activities and entire projects more economically and productively. The program provides students from engineering and related disciplines with the knowledge and skills needed to plan, design, analyze and improve integrated systems of people, material, technology and information. It also aims to contribute to the related world body of knowledge and advance research and development efforts in the region.

Program Educational Objectives

Graduates of the MSES degree program will be prepared to:

- develop creative and effective engineered solutions that require engineering systems management skills to meet organizations' needs in product, service and project-based industries
- succeed in a wide range of different organizations, positions and complex projects and adapt to various work environments
- lead the change management process to meet organizational goals and objectives
- seek continual professional development and lifelong learning in a dynamic, global professional environment
- act professionally and ethically in the practice of engineering systems management

Student Outcomes

Upon graduation, an AUS MSES graduate should demonstrate the ability to:

- apply the techniques, tools and skills of engineering systems management to address real-world problems
- conduct economic and financial analysis of projects and engineering operations
- function as effective members of multidisciplinary teams and communicate effectively in both written and verbal forms
- recognize professional and ethical responsibilities and act accordingly within a global and social context

- engage in theoretical and applied research projects

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science degree in engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS.

Applicants with non-engineering degrees may be considered for conditional admission on a case-by-case basis. Preference will be given to applicants with relevant work experience. The following criteria must be met:

- The applicant should demonstrate that he/she has gained technical skills by working in an engineering/manufacturing/construction/petroleum/power utility organization for at least five years.
- The applicant should have held managerial positions in technical-oriented departments/divisions such as manufacturing/production/inventory/maintenance/quality/warehousing/scheduling/procurement.
- The applicant should demonstrate that he/she has been involved in technical-oriented projects.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSES degree may register for a maximum of six credit hours from MSES courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSES degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in major offered by the College of Engineering
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSES courses

available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSES degree program must choose from two options: the thesis/project option and the course option.

To qualify for graduation with an MSES degree, students must successfully complete a minimum of 30 credit hours consisting of core courses, theme courses, and a master's thesis or a professional project (for students in the thesis/project option only) or a capstone course (for students in the course option), with a minimum cumulative grade point average of 3.00.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis/Project Option

Students in the thesis/ project option must successfully complete the following requirements:

- 15 credit hours in core courses
- nine credit hours in theme courses
- six credit hours in Master's Thesis or Professional Project

Course Option

Students in the course option must successfully complete the following requirements:

- 15 credit hours in core courses
- 12 credit hours in theme courses
- three credit hours in the capstone course

Required Courses (21/18 credit hours)

Students in the thesis/project option must successfully complete a total of 21 credit hours in required courses. Students in the course option must successfully complete 18 credit hours in required courses.

Core Courses (15 credit hours)

Students in all options must successfully complete 15 credit hours in core courses, as follows:

- ESM 520 Management for Engineers
- ESM 535 Introduction to Management Science
- ESM 570 Project Management

- ESM 575 Advanced Engineering Economy
- ESM 600 Research Methodology

Master's Thesis/Professional Project (6 credit hours)

This requirement applies to students in the thesis/ project option:

- ESM 698 Professional Project (project option)
- ESM 699 Master's Thesis (thesis option)

Capstone Course (3 credit hours)

This requirement applies to students in the course option:

- ESM 685 Capstone Course in Engineering Systems Management

Elective Courses (minimum of 9/12 credit hours)

Students in the thesis/project option must successfully complete a minimum of nine credit hours in elective courses. A minimum of six credit hours must be successfully completed in courses taken from the list of elective courses of the student's declared theme and a maximum of three credit hours can be completed in courses outside the student's designated theme elective courses.

Students in the course option must successfully complete a minimum of 12 credit hours in elective courses. A minimum of six credit hours must be successfully completed in courses taken from the list of elective courses of the student's declared theme and a maximum of six credit hours can be completed in courses outside the student's designated theme elective courses.

Elective courses from outside the student's theme must be approved by the program coordinator.

Engineering Management Theme

- ESM 615 Big Data and Business Analytics
- ESM 625 Enterprise Resource Planning Systems
- ESM 630 Quality Engineering and Management
- ESM 634 Advanced Modeling and Simulation
- ESM 636 Human Resources Management for Engineers
- ESM 638 Decision Analysis
- ESM 640 Supply Chain Management
- ESM 644 Financial Management for Engineers
- ESM 694 special topic courses in ESM

Project Management Theme

- ESM 630 Quality Engineering and Management
- ESM 636 Human Resources Management for Engineers
- ESM 638 Decision Analysis
- ESM 660 Legal Aspects of Engineering
- ESM 670 Project Risk Management
- ESM 675 Project Procurement Management
- ESM 694 special topic courses in ESM

Master's Thesis/Professional Project

To be eligible for master's thesis/professional project registration, a student must have completed a minimum of 12 credits of course work and must be approved for master's thesis/professional project registration by the ESM program coordinator. Normally, minimum GPAs of 3.50 and 3.25 after 12 credit hours of course work are required to register in master's thesis and professional project, respectively.

A student must complete his/her master's thesis or professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

Master of Science in Mechanical Engineering (MSME)

Mamoun Abdel-Hafez, Head, Department of Mechanical Engineering

The Master of Science in Mechanical Engineering (MSME) degree program is offered by the Department of Mechanical Engineering.

The MSME degree program prepares mechanical engineering and associated professionals in an environment that

combines mechanical engineering practice and technical research to contribute to the growing body of mechanical engineering knowledge, research and development both regionally and internationally.

Mission Statement

The mission of the MSME degree program at AUS is to prepare professionals for advanced careers and/or doctoral studies related to mechanical engineering. The program is continuously striving to create a stimulating proactive learning environment that promotes excellence in teaching and research to assist the students in becoming competent, innovative, and responsible professionals.

Program Educational Objectives

Graduates of the MSME degree program will be prepared to:

- be successful professionals in a specialized area of mechanical engineering
- maintain a desire for research, innovation and lifelong learning
- uphold the responsibilities of the engineering profession

Student Outcomes

Upon graduation, an AUS MSME graduate should demonstrate the ability to:

- perform research emphasizing creativity, independent learning and scientific methods in a chosen area of mechanical engineering
- apply advanced mathematics and engineering knowledge in identifying, formulating and solving engineering problems
- select and use techniques, skills and modern tools necessary for research or professional practice
- communicate effectively
- recognize the need for, and engage in, lifelong learning
- attend to professional and ethical responsibilities

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a Bachelor of Science in Mechanical Engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in engineering fields or a quantitative science field that is closely related to the mechanical engineering field may be considered on a case-by-case basis.

Accelerated Master's Program— AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSME degree may register for a maximum of six credit hours from MSME courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSME degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the mechanical engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed all the 300-level major requirements from MCE courses.

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSME courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

Students in the MSME degree program must choose from two options: the thesis option and the project option.

To qualify for graduation with an MSME degree, students must successfully complete a minimum of 30 credit hours consisting of college core courses, program elective courses, a seminar, and a master's thesis or a professional project with a minimum cumulative grade point average of 3.00.

To ensure that students in the MSME degree program will receive good exposure to the research environment, students in the project option are required to complete a professional project that includes research aspects. In addition, all students will be required to complete research-oriented class projects within many of the mechanical engineering graduate courses.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 18 credit hours in elective courses
- a zero-credit hour seminar
- nine credit hours in Master's Thesis

Project Option

Students in the project option must successfully complete the following requirements:

- three credit hours of required college core courses
- a minimum of 24 credit hours in elective courses
- a zero-credit hours seminar
- three credit hours in Professional Project

Required Courses (12/6 credit hours)

College Core Courses (3 credit hours)

Students must successfully complete one of the following courses:

- NGN 500 Advanced Engineering Mathematics
- NGN 505 Random Variables and Stochastic Processes

In addition, all students must successfully complete a seminar course (MCE 695).

Master's Thesis/Professional Project (9/3 credit hours)

- MCE 698 Professional Project (3 credit hours—project option)
- MCE 699 Master's Thesis (9 credit hours—thesis option)

Elective Courses (minimum of 18/24 credit hours)

Students in the thesis option must successfully complete a minimum of 18 credit hours in elective courses.

Students in the project option must successfully complete a minimum of 24 credit hours.

Students may select their elective courses from the following list:

- MCE 550 Mechanical Systems Design
- MCE 551 Advanced Materials Science and Engineering

- MCE 552 Modeling and Simulation of Mechanical Systems
- MCE 553 Advanced Thermodynamics
- MCE 554 Advanced Fluid Dynamics
- MCE 594 special topic courses in mechanical engineering
- MCE 650 Advanced Dynamics
- MCE 652 Advanced Topics in Manufacturing
- MCE 653 HVAC Systems Design
- MCE 655 Advanced Measurements and Design of Experiments
- MCE 694 special topic courses in mechanical engineering
- MTR 540 Advanced Control Systems

With the approval of their advisor and the program coordinator, students in both options may elect to take one course outside the list of elective courses.

Master's Thesis/Professional Project

A student must complete his/her master's thesis/professional project under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. For the thesis option, one of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under Academic Policies and Regulations section of this catalog.

Master of Science in Mechatronics Engineering (MSMTR)

Mohammad Jaradat, Coordinator

The Master of Science in Mechatronics Engineering (MSMTR) degree program is an interdisciplinary degree program offered by the College of Engineering (CEN) that draws on the expertise of faculty from the different CEN departments.

The MSMTR degree program is committed to being an international, multidisciplinary center of excellence in

synergistic applications of the latest techniques in embedded systems, precision mechanical engineering, control theory, computer science and electronics through education, research and outreach. The technological gap between developing and industrialized nations continues to widen at an alarming rate, largely due to the lack of skilled engineers capable of integrating new technologies into existing systems and networks. The mandate of the mechatronics engineering program is to improve this situation by equipping engineers with the design, analysis and synthesis abilities to plan, implement and manage the latest technologies. The curriculum of the mechatronics program meets the region's needs—both present and future—through the education of engineers and scientists.

Professional jobs considered to be in the mechatronics engineering field are grounded in the multidisciplinary aspects of electrical, mechanical, control, computer and software engineering. The unique skills of mechatronics graduates are becoming increasingly valuable to employers in a variety of areas, including modern industrial installations and systems, computer integrated manufacturing systems, maintenance diagnosis and troubleshooting, defense systems, vehicle design and manufacturing, robotics and many more.

The MSMTR degree program provides students with state-of-the-art knowledge in their areas of specialization with practical strategies for adapting that knowledge to serve the specific needs of the region. Multidisciplinary engineers are needed now more than ever to meet the demand for a flexible engineering workforce to deal with highly integrated engineering systems.

Mission Statement

The MSMTR degree program at AUS is an interdisciplinary program that synergistically integrates advances in science and technology to prepare students for advanced research and applied systems engineering practices. The program hosts a research center equipped with world-class resources enabling hands-on teaching and advanced research, promoting entrepreneurial initiatives to assist students in becoming competent, innovative and responsible professionals.

Program Educational Objectives

Graduates of the MSMTR degree program will be prepared to:

- lead multidisciplinary projects, which apply the latest techniques for the

design and development of smart systems

- provide employers with interdisciplinary skills necessary to utilize cutting-edge technology tools in the design, development, and implementation of modern engineering systems
- develop new technologies in the areas of cyber physical systems, and smart cities
- apply Mechatronics principles in the broad context of engineering system design and address the aspect of commercialization
- address open-ended problems and maintain an attitude of self-learning

Student Outcomes

Upon graduation, an AUS MSMTR graduate should demonstrate the ability to:

- apply advanced engineering tools necessary to identify, model and analyze mechatronics engineering problems
- formulate and propose alternative solutions that satisfy specific performance requirements of a mechatronics system
- design and implement a mechatronics component, process or system and assess its performance
- function effectively in multidisciplinary teams in a leadership role or as an active member
- act professionally and ethically
- recognize contemporary issues and their influence on technology advancement in a global and societal context
- engage in lifelong learning in engineering and related professional areas
- conduct research and development activities in mechatronics and related areas
- communicate effectively through technical presentations and documentations

Admission Requirements

In addition to meeting the university's general graduate admission requirements, applicants must hold a bachelor of science degree in engineering from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Degreed individuals in fields closely related to engineering or a quantitative science may be considered on a case-by-case basis.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSMTR degree may register for a maximum of six credit hours from MSMTR courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSMTR degree program. The master's level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the computer engineering, electrical engineering or mechanical engineering major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed a course in control systems.

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSMTR courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Degree Requirements

The program of study of the MSMTR degree program consists of a minimum of 30 credit hours with two options: the thesis option and the course option. Students must declare the option of their choice by submitting a formal study plan upon completion of 12 credit hours of approved MTR graduate courses.

To qualify for graduation with an MSMTR degree, students must successfully complete the requirements detailed hereafter with a minimum cumulative grade point average of 3.00.

Students must complete the degree requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Thesis Option

Students in the thesis option must successfully complete a minimum of 30 credit hours, as follows:

- 15 credit hours in core courses
- a minimum of six credit hours in elective courses
- nine credit hours in Master's Thesis

Course Option

Students in the course option must successfully complete a minimum of 30 credit hours, as follows:

- 15 credit hours in core courses
- a minimum of 15 credit hours in elective courses

Prerequisite Discipline-Bridging Course

Students admitted to the MSMTR degree program, with the exception of students with a Bachelor of Science in Mechatronics Engineering, are required to complete the prerequisite discipline-bridging course MTR 501 Introduction to Mechatronics.

The prerequisite discipline-bridging course does not generate credit hours towards completion of the degree program graduation requirements. Students required to complete the bridging course are normally not eligible to register for degree program courses prior to successful completion of the course. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

The prerequisite-discipline course could be waived by the Mechatronics Engineering Admissions Committee, depending on the student's background.

Waiver Policy

The prerequisite discipline-bridging course may be waived if the student has completed comparable course work at the undergraduate level. Students may be required to submit course documentation. For details, refer to the Admission to Graduate Studies/Course Waiver earlier in this catalog.

Required Courses (24/15 credit hours)

Core Courses (15 credit hours)

Students must successfully complete the following courses:

- MTR 520 Embedded Systems for Mechatronics
- MTR 540 Advanced Control Systems
- MTR 550 Robotic Systems
- MTR 615 Artificial Intelligent Systems

- MTR 690 Mechatronics Design
- MTR 695 Mechatronics Seminar

Master's Thesis (9 credit hours)

- MCE 699 Master's Thesis (thesis option)

Elective Courses (minimum of 6/15 credit hours)

Students in the thesis option must successfully complete a minimum of six credit hours in elective courses. Students in the course option must successfully complete a minimum of 15 credit hours in elective courses.

Students may select their elective courses from the following list:

- ELE 544 Advanced Signal Processing
- MTR 610 Automated Manufacturing Systems
- MTR 640 Nonlinear and Intelligent Control Systems
- MTR 644 Electric Drives for Mechatronics Systems
- MTR 650 Applied Linear Estimation
- MTR 670 Adaptive Control Systems
- MTR 694 special topic courses in mechatronics engineering
- NGN 500 Advanced Engineering Mathematics

Students in both the thesis option and the course option may elect to take one elective course outside the list of elective courses, with the approval of their advisor and the program coordinator.

Master's Thesis

Students in the thesis option must complete a program of research culminating in a master's thesis, for at least nine credits, that contributes to a selected area of knowledge.

A student must complete his/her master's thesis under direct supervision and guidance of a principal advisor. This principal advisor will serve as the chair of the student's examining committee and is appointed no later than the end of the third semester of study in the program. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one or more co-advisor.

The master's thesis must be defended to the satisfaction of the thesis examining committee.

A complete guide for forming the master's thesis/professional project committee and for preparing the master's thesis, including the thesis proposal, thesis defense and deadlines,

is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under Academic Policies and Regulations section of this catalog.

Doctor of Philosophy in Engineering-Engineering Systems Management (PhD-ESM)

Ghassan Abu-Lebdeh, Coordinator

The PhD in Engineering-Engineering Systems Management (PhD-ESM) degree program is an interdisciplinary degree program offered by the College of Engineering (CEN) that draws on the expertise of faculty from several departments across CEN and other colleges/schools.

The PhD-ESM degree program addresses fundamental research problems of national and global importance for the 21st century centered on four concentration areas:

- supply chain management
- sustainable construction project management
- smart cities management
- engineering management

Program Mission Statement

The mission of the PhD-ESM degree program is to educate future researchers, practitioners, innovators and academics with cutting-edge knowledge, skills and abilities in engineering systems management that can be utilized in meeting societal needs and shaping contemporary market trends in the UAE, the region and globally.

Program Educational Objectives

Graduates of the PhD-ESM degree program will be prepared to:

- pursue successful academic, industry and/or government careers
- conduct research independently in multidisciplinary areas
- apply technical knowledge for long-term sustainable and economic development
- act professionally and ethically when practicing of the principles of engineering systems management.

Student Outcomes

Upon graduation, an AUS PhD-ESM graduate should demonstrate the ability to:

- perform advanced research related to ESM areas
- assess economic, environmental and societal impacts of engineering management systems
- formulate and solve complex technical problems using ESM tools and techniques
- manage highly complex ethical issues related to engineering systems management
- use advanced written and oral communications skills to present research outcomes and evaluate scholarly publications for diverse audiences.

Admission Requirements

In addition to meeting the university's general requirements for admission to PhD degree programs, applicants to the PhD-ESM degree program must meet the following program admission requirements:

- Applicants must have completed a relevant master of science or master of engineering degree with a minimum CGPA of 3.30. Applicants with non-engineering master's degrees may be considered on a case-by-case basis.
- Applicants must submit an official Graduate Record Examination (GRE) score.
- Applicants must submit three letters of recommendation, a statement of purpose and a current vitae/resume. At least two of the letters must be from an academic advisor/faculty familiar with the applicant's background.

Degree Requirements

To qualify for graduation with a PhD-ESM degree, students must successfully complete a minimum of 54 credit hours with a minimum cumulative GPA of 3.00, as follows:

- a minimum of 24 credit hours (eight courses) of required and elective coursework:
 - a minimum of six credit hours (two courses) of required courses
 - a minimum of 18 credit hours (six courses) of elective courses
 - a zero-credit hour seminar
- a minimum of 30 credit hours of research work (Dissertation)

The expected minimum duration for completion of the PhD-ESM degree program is four years. All graduation requirements must be completed within 10 years of admission to AUS as a doctoral student, inclusive of any leave.

Graduation residence requirements must be met. For details, refer to

Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Required Courses (minimum of 36 credit hours)

Students must successfully complete the following required courses:

- ESM 701 Research Methods
- ESM 702 Multivariate Data Analysis
- ESM 795 Doctoral Seminar
- ESM 799 Dissertation (for a minimum of 30 credits)

Elective Courses (minimum of 18 credit hours)

Students must successfully complete a minimum of six elective courses (for a minimum of 18 credit hours) selected from the following research areas. The elective courses must be approved by the program coordinator.

Supply Chain Management Research Area

- ESM 710 Advanced Decision Making Analysis
- ESM 711 Deterministic Optimization Techniques
- ESM 712 Advanced Supply Chain Management
- ESM 713 Supply Chain Modeling
- ESM 714 Modeling and Analysis of Logistics Systems
- ESM 794 Special Topics in ESM—Supply Chain Management

Sustainable Construction Project Management Research Area

- ESM 720 Sustainable Development for Engineers
- ESM 721 Sustainable Development and Global Competitiveness
- ESM 722 Sustainable Analytics and Resource Management
- ESM 723 The Living Building
- ESM 724 Sustainable Ecosystems
- ESM 725 Programs and Portfolio Management
- ESM 794 Special Topics in ESM—Sustainable Construction Project Management

Smart Cities Research Area

- ESM 730 Tools for Big Data
- ESM 731 Smart Cities Infrastructure and Services
- ESM 732 Networking Architectures for Smart Cities
- ESM 733 Electronic, Social and Sensor Network Applications for Smart Cities
- ESM 734 Trust and Security for Smart Cities

- ESM 794 Special Topics in ESM—Smart Cities

Engineering Management Research Area

- ESM 710 Advanced Decision Making Analysis
- ESM 740 Advanced Quality Engineering
- ESM 741 Organizational Performance Management
- ESM 742 Strategic Human Resources Management
- ESM 743 Strategic Management
- ESM 794 Special Topics in ESM—Engineering Management

Qualifying Examination

To be considered as a candidate for the PhD-ESM degree, a student must pass a written and an oral qualifying examination. Registration for the qualifying examination is conditional upon meeting the following requirements:

- The student must be in good academic standing.
- The student must have successfully completed a minimum of 12 credit hours of course work, including ESM 701 and ESM 702.

The qualifying examination may result in a pass or a fail grade. A student who fails the qualifying examination is academically dismissed from the university. A student who was academically dismissed as a result of failing the qualifying examination may petition for reinstatement and a repeat of the failed qualifying examination to the program coordinator, one month ahead of the registration of the semester immediately following academic dismissal. The student petition form is available at www.aus.edu/registration/forms. The petition will be reviewed by the program coordinator, who will make a written recommendation to the Associate Dean for Graduate Studies and Research. The associate dean will then provide a recommendation to the Vice Provost for Graduate Studies. Decisions regarding reinstatement and repeat of the qualifying examination will be made by the Vice Provost for Graduate Studies. A student who failed the qualifying examination may be allowed to repeat the qualifying examination only once.

Students need to seek guidance from the program coordinator regarding the qualifying examination requirements and deadlines.

Further details on the qualifying examination are provided in the *Office of Graduate Studies Policies and Procedures* document available on

iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of this catalog.

PhD Dissertation

The PhD dissertation includes the preparation of a research proposal, presentation and defense of the research proposal, write-up of the dissertation, and presentation and defense of the dissertation.

A PhD-ESM candidate develops his/her dissertation research proposal and completes the dissertation under the direct supervision and guidance of a principal advisor. The principal advisor serves as the chair of the student's Dissertation Advisory Committee (DAC). The DAC also includes at least two additional faculty members. The student may request the appointment of an external committee member.

A PhD-ESM candidate is eligible to defend the dissertation research proposal only after all coursework is successfully completed. The research proposal defense includes a comprehensive examination of all coursework completed. PhD candidates are expected to successfully complete the dissertation proposal within three semesters of first registering for the dissertation. Failure to complete the dissertation proposal within the specified time frame or failure to demonstrate progress after the proposal defense may result in assigning an NP grade, resulting in withdrawal of candidacy from the PhD degree program.

The dissertation must be publicly defended to the satisfaction of the Final Oral Defense Committee (FODC). The FODC is formed by the program coordinator in consultation with the DAC chair; it is approved by the Associate Dean for Graduate Studies and Research and appointed by the Vice Provost for Graduate Studies.

A complete guide for forming the DAC and the FODC, and preparing the dissertation, including the dissertation research proposal, the dissertation defense schedule and deadlines, is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

School of Business Administration

Dean

Narjess Boubakri

Associate Dean for Undergraduate Programs

Mohsen Saad

Associate Dean for Graduate Programs

Valerie Lindsay

Master of Business Administration (MBA)

Valerie Lindsay, Coordinator

The Master of Business Administration (MBA) degree program is an interdisciplinary program offered by the School of Business Administration (SBA) that draws on the expertise of faculty from all the SBA departments.

The MBA degree program prepares students for leadership positions in the private and public sectors.

The MBA is designed to help managers in the MENA region think and act globally by integrating the latest business knowledge into problem solving. The program provides advanced management education in an environment that encourages students to extend their leadership capabilities.

Our high-quality curriculum, taught in the evening, requires a total 33 credit hours for a general MBA and 36 credit hours for an MBA with concentration. At the core of the general MBA are 10 courses that cover the principles of analysis and leadership skills expected of an executive manager and two elective courses. For students interested in an MBA with a concentration in either finance or human resource management, a total of 36 credit hours must be completed, including a total of three electives taken in the area of concentration.

More details on the program are available at www.aus.edu/mba.

Program Goals and Outcomes

Our MBA degree program is designed for students with managerial potential. MBA graduates will have achieved the following objectives:

- Proficiency in the core business knowledge required of an executive manager

Students will be able to apply the principles of economics, financial analysis, information and operations management, and marketing to the

diagnosis of complex business problems.

- Understanding of the interrelations between business organizations and other societal institutions

Students will use principles of ethics and social responsibility to understand the management of relationships between a business enterprise and its key internal and external stakeholders.

- Teamwork, interpersonal, communication and leadership skills expected of an executive manager

Students will demonstrate graduate-level competence in team interaction, effective writing and presentation skills, and leadership.

- Application of critical thinking, analysis and problem-solving skills to crucial business decisions

Students will apply a variety of techniques to analyze problems critically; to develop, evaluate and select from competing alternative courses of action; then implement decisions in an organizational context.

Admission Requirements

Admission to the MBA degree program is competitive. In addition to meeting the university's general graduate admission requirements, applicants are required to take the MBA Admission Test (administered through the AUS Testing Center), or provide a GMAT score. These tests can be taken online. The score is considered with the student's work experience and the undergraduate grade point average, particularly for the last two years of study. These results are used to assist the SBA Graduate Committee in determining the admission status of an applicant.

Applicants who lack the requisite undergraduate training in business may be required to complete business bridging courses prior to matriculating in the major. The bridging courses comprise 1.5 credit hours courses in a range of business topics. For details, please see the Business Bridging Courses section hereafter.

Conditional Admission

Conditional admission to the MBA degree program is limited. During the semester in which they have conditional admission status, applicants must satisfy all admission requirements for the MBA degree program, including the requirement to earn an average of at least 3.00 in all

coursework. Failure to do so will result in dismissal.

Business Bridging Courses

Students admitted to the MBA degree program may be required to complete a maximum of 4.5 credit hours in courses that serve as the foundation for the core MBA program. The number of business bridging courses required will normally depend on courses completed by the student as an undergraduate and is determined by the program at the time of admission.

Business bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete bridging courses are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Business bridging courses may be waived when the waiver policy requirements are met. Matriculation into the major requires successful completion or waiver of the business bridging courses.

All business bridging courses are half-semester courses.

Business Bridging Courses (4.5 credit hours)

- BUS 501 Introduction to Economics
- BUS 502 Quantitative Methods
- BUS 503 Financial Accounting

Waiver Policy

Students may qualify to waive any or all of the business bridging courses. In general, a course may be waived if the student has completed comparable course work at the undergraduate level. Waivers are evaluated at the time of admission. For more information, consult the Course Waiver in the Admission to Graduate Studies section earlier in this catalog.

Course Timings

MBA courses are offered in the evenings, with classes typically beginning at 6:00 p.m. and ending at 9:00 p.m.

Academic Load

An MBA student may register for up to nine credit hours per semester. Upon

a student's request, the Associate Dean for Graduate Programs can approve three additional credit hours if the student has achieved a cumulative GPA of 3.50 or above.

Degree Requirements

To be awarded an MBA degree, students must successfully complete 33 credit hours in core courses and electives as follows:

- 27 credit hours in core courses
- a minimum of six credit hours in elective courses

Students enrolled in the program also have the option to choose an area of concentration in one of the following fields: finance or human resource management.

Students who select an area of concentration are required to successfully complete 36 credit hours in core courses and concentration electives as follows:

- 27 credit hours in core courses
- a minimum of nine credit hours in concentration electives

Students must complete the degree requirements within five years from the time of initial enrollment in the program. A minimum cumulative grade point average of 3.00 is required.

Graduation residence requirements must be met. For more information, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Core Courses Requirement (27 credit hours)

Students in the general MBA option as well as students who have selected a concentration must successfully complete the following MBA core courses:

- MBA 601 Managerial Economics
- MBA 602 Organizational Theory and Behavior
- MBA 604 Management Decision Analysis*
- MBA 605 Financial Management
- MBA 606 Management Information Systems
- MBA 608 Applied Business Research*
- MBA 609 Operations and Supply Chain Management
- MBA 613 Managerial Accounting
- MBA 614 Marketing Management
- MBA 618 Strategic Management

* Indicates a half semester or a compressed course format.

Elective Courses (6/9 credit hours)

General MBA Degree (6 credit hours)

In addition to meeting the core courses requirements, students who do not elect an area of concentration must successfully complete two elective courses (a minimum of six credit hours) selected from any MBA courses not counted as core courses. Electives selected from outside of the MBA program must be approved by the MBA program coordinator.

Finance Concentration (9 credit hours)

Students in the finance concentration must successfully complete a minimum of nine credit hours in courses selected from the following:

- MBA 632 Investment Analysis
- MBA 633 Financial Derivatives
- MBA 634 Commercial Banking
- MBA 636 Islamic Banking and Finance
- any other approved electives. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

Human Resource Management Concentration (9 credit hours)

Students in the human resource management concentration must successfully complete a minimum of nine credit hours in courses selected from the following:

- MBA 661 Strategic Human Resources Management
- MBA 662 International Human Resources Management
- MBA 663 Staffing
- MBA 664 Training and Development
- any other approved electives. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

Academic Advising

The MBA degree program curriculum draws from several departments in SBA, with students having backgrounds in different disciplines. The Associate Dean for Graduate Programs provides academic and career advising to students. Faculty teaching in the MBA program may also advise continuing students.

Master of Science in Accounting (MSA)

Abed Al-Nasser Abdallah, Head, Department of Accounting

The Master of Science in Accounting (MSA) degree program is offered by the Department of Accounting.

The MSA degree program is designed to provide students with knowledge and preparation to pursue professional careers in public and private accounting; develop skills necessary to solve accounting problems that are of contemporary relevance and more challenging in the fields of accounting, finance and other business areas; and teach the required technical and nontechnical accounting competencies. Although pre-class readings and in-class lectures remain essential for presenting key accounting theories and concepts, the reinforcement and assessment methods are oriented toward experiential exercises that require the students to apply the material to real-life cases. Thus, the degree program makes extensive use of case studies, individual and team projects and other "real-world" opportunities to use the material covered.

The MSA degree program creates additional employment opportunities and promotes the career success of our graduates. Career options for graduates will include positions in public accounting such as auditors, controllers, financial analysts and management consultants.

This degree program will allow students to meet the current 150-semester-hour education requirement to take the Certified Public Accountant (CPA) Examination in most US states. The objective of the MSA degree program is to give our students an edge in passing the CPA exam and to prepare them for careers in professional accountancy. Courses in the MSA degree program will strengthen students' competencies in business in general and accounting in particular. This knowledge is needed to achieve professional certifications such as CPA, CMA and CIA—qualifications expected of top professionals in the accounting field. The Big Four accounting firms in the region and other top employers will hire graduates from the MSA degree program particularly because of its solid auditing/assurance component.

Program Goals

MSA graduates will have achieved the following goals:

- proficiency in the core knowledge required to pursue careers in private and public accounting
- mastery of the knowledge required to pass the CPA exam
- ability to solve challenging accounting problems that are of contemporary relevance in finance and other business areas

- development of the accounting skills needed to facilitate career advancement in business or pursuit of further advanced study in accounting
- professional sophistication required to manage business complexities using leadership and critical-thinking skills
- development of technical and non-technical accounting competencies

Program Learning Outcomes

Upon graduation from the MSA degree program, students will be able to:

- demonstrate advanced knowledge of financial statements, regulations, auditing standards and procedures, standards of ethical conduct and their applications
- assess the financial, ethical and social implications of selecting various accounting policies to support decisions made by internal and external user of accounting information
- integrate accounting skills and knowledge to resolve current complex accounting issues
- apply judgment in selecting financial reporting standards to a set of financial statements
- apply appropriate professional skepticism in evaluating financial assertions
- explain effectively technical accounting concepts in written and oral form

Admission Requirements

Admission to the MSA degree program is competitive. Regardless of undergraduate major, to be considered for admission, each applicant to the MSA degree program is expected to have achieved a minimum undergraduate CGPA of 3.00, in addition to meeting the university's graduate admission requirements. For more information, please refer to General University Requirements for Graduate Admission section earlier in this catalog.

Applicants with a lower CGPA may be granted conditional admission, but are generally expected to participate in a face-to-face interview. Such applicants may also be required to meet additional specific requirements of the MSA program.

Accelerated Master's Program—AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSA degree may register for a maximum of six credit hours from MSA courses while completing their undergraduate degree program by seeking acceptance to the

Accelerated Master's Program (AMP) of the MSA degree program. The master's-level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the accounting major
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed the following courses:
 - ACC 302 Intermediate Financial Accounting II
 - ACC 303 Cost Accounting

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSA courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Course Timings

MBA courses are offered in the evenings, with classes typically beginning at 6:00 p.m. and ending at 9:00 p.m.

Academic Load

An MSA student may register for up to nine credit hours per semester. Upon a student's request, the Associate Dean for Graduate Programs can approve three additional credit hours if the student has achieved a cumulative GPA of 3.50 or above.

Degree Requirements

To be awarded an MSA degree, students must successfully complete 30 credit hours in MSA core courses and electives as follows:

- 18 credit hours in core courses
- a minimum of six credit hours in ACC elective courses
- a minimum of six credit hours in MBA and/or MTH elective courses

Students must complete the degree requirements within five years from the time of initial enrollment in the program. A minimum cumulative grade point average of 3.00 is required.

Graduation residence requirements must be met. For more information, refer to Graduation Requirements in the Academic Policies and Regulations section earlier in this catalog.

Prerequisite Discipline-Bridging Courses

Students admitted to the MSA degree program may be required to successfully complete a maximum of nine credit hours in courses that serve as prerequisites to the MSA degree requirements. All MSA students must meet this prerequisite requirement, whether by demonstrating completion of the required courses as an undergraduate at AUS, by demonstrating acceptable performance in equivalent courses at another accredited institution, or by completing the prerequisites before taking the corresponding graduate courses.

Prerequisite discipline-bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete discipline-bridging courses are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Students may qualify to waive any or all of the prerequisite discipline-bridging courses. Waivers are evaluated by the Head of the Department of Accounting at the time of admission. Waivers are only granted after an official, sealed transcript is received by the AUS Office of Enrollment Management/Graduate Admissions. For policy details, refer to Course Waiver in the Admission to Graduate Studies section earlier in this catalog.

Prerequisite Discipline-Bridging Courses (9 credit hours)

- ACC 510 Financial Accounting for Managers
- ACC 520 Managerial Accounting
- ACC 530 Auditing for Managers

Core Courses Requirement (18 credit hours)

Students must successfully complete 18 credit hours in core courses:

- ACC 610 Topics in Financial Accounting
- ACC 611 Auditing and Attestation
- ACC 612 Advanced Topics in Managerial and Cost Accounting

- ACC 614 Regulatory Environment in Accounting
- ACC 615 Enterprise Database Systems
- ACC 616 Advanced Topics in Financial Reporting

Elective Courses (minimum of 12 credit hours)

In addition to meeting the core courses requirements, students must successfully complete two accounting (ACC) elective courses (for a minimum of six credit hours) and two MBA and/or MTH elective courses (for a minimum of six credit hours) as follows:

ACC Elective Courses (minimum of 6 credit hours)

Students must select from the following list of courses:

- ACC 620 Forensic Accounting and Fraud Examination
- ACC 622 Internal Auditing
- ACC 623 Financial Statement Reporting and Analysis
- ACC 628 Fraudulent Financial Reporting
- ACC 694 approved special topic ACC courses. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.

MBA and MTH Elective Courses (minimum of 6 credit hours)

Students must successfully complete two courses for a minimum of six credit hours from the following:

- 600-level MBA courses, excluding MBA 613. Approved 600-level MBA special topics satisfy this requirement. Consult the online course catalog or the online class schedule accessible via the AUS student information system to verify course classifications.
- MTH 500 Mathematical Statistics with Applications
- MTH 507 Financial Mathematics I
- MTH 516 Financial Mathematics II

Academic Advising

The Department of Accounting provides academic and career advising to MSA students through the head of the department. Department of Accounting faculty teaching in the MSA program may also advise continuing students.

Master of Science in Finance (MSF)

Osamah AlKhazali, Head, Department of Finance

The Master of Science in Finance (MSF) degree program is offered by the Department of Finance.

The MSF degree program offers graduate-level business finance education to meet the needs for financial analysis, and analytical and technical expertise in the Gulf region. The program also provides research training for students following the thesis option who wish to consider future PhD study.

The MSF degree program at American University of Sharjah prepares students with the analytical skills needed for a successful professional career in today's global financial environment.

Featuring a rigorous curriculum that provides cutting-edge training in finance—focusing on all dimensions of learning that include knowledge, attitudes, values, skills, understanding and analysis—the program endows students with the necessary quantitative and theoretical expertise for analytical jobs in the finance sector. Because the curriculum covers the CFA body of knowledge, it also encourages students to prepare for the CFA exams.

A concentration in corporate finance and investments prepares students to effectively utilize their analytic skills to project earnings, conduct valuations, construct and manage portfolios, and assess an organization's assets and liabilities to identify opportunities for global business growth.

While all students in the program are exposed to research, the thesis option provides students considering future PhD studies with more in-depth research training.

Program Goals

The MSF degree program prepares graduates to:

- meet the highest levels of proficiency in the functional or technical knowledge required for professional finance careers
- address key issues in professional decision making through the application of critical analysis and integration of knowledge relevant to changing environments
- be at the forefront of academic and professional research related to the practice of finance and investment

Program Learning Outcomes

Graduates of the MSF degree program will be prepared to:

- evaluate risk in investments and devise risk management strategies
- price major financial assets and securities, including in complex environments
- assess and devise alternative financing decisions and strategies, based on advanced analysis and the application of research skills
- use financial modeling and problem-solving techniques to facilitate financial decision making
- analyze advanced financial statements to inform high-level strategic thinking.

Concentration in Corporate Finance and Investment

Upon graduation from the MSF degree program with a concentration in corporate finance and investment, graduates will be able to:

- solve key decision problems including valuation of corporate securities, capital budgeting under certainty, capital budgeting under uncertainty, investment decisions, corporate capital structure decisions, dividend decisions and policy, capital raising decisions, leasing decisions and analysis of takeovers
- critically assess risk-return relationship, demonstrating the ability to create an investment policy statement, and show how the financial markets operate
- examine the principles of modern portfolio theory and the effect of diversification on investment portfolios
- measure and evaluate portfolio performance demonstrating the key features of futures and options and how they can be used to manage the risk of the portfolio

Admission Requirements

In addition to meeting the general university requirements for graduate admission, applicants to the MSF degree program must hold a bachelor's degree in business-related areas from an independently accredited university recognized by the UAE Ministry of Education's Higher Education Affairs Division and by AUS. Applicants must also submit a current vitae/resume.

Business Bridging Courses

Students admitted to the MSF degree program may be required to complete a maximum of 7.5 credit hours in courses that serve as the foundation

for the core MSF program. The number of business bridging courses required will normally depend on courses completed by the student as an undergraduate and is determined by the program at the time of admission.

Business bridging courses do not generate credit hours towards completion of the degree program graduation requirements. Students required to complete bridging courses are normally not eligible to register for degree program courses prior to successful completion of these courses. For further details, refer to Bridging Courses in Registration and Course Information within the Academic Policies and Regulations section earlier in this catalog.

Business bridging courses may be waived when the waiver policy requirements are met. Matriculation into the major requires successful completion or waiver of the business bridging courses.

All business bridging courses are half-semester courses.

Business Bridging Courses (7.5 credit hours)

- BUS 501 Introduction to Economics
- BUS 502 Quantitative Methods
- BUS 503 Financial Accounting
- BUS 504 Econometric Analysis
- BUS 505 Introduction to Financial Management

Waiver Policy

Students may qualify to waive any or all of the business bridging courses. In general, a course may be waived if the student has completed comparable course work at the undergraduate level. Waivers are evaluated at the time of admission. For more information, consult the Course Waiver in the Admission to Graduate Studies section earlier in this catalog.

Accelerated Master's Program— AUS Undergraduate Students

AUS undergraduate degree seeking students interested in pursuing an MSF degree may register for a maximum of six credit hours from MSF FIN courses while completing their undergraduate degree program by seeking acceptance to the Accelerated Master's Program (AMP) of the MSF degree program. The master's-level courses may be counted towards meeting the graduation requirements for both the bachelor's and master's degrees.

To qualify for acceptance to the AMP, students must satisfy the following requirements at AMP application time:

- be enrolled in the finance or economics (BSBA or BAE) majors
- have earned a minimum of 90 credit hours (excluding credit hours earned in Achievement Academy/Bridge Program courses and preparatory courses)
- have achieved a minimum cumulative GPA of 3.50
- have successfully completed the following courses:
 - ECO 201 Principles of Microeconomics
 - ECO 202 Principles of Microeconomics
 - FIN 201 Fundamentals of Financial Management
 - FIN 430 Financial Forecasting or ECO 351 Introduction to Econometrics

For further details on the AMP, refer to Accelerated Master's Program in the Academic Policies and Regulations section of the *AUS Undergraduate Catalog*. For the list of MSF FIN courses available to AMP students, consult the Course Descriptions section of this catalog. Course prerequisites and background requirements must be met.

Course Timings

MSF courses are offered in the evenings, with classes typically beginning at 6:00 p.m. and ending at 9:00 p.m.

Academic Load

An MSF student may register for up to nine credit hours per semester. Upon a student's request, the Associate Dean for Graduate Programs can approve three additional credit hours if the student has achieved a cumulative GPA of 3.50 or above.

Degree Requirements

Students in the MSF degree program are offered two options: a thesis option and a non-thesis option,

To be awarded an MSF degree, students must successfully complete a minimum of 30 credit hours consisting of program core courses, concentration courses, program elective courses and a master's thesis (for students in the thesis option only), with a minimum grade point average of 3.00.

The expected minimum duration for completion of the MSF degree program for a full-time student is 18 months. Part-time students may need more time to complete the degree. All students must successfully complete the degree program graduation

requirements within five years from the time of initial enrollment in the program.

Graduation residence requirements must be met. For details, please refer to the Graduation Requirements in the Academic Policies and Regulations section of the *AUS Graduate Catalog*.

Thesis Option

Students in the thesis option must successfully complete the following requirements:

- 12 credit hours in core courses
- nine credit hours in concentration courses
- a minimum of three credit hours in elective courses
- six credit hours in Master's Thesis

Non-Thesis Option

Students in the non-thesis option must successfully complete the following requirements:

- 12 credit hours in core courses
- nine credit hours in concentration courses
- a minimum of nine credit hours in elective courses

Core Courses (18/12 credit hours)

Students must successfully complete the following courses:

- FIN 681 Advanced Financial Statements Analysis
- FIN 682 Advanced Corporate Finance
- FIN 683 Applied Econometrics Methods
- FIN 684 Investment Analysis and Portfolio Management
- FIN 699 Master's Thesis (6 credit hours—for students in the thesis option)

Concentration Courses (9 credit hours)

Corporate Finance and Investment Concentration

Students must successfully complete the following courses:

- FIN 685 Advanced Asset Valuation
- FIN 686 Pricing and Hedging of Financial Derivatives
- FIN 687 Financial Markets and Institutions

Elective Courses (minimum of 3/9 credit hours)

Student in the thesis option must complete a minimum of three credit hours in elective courses. Students in the non-thesis option must complete a

minimum of nine credit hours in elective courses.

Students may select their elective courses from the following list:

- FIN 688 Private Equity and Venture Capital
- FIN 689 Risk Management
- FIN 691 International Financial Management
- FIN 692 Islamic Finance
- FIN 694 Special Topics in Finance

With the approval of their advisor and the SBA Associate Dean for Graduate Programs, students in the non-thesis option may elect to take up to two elective courses from outside the list of elective courses.

Academic Advising

The Department of Finance provides academic and career advising to MSF students through the head of the department. Department of Finance faculty teaching on the MSF program may also advise continuing students.

Master's Thesis

The thesis option allows in-depth specialization in a particular topic area, and provides students with the opportunity to receive individualized attention from their thesis faculty supervisor, equipping them with the research skills required for a PhD degree. MSF thesis option students will select an advisor after successfully completing the core courses.

A student must complete his/her master's thesis under the direct supervision and guidance of a principal advisor. This principal advisor serves as the chair of the student's examining committee. The committee also includes two additional faculty members. One of the additional faculty members must be selected from outside the program. The committee could also include one co-advisor or more.

A complete guide for preparing the master's thesis/professional project is given in the *Office of Graduate Studies Policies and Procedures* document available on iLearn and accessible using the following path: iLearn-Community-Office of Graduate Studies (OGS)-Office of Graduate Studies Policies & Procedures.

For registration details, please refer to Thesis, Final Project and Dissertation under the Academic Policies and Regulations section of the *AUS Graduate Catalog*.

College of Architecture, Art and Design

Courses with titles in italic are available to undergraduate students in the Accelerated Master's Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master's Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

UPL Urban Planning

UPL 600 Planning History, Theory and Principles (3-0-3). Introduces the profession of urban planning and its cardinal doctrines. Surveys the history of the profession and its links to other environmental design fields. Reviews basic procedural and substantive theories that inform planning practice. Previews planning specializations, what planners do, and the tools they use and need to nurture sustainable cities. Prerequisite: admission to the MUP program.

UPL 602 Computer Applications in Planning (4-0-3). Introduces key concepts and technical skills involved in analyzing spatial phenomena. Includes the following topics: spatial inferences, cartographic quality, geospatial data and exploratory spatial data analysis. Introduces and applies key software tools in urban and regional contexts. Prerequisite/concurrent: UPL 600. Lab/Tech fee rate A applies.

UPL 604 Urban Planning Research and Analysis (3-0-3). Introduces quantitative and qualitative research and analysis methods used in urban planning practice. Considers various sources of primary and secondary data (surveys, interviews and observations; national and international data repositories) and associated analytical skills (statistical analysis, qualitative analysis, forecasting, analysis of local economies). Emphasizes effective presentation of data and analyses. Prerequisite/concurrent: UPL 600.

UPL 621 Environmental and Land Use Planning (3-0-3). Provides a comprehensive overview of the field of sustainable environmental and land use planning, focusing on key principles, processes and skills for assessing, managing and protecting environmental resources—land, air, water, flora and fauna. Reviews the social, economic, political and legal dimensions of environmental and land use planning through case studies and best practices worldwide. Prerequisite/concurrent: UPL 600.

UPL 623 Urban Design Principles, Processes and Skills (4-0-3). Examines urban design principles, processes and necessary skill-sets. Differentiates between urban design as a discipline and as a profession and gives an overview of its evolution in the West. Examines the applicability and

limitations of discussed concepts, processes and skills by engaging in projects ranging from problem formulation and analysis to spatial solutions and recommendations in the local/regional contexts. Prerequisite/concurrent: UPL 600.

UPL 625 Plan Making, Communication and Process (4-0-3). Introduces skills relevant to making useable plans. Reviews the need for and logic of plans, the challenges of collective choice, and the institutional context of plan making. Covers topics such as problem formulation and decision analysis; forecasting, impact assessment and scenario development; and facilitation, negotiation and mediation. Emphasizes effective presentation of data, analyses and recommendations. Requires individual and group work on applied tasks. Prerequisite/concurrent: UPL 600.

UPL 633 Urban Infrastructure Planning (3-0-3). Explores the challenges and prospects for planning sustainable urban infrastructure. Examines the conceptual basis of infrastructure planning, as well as empirical cases of planning, financing and managing sustainable urban infrastructure. Reviews case studies and best practices of infrastructure planning worldwide and locally. Prerequisite: UPL 600.

UPL 634 Tourism and Hospitality Planning (3-0-3). Covers the history of tourism and hospitality planning as a specialized field of study. Critiques tourism and hospitality concepts, trends, genres and case studies. Analyzes the political, economic, environmental and socio-cultural dimensions and implications of the tourism and hospitality industry. Assesses the links between tourism and sustainable development. Prerequisite: admission to the MUP program.

UPL 639 Urban Planning and Housing Policy (3-0-3). Provides an overview of housing policy as it relates to urban planning. Reviews different approaches to housing provision from around the world including housing finance mechanisms. Considers housing typologies as well as policy issues specific to the UAE. Prerequisite: UPL 600.

UPL 641 Urban Economics and Analysis (3-0-3). Examines the economics of cities and urban problems. Undertakes economic

analysis of the location and growth of urban and regional areas with emphasis on public policy issues. Discusses land-use patterns, measurement and change in regional economic activity, and urban problems such as transportation, housing, poverty and crime. Reviews the economic impact of climate change as it relates to urban development. Places special attention on local fiscal behavior, overlapping jurisdictions and the provision of local public goods, and intergovernmental fiscal relations. Prerequisite: UPL 600.

UPL 651 Negotiation Strategies (3-0-3). Introduces key principles, strategies and dynamics of negotiation in the governmental, corporate, non-profit and grassroots sectors. Reviews relevant social theories and simulates experiences in negotiation and conflict resolution. Highlights relevance of negotiation to urban planning. Prerequisite: UPL 600.

UPL 680 Urban Planning and Research Workshop (8-0-6). Covers application of substantive skills in urban planning. Focuses on comprehensive planning exercises in the Gulf region, involving preliminary research, problem formulation, fieldwork and hands-on analysis/application. Emphasizes methods and tools of preparing plans. Addresses development of baseline data; analysis of existing conditions; identification of strategic planning and development issues; forecasting of future conditions; review of development goals, objectives and policies; development and synthesis of alternative plans; evaluation of alternatives; and development of implementation strategies. Prerequisites: UPL 602, UPL 604, UPL 621, UPL 623 and UPL 625.

Special Topic Courses

Special Topic (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the college during registration.

College of Arts and Sciences

Courses with titles in italic are available to undergraduate students in the Accelerated Master's Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master's Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

ELT

TESOL

ELT 501 Advanced English Grammar (3-0-3). Examines the structure, function and meaning of contemporary English. Discusses issues relative to descriptive/prescriptive approaches to language and ESL instruction.

ELT 507 Culture, Society and Language Learning (3-0-3). Explores the influence of cultural diversity on teaching and learning an additional language and the implications of language use in social contexts, like world, regional and international Englishes. Analyzes methods and approaches for intercultural research and prepares language teachers in practical and theoretical areas of pragmatics and sociolinguistics, providing opportunities to prepare, present and evaluate authentic lessons that enrich intercultural competence.

ELT 511 Linguistics for ESL Teachers (3-0-3). Focuses on areas in linguistics relevant to ESL teachers. Explores ways of utilizing research and generalizations derived from linguistics to inform ESL teaching practice.

ELT 513 Language Acquisition and Development (3-0-3). Focuses on processes involved in acquiring first and second languages. Examines different theoretical perspectives explaining acquisition and analyzes the factors that affect language development and learning. Explores the implications of SLA research in ELT classroom contexts.

ELT 515 Methods and Materials Development (3-0-3). Examines traditional and contemporary approaches to English language teaching. Various aspects of classroom practice are analyzed, including teacher and learner roles, classroom management, and integrated versus separate teaching of the language skills.

ELT 517 Curriculum Design (3-0-3). Introduces the principles of ESL course design. Examines the stages of developing and evaluating learning centered curricula and materials. Prerequisite: admission to the MATESOL program.

ELT 521 Reading and Writing in ESL (3-0-3). Discusses various theoretical models dealing with teaching literacy skills in a second language to children and adults. Explores ways to adapt and apply these models for effective ESL instruction.

ELT 523 Bilingual Education (3-0-3). Reviews different models of bilingual education and issues in bilingualism. Discusses how to achieve a balanced bilingual education system by examining the challenges posed by cultural and linguistic diversity in a bilingual education setting.

ELT 551 Language Testing and Evaluation (3-0-3). Covers the fundamental goals, principles, standards and uses of language assessment and language assessment research. Reviews the factors involved in assessing proficiency in second language skills and in selecting appropriate testing instruments and evaluation tools.

ELT 553 Technology in the ESL Classroom (3-0-3). Introduces a wide range of current applications of technology in the ESL classroom. Focuses on creating innovative and effective ESL learning and teaching environments using computers and other educational technologies.

ELT 617 Quantitative, Qualitative and Action Research in ELT (3-0-3). Surveys quantitative, qualitative and action research approaches in language learning and teaching. Emphasizes the role of research design, data collection and the interpretation of results. Graduate students pursuing the thesis option may use this course to develop their proposals. Prerequisite: admission to the MATESOL program.

ELT 619 Practicum in TESOL (3 credit hours). Provides the opportunity to observe, explore and implement effective ESL teaching strategies. Involves weekly seminars in which the students discuss their classroom experiences and reflect on their personal growth as ESL teachers. Prerequisites: ELT 511 and ELT 513; prerequisite/concurrent: ELT 515.

ELT 699 Master's Thesis (6 credit hours). Requires completion of individual and original research work on a topic related to some aspect of TESOL that addresses both theoretical and practical aspects of ELT. The thesis is supervised by the thesis faculty supervisor and is defended to the satisfaction of the thesis committee. Graded as Pass/No Pass. Prerequisite: good academic standing.

MSE

Materials Science and Engineering

MSE 500 Fundamentals of Materials Science and Engineering (3-0-3). Provides advanced description for the structure of different materials including metals, ceramics and polymers. Examines material defects, and the fundamentals of mechanical, electrical, magnetic and optical properties. Covers the connection between material properties, structure and function. Addresses different modes of material failure such as fracture, creep and fatigue. Prerequisite: admission to the PhD-MSE program.

MSE 510 Thermodynamics in Materials Science and Engineering (3-0-3). Covers the basic concepts and laws of thermodynamics and their applications. Focuses on the use of internal energy, enthalpy, entropy and Gibbs free energy; Maxwell relations; ideal and real cycles and processes; chemical equilibrium; phases and solutions, phase equilibrium and other applications. Prerequisite: admission to the PhD-MSE program.

MSE 705 Diffraction and Crystallography (3-0-3). Introduces the fundamentals of X-ray crystallography and diffraction. Provides knowledge on how X-ray diffraction can be used to determine the crystal structure for both single and poly crystalline materials. Covers reciprocal lattices, space groups, Ewald sphere construction, elements of diffraction measurements and instrumentation, and the interpretation of diffraction data. Discusses diffraction studies using synchrotron radiation and neutrons sources. Requires knowledge in differential equations analysis techniques. Prerequisite: MSE 500.

MSE 707 Magnetic Materials and Devices (3-0-3). Introduces basic concepts of magnetism, experimental methods, and applications of magnetic materials. Describes magnetic order and excitations in magnetic materials using quantum mechanics. Covers magnetic moment, types of magnetic materials and their properties, domains and effects of nanostructuring, soft and hard magnetic materials, magnetoresistance, spintronics and magnetic superconductors. Explores applications in magnetic memories and magnetic data storage devices. Requires knowledge in differential equations

analysis techniques. Prerequisite: MSE 500.

MSE 708 Electronic Properties of Materials (3-0-3). Provides deep insights into the electronic properties of functional materials. Covers the concepts of energy bands and electron behaviors in crystals. Introduces various transport mechanisms for a large spectrum of materials including metals, semiconductors and polymers. Requires knowledge in quantum mechanics. Prerequisite: admission to the PhD-MSE program.

MSE 710 Advanced Thermodynamics in Materials Science and Engineering (3-0-3). Explores applications of the laws of thermodynamics in materials science and engineering. Covers chemical reactions, magnetism, polarizability, models and properties of solutions; thermodynamic analysis of the phase diagrams of different materials; thermodynamic activities in solid and liquid systems; equilibrium constant; and phase equilibria. Prerequisite: MSE 510.

MSE 711 Kinetics of Materials (3-0-3). Covers topics related to analysis of kinetic processes in materials including irreversible thermodynamics and diffusion. Explores mechanisms of materials processing, microstructural behavior and phase transformations. Introduces equations for diffusion, reaction rates and rate theories. Prerequisites: MSE 500 and MSE 510.

MSE 718 Materials for Energy Production and Storage (3-0-3). Provides comprehensive knowledge about the importance of the physical and chemical properties of materials as applied in energy generation and storage. Describes the effects of materials structure, chemistry and defects on performance and efficiency in energy production, conversion, storage and utilization. Covers topics related to materials used in solar cells and solar heat, batteries, hydrogen technology and fuel cells. Prerequisites: MSE 500 and MSE 510.

MSE 720 Advanced Characterization and Analytical techniques (3-0-3). Focuses on advanced characterization and analytical techniques in materials science and engineering research. Explores the operating principles and applications of electron microscopes and their spectroscopical tools. Covers X-ray diffraction (XRD), X-ray Photoelectron Spectroscopy (XPS), Scanning Probe Microscopy (SPM) and Raman spectroscopy. Addresses the utility and the limitation of each analytical tool. Requires advanced undergraduate laboratory in physical sciences or engineering. Prerequisite: MSE 500. Lab/Tech fee rate A applies.

MSE 721 Surface Science and Technology (3-0-3). Provides advanced knowledge of the properties of surfaces and interfaces, with focus on their structure, electronic and chemical properties. Covers surface fabrication and modification methods, surface characterization techniques, adsorption/desorption isotherms, and surface reactions for catalytic applications. Discusses a range of applications including the shape of nanostructures, hydrophilic surfaces, electrochromic and thermochromic coatings, self-cleaning, self-healing and bio-inspired surfaces. Prerequisites: MSE 500 and MSE 510.

MSE 730 Advanced Mechanics of Materials (3-0-3). Covers fundamental concepts of solid mechanics with focus on elastic deformable bodies. Includes tensor algebra, kinematics, strain-displacement relationship, compatibility, stress and traction, equilibrium equations, constitutive relationships, linear elasticity, and solutions to selective boundary value problems. Explores the necessary mechanics background needed for other specific areas of solid mechanics, including plasticity, fatigue and fracture mechanics. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 731 Plasticity (3-0-3). Focuses on constitutive laws of plasticity, yield criteria, stress-strain relations, flow rules and formulation for rate-dependent and rate-independent plasticity. Covers basic numerical implementation of constitutive models and solutions for boundary value problems. Introduces advanced topics including crystal plasticity and applications of plasticity concepts in materials science and engineering. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 732 Fatigue of Materials and Structures (3-0-3). Covers materials response under cyclic loading with focus on predicting the fatigue life of materials and structural components. Focuses on stress-life, strain-life and fracture mechanics approaches to fatigue life. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 733 Mechanics of Laminated Composite Structures (3-0-3). Introduces the continuous fiber-reinforced composite materials with emphasis on equations of anisotropic elasticity, environmentally induced stresses, and constitutive equations of a lamina. Covers micromechanics of stiffness and expansion coefficients. Discusses transformation of stresses, strains and material coefficients. Explores the classical and first-order theories of laminated composite plates, bending, buckling and the vibrations of composite plates using selected

analytical solutions. Requires knowledge in mechanics of materials. Prerequisite: MSE 500.

MSE 734 Physical Metallurgy (3-0-3). Focuses on structure-property relationship of metals and alloys based on composition and processing. Covers types of solid solutions, ferrous and non-ferrous phase diagrams with focus on cooling curve and heat treatment. Examines Fe-C phase diagrams, steel and its types, and the microstructure associated with the individual phases. Explores design of alloys and the effect of alloying element and heat treatment in different applications. Prerequisites: MSE 500 and MSE 510.

MSE 740 Computational Methods in Materials Science and Engineering (3-0-3). Covers advanced computational methods and simulation in materials science and engineering. Focuses on modeling techniques from the microscopic up to the macroscopic structural scale. Explores molecular dynamics, classical mechanics, potentials for solids, Monte-Carlo simulation for atomic systems, and finite element method applications in materials and solids. Introduces computer aided design and simulation software. Requires knowledge in differential equations techniques or numerical analysis. Prerequisite: admission to the PhD-MSE program.

MSE 741 Advanced Finite Element Methods in Materials Science and Engineering (3-0-3). Covers different finite element methods in materials science and engineering. Emphasizes on formulation and assembly of finite elements using shell and solid elements. Covers materials and geometric nonlinearities, heat transfer and structural dynamics and vibrations. Focuses on practical considerations and software use in materials and structures. Requires knowledge in finite element methods. Prerequisite: admission to the PhD-MSE program.

MSE 750 Nanomaterials: Science and Applications (3-0-3). Provides detailed knowledge of the physical phenomena, theoretical concepts and experimental techniques to fabricate and manipulate nanostructures. Covers the preparation, testing and the physical properties (mechanical, electrical, magnetic, optical) of nanomaterials. Explores a wide spectrum of applications such as catalysis, adsorption, sensors, high wear resistant and corrosion resistant coatings, nanophotonics and nanoelectronics. Prerequisites: MSE 500 and MSE 510.

MSE 760 Advanced Corrosion (3-0-3). Provides a strong foundation in electrochemical thermodynamics and kinetics related to corrosion processes. Covers the principles behind corrosion and methods for prevention and control.

Addresses materials selection, testing, design consideration and practical high-temperature corrosion problems. Requires knowledge in physical chemistry or electrochemistry. Prerequisite: admission to the PhD-MSE program.

MSE 761 Advanced Polymers and Composite Materials (3-0-3).

Provides an overview of polymers, polymer composites, plastics, elastomers and fibers with concentration on specialty polymeric materials and hybrid polymer composites and their applications. Discusses the processing, fabrication and characterization techniques of polymers and polymer composites. Explores the characteristics, composition, adhesion and morphology of polymers and polymer composites. Prerequisites: MSE 500 and MSE 510.

MSE 790 Qualifying Examination (0-0-0).

Includes written and/or oral parts to test the student's breadth of knowledge, understanding of fundamentals, and ability to perform independent research work in one of the research areas in materials science and engineering. Graded as Pass/Fail. Prerequisites: successful completion of at least 12 credit hours, good academic standing and approval of program coordinator.

MSE 795 Doctoral Seminar (1-0-0).

Provides a unique discussion forum for all doctoral students to interact with a diverse group of faculty from different sciences and engineering departments, as well as outside presenters. Encompasses a wide variety of pertinent topics from different MSE research areas. Graded as Pass/Fail. Prerequisite: admission to the PhD-MSE program.

MSE 799 Dissertation (a minimum of 30 credit hours). Includes the preparation, presentation and defense of the research proposal, as well as the write-up, presentation and defense of the dissertation. Graded as Pass/No Pass. Prerequisites: MSE 790, DAC appointment and approval of program coordinator.

MTH Mathematics

MTH 500 Mathematical Statistics with Applications (3-0-3).

Introduces formulation of statistical models, transformations and expectations, methods of estimation and optimal theory, hypothesis testing and methods of evaluations, nonparametric statistics, and Monte Carlo simulation and applications using statistical packages. Prerequisite: approval of department head.

MTH 505 Ordinary Differential Equations (3-0-3).

Covers the following topics: scalar and planar autonomous systems, nonlinear systems and linearization, existence and

uniqueness of solutions, matrix solution of linear systems, series solutions, phase plane analysis, stability analysis, bifurcation theory, Liapunov's method, limit cycles and Poincare Bendixon theory. Prerequisite: admission to the MSMTH program.

MTH 506 Partial Differential Equations (3-0-3).

Covers the classification of first- and second-order partial differential equations and analyzing its applications. Introduces eigenfunction expansions, separation of variables, and transform methods for solving PDEs, Green's functions for PDEs, and the method of characteristics. Prerequisite: admission to the MSMTH program.

MTH 507 Financial Mathematics I (3-0-3).

Provides a basic introduction to financial mathematics. Introduces mathematical perspective on the valuation of financial instruments such as futures and options, and their risk-management using the Cox-Ross-Rubenstein framework. Introduces the stochastic techniques employed in derivative pricing. Prerequisite: approval of department head.

MTH 508 Mathematical Biology (3-0-3).

Explores continuous and discrete methods for modeling biological systems. Covers ordinary differential equations models, multistate logical models and polynomial dynamical systems. Introduces phase portraits, bifurcation diagrams, perturbation theory, parameter estimation and system identification. Examines some biological systems and their mathematical models. Prerequisite: admission to the MSBME or MSMTH programs.

MTH 511 Real Analysis (3-0-3).

Covers Riemann integration and the associated convergence theorems, Lebesgue measure on the real line, Lebesgue measurable functions and Lebesgue integration on the real line. Addresses bounded convergence theorem, Fatou's lemma, monotone convergence theorem, Lebesgue dominated convergence theorem, Vitali convergence theorem, absolute continuity, differentiation and integration, L_p spaces, Holder and Minkowski inequalities, and the Riesz Fischer Theorem. Prerequisite: admission to MSMTH program.

MTH 512 Advanced Linear Algebra (3-0-3).

Covers the proof-based theory of matrices, determinants, vector spaces, linear spaces, linear transformations and their matrix representations, linear systems, linear operators, eigenvalues and eigenvectors, invariant subspaces of operators, spectral decompositions, functions of operators, and applications to science, industry and business.

Prerequisite: admission to the MSMTH program.

MTH 513 Advanced Probability (3-0-3).

Covers probability spaces, random variables, independence, integration and expectation, convergence concepts, strong and weak laws of large numbers, convergence in distribution, characteristic functions and central limit theorem, conditional probability, and martingales. Prerequisite: MTH 511.

MTH 514 Combinatorics (3-0-3).

Covers enumeration, combinatorial optimization, random methods in combinatorics (random graphs, random matrices, randomized algorithms), combinatorial designs, matroids, formal languages and combinatorics on words, combinatorial number theory, and combinatorial and symbolic methods in dynamical systems. Prerequisite: admission to the MSMTH program.

MTH 516 Financial Mathematics II (3-0-3).

Introduces fundamental concepts of discrete-time binomial model and continuous-time. Covers probability measure theory and conditional expectation, Brownian motion and quadratic variation, martingales, Ito integral, stochastic calculus, replicating portfolios and hedging, Black-Scholes-Merton formulae for a European-style call option price, change of measure and Girsanov's Theorem, risk-neutral pricing theory, no-arbitrage and existence of risk-neutral measure, market completeness and uniqueness of risk-neutral measure. Prerequisite: MTH 507.

MTH 517 Numerical Methods for Derivative Pricing (3-0-3).

Covers modeling and pricing of equity options in the Black-Scholes framework including analytic methods, PDE methods and simulation methods. Examines pricing and hedging of exotic derivatives including path-dependent options (e.g., barriers, look-backs, Asian options). Explores extensions of the Black-Scholes model including local volatility and stochastic volatility models. Presents implementations of some models in the computer algebra system MATLAB. Prerequisite: MTH 507.

MTH 520 Complex Analysis (3-0-3).

Covers the following topics: analytic functions, Cauchy's theorem and consequences, singularities and expansion theorems, maximum modulus principle, residue theorem and its application, compactness and convergence in space of analytic and meromorphic functions, elementary conformal mappings, Riemann mapping theorem, elliptic functions, analytic continuation and Picard's theorem. Prerequisite: admission to the MSMTH program.

MTH 525 Functional Analysis (3-0-3).

Covers normed linear spaces,

completeness, Banach spaces, Hilbert spaces, duality and Hahn-Banach theorem. Examines topics related to linear operators including boundedness, invertibility, adjoints, closed graph theorem, open mapping theorem, compactness and spectral analysis. Prerequisite: MTH 511.

MTH 532 Abstract Algebra (3-0-3).

Covers basic properties of groups, normal subgroups and direct sum of groups; homomorphism and isomorphism between groups; classification of finite abelian groups; and applications of Sylow's Theorems. Introduces rings, ideals, polynomial rings, irreducible and prime elements of rings, unique factorization domains, fields and their extensions including finite fields. Prerequisite: admission to the MSMTH program.

MTH 540 Algebraic Coding Theory (3-0-3).

Employs the theory of rings and finite fields. Covers linear codes, cyclic codes, BCH codes, Reed-Solomon codes, convolutional codes, codes over rings, and encoding/decoding. Prerequisite: admission to the MSMTH program.

MTH 551 Methods of Applied

Mathematics (3-0-3). Covers integral equations, Volterra and Fredholm type equations, relation to differential equations, solutions by Neumann series, Green's functions, asymptotic analysis of solutions, and perturbation techniques with eigenvalue problems. Prerequisite: admission to the MSMTH program.

MTH 555 Loss and Risk Models (3-0-3).

Covers severity models, frequency models, aggregate models, the impacts of coverage modifications, and risk measures. Prerequisite: admission to the MSMTH program.

MTH 560 Topology (3-0-3).

Introduces topological spaces, continuous functions and homeomorphisms. Covers connectedness, compactness, separation axioms, product and quotient topologies and metric spaces. Introduces algebraic topology: homotopy, fundamental groups, covering spaces and applications such as the Brouwer Fixed Point theorem and the Borsuk-Ulam theorem. Prerequisite: admission to the MSMTH program.

MTH 565 Numerical Analysis

(3-0-3). Covers interpolation, numerical evaluation of definite integrals and solution of ordinary differential equations, stability and convergence methods, and error estimates. Prerequisite: admission to the MSMTH program.

MTH 570 Optimal Control Theory

(3-0-3). Introduces deterministic optimal control. Covers examples involving calculus of variations, optimal trajectories, and engineering control

problems. Prerequisite: admission to the MSMTH program.

MTH 599 Master's Thesis

(6 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member from the department serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of department head.

STA

Statistics

STA 501 Advanced data mining: theory and applications (3-0-3).

Covers foundation and theory of supervised and unsupervised machine learning methods including linear and logistic regressions, regularization, neural networks, support vector machines, decision trees, ensembling, k-means and hierarchical clustering, principal component analysis, Naive Bayes. Covers some related recent research topics. Requires Knowledge of probability theory and statistical inference and basic programming skills. Prerequisite: approval of department head.

TRA

**English/Arabic/
English Translation
and Interpreting**

TRA 500 Principles and Strategies of Translation (3-0-3).

Provides advanced training in principles and methods of translation from English to Arabic and vice versa. A variety of text types are covered, ranging from legal to journalistic genres.

TRA 503 Theoretical Models of Translation (3-0-3).

Provides a conceptual map of translation studies and outlines the various theoretical approaches and trends that impact the practice of translation. Introduces the range of factors that govern the process of translation and to the theoretical underpinnings that have motivated different attitudes to translating and translations. Prerequisite: TRA 500.

TRA 504 Discourse Semantics and Pragmatics in Translation (3-0-3).

Addresses the needs of the practicing translator and interpreter within a discourse framework. Advanced training in semantics and pragmatics is provided, and linguistic analysis in these domains is re-considered from the vantage point of cross-cultural communication.

TRA 505 Interpreting and the Profession I: Consecutive

Interpreting (3-0-3). Provides high-level training in those interpreting skills most relevant to the translator at work.

Provides advanced training in liaison and consecutive interpreting with a focus on professional standards and community needs. Presents theoretical insights into the process of interpreting and places them within an overall, practice-driven model of the process.

TRA 509 Interpreting and the Profession II: Simultaneous Interpreting (3-0-3).

Builds on TRA 505 and provides high-level training in those skills most relevant to Simultaneous Interpreting (SI), including professional standards and international conventions as well as equipment simultaneous interpreters use. Theoretical insights into the process of interpreting are presented and placed within an overall, practice-driven model of the process. Prerequisite: TRA 505.

TRA 510 Research Methods and Academic Writing (3-0-3).

Examines academic writing conventions and research methods. Addresses quantitative and qualitative research approaches. Deals with the requirements of preparing/writing MA theses.

TRA 512 Terminology, Arabicization and the Translator (3-0-3).

Introduces the field of terminology and reviews it within the work of the translator. Explains term formation, standardization, term banks and coordination, among others. Reviews the process and problems of Arabicization and its impact on translation into Arabic. Demonstrates the application of theoretical framework of terminology and Arabicization on translation work.

TRA 556 Rhetoric for Translators

(3-0-3). Surveys the various traditions within both English and Arabic grammar and rhetoric and their application to translation. Develops and applies a text-linguistic model rooted in rhetorical thinking.

TRA 557 Translation of Administrative and Legal Documents (3-0-3).

Addresses the practical translation of administrative and legal documents such as contracts, certificates, court and police documents, laws, and more. Analyzes specialized and idiomatic language of administrative and legal documents in the context of translation and market requirements. Prerequisite: TRA 500.

TRA 558 Contrastive Linguistics and Translation (3-0-3).

Deals with how English and Arabic compare and contrast at various levels of linguistic organization: phonology, morphology, syntax and semantics. Promotes a discourse pragmatic perspective, together with a functional approach to the lexico-grammar to look at the way texts are organized functionally. Prerequisite: TRA 500.

TRA 560 Audiovisual Translation

(3-0-3). Introduces different genres of audiovisual translation. Includes the semiotic, linguistic and cultural issues involved in multimedia productions and their translation. Covers translating scripts of various cinema and TV productions into and out of Arabic and English and deals with the linguistic and cultural problems of audiovisual translation. Introduces research areas in audiovisual translation. Prerequisite: TRA 500.

TRA 580 Translating Quranic

Pragmatics (3-0-3). Pursues three major lines of enquiry: pragmatics from a textual perspective, Arabic rhetoric (*balagha*) from a pragmatic perspective, and translation studies from the perspective of preserving textual pragmatics in translating the Holy Quran into English. Emphasizes the practical aspects and hands-on experience in dealing with sacred sensitive texts in general and the Quranic text in particular. Prerequisite: TRA 500.

TRA 610 Intercultural

Communication and Translation (3-0-3). Addresses the interface between culture and translation in intercultural communication between Arabic and English. Examines macro and micro culture and the translational strategies used in cross-cultural communication through translation. Prerequisite: approval of department head.

TRA 630 Practicum (0-0-0). Provides the opportunity for practical hands on experience in translation and/or interpreting. Involves working within a translation and/or interpreting organization and reporting back weekly to the practicum supervisor over a period of four weeks. Graded as Pass/No Pass. Prerequisite: approval of department head.

TRA 699 Master's Thesis

(6 credit hours). Requires completion of an extended piece of individual research (10,000–12,000 words) on a topic within translation/interpreting studies, including an extended translation (c. 5000 words) and a commentary, chosen in consultation with the thesis faculty supervisor. Places emphasis on the theoretical and practical aspects of translating or interpreting. The thesis must be completed within two consecutive academic semesters. An extension may be allowed if a candidate presents acceptable mitigating circumstances. The thesis is defended to the satisfaction of the thesis committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of department head.

Special Topic Courses

Special Topic (1 to 4 credit hours).

Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 594 or 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the college during registration.

College of Engineering

Courses with titles in *italic* are available to undergraduate students in the Accelerated Master's Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master's Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

BME

Biomedical Engineering

BME 511 Human Anatomy and Physiology (3-0-3). Provides an overview of the human body structures and their functions. Covers the basic structure of cells, tissues, anatomical body organization, and several organ systems including the cardiovascular, nervous, sensory, digestive, skeletal, muscular and urinary systems. Highlights the structure-function relationships and how abnormalities in structure and/or function of tissues and organs lead to diseases. Presents engineering approaches for the diagnosis and prevention/treatment of various diseases. Prerequisite: admission to the MSBME program.

BME 541 Biomedical Measurements and Devices (3-0-3). Covers biomedical sensors and transducers, signal acquisition, amplifiers and real-time biomedical signal processing, measurement of biopotentials, blood flow and pressure, chemical biosensors and clinical laboratory instrumentation. Prerequisite: admission to the MSBME program.

BME 543 Biomedical Imaging Technologies (3-0-3). Introduces several medical imaging modalities, including X-ray imaging, computerized tomography, magnetic resonance imaging, ultrasound imaging and positron emission tomography. Explores the clinical applications for the medical imaging modalities. Prerequisite: admission to the MSBME program.

BME 544 Neuroengineering (3-0-3). Covers field potential generation, electrode design and electrophysiological neuroimaging. Introduces seizure detection and prediction of epilepsy, and quantitative assessment of brain injury and spinal cord injury. Includes deep brain stimulation, visual prosthetics, cochlear implants and brain machine interface. Prerequisite: admission to the MSBME program.

BME 551 Biofluid Mechanics (3-0-3). Cover the flow of biofluids, measurement methods and modeling for biomedical engineering applications. Applications include respiratory flow, blood flow in physiological and in artificial environments, pulse propagation and rheology of blood flow

in the microcirculation. Prerequisite: admission to the MSBME program.

BME 552 Drug Delivery (3-0-3). Discusses cells signaling mechanisms. Introduces the calculations of drug dosages, drug clearance and receptor binding kinetics. Explains the various ways a drug can be administered to the body, and discusses various types of drug delivery administration paths including ingestion, inhalation, surgical implantation, transdermal, intravenous injection, peritoneal, pulmonary and targeted routes. Researches different targeting techniques and drug delivery carriers. Models pharmacokinetics in the human body. Requires undergraduate-level knowledge in organic chemistry. Prerequisite: admission to the MSBME program.

BME 561 Healthcare Operations Management (3-0-3). Covers topics in the application of quantitative and operations research techniques to healthcare planning, control and decision. Includes scheduling, productivity, decision making, quality management, project management, supply chain and inventory management, and financial performance. Prerequisite: admission to the MSBME program.

BME 562 Healthcare Planning and Risk Management (3-0-3). Covers how to plan for new or existing health services, programs or facilities. Presents role of health planner, managers, providers and governing boards. Introduces the concept of risk management in health. Provides a historical perspective on the development of healthcare risk management, the role of the healthcare risk manager, the principles of healthcare risk management and the connection between risk management, quality improvement and corporate compliance in various healthcare settings. Covers practical approaches to healthcare problems using case analysis of actual healthcare projects and programs. Prerequisite: BME 561.

BME 571 Biomechanics Engineering (3-0-3). Provides an overview of musculoskeletal anatomy, the mechanical properties and structural behavior of biological tissues, and biodynamics. Includes application of stress and strain analysis to biological tissues, analysis of forces in human function and movement, energy and power in human activity, and introduces

modeling viscoelasticity of tissues. Covers classification and bulk properties of implantable materials. Prerequisite: admission to the MSBME program.

BME 572 Biomaterials Engineering (3-0-3). Gives students the background concepts in biology, biochemistry and medicine relating to biomaterials. Covers the fundamental classes of materials used in medicine, foreign body reactions to biopolymers, and bioceramics. Discusses the degradation of materials in a biological environment, and outlines methods used for biomaterial testing and implant sterilization. Prerequisite: admission to the MSBME program.

BME 581 Biomedical Informatics (3-0-3). Presents the core concepts and methods of biomedical informatics and discusses its role in the healthcare process. Emphasizes the organization of information using computational approaches, and the impact of such approaches on patient care and biomedical research. Includes a final project that requires an in-depth examination, critique and presentation of a specific topic in biomedical informatics. Prerequisite: admission to the MSBME program.

BME 582 Computational Molecular Biology (3-0-3). Introduces the computational methods used to understand the cell on a molecular level. Covers subjects such as the sequence alignment algorithms: dynamic programming, hashing, suffix trees and Gibbs sampling. Focuses on computational approaches to genetic and physical mapping; genome sequencing, assembly and annotation; RNA expression and secondary structure; protein structure and folding; and molecular interactions and dynamics. Prerequisite: BME 511.

BME 594/BME 694 Special Topic in Biomedical Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

BME 695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems.

Addresses ethical issues in biomedical engineering. Graded as Pass/Fail. Prerequisite: admission to the MSBME program.

BME 698 Professional Project (3 credit hours). Requires an approved professional project on a selected area of biomedical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection, and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: approval of the program coordinator; prerequisite/concurrent: BME 695.

BME 699 Master's Thesis (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: approval of the program coordinator; prerequisite/concurrent: BME 695.

CHE Chemical Engineering

CHE 510 Transport Phenomena (3-0-3). Covers mechanisms of molecular transport; momentum, heat and mass transport analyses; shell balances and the equations of change; mathematical solutions using separation of variables, Laplace transform and similarity solutions for solving PDEs; dimensional analysis; flow of inviscid fluids and potential flow of heat in solids; boundary-layer theory. Requires background in chemical engineering. Prerequisite: approval of the department head.

CHE 511 Advanced Chemical Engineering Thermodynamics (3-0-3). Investigates advanced concepts in thermodynamics. Includes in-depth study of the following topics: fundamental laws of thermodynamics, equations of state, property relations for pure materials and mixtures, phase equilibria and intermolecular forces. Requires background in engineering thermodynamics. Prerequisite: approval of the department head.

CHE 512 Advanced Kinetics and Reactor Design (3-0-3). Covers the following principles of chemical reaction and reactor analysis and design: non-elementary reaction kinetics, deviations from ideal reactor performance, fundamentals of catalytic chemical

reactions, coupled chemical kinetics and transport phenomena in fluid-solid reaction systems, heterogeneous non-isothermal reactor design, design and analysis of multiphase chemical reactors, dynamics and stability of heterogeneous chemical reaction systems. Requires background in undergraduate reaction engineering. Prerequisite: approval of the department head.

CHE 594/CHE 694 Special Topic in Chemical Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

CHE 610 Catalysis and Reaction Engineering (3-0-3). Introduces the fundamental concepts underlying catalytic processes and their application in reactor design. Covers the following topics: molecular theories of adsorption and surface reactions on catalysts; catalyst characterization techniques; transport in catalysts and shape selective catalysts; and applications in fixed-bed catalytic reactors, fluidized bed reactors and multiphase reactors. Prerequisite: admission to the MSChE program.

CHE 611 Biomedical Engineering and Biotechnology (3-0-3). Explores chemical engineering concepts related to the human body. Covers the following topics: body material balances, blood properties and rheology, circulatory dynamics, neuroprosthetics, body heat exchange, body thermoregulation, heat transfer in tumors, pharmacokinetic models, non-invasive imaging, orthopedics, biomaterials, membrane transport, tissue engineering and drug delivery systems. Assumes a basic understanding of physiological functions. Prerequisite/concurrent: CHE 510.

CHE 612 Advanced Process Analysis and Control (3-0-3). Covers the following topics: linear multi-input multi-output (MIMO) systems; state-space representation of process dynamic systems; controllability and observability analysis; stability analysis; frequency-domain analysis and system identification; controller synthesis for multivariable process systems; decentralized control, state feedback control, model predictive control and optimal control; digital control systems-Z transforms, discrete time models, closed loop analysis and digital control system implementation; and application of advanced control concepts to chemical process units. Prerequisite/concurrent: NGN 500.

CHE 613 Advanced Materials Science (3-0-3). Introduces advanced materials for engineers, emphasizing process-structure-property relations and strengthening of materials, phase transformations and mechanical properties. Covers concepts in materials science, engineering and technology dealing with traditional and advanced materials, surface science and engineering, fabrications and processing of engineering materials, evaluation and standards. Requires undergraduate background in material science. Prerequisite: approval of the department head.

CHE 614 Environmental Engineering (3-0-3). Provides a review of fundamentals, applied knowledge and recent advances in environmental engineering. Covers the following topics: causes of environmental pollution; environmental regulations; mass and energy balance for environmental systems under steady state and transient conditions; and contaminant transport in air, water and solids. Focuses on microbiology and reaction kinetics related to the environment and the application of environmental principles to water and wastewater treatment, air pollution control and solid waste management. Prerequisite: admission to the MSChE program.

CHE 695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSChE program.

CHE 698 Professional Project (3 credit hours). Requires an approved professional project on selected area of chemical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CHE 695.

CHE 699 Master's Thesis (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as

Pass/No Pass. Prerequisites: good academic standing and approval of the department head;
prerequisite/concurrent: CHE 695.

CMT Construction Management

CMT 500 Management of Construction Projects (3-0-3).

Covers both the fundamental concepts and the contemporary applications of construction management. Covers construction contracts, bidding, delivery methods, construction funding, changes, claims, disputes, productivity, ethics and safety. Covers the development of project execution plans. Utilizes digital data communication tools and software to manage construction projects. Provides the opportunity to simulate real-life construction management problems and apply acquired skills in their solution through case studies and team projects. Prerequisite: admission to the MSCM program.

CMT 510 Construction Automation (3-0-3).

Introduces automation technology in construction and the built environment, including all stages of the construction project life cycle, design, construction, operation and maintenance. Reviews computer aided engineering and design tools. Evaluates robot oriented design and smart systems integration, assesses modular construction and efficiency techniques, and building management systems. Project-based learning (PBL) techniques are used. Prerequisite: admission to the MSCM program.

CMT 520 Advanced Construction Scheduling (3-0-3).

Covers the application of planning, scheduling and control techniques critical to the success of construction projects, resource allocation and leveling, time-cost optimization, project monitoring, updating and control, stochastic scheduling, contractual implications of construction schedules, analysis of time-related change orders and delays, schedule diagnostics, and advanced use of construction planning and scheduling software. Employs case studies from the construction industry. Prerequisite: admission to the MSCM program.

CMT 600 Cost Analysis and Control (3-0-3).

Discusses different types of estimating techniques in relation to various stages in a construction project. Covers productivity analysis, measurement of progress and techniques of cost control; responsibilities of different personnel in different aspects of cost control; the relationship between the degrees of accuracy of an estimate and the different stages of the construction

project; and cost control, starting from the conceptual stage through the end of construction. Uses case studies to demonstrate the key concepts of cost analysis and control. Prerequisite: admission to the MSCM program.

CMT 610 Building Information Modeling (3-0-3).

Provides a thorough review of the concept of BIM and the development of digital programs principles and processes. Explores benefits, costs, risks and currently unsolved challenges in the area of BIM for developing client-facing integrated project information systems. Introduces Revit Architecture, BIM clash detections, basic technical product modelling and interoperability issues. Explores BIM as a driving force for innovation and sustainability. Prerequisite: admission to the MSCM program.

CMT 620 Construction Project Risk Management (3-0-3).

Covers the application of project risk and procurement planning, monitoring and control techniques critical to the success of construction projects, risk management strategy, risk identification, risk qualitative assessment, risk quantitative assessment, procurement planning, risk response planning, risk and procurement execution process, risk monitoring and control, procurement monitoring and control, closing risk and procurement, and use of risk analysis software. Employs case studies from the construction industry. Prerequisite: admission to the MSCM program.

CMT 630 Construction Contracting (3-0-3).

Covers the set of skills, knowledge and conceptual tools needed to successfully own or manage a construction company, as well as to undertake construction projects. Covers construction company ownership and organization, the bid process, bid documents, construction contracts, bonds and insurance, business methods, project management and administration, and construction ethics. Employs case studies from the construction industry. Prerequisite: admission to the MSCM program.

CMT 640 International Construction (3-0-3).

Covers various topics in international construction, including contracts, financial issues, financing options, cultural differences, legal considerations, negotiation strategies, international trade agreements, and project delivery systems. Uses case studies to supplement the course materials. Prerequisite: admission to the MSCM program.

CMT 650 Sustainable Infrastructure Management (3-0-3).

Covers the following topics: sustainable infrastructure, planning for sustainable

infrastructure projects, environmental and social impact assessment, life cycle assessment, economic and financial analysis, design and construction, asset management, operation and maintenance for infrastructure, smart technologies for infrastructure, risk management and disaster preparedness for critical infrastructure. Prerequisite: admission to the MSCM program.

CMT 660 Sustainable Development and Construction (3-0-3).

Discusses the construction industry within its multinational component. Analyzes the impact of construction activity worldwide and bridges the knowledge gap with sustainable development concepts and national economic indicators. Explains the difference between economic growth and economic development. Addresses the nature of construction projects and its influence on industry. Examines national competitiveness, human capital, labor markets, environmental outlook and future policies. Introduces the industry's importance in improving the human condition. Prerequisite: admission to the MSCM program.

CMT 665 Construction Safety

Management (3-0-3). Covers safety and health concerns in the construction worksite. Concentrates on safety process development and management in construction. Provides a comprehensive background in worksite hazard assessment, safety and health program development, and risk management in the construction industry. Prerequisite: admission to the MSCM program.

CMT 670 Construction Equipment Management (3-0-3).

Covers both the conceptual and quantitative methods in selecting and managing construction equipment. Analyzes various types of construction equipment including earthmoving equipment, lifting and loading equipment, equipment used in concrete and asphalt construction. Covers equipment selection, economic analysis, ownership and operating costs, depreciation, replacement studies. Includes use of simulation to optimize equipment selection. Prerequisite: admission to the MSCM program.

CMT 698 Professional Project

(3 credit hours). Requires completion of an approved professional project on a selected area of construction management. Requires demonstration of the ability to integrate the information and skills accumulated through rigorous written and oral communication. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing

and approval of the program coordinator.

CMT 699 Master's Thesis (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisite: good academic standing and approval of the program coordinator.

COE Computer Engineering

COE 530 Advanced Computer Networks (3-0-3). Focuses on advanced topics in computer networking and performance modeling. Covers the following: performance modeling and simulation, congestion control and quality of service (QoS) techniques, overview of computer networks security, and recent advances in computer networks. Requires undergraduate-level knowledge of computer networks. Prerequisite: approval of the department head.

COE 533 Advanced Computer Architecture (3-0-3). Covers techniques of quantitative analysis and evaluation of modern computing systems. Emphasizes the major component subsystems of high-performance computers: pipelining, instruction level parallelism, memory hierarchies, input/output and network-oriented interconnections. Requires undergraduate course in computer architecture. Prerequisite: approval of the department head.

COE 555 Cyber Security (3-0-3). Covers advanced topics in cyber security, including: information security and risk management, disaster recovery planning, operations security, access control, applied cryptography and public key infrastructure, network security, and laws and regulations in computer security. Requires undergraduate course in networking and computer security. Prerequisite: approval of the department head.

COE 594/COE 694 Special Topic in Computer Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

COE 630 Wireless Networks (3-0-3). Explores advanced concepts in wireless networking and mobile communications. Covers recent technologies and trends in signal propagation, wireless local

area networks, cellular networks, vehicular networks, sensor networks, wireless personal-area networks, low-power wide-area networks, Internet of Things, cognitive radio and mobility management. Requires undergraduate-level knowledge of computer networks. Prerequisite: approval of the department head.

COE 632 Advanced Database Systems (3-0-3). Covers the following advanced topics in database systems: file structures, indexing techniques, query processing and optimization, concurrency control and backup and recovery Extensible Markup Language (XML) databases and languages, and mobile databases and data mining. Covers advanced database concepts such as parallel and distributed databases, transaction management, commit protocols and replicated databases. Requires undergraduate course in database systems. Prerequisite: approval of the department head.

COE 633 Advanced Internet Computing and Internet of Things (3-0-3). Covers advanced topics in Internet computing and Internet of Things (IoT) including client-side and web-server technologies, Internet-specific big data technologies, edge analytics and resource off-loading, middleware, IoT architectures and IoT applications of deep learning. Requires basic knowledge of Internet programming. Prerequisite: approval of the department head.

COE 635 Optical Networks (3-0-3). Covers the following concepts in optical communications and networking: single-mode and multi-mode fibers, fiber loss and dispersion, fiber nonlinearities, lasers and optical transmitters, photodetectors and optical receivers, single-channel system design, SONET/SDH networks, WDM components and networks design issues. Requires undergraduate-level knowledge of physics and data communications. Prerequisite: approval of the department head.

COE 636 Advanced Multicore and GPU Computing (3-0-3). Covers software development on multicore systems and many-core systems, including CPUs, GPUs and hybrid systems. Covers performance metrics and performance prediction of parallel algorithms. Examines models of parallel computation and associated software architectures such as master-worker, pipelining, data-flow and streaming. Studies advanced load-balancing mathematical models and algorithms. Uses selected applications as case-studies as well as state-of-the-art software tools such as CUDA and OpenCL. Requires operating systems background and basic Linux/Unix

experience. Prerequisite: approval of the department head.

COE 637 Advanced Machine Learning and Data Mining (3-0-3). Presents the principles of machine learning and data mining. Covers key topics including data preparation and visualization, supervised and unsupervised learning, experimental validation and model interpretation. Examines various techniques from decision trees and rule induction to probabilistic methods and regression as well as association mining and clustering. Studies examples of data mining applications using state-of-the-art software such as R or Weka. Requires undergraduate-level knowledge of statistics and programming. Prerequisite: approval of the department head.

COE 639 Digital Video Compression (3-0-3). Covers the theory and applications of digital video compression. Introduces lossless and lossy compression algorithms. Covers transform coding. Introduces international compression standards such as JPEG and MPEG. Examines digital video transcoding and error resiliency. Requires undergraduate-level courses in statistics and probabilities, and C/C++ programming. Prerequisite: approval of the department head.

COE 695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSCoE program.

COE 698 Professional Project (3 credit hours). Requires an approved professional project on selected area of computer engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: COE 695.

COE 699 Master's Thesis (9 credit hours). Requires completion of complete original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as

Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: COE 695.

CVE Civil Engineering

CVE 520 Sustainable Construction and Methods (3-0-3). Covers several emerging sustainable constructions that have impact on new and existing infrastructures. Introduces design concepts related to advanced composites by combining two or more new materials including advanced concrete material, fiber reinforced material and advanced steel. Covers principles and applications of building and heavy construction methods including safe formwork, sustainable/green concrete and methods for the built environment. Requires undergraduate course on reinforced concrete design or equivalent course. Prerequisite: approval of the department head.

CVE 521 Finite Element Method for Solids and Structures (3-0-3). Introduces the theory and application of modern structural analysis. Emphasizes finite element formulations for truss, frame, plane stress, plane strain and axisymmetric problems. Covers variational principles and isoparametric formulation. Introduces fundamentals of nonlinear analysis concepts. Covers computer modeling and practical analysis of large structural systems. Requires undergraduate courses on theory of structures or mechanical design or equivalent. Prerequisite: approval of the department head.

CVE 522 Advanced Water Resources Engineering (3-0-3). Presents advanced hydrologic and hydraulic principles in planning, modeling and designing storage, irrigation, drainage, flood control and related water resource facilities. Covers the following topics: unsteady and non-uniform flow, conveyance channels and spillways, control and diversion structures, outlet works, energy dissipation, hydraulic machinery, flow measurements and reservoir hydraulics. Employs applicable case studies. Requires background in water resources engineering. Prerequisite: approval of the department head.

CVE 524 Design of Strengthened Concrete Structures (3-0-3). Covers basic mechanics of composites. Introduces different strengthening methods for existing reinforced and prestressed concrete structures. Covers general design philosophies using relevant codes; strengthening of structural elements in flexure, shear, axial and combined loadings; emphasizes the use of computers in the

analysis and design of concrete structures strengthened with composites. Requires undergraduate course on reinforced concrete design. Prerequisite: approval of the department head.

CVE 525 Structural Earthquake Engineering (3-0-3). Introduces structural dynamics of single and multi-degree-of-freedom (SDOF/MDOF) systems. Provides an overview of how earthquake causes and effects are traced from source to structure, as well as features and representations of strong ground motion. Presents pseudo-static and dynamic nonlinear analyses for quantifying the response of structural systems and components. Explores estimating structural damage and hysteretic damping from inelastic deformations and rotations. Covers assessments of structural integrity and stability during seismic events. Introduces performance-based earthquake engineering (PBEE), incremental dynamic analysis (IDA) and structural fragility relationships. Requires background in dynamics, structural analysis and ODE. Prerequisite: approval of the department head.

CVE 526 Advanced Structural Steel Design (3-0-3). Covers behavior and design of connections and members used in steel and composite structures including bolted and welded connections under shear and combined forces; simple shear connections, partially restrained and fully restrained moment connections; composite beams, composite columns, and built-up plate girders. Introduce seismic provisions for design of steel structures. Requires background in structural steel design. Prerequisite: approval of the department head.

CVE 527 Optimization Techniques for Civil Engineering Systems (3-0-3). Introduces operations research (OR) techniques and their applications in civil engineering systems. Focuses on network problem, transportation models, formulation of transportation models, formulation of standard assignment problems, and shortest path models. Includes the use of software packages for solving Operations Research problems. Prerequisite: admission to the MSCE program.

CVE 531 Dynamics of Machine Foundations (3-0-3). Introduces industrial machines, dynamic loads on foundations and types of foundations for industrial machines. Reviews major laboratory and field tests for evaluation of dynamic properties of soils. Introduces calculation of stiffness and damping coefficients for vertical, horizontal and coupled modes of

vibrations. Covers design of shallow and deep foundations of vibrating machines and shock producing machines, and base isolation systems. Prerequisite: admission to the MSCE program.

CVE 551 Wastewater Treatment (3-0-3). Covers wastewater characterization; different stages in wastewater treatment; preliminary, primary, secondary and tertiary treatment of wastewater; sludge treatment and disposal; small wastewater treatment systems; ecological wastewater treatment systems; and site visits to wastewater treatment plant(s). Prerequisite: admission to the MSCE program.

CVE 572 Satellite Remote Sensing (3-0-3). Covers the concepts of satellite remote sensing, spectral reflectance, electromagnetic radiation, aerial photography, image interpretation and analysis, image enhancement, land observation satellite systems, filtering, image rectification, land use/land cover mapping, and examples of case studies in civil engineering and urban planning. Prerequisite: admission to the MSCE or MUP programs.

CVE 594/CVE 694 Special Topic in Civil Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

CVE 620 Advanced Construction Scheduling (3-0-3). Covers the following topics: application of advanced planning and control techniques critical to the success of construction projects, advanced resource allocation and leveling, time-cost optimization, project monitoring, updating and control, stochastic scheduling, contractual implications of construction schedules, analysis of time-related change orders and delays, schedule diagnostics, and advanced use of construction planning and scheduling software. Employs case studies from the construction industry. Requires background in project estimating, planning and control or equivalent. Prerequisite: approval of the department head.

CVE 621 Analysis and Design of Tall Buildings (3-0-3). Develops design strategies for tall buildings. Covers the following topics: structural analysis of tall buildings subjected to gravity and lateral loads; wind and earthquake loads determination based on design codes; differential shortening effects and column length corrections; stability of tall buildings and P-Delta effects. Introduces wind-tunnel techniques,

progressive collapse resistance design and structural fire resistance design. Emphasizes the use of computer methods and modeling techniques for tall buildings. Requires background in reinforced concrete and structural steel design. Prerequisite: approval of the department head.

CVE 622 Physical and Chemical Processes in Water Treatment (3-0-3). Explores theoretical and engineering aspects of chemical and physical phenomena and processes applicable to the removal of impurities from water. Includes advanced analysis and design of water treatment processes. Covers the following topics: mixing, mass transfer, chemical kinetics, oxidation-reduction, separation processes, disinfection, emerging contaminants and water reuse. Requires background in environmental engineering including water treatment. Prerequisite: approval of the department head.

CVE 623 Advanced Transportation Planning Techniques (3-0-3). Presents an overview of both theoretical and applied issues in planning transportation systems. Focuses on everyday planning-oriented problems associated with development and project evaluation issues and techniques with emphasis on the development, calibration and validation of master transportation plans and traffic impact study analysis. Covers engineering economics and procedures for traffic impact studies. Prerequisite: admission to the MSCE program.

CVE 624 Advanced Geotechnical Engineering (3-0-3). Covers advanced field investigation techniques and their use in geotechnical engineering problems. Includes topics of excavation support and retention systems, advanced cases of shallow and deep foundation, foundation for special cases, and tests for deep foundation under static vertical and lateral loads. Requires undergraduate courses in soil mechanics and foundation engineering. Prerequisite: approval of the department head.

CVE 625 Highway Bridge Design (3-0-3). Presents a modern approach to highway bridge design based on the American Association of State Highway and Transportation Officials (AASHTO), load factor resistance design (LRFD), and bridge design specifications. Covers identification of bridge components, classification of bridges, bridge loading, structural analysis, influence lines and envelopes, deck slab design, composite steel girder design and prestressed concrete girder design. Requires background in reinforced concrete and structural steel design. Prerequisite: approval of the department head.

CVE 626 Bridge Management Systems (3-0-3). Presents an approach to performance-based assessment of highway bridges for planning, programming and overall management of a transportation network. Course topics include bridge management modules with emphasis on inspection, structure condition assessment, load rating and decision making process. Requires background in reinforced concrete and structural steel design. Prerequisite: approval of the department head.

CVE 651 Wastewater Treatment Process Control (3-0-3). Presents bacterial growth kinetics in wastewater, biochemical oxygen demand (BOD) tests for wastewater treatment, design and control of activated sludge process, determination of wastewater treatment process performance criteria and monitoring methods, and aeration in water. Prerequisite: admission to the MSCE program.

CVE 663 Traffic Flow Theory (3-0-3). Covers the fundamental properties of traffic flow: microscopic and macroscopic flow, microscopic and macroscopic speed, microscopic and macroscopic density, demand-supply analysis, capacity analysis, traffic stream models, network flow, shockwave analysis, queuing analysis and control of congested systems. Requires background in traffic engineering. Prerequisite: approval of the department head.

CVE 695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSCE program.

CVE 698 Professional Project (3 credit hours). Requires an approved professional project on selected area of civil engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CVE 695.

CVE 699 Master's Thesis (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a

faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: CVE 695.

ELE Electrical Engineering

ELE 540 Principles of Digital Communications (3-0-3). Reviews probability concepts and random processes. Covers representation of bandpass signals and systems, baseband and bandpass digital modulation schemes, memory-less and memory-based modulation schemes, power spectral density calculations, optimum receiver design and performance analysis over AWGN, and optimum detection in presence of uncertainty. Prerequisite: approval of the department head.

ELE 542 Applied Electromagnetics (3-0-3). Explores concepts and applications of Maxwell's equations for electromagnetism. Topics covered include: Maxwell's equations; boundary conditions; power flow; wave equation and its solutions; plane wave propagation and polarization; reflection and transmission; auxiliary potentials; theorems of field calculations (uniqueness, image, reciprocity, duality, and equivalence); transmission lines; waveguides; antennas and radiation. Prerequisite: admission to the MSEE program.

ELE 543 Analog Microelectronics (3-0-3). Covers analysis and design of advanced electronic circuits. Explores topics such as electronic device modeling, processing and layout, current mirrors, noise analysis, voltage reference and regulators, Opamp design, OTAs and filter circuits. Prerequisite: admission to the MSEE program.

ELE 544 Advanced Signal Processing (3-0-3). Explores topics such as signal representation and system response, signal sampling and reconstruction, convolution, transfer function and system characteristics, digital filter design and realization, adaptive filters, spectral analysis, multirate signal processing, MMSE filters and array signal processing. Prerequisite: admission to the MSEE or MSBME or MSMTR programs.

ELE 545 Power System Operation and Control (3-0-3). Introduces economic operation, and unit commitment of power systems. Covers modeling of system components and control equipment, automatic control of generation and frequency regulation,

and aspects of interconnected operation. Prerequisite: admission to the MSEE program.

ELE 546 Advanced Power

Electronics (3-0-3). Covers operation and modeling of power electronic devices, DC/DC converters, single phase and three phase inverters, different type of PWM techniques, theory of space transformation, space vector representation and space vector PWM inverters. Includes DSP based control and implementation of power converters and power electronics applications in renewable energy systems. Prerequisite: admission to the MSEE program.

ELE 547 Distributed Energy

Resources in Smart Grids (3-0-3).

Covers operation, modeling, economics, and planning of different distributed energy resources such as dispatchable generation systems, photovoltaic energy systems, wind energy systems, energy storage systems, and electric vehicles. Includes introduction to smart grid, microgrids, and demand response concepts. Prerequisite: admission to the MSEE program.

ELE 594/ELE 694 Special Topic in Electrical Engineering

(1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

ELE 641 Advanced Microwave

Engineering (3-0-3). Explores concepts related to microwave engineering and its applications. Topics covered include: transmission-line theory; microstrip lines; Smith charts; impedance matching; microwave network analysis; microwave amplifiers; microwave filters; power dividers; radar systems and microwave radiometry; microwave measurements and calibration; simulations using CAD tools. Prerequisite: admission to the MSEE program; prerequisite/concurrent: NGN 500.

ELE 642 Digital and Wireless

Communications (3-0-3). Covers the following topics: signal design for communications over band-limited channels, optimum and suboptimal receiver structures for band-limited channels, adaptive equalization, communications over mobile radio channels with fading and mitigation techniques against channel fading. Prerequisite: ELE 540.

ELE 644 Dynamics and Control of

Electrical Drives (3-0-3). Covers dynamic models of DC and AC machines, torque and speed control of DC motors, PWM inverters, scalar control, field oriented control, and

direct flux/torque control of induction motors. Prerequisite: admission to the MSEE program.

ELE 645 High Voltage Engineering

(3-0-3). Covers the following topics: destructive and non-destructive testing of power system components; breakdown mechanism of gas, liquid and solid insulating materials; generation and measurement of high-voltage AC; and DC and impulse voltages and non-destructive testing such as surface and internal discharges, capacitance and loss factor. Prerequisite: admission to the MSEE program.

ELE 646 Radio Frequency

Integrated Circuits (3-0-3).

Covers design of advanced radio frequency integrated circuits as it applies to contemporary electronic systems. Includes RFIC systems and architectures, low-voltage MOS, transceiver complex circuits, RF signal processing, RF power amplifiers and linearization, PLL topologies, frequency synthesizers, phase noise analysis, layout considerations, packaging of RF circuits and design case studies. Use of software tools and analytical techniques for circuit design and simulations. Prerequisite: admission to the MSEE program.

ELE 647 Digital Protection of Power

Systems (3-0-3). Covers digital relay hardware, phasor computations, frequency estimation techniques, digital protection algorithms, fault location techniques, signal processing and artificial intelligence for relays, relay testing, relay modeling and simulation. Prerequisite: admission to the MSEE program.

ELE 648 Pattern Classification

(3-0-3). Covers description of the elements of pattern recognition systems, Bayesian decision theory and parameter estimation, maximum likelihood estimation, linear discriminant analysis, dimensionality reduction techniques, neural networks, clustering techniques, and Gaussian Mixture Models. Provides a description of decision trees, support vector machines and Hidden Markov Models. Prerequisite: approval of the department head.

ELE 649 Power System Transients

(3-0-3). Covers transient analysis, travelling waves on transmission lines, lightning and switching surges, insulation coordination, grounding and surge protection devices. Prerequisite: admission to the MSEE program.

ELE 695 Seminar (1-0-0).

Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies

that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSEE program.

ELE 698 Professional Project

(3 credit hours). Requires an approved professional project on selected area of electrical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: ELE 695.

ELE 699 Master's Thesis

(9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis examining, and a final defense to the advisory committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: ELE 695.

ESM

Engineering Systems Management

ESM 520 Management for Engineers

(3-0-3). Explores a full range of integrated topics for individuals in both public and private sector organizations who coordinate and manage engineering projects, personnel, resources and systems. Covers human resources, communication skills, leadership styles, team building, the basics of marketing management and financial management, and the management needs in multicultural and multinational environments. Integrates the core management principles with engineering experiences using case studies and applications. Prerequisite: admission to the MSEM program.

ESM 535 Introduction to Management Science (3-0-3).

Introduces deterministic and stochastic operations research methods including formulation and applications of linear network and integer problems. Covers basic probability concepts, distributions, forecasting methods, Markov chains and simulation. Emphasizes problem formulation, solution methods using suitable software and interpretation of results. Uses various optimization, statistics, and simulation software to solve problems and case studies.

Prerequisite: admission to the MSEM program.

ESM 570 Project Management (3-0-3). Covers the elements of project management critical to the success of engineering projects: project management framework, strategic management and project selection, scope management, time management, cost management, time-constrained scheduling, resource-constrained scheduling, risk management, and project monitoring and control. Integrates and clarifies the principles and tools through case studies from a variety of disciplines. Prerequisites: admission to the MSEM program and approval of the program coordinator.

ESM 575 Advanced Engineering Economy (3-0-3). Covers the theory and application of advanced engineering economy principles and methods. Studies the effects of inflation, depreciation and taxes, cost estimation, sensitivity analysis, risk and uncertainty, capital budgeting, multi-attribute decision making, advanced asset replacement analysis and real option analysis. Includes case studies and a term project related to the topic. Prerequisites: admission to the MSEM program and approval of the program coordinator.

ESM 594/ESM 694/ESM 794 Special Topic in Engineering Systems Management (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

ESM 600 Research Methodology (3-0-3). Introduces the methodology of scientific research including research problem formulation and justification, critical literature review, definition and formulation of research questions, and selection research tools and methods. Covers quantitative, qualitative and mixed research methods; internal and external construct validity and reliability issues; introduction to quasi-experimental design and case study methodologies; effective academic writing using various style guidelines; delineation of research directions for the future, ethics, academic fraud and plagiarism. Prerequisite: admission to the MSEM program.

ESM 615 Big Data and Business Analytics (3-0-3). Introduces application of descriptive analytics, data mining and predictive analytical methods to address business problems. Covers analytical methods including nearest neighbor, classification trees, naïve Bayes, linear regression, logistic regression, support vector machines, and TFIDF. Shows how to apply model evaluation techniques including cross-

validation, attribute selection and tree pruning, and profit and AUC curves. Discusses alignment of data science applications to corporate strategy. Prerequisite: ESM535.

ESM 625 Enterprise Resource Planning Systems (3-0-3). Provides an overview of ERP systems and their implementation in practice. Covers various applications within the enterprise framework such as procurement, orders fulfillment, production, inventory management and material planning. Includes real examples on ERP implementation and hands-on experience using an ERP software. Prerequisite: admission to the MSEM program.

ESM 630 Quality Engineering and Management (3-0-3). Covers the techniques and applications of quality control and management. Includes total quality management, quality award models, service quality, statistical process control charts, process capability analysis, Taguchi methods, and six sigma. Includes case studies from both the service and industrial sectors. Prerequisite: ESM 535.

ESM 634 Advanced Modeling and Simulation (3-0-3). Covers advanced principles associated with systems modeling and simulation using contemporary software tools. Includes topics such as problem formulation, queuing theory, Markov chain, discrete event simulation modeling and analysis of alternatives and selection of the optimum solution. Prerequisite: ESM 535.

ESM 636 Human Resources Management for Engineers (3-0-3). Covers human resource planning processes, tools and techniques, job specification and methods of job analysis for engineering organizations. Describes the requirements and ethical context of HRM methods of recruitment, evaluation, career training and development programs, salary systems and employee benefits, HR information systems and international HR issues. Integrates HR management practices and methodologies with engineering experiences. Prerequisite: ESM 520.

ESM 638 Decision Analysis (3-0-3). Covers the theory and practice of analyzing decisions in the public and private sectors. Covers multiple objectives, influence diagrams, decision trees, sensitivity analysis, probability assessment, multi-attribute utility and human biases. Describes practical applications through real-world systems model building. Uses decision analysis software and spreadsheets to solve real-life problems through case studies. Prerequisite: ESM 535.

ESM 640 Supply Chain Management (3-0-3). Explores key issues related to the design, planning and operation of supply chains. Covers supply chain structure, supply chain performance metrics, network design and facility location in a supply chain. Discusses aggregate planning, planning and managing inventory in a supply chain, transportation, pricing and revenue management, green supply chain and supply chain risk management. Prerequisite: ESM 535.

ESM 644 Financial Management for Engineers (3-0-3). Provides engineers with financial management knowledge necessary for value-added decision making. Covers structure and analysis of financial statements, corporate valuation, capital structure, securities analysis and financial markets, and forecasting financial markets. Includes practical financial management case studies in technical organizations. Prerequisite: ESM 575.

ESM 660 Legal Aspects of Engineering (3-0-3). Introduces the fundamentals of the UAE legal system, rules of evidence, property laws (both tangible and IP), technology transfer regulations, product liability, and professional liability for engineers. Discusses partnering among organizations, business and government agencies, labor laws, international construction contracts, FIDIC, and insurance and surety industry regulations. Covers strategies for avoiding or terminating litigation, alternative dispute resolution techniques such as mediation, arbitration and mock trials, in addition to claims presentation and cost evaluation. Prerequisites: ESM 570 or approval of the program coordinator.

ESM 670 Project Risk Management (3-0-3). Focuses on the process of risk management including risk management planning; identifying risks; qualitative risk analysis; quantitative risk analysis; risk response planning and monitoring and control. Covers the tools and techniques for managing risks associated with various stages of the project life cycle. Provides a methodology for a systematic approach to risk management in addition to the related ISO standards. Prerequisite: ESM 570.

ESM 675 Project Procurement Management (3-0-3). Covers elements of structured procurements, including procurement planning, competitive solicitations, negotiations, legal considerations of procurement, contract management and administration, dispute resolution, and procurement ethics. Discusses the standards of ISO 20400: sustainable procurement and ISO 44001:

collaborative business relationship management systems. includes an in-depth explanation of the roles of the procurement professionals on the project team. Prerequisite: ESM 570.

ESM 685 Capstone Course in Engineering Systems Management (3-0-3). Presents an opportunity to showcase accumulated theoretical and the practical knowledge in ESM. The general intent of the engineering capstone is to demonstrate knowledge of the integrative aspects of ESM tools through rigorous written and oral communication of case analysis and a team project. Uses case studies to demonstrate the integrative aspects of ESM applications. Prerequisite: ESM 600.

ESM 698 Professional Project (6 credit hours). Requires completion of an approved professional project on a selected area of engineering management and systems engineering. Requires demonstration of the ability to integrate the information and the skills accumulated through rigorous written and oral communication. A final report and presentation must be submitted to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the program coordinator.

ESM 699 Master's Thesis (6 credit hours). Requires completion of original research work in a multidisciplinary area in engineering systems management. Requires demonstration of the ability to integrate the information and the skills accumulated through rigorous written and oral communication. The thesis is completed under the supervision of a faculty member serving as the thesis advisor, and a final defense to the examining committee is required. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the program director.

ESM 701 Research Methods (3-0-3). Equips PhD students with a good understanding of qualitative and quantitative research methods at both conceptual and applied levels to prepare them to undertake substantiated and rigorous scholarly research work, particularly dissertation and research papers. Familiarizes students with basic tenets of research, knowledge, methods, and success in research. Includes problem formulation, literature review, hypotheses formulation, proposal preparation, and empirical testing techniques. Enables students to formulate empirical research using experimental or descriptive research approaches. Utilizes commonly used statistical models such as nonparametric association and correlation measures

and Analysis of Variance to analyze and interpret actual data. Prerequisites: admission to the PhD-ESM program and approval of the program coordinator.

ESM 702 Multivariate Data Analysis (3-0-3). Discusses techniques for analyzing multivariate experimental and observational data. Provides a working knowledge of several multivariate data analysis techniques to conduct empirical research. Covers exploratory multivariate data analysis, multivariate analysis of variance, multivariate regression analysis, principal components analysis, factor analysis, clustering analysis, and structural equation modeling. Utilizes commonly used statistical software for data analysis, such as Minitab, STATA, and the R free open-source package. Prerequisites: admission to the PhD-ESM program and approval of the program coordinator.

ESM 710 Advanced Decision Marketing Analysis (3-0-3). Provides the necessary theoretical knowledge towards analyzing and making decisions. Covers multiple objectives, influence diagrams, decision trees, risk assessment and quantification, single and multi-attribute utility, techniques for multi-criteria decision making (MCDM) and game theory. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 711 Deterministic Optimization Techniques (3-0-3). Covers deterministic operations research techniques and their underlying theory. Includes advanced topics in large scale optimization, integer programming, non-linear programming, and meta-heuristic optimization techniques. Prerequisites: ESM 701, 702 and consent of the instructor.

ESM 712 Advanced Supply Chain Management (3-0-3). Covers leading edge topics in global supply chain management including latest supply chain strategies, strategic sourcing, technological advances in supply chain management, supply chain risk management approaches, sustainable supply chain, ethical issues in supply chain management, and humanitarian supply chain. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 713 Supply Chain Modeling (3-0-3). Explores how optimization techniques can support decisions in the design, planning and operation of a supply chain. Covers deterministic and stochastic models in supply chain management. Includes advanced topics in supply chain design, supply chain coordination, closed loop supply chains, supply chain risk and sustainability. Prerequisites: ESM 711 and consent of the instructor.

ESM 714 Modeling and Analysis of Logistics Systems (3-0-3). Discusses the modeling and analysis of logistics and physical distribution systems. Includes location and design of facilities, tactical and operational decisions related to warehousing, management of logistics systems and management of ports operations and container terminals. Prerequisites: ESM 711 and consent of the instructor.

ESM 720 Sustainable Development for Engineers (3-0-3). Covers both the rudimentary and radical concepts of sustainable development and economic growth in a social and environmental context. Discusses, analyzes and evaluates patterns of development. Investigates the impacts of engineering projects in local and international communities via well-structured research questions utilizing theoretical and empirical research techniques. Evaluates contemporary trends in sustainable technology in relation to the different project settings. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 721 Sustainable Development and Global Competitiveness (3-0-3). Introduces students with technical backgrounds to the macro realm of sustainable development, international economics, and urban planning and regeneration. Highlights the role of multinational corporations and mega projects in global competitiveness. Presents the subtle overlap between design patterns, development, and regulations in sustainable development projects. Deliberates the latest UN sustainable development goals and their expected aftermath in the international setting. Uses case studies and research workgroups to demonstrate the comprehensive link between economic growth and social progress. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 722 Sustainable Analytics and Resource Management (3-0-3). Focuses on sustainability data analyses and covers current and innovative methodologies in optimal energy and water resource management in construction projects. Explores data-driven resource management techniques during design, construction, and operation. Utilizes regression analysis, economic impact analysis, and feasibility studies in answering research questions through a series of case studies and projects. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 723 The Living Building (3-0-3). Focuses on the Living Building Challenge performance areas. Introduces the "beyond regenerative"

concept of an organic, living building envelope for commercial and residential construction. Explains the core construction practices in relation to net zero energy and net zero water techniques. Presents traditional and renewable grid balance techniques through a series of projects and seminars. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 724 Sustainable Ecosystems (3-0-3). Covers integrated ecological planning and sustainable land management in coastal ecosystems. Discusses fundamental concepts and practical quantitative problem-solving techniques dealing with contamination, environmental toxicology, and ecosystem turbulence due to manmade construction projects. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 725 Programs and Portfolio Management (3-0-3). Presents a view of managing projects from an organizational perspective. Discusses strategic alignment, project and program selection techniques, the role of effectively managing organizational assets through an enterprise project management office as a governance entity, portfolio management and program management. Covers schedule integration, resource management and portfolio risk management. Covers tools such as Analytic Hierarchy Process, Earned Value Management and Monte Carlo Simulation. Uses specific examples and case studies to explore and apply practices to create and manage portfolios of programs and projects to efficiently leverage organizational assets. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 730 Tools for Big Data (3-0-3). Covers software tools for manipulating, storing and analyzing Big Data in various formats like sensor and web logs, videos, speech recordings, images, e-mails, and tweets, etc. Covers the use of R system for data manipulation and for Statistical and Machine Learning. Explains the use of MapReduce/Hadoop for scalable data processing in conjunction with Hive/Pig. Introduces NoSQL databases like MongoDB and CouchDB. Includes techniques for processing streaming real-time data. Discusses tools for visualizing large data and integration strategies for various Big Data tools. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 731 Smart Cities Infrastructure and Services (3-0-3). Identifies and investigates smart cities major infrastructure pillars. Discusses smart cities physical layer and enabling technologies, developing

smart cities conceptual model and multi-criteria assessment transformation based on SWOT analysis. Studies smart cities resources and services such as smart energy, smart buildings, smart transportation, smart water, smart waste, smart physical safety and security, smart health care and smart education. Explores smart cities social impact and ethical issues. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 732 Networking Architectures for Smart Cities (3-0-3). Introduces communication networks for smart cities. Discusses architectures, models, protocols and the emerging new Internet of Things (IoT) paradigm. Addresses the principles of flow and congestion control, addressing, signaling switching and routing, multiple access approaches, convergence sublayer solutions and standards, physical layer technologies, and network security. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 733 Electronic, Social and Sensor Network Applications for Smart Cities (3-0-3). Covers the foundations of electronic, social and sensor network applications including infrastructure, services and application layers with special emphasis on sensors and mobile devices. Explores harvesting and processing techniques for large-scale near real-time data from smart cities. Discusses the role of Geographical Information Systems (GIS) and associated spatial analysis. Covers design of networks for capturing resource consumption and mobility patterns. Discusses the use of statistical and big data techniques to improve city services based on harvested data, and business models for sustainable deployment of smart city applications. Covers Ethics of data-driven urbanism. Includes case studies in selected areas of learning, recreation, energy, production, and health. Prerequisite: ESM 730.

ESM 734 Trust and Security for Smart Cities (3-0-3). Covers advanced security and trust concepts and implementation in wired and wireless computer networks and computer systems especially in the context of smart cities. Includes malware defenses, impact of channel fragility, node mobility, cooperative functionality, and resource constraints on security and trust at the different layers of the Internet protocol stack. Discusses special topics in privacy of personal data such as mobility patterns, resource consumption (food, water, energy) and individualized health profiles. Prerequisite: ESM 731.

ESM 740 Advanced Quality Engineering (3-0-3). Covers emerging issues with quality engineering and management such as innovation, happiness, and process re-engineering with a focus on both quantitative and qualitative analytical skills essential to conducting research. Examines organizational development and deployment of service management systems utilized in achieving service quality. Includes analysis of business case, enablers, and detractors of Six Sigma and quality awards deployment in both manufacturing and service sectors through critical articles reviews. Prerequisites: ESM 701, ESM 702 and consent of instructor.

ESM 741 Organizational Performance Management (3-0-3). Explores traditional and contemporary Performance Management (PM) frameworks and models at the organization level, unit level, and the individual level. Focuses on designing PM systems that integrate strategy, execution, methodologies, and risk. Details the design of the added-value PM systems including goals and objectives, the operational process, support process, evaluation and control, and organization behavior. Covers PM measurements system's design and analysis using the various Key Performance Indicators, Key Risk Indicators, and Key Control Indicators. Includes PM implementation pitfalls and Critical Success Factors. Prerequisites: ESM 701 and ESM 702.

ESM 742 Strategic Human Resources Management (3-0-3). Explores how Human Resources Management (HRM) policies and procedures can add value to an organization. Covers state-of-the-art HRM approaches to become a strategic partner in improving resource utilization and help companies achieve their goals. Includes the processes of developing and implementing human resources (HR) strategies to promote a healthy social and psychological environment for the workforce. Discusses the link between HRM and outcomes at the firm and individual level; the roles and capabilities of the HR department and of individual HR professionals; and HRM in multinational corporations, comparative HRM, and global mobility. Examines the particularities of HRM in the public sector and in the GCC countries. Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 743 Strategic Management (3-0-3). Covers analysis of internal and external environments of an organization. Explores the development of appropriate strategies, objectives, and key performance indicators (KPIs). Prerequisites: ESM 701, ESM 702 and consent of the instructor.

ESM 790 Qualifying Examination (0-0-0). Includes written and oral parts to test breadth of knowledge, understanding of fundamentals, and ability to perform independent research work in an engineering systems management specific area. Can only be repeated once with approval of the VPGS. Graded as Pass/Fail. Prerequisites: completion of 12 credit hours including ESM 701 and ESM 702, good academic standing and approval of the program coordinator.

ESM 795 Doctoral Seminar (1-0-0). Provides a unique discussion forum for interaction with a diverse group of faculty from the different departments of the College of Engineering, as well as outside presenters. Encompasses a wide variety of pertinent topics from different ESM research areas. Graded as Pass/Fail. Prerequisite: admission to the PhD-ESM program.

ESM 799 Dissertation (a minimum of 24 credit hours). Includes the preparation, presentation and defense of the research proposal, as well as the write-up, presentation and defense of the dissertation. Graded as Pass/No Pass. Prerequisites: Qualifying Examination, DAC appointment and approval of the program coordinator.

MCE Mechanical Engineering

MCE 540 Advanced Dynamics (3-0-3). (Formerly MCE 650). Covers the following topics: kinematics and kinetics of three-dimensional rigid bodies and multibody systems, momentum and energy methods, and holonomic and non-holonomic constraints. Introduces Hamilton's principle for holonomic systems, Lagrange's equations, relativistic dynamics, central force motion, Euler equations of motion, Hamilton's equations and phase space, and the Hamilton-Jacobi equation. Requires undergraduate background in dynamics. Prerequisite: approval of the department head.

MCE 550 Mechanical Systems Design (3-0-3). Introduces the design methodology applicable to mechanical systems. Includes the following topics: specialized design methods such as design for manufacture, design for reliability and life cycle design; applications of optimization techniques; and finite element analysis to solve typical mechanical engineering problems. Prerequisite: admission to the MSME program.

MCE 551 Advanced Materials Science and Engineering (3-0-3). (Formerly MCE 651). Explores advanced topics in materials science. Covers the

following topics: fatigue, fracture, experimental techniques, nondestructive evaluation, inelastic behavior, and the effect of processing and environmental conditions on mechanical properties. Requires undergraduate background in materials science or equivalent. Prerequisite: approval of the department head.

MCE 552 Modeling and Simulation of Mechanical Systems (3-0-3). Addresses the importance of modeling and simulation and the interface between computer models and actual processes. Covers the formulation of systems of equations representing linear and non-linear mechanical systems behavior, and black box modeling of mechanical systems such as artificial intelligence schemes. Employs commercial software applied to the different fields of mechanical engineering. Prerequisite: admission to the MSME program.

MCE 553 Advanced Thermodynamics (3-0-3). Explores advanced thermodynamics used in engineering applications. Covers phase transition and stability, multi-component and multi-phase systems, chemical and kinetics. Explains the essential concepts of quantum mechanics, classical statistical mechanics, potentials of statistical thermodynamics, micro-states and macro-states, entropy-generation minimization and the equilibrium particle distribution, corrected Maxwell-Boltzmann statistics, ideal monatomic and diatomic gases, imperfect gases, quantum analysis of internal energy modes, and statistical modeling of thermodynamics. Prerequisite: admission to the MSME program.

MCE 554 Advanced Fluid Dynamics (3-0-3). (Formerly MCE 654). Examines the conservation equations for viscous fluids and Navier-Stokes equations. Covers advanced topics such as Stokesian flow, boundary layer concept, laminar boundary layer equations and methods of solutions, theory of stability of laminar flows and introduction to turbulent flow. Prerequisite/concurrent: NGN 500.

MCE 594/MCE 694 Special Topic in Mechanical Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

MCE 652 Advanced Topics in Manufacturing (3-0-3). Covers quantitative analysis and modeling of advanced manufacturing processes including high-speed machining, machining by abrasion, electrochemical and thermal erosion for ferrous and

non-ferrous alloys. Introduces contemporary manufacturing topics including additive manufacturing, micro/nano manufacturing and manufacturing process sustainability. Requires undergraduate background in materials science or equivalent. Prerequisite: approval of the department head.

MCE 653 HVAC Systems Design (3-0-3). Aims at developing a solid background in the practical design and analysis of HVAC systems. Covers building load using transfer functions and energy estimation methods, renewable energy technologies (solar, wind, geothermal, photovoltaics) and their applications on HVAC systems, solar thermal energy and wind energy conversion systems, passive design strategies, HVAC system controls, thermal energy storage, absorption chillers, energy efficiency for buildings, and design of large commercial and industrial HVAC systems w/without renewable energy.

MCE 655 Advanced Measurements and Design of Experiments (3-0-3). Explores advanced experimental methods used in mechanical engineering systems. Covers the following topics: advanced measurement techniques in fluids, solids and motion variables; instrumentation; data acquisition; error and noise reduction; experimental data processing; error analysis; and design of experiments. Prerequisite: MCE 552.

MCE 695 Seminar (1-0-0). Introduces research methodologies. Explores the planning and realization of research projects. Examines current research issues in engineering using case studies that emphasize the utilization of applied research in designing engineering systems. Graded as Pass/Fail. Prerequisite: admission to the MSME program.

MCE 698 Professional Project (3 credit hours). Requires an approved professional project on selected area of mechanical engineering for completion of the MS degree. Includes development of the project concept, investigation of needs, initial data collection and assembly of written and field materials necessary to conduct a professional project, as well as exploration of alternative means to conduct the project. Requires a report and final presentation to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: MCE 695.

MCE 699 Master's Thesis (9 credit hours). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a

faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the department head; prerequisite/concurrent: MCE 695.

MTR **Mechatronics Engineering**

MTR 501 Introduction to Mechatronics (2-3-3). Covers applied mechanical and electrical engineering principles used in mechatronics products. Introduces the modeling and analysis of electromechanical systems, hydraulic systems, signal processing and conditioning, power amplifiers and switches. Develops design skills in system integration using mechanisms, electronic devices, CAD tools, and information technology in order to create, test and verify mechatronics systems. Includes laboratory projects. Graded as Pass/Fail. Prerequisite: admission to the MSMTR program.

MTR 520 Embedded Systems for Mechatronics (2-3-3). Explores microprocessor and microcontroller hardware and software architectures, microcontroller programming and interfacing with real-time mechatronic systems. Introduces new microcontroller based devices and design of stand-alone embedded systems for mechatronics products. Includes labs and course projects. Requires basic background knowledge of C programming and digital electronics. Prerequisite: approval of the program coordinator.

MTR 540 Advanced Control Systems (3-0-3). Covers state variable models, design of control systems in state space, full state observers, reduced order observers, digital compensator design, servomechanism identification and design, and design of continuous and digital control systems using modern analytic and computer design. Requires undergraduate background in linear control systems or equivalent. Prerequisite: approval of the program coordinator.

MTR 550 Robotic Systems (2-3-3). Covers homogenous coordinates and transform representations, kinematic chains, Forward and Inverse Kinematics, differential kinematics: Jacobian computation, singular configurations, Motion planning in robotics, and robot control strategies. Prerequisite: admission to the MSMTR program.

MTR 594/MTR 694 Special Topic in Mechatronics Engineering (1 to 4 credit hours). Presents a theoretical or practical topic proposed

by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/Tech fee may apply.

MTR 610 Automated Manufacturing Systems (3-0-3). Describes and demonstrates automated machine tools and machining cells. Covers machining center configuration and operation, machine tool controller, machining code generation, in-process sensing and control, cell controllers and system simulation. Prerequisite: admission to the MSMTR program.

MTR 615 Artificial Intelligent Systems for Mechatronics (3-0-3). Covers artificial intelligent systems for mechatronics engineering, concepts of expert and fuzzy logic decision-making systems, fuzzy logic modeling and control, artificial neural networks, genetic algorithms, decision trees and applications. Prerequisite: admission to MSMTR program.

MTR 640 Nonlinear and Intelligent Control Systems (3-0-3). Introduces nonlinear systems, Lyapunov stability theory, linearization by high gain and sliding modes, nonlinear observers, Lyapunov design methods, feedback linearization, and intelligent control strategies, such as neural networks and fuzzy logic. Prerequisite: MTR 540.

MTR 644 Electric Drives for Mechatronics Systems (3-0-3). Provides an overview of modern electrical machines in terms of their dynamic and steady-state performance. Covers power electronic conversion and modulation principles, magnetic systems, dynamic models of AC and DC machines, and pulse-width modulated power electronic converters. Includes case studies with practical current control techniques. Prerequisite: MTR 501.

MTR 650 Applied Linear Estimation (3-0-3). Introduces linear algebra and presents a review of probability and stochastic processes. Introduces deterministic and stochastic least squares estimators. Defines the innovation process and its properties. Introduces state space models, Weiner-Kalman filters for scalar and vector processes as well as smoothed estimators, and non-linear parameter estimation. Introduces fast array algorithms. Includes a project that applies the estimation algorithms on mechatronics application case studies. Prerequisite: admission to the MSMTR program.

MTR 670 Adaptive Control Systems (3-0-3). Reviews state space modeling of dynamic systems. Discusses linear time invariant (LTI) system stability, solving for system trajectory, observability, controllability and state

feedback control. Introduces stability and solution of linear time-varying (LTV) systems. Covers Lyapunov stability theory, concepts of invariant sets, stability of non-autonomous systems, LaSalle extensions and Barbalat's lemma. Covers direct and indirect model reference adaptive control (MRAC). Explores robustness of MRAC and disturbance rejection. Requires basic background knowledge of control systems. Prerequisite: approval of the program coordinator.

MTR 690 Mechatronics Design (2-3-3). Covers actuators and sensors modeling and presents different types of modeling and simulation of mechatronic systems. Requires individual and team projects involving the development and integration of hardware and software into a smart system, which includes sensing, processing and controlling functions. Prerequisite: MTR 520; prerequisite/concurrent: MTR 695.

MTR 695 Mechatronics Seminar (1-0-0). Explores project planning development and realization, case studies of engineering systems design and realization, and current research topics in mechatronics engineering, including areas such signal processing, image processing, control, robotics, intelligent systems, computer vision and MEMS. Prerequisite: approval of the program coordinator.

MTR 699 Master's Thesis (9 credit hours). Requires completion of extended and original research work on a topic related to elements of computing, mechanics, electronics and intelligence. Graded as Pass/No Pass. Prerequisites: good academic standing and approval of the program coordinator; prerequisite/concurrent: MTR 695.

NGN **Engineering**

NGN 500 Advanced Engineering Mathematics (3-0-3). Covers analysis of linear and nonlinear physical systems described by ODEs and PDEs, Sturm-Liouville problems, tensors, partial differential equations of mathematical physics (wave, diffusion, Laplace, Poisson Equations), transform and integral methods for solving boundary and initial value problems for ordinary and partial differential equations. Prerequisite: admission to the MSBME or MSChE or MSCE or MSCoE or MSEE or MSME or MSMTR programs.

NGN 505 Random Variables and Stochastic Processes (3-0-3). Covers the following topics: random variables, transformation of functions of random variables, vectors of random variables, random processes:

correlation and power spectral density, LTI systems with stochastic signals, Markov chains and queuing theory. Prerequisite: admission to the MSBME or MSCE or MSCoE or MSEE or MSME programs.

NGN 509 Computational Methods for Engineers (3-0-3). Covers numerical error analysis; solving system of linear and nonlinear algebraic equations; nonlinear regression and optimization techniques; numerical solutions of ordinary and partial differential equations; applications of numerical methods for engineering problems using MATLAB. Prerequisite: admission to the MSBME or MSChE or MSCE or MSCoE or MSEE or MSME programs.

Special Topic Courses

Special Topic (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 594 or 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the college during registration.

School of Business Administration

Courses with titles in italic are available to undergraduate students in the Accelerated Master's Program (AMP). Course prerequisites must be met. For full details on the AMP, refer to the Accelerated Master's Program section of the AUS Undergraduate Catalog or www.aus.edu/amp.

ACC

Accounting

ACC 510 Financial Accounting for Managers (3-0-3). Focuses on the meaning, analysis and interpretation of financial statements for the purpose of making important managerial and investment decisions. Emphasizes the importance of communication and leadership for the practice of accounting. Graded as Pass/Fail. Prerequisite: admission to the MSA program.

ACC 520 Managerial Accounting (3-0-3). Explains the role of accounting information in facilitating the functions of management. Covers decision making, planning, performance evaluation, budgeting and international transfer prices. Graded as Pass/Fail. Prerequisite: admission to the MSA program.

ACC 530 Auditing for Managers (3-0-3). Introduces external and internal auditing concepts and practices that are relevant to managers as part of the entity's corporate governance apparatus; suitable for those have no background in accounting and auditing. Graded as Pass/Fail. Prerequisite: admission to the MSA program.

ACC 610 Topics in Financial Accounting (3-0-3). Focuses on contemporary financial reporting issues, including development of the conceptual framework as presented by the Financial Accounting Standards Board (FASB), contemporary accounting research and recent financial accounting pronouncements. Examines theories relevant for financial accounting and reporting. Prerequisite: ACC 510.

ACC 611 Auditing and Attestation (3-0-3). Focuses on current developments in auditing and attestation standards as promulgated by the American Institute of Certified Public Accountants (AICPA). Covers international auditing standards promulgated by the International Federation of Accountants (IFAC) as well. Provides preparation for the CPA exam section on Auditing and Attestation. Prerequisite: ACC 530.

ACC 612 Advanced Topics in Managerial and Cost Accounting (3-0-3). Addresses advanced issues in cost allocation and transfer pricing. Considers also the use of modeling such as linear programming, probability

theory and other quantitative techniques to solve business problems. Prerequisite: ACC 520.

ACC 614 Regulatory Environment in Accounting (3-0-3). Examines the sources, rules, regulations and laws covering business transactions including leases, contracts, loans, contingencies, commitments and purchases. Evaluates authoritative regulations and standards issued by the Securities and Exchange Commission (SEC) and AICPA. Emphasizes development of procedures for identifying applicable accounting issues and locating appropriate laws/standards. Prerequisite: admission to the MSA program.

ACC 615 Enterprise Database Systems (3-0-3). Focuses on building information systems that meet multiple needs for transaction-level processing, control specification and financial statement preparation, while simultaneously supporting the needs of a variety of other decision makers in finance, management, marketing and supply chain logistics. Emphasizes the design and use of conceptually modeled databases. Includes coverage of systems-related components of the business environment. Prerequisite: admission to the MSA program.

ACC 616 Advanced Topics in Financial Reporting (3-0-3). Focuses on principles and elements associated with financial statements. Covers income measurement, valuation of assets and equities, long-term liabilities, stockholders equity, cash flow analysis and financial statements. Not open to students who have completed ACC 616. Prerequisite: ACC 510.

ACC 620 Forensic Accounting and Fraud Examination (3-0-3). Considers fraud as a cost for businesses and society as a whole. Focuses on examining fraud committed by corporate crime. Addresses questions of why and how fraud is committed and identifies red flags that may indicate the presence of fraud. Examines methods for deterring, investigating and uncovering fraud schemes. Discusses empirical surveys on the extent and nature of occupational fraud worldwide, considering real-life cases in which managers are caught manipulating company records and committing widespread fraud. Prerequisite: admission to the MSA program.

ACC 622 Internal Auditing (3-0-3). Focuses on the theory and practice of internal auditing. Addresses the role of internal auditing in strengthening the corporate governance system in business and nonbusiness organizations. Provides a foundation for accounting and auditing students to be objective professionals. Provides students with knowledge of the relationship between internal audit and corporate governance. Covers planning and performing the internal auditing engagement process. Prerequisite: ACC 530.

ACC 623 Financial Statement Reporting and Analysis (3-0-3). Emphasizes the analysis of financial statements and related footnotes from the standpoint of the different users of financial reporting. Covers assessment of financial statements for fairness and completeness in reporting. Develops skills in using tools and in analysis and interpretation of financial reports for assessing financial performance of firms in relation to investment, lending and other financial decisions in a variety of business contexts. Prerequisite: ACC 510.

ACC 628 Fraudulent Financial Reporting (3-0-3). Focuses on financial reporting schemes utilized to mislead investors and influence investment actions. Covers accounting methods employed to provide misleading information, as well as accounting standards used to induce fraudulent financial reporting behavior. Examines landmark fraudulent cases and their impact on society. Prerequisite: ACC 530.

BUS

Business

BUS 501 Introduction to Economics (1.5-0-1.5). Provides an introductory survey of microeconomics and macroeconomics, designed primarily as a bridging course for graduate students unfamiliar with the principles of economics. Includes elements of supply and demand, consumer behavior, costs, market structures and income distribution. Analyzes movements in prices and national output, inflation, unemployment, and monetary and fiscal policy. Offered over an eight-week period. Graded as Pass/Fail. Restricted to School of Business Administration master's students.

BUS 502 Quantitative Methods (1.5-0-1.5). Examines the decision-

aiding tools that can be applied by managers to gain insight into decision problems, ranging from simple graphic displays of data to sophisticated statistical tests. Uses real-world data sets and PC-based software to describe sets of measurements, construct probability distributions, estimate numerical descriptive measures and build multiple regression models. Offered over an eight-week period. Graded as Pass/Fail. Restricted to School of Business Administration master's students.

BUS 503 Financial Accounting (1.5-0-1.5). Develops the ability to analyze and interpret financial statements for the purpose of making managerial and investment decisions. Improves communication, leadership and presentation skills, which are essential for business executives. Offered over an eight-week period. Graded as Pass/Fail. Restricted to School of Business Administration master's students.

BUS 504 Econometric Analysis (1.5-0-1.5). Examines the basic forecasting methods and tools that can be applied by managers and professionals working in the public and private sector. Covers topics including time series analysis, linear dependence and links to economic models, deterministic and stochastic trends, forecasting volatility, and forecasting with nonlinear models. Offered over an eight-week period. Graded as Pass/Fail. Restricted to School of Business Administration master's students.

BUS 505 Introduction to Financial Management (1.5-0-1.5). Presents the basic foundations of accounting information and financial statements analysis, including the balance sheet, income statement and statement of cash flows. Covers the present value, compounding and discounting of financial cash-flows, evaluation of capital projects with their risk and return, choice of investment projects and choice of financing. Offered over an eight-week period. Graded as Pass/Fail. Restricted to School of Business Administration master's students.

FIN Finance

FIN 681 Advanced Financial Statements Analysis (3-0-3). Provides a rigorous exposure to modern financial analysis and applications to business challenges in valuation, risk analysis, corporate investment decisions, and basic securities analysis and investment management. Covers earnings management models. Prepares for CFA Level 2. Requires background in business courses,

including finance. Prerequisite: admission to MSF program.

FIN 682 Advanced Corporate Finance (3-6-3). Covers advanced topics in corporate finance along three dimensions: investment, financing and corporate governance. Emphasizes the empirical evidence in the field of corporate finance, as well as the most recent developments in the field. Requires background in business courses, including finance. Prerequisite: admission to MSF program.

FIN 683 Applied Econometrics Methods (3-0-3). Covers the evaluation of quantitative information and how to use data to answer quantitative questions in the financial economics field. Focuses on econometric techniques, including cross sectional and panel techniques, financial forecasting techniques and time series analysis. Builds competency in the use of various modeling procedures, including structural equation modeling (SEM), and ARCH and GARCH models. Requires background in business courses, including finance. Prerequisite: admission to MSF program.

FIN 684 Investment Analysis and Portfolio Management (3-0-3). Covers quantitative techniques relating to financial market structure and financial asset valuation. Emphasizes key aspects of investment analysis and portfolio management, including arbitrage, portfolio selection and portfolio theory, equilibrium asset pricing (CAPM), fixed income securities and derivative pricing. Requires background in business courses, including finance. Prerequisite: admission to MSF program.

FIN 685 Advanced Asset Valuation (3-0-3). Provides a rigorous exposure to different company valuation models, from fundamentals, to multiples, to cash flow valuation models. Covers cost of capital calculation techniques, and applies these concepts to different situations, including acquisitions, private firms, public firms, financial distress and IPO. Includes material relevant to CFA Levels I, II and III. Prerequisite: FIN 681.

FIN 686 Pricing and Hedging of Financial Derivatives (3-0-3). Places emphasis on market operations and the valuations of forward, futures, swaps, and options contracts and their interrelations. Covers topics of trading strategies include hedging, arbitrage and speculation, and of market operations on stock index, interest rate instruments, and foreign currencies. Addresses binomial and Black-Sholes option pricing models, as well as recent innovations in derivative markets. Prerequisite: FIN 684.

FIN 687 Financial Markets and Institutions (3-0-3). Emphasizes the understanding of financial institutions, markets and instruments. Includes commercial banking, expansion process of money, central banking and other financial institutions, as well as the types of financial markets and instruments, and interest rates. Requires background in business courses, including finance. Prerequisite: admission to MSF program.

FIN 688 Private Equity and Venture Capital (3-0-3). Provides a framework for understanding the venture capital and private equity industry in today's finance. Explores the evolution of this asset class, its players and the characteristics that contributed to its success. Analyzes the risk and return, analysis and valuation of high growth companies and the capital structure specific to venture backed companies. Prerequisite: FIN 681.

FIN 689 Risk Management (3-0-3). Covers risk management practices in the corporate world with special attention to financial institutions. Covers different topics in market risk and credit risk, as well as various types of risk faced by corporations, such as operational and liquidity risks. Prerequisite: FIN 684.

FIN 691 International Financial Management (3-0-3). Provides an overview of topics in international finance in the context of globalization and international trade and finance. Builds on the basic theories of exchange rate determination and how arbitrage leads to purchasing power and interest rate parity. Emphasizes the financial management activities of the multinational firm. Prerequisite: FIN 684.

FIN 692 Islamic Finance (3-0-3). Provides a critical understanding of Islamic finance and banking, including the foundation of traditional Islamic financial tools and practices and the development of modern Islamic banking and financial instruments and institutions. Relates the theory of Islamic finance to current development in Islamic banking and the finance industry. Examines the compliance of various financial products with Islamic (Sharia'a) law, and considers the risk factors associated with the Islamic banking and finance industry. Requires background in business courses, including finance. Prerequisite: admission to MSF program.

FIN 699 Master's Thesis (6-0-6). Requires completion of original research work in the field of study. Requires the thesis to be completed under the supervision of a faculty member serving as thesis advisor, and a final defense to the examining committee. Graded as

Pass/Fail. Prerequisites: good academic standing and approval of department head.

MBA Business Administration

MBA 601 Managerial Economics (3-0-3). Covers the application of economic theory to management problems using basic economic tools and techniques of economic analysis to analyze decision-making problems faced in private businesses, government agencies and non-profit organizations. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 602 Organizational Theory and Behavior (3-0-3). Applies management theory to factors that influence individual and group performance while incorporating current management theory and research. Emphasizes the total organization and its subsystems with topics including structure and design, organizational culture, communication, individual and group dynamics, teamwork, power and influence, decision making, and the role of leadership. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 604 Management Decision Analysis (1.5-0-1.5). (Formerly MBA 508). Examines analytical tools and methods used to make effective management decisions. Introduces decision analysis, process analysis and design, capacity management and queuing with an emphasis on the use of analytical models to solve complex business problems. Includes such techniques as decision trees, value stream mapping, process modeling, spreadsheet simulations and dynamic modeling. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 605 Financial Management (3-0-3). (Formerly MBA 505). Covers financial theory and techniques of analysis, including valuation theory, theories of risk measurement, managing a firm's investment decisions and capital structure, sources of financing for a firm, and financial planning and analysis. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 606 Management Information Systems (3-0-3). Provides the theoretical, technological, practical and managerial foundations of management information systems. Covers information technologies, systems development, the impact of information systems on business organizations, information technology as a competitive tool and the management of

information systems within domestic and multinational corporations. Introduces students to current systems and software. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 608 Applied Business Research (1.5-0-1.5). Provides a basic understanding of research methodology as well as insight into the application of modern analytical tools and techniques for the purpose of management decision-making. Emphasizes the nature of the research problem, problem identification and formulation, methods of observation and data collection, analysis and interpretation, research communication, and project development. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 609 Operations and Supply Chain Management (3-0-3). Takes an analytical approach to solving problems in production and operations management. Explores basic principles, functions and concepts involved in the design, operation and control of operations in contemporary organizations as well as key elements of supply chain management. Covers development of operations strategy, the application of linear programming, quality management, supply chain design and procurement, inventory management, lean production, and introduces basic concepts of logistics and supply chain management ranging from supplier selection and collaboration, performance measurement along the supply chain, strategic outsourcing, just-in-time partnership and distribution, customer relationship management, logistics, procurement, inventory and warehousing strategies, and service supply chains. Prerequisite: MBA 604.

MBA 613 Managerial Accounting (3-0-3). Explains the role of accounting information in facilitating the functions of management. Covers decision making, planning, performance evaluation, budgeting, cost control and international transfer prices. Restricted to the MBA program, excluding Pre-MBA students.

MBA 614 Marketing Management (3-0-3). Introduces current marketing management techniques and the tools necessary for effective marketing decision making. Provides global perspectives on marketing management and international marketing issues. Includes interactive learning techniques such as the case method and active class participation. Incorporates issues such as ethics, minorities and the ecological environment. Requires familiarity with microeconomic theory, basic concepts

of accounting and relevant support software. Restricted to the MBA and MSA programs, excluding Pre-MBA students.

MBA 618 Strategic Management (3-0-3). Focuses on developing and applying strategic management to successfully position organizations in a competitive global environment. Integrates previous course experiences to hone decision making, analysis, and oral and written communication skills. Requires work in small teams to analyze a real company's external environment, perform an internal corporate audit and build detailed action plans including implementation issues and financial forecasting. Normally taken during the last semester in the MBA program. Prerequisite: completion of a minimum of five core MBA courses including MBA 602 and MBA 614; prerequisite/concurrent: MBA 609.

MBA 632 Investment Analysis (3-0-3). Covers the purpose and operations of security markets; investment instruments and their characteristics; introduction to portfolio and capital market theory; theory of valuation, bonds and the term structure of interest rates; options, commodity and financial futures investment companies; and international investments. Prerequisite: MBA 605

MBA 633 Financial Derivatives (3-0-3). Covers conceptual and practical aspects of financial derivatives and derivatives markets with a detailed look at options, forwards, and futures on stocks, stock indices, bonds, currencies and commodities. Discusses in detail alternative hedging strategies and speculative elements of derivatives. Analyzes option pricing aspects by applying the Binomial Model and the Black-Scholes Model. Prerequisite: MBA 605.

MBA 634 Commercial Banking (3-0-3). Focuses on decision making based on an integrated approach that exposes students to the understanding of bank management. Discusses factors that influence credit, investment, funding and pricing decisions. Introduces topics that help develop an appreciation of the trade-offs between risk and return. Discusses a wide range of cases related to bank performance evaluation, making new loans, managing the investment portfolio, asset and liquidity management as well as the macro and international environment in which commercial banks operate. Prerequisite: MBA 605.

MBA 636 Islamic Banking and Finance (3-0-3). Provides a formal and intuitive understanding of the essentials of Islamic finance, including the foundation of traditional Islamic

financial tools and practices and the development of modern Islamic banking and financial instruments and institutions. Relates the theory of Islamic finance to current developments in Islamic banking and the finance industry. Prerequisite: MBA 605.

MBA 640 Leadership and Change Management (3-0-3). (Formerly MBA 612). Investigates the role of leadership in the context of global change. Gives particular attention to leadership issues as they pertain to organizational development, culture and the dynamics of change. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 641 Innovation and Entrepreneurship (3-0-3). (Formerly MBA 615). Introduces business innovation and explores the entrepreneurial process through which new ideas become the basis for viable enterprises. Considers the development of a product or concept, assessment of technical and commercial feasibility, preparation of a business plan, and the need for funding. Requires the completion of an interdisciplinary, team-based project whereby students will develop a proposal for the prospective commercialization of a product, process or other business concept. Exposes the constant interplay between innovation and risk, feasibility and function, ownership and financing, marketing and delivery. Restricted to MBA and MSA programs, excluding Pre-MBA students.

MBA 661 Strategic Human Resources Management (3-0-3). Focuses on the strategic role of HRM, i.e., the role of HRM in strategy formulation, strategy implementation and measuring and improving HRM effectiveness. Examines how to align HRM practices with organizational business goals, using job analysis and design, HR planning, recruitment and selection, training and development, performance management and compensation practices. Also addresses the special topics of Emirization and diversity issues, talent management, the role of HR in merger and acquisitions, and high commitment practices. Prerequisite: MBA 602.

MBA 662 International Human Resources Management (3-0-3). Explores the roles of HR managers in multinational corporations and identifies and analyzes efficient management strategies and practices in the field of international HR and effective HRM policies and practices in international contexts. Focuses on the internationalization of the organizations and the cultural dimensions that have an impact on HRM activities. Studies recruitment and selection, training, development, and evaluation and

compensation practices in an international context. Covers ethics and social responsibility issues in the MNE as well as the challenges of designing and implementing an iHRM policy. Prerequisite: MBA 602.

MBA 663 Staffing (3-0-3). Aims to develop critical, analytical and integrative thinking about the staffing process in today's organizations. Examines in detail the six steps in the staffing process: job design and analysis, HR planning, recruitment, selection, orientation and retention. Explores selection interviews, interviewing skills and selection tests. Covers how to manage diversity in the staffing context as well as evaluation and improvement of the important steps in the staffing process. Includes concrete exercises and case studies. Prerequisite: MBA 602.

MBA 664 Training and Development (3-0-3). Adopts a systematic approach to training and development systems, focusing on the blend between theory and practice. Covers training in organizations, the training process, identifying learning needs and appropriate learning opportunities, designing and delivering training, the transfer of learning, reviewing and evaluating training activities, the management of transfers and promotions, the strategic development of leaders and managers, numerous developmental techniques, the learning organization and knowledge management. Studies the strategic management of training and development activities. Prerequisite: MBA 602.

MBA 670 Management Consulting (3-0-3). Explores the theoretical and analytical foundations of management consulting practice. Develops the skills necessary for successful consulting engagements. Includes the following topics: marketing professional services, needs assessment, selection of key performance indicators, proposal preparation, liaising with senior management, change leadership, training, managing deliverables, project documentation and presentation styles. Covers common consulting tools, technologies and techniques used for problem identification and process analysis, quality management, team building, etc. Prerequisites: MBA 602 and MBA 608.

MBA 680 Project Management (3-0-3). Examines the concepts and techniques associated with managing projects in business organizations. Considers project design, planning, scheduling, systems engineering, cost estimation and control. Explores the relationship between innovation and risk. Prerequisite: MBA 604.

MBA 690 Global Consulting Practicum (0-9-3). Provides the opportunity to participate in a consulting engagement under the direction of SBA faculty. Requires the completion of a project with a team from a US partner institution. Develops skills in problem definition, needs analysis, strategic planning, market research and other techniques appropriate to the needs of the client. Travel is required. Prerequisites: MBA 602, MBA 670 and approval of the MBA program coordinator.

MBA 697 Business Co-op (3-0-3). Provides opportunities for application of theory to actual problems in real-life business settings. Enhances research, writing, technical, presentation and soft skills through practical experience. Reinforces objective-setting and performance measurement through a structured reporting process. Requires a minimum of one semester of on-the-job experience with an approved sponsor organization. Graded as Pass/No Pass. Restricted to MBA and MSA programs, excluding Pre-MBA students. Prerequisites: good standing and the permission of the MBA program coordinator.

Special Topic Courses

Special Topic (1 to 4 credit hours). Presents a theoretical or practical topic proposed by the faculty beyond what is offered in existing courses. Can be repeated for credit. Prerequisites: topic specific. Lab/tech fee may apply.

Special topic courses are numbered as 694 courses. The three-letter course prefix reflects the field of study of the course.

Descriptions of particular special topic courses are made available in the school during registration.

Full-Time Faculty

The following pages list the full-time AUS faculty members with their terminal degrees, the conferring institution, the AUS department they are members of, as well as administrative positions they hold in addition to their faculty title. This information is also available at www.aus.edu/faculty-hub.

For details on the research achievements, research interests and experience of full-time AUS faculty members, visit www.aus.edu/research/impact/faculty-research.

A

Abdalla, Jamaleldin, PhD, University of California at Berkeley, 1989; Professor in Civil Engineering and Riad T. Sadek Chair in Civil Engineering

Abdallah, Abed Al-Nasser, PhD, University of Lancaster, 2004; Professor in Accounting and Head, Department of Accounting

Abdelfatah, Akmal, PhD, University of Texas at Austin, 1999; Professor in Civil Engineering

Abdelgawad, Mohamed, PhD, University of Toronto, 2009; Associate Professor in Mechanical Engineering

Abdel-Hafez, Mamoun, PhD, University of California at Los Angeles, 2003; Professor in Mechanical Engineering and Head, Department of Mechanical Engineering

Abdel-Jabbar, Nabil, PhD, University of Michigan, 1996; Professor in Chemical Engineering

Abdel Naby, Shahin, PhD, Western Michigan University, 2010; Assistant Professor in Physics

AbdulHadi, Zayid, PhD, Laval University, 1987; Professor in Mathematics and Statistics

Abdul-Latif, Akrum, PhD, University of Technology of Compiègne, 1994; Visiting Professor in Mechanical Engineering

Abed, Farid, PhD, Louisiana State University, 2005; Professor in Civil Engineering

Abouleish, Mohamed Yehia, PhD, Tennessee Technological University, 2003; Associate Professor in Biology, Chemistry and Environmental Sciences

Abu Al-Foul, Bassam, PhD, University of Utah, 1994; Professor in Economics

Abualrub, Taher, PhD, University of Iowa, 1998; Professor in Mathematics and Statistics

Abukhaled, Marwan, PhD, Texas Tech University, 1995; Professor in Mathematics and Statistics (on sabbatical Spring 2021)

Abu-Lebdeh, Ghassan, PhD, University of Illinois at Urbana-Champaign, 1999; Professor in Civil Engineering and PhD-ESM Program Academic Coordinator

Abu-Nabah, Bassam, PhD, University of Cincinnati, 2007; Associate Professor in Mechanical Engineering

Abu-Rukba, Ra'afat, PhD, Western University, 2013; Assistant Professor in Computer Science and Engineering

Abusalim, Alaanoud, MA, Southern Illinois University, Carbondale, 2006; Senior Instructor in English

Abu-Yousef, Imad, PhD, McGill University, 1996; Professor in Biology, Chemistry and Environmental Sciences

Abuzaid, Wael, PhD, University of Illinois, 2012; Assistant Professor in Mechanical Engineering

Agha, Albert, C. Phil, University of California, Los Angeles, 2017; Assistant Professor in Performing Arts

Aghasi, Maya, PhD, University of Wisconsin Madison, 2012; Assistant Professor in English (on leave Fall 2020)

Aguir, Iness, PhD, University of Texas at San Antonio, 2013; Assistant Professor in Finance

Ahmad, Irtishad, PhD, University of Cincinnati, 1998; Professor and Head, Department of Civil Engineering

Ahmad, Norita, PhD, Rensselaer Polytechnic Institute, 2001; Associate Professor in Marketing and Information Systems, Director, Faculty Development Center

Ahmed, Khawlah, PhD, State University of New York at Buffalo, 1998; Professor in English

Ahmed, Mohammad, PhD, McMaster University, 2008; Visiting Assistant Professor in Mechanical Engineering

Ahmed, Rana, PhD, Duke University, 1991; Professor in Computer Science and Engineering

Ahmed, Vian, PhD, Loughborough University, 2000; Professor in Industrial Engineering and Director, Alternative Delivery Graduate Education

Ajčić, Adnan, PhD, Northern Arizona University, 2015; Assistant Professor in English

Al-Ali, Abdul-Rahman, PhD, Vanderbilt University, 1990; Professor in Computer Science and Engineering

Al-Aomar, Raid, PhD, Wayne State University, 2000; Associate Professor in Industrial Engineering

Al-Asheh, Sameer, PhD, University of Ottawa, 1997; Professor in Chemical Engineering and Interim Head, Department of Chemical Engineering

Al-Assadi, Wesam, MA, American University of Sharjah, 2004; Instructor in Arabic and Translation Studies

Al-Attar, Mariam, PhD, University of Leeds, 2008; Lecturer in Arabic and Translation Studies

Albasha, Lutfi, PhD, University of Leeds, 1995; Professor in Electrical Engineering

AlHamaydeh, Mohamed, PhD, University of Southern California, 2005; Professor in Civil Engineering

Ali, Ahmed, PhD, University of Durham, 1999; Professor in Arabic and Translation Studies

Ali, Tarig, PhD, The Ohio State University, 2003; Professor in Civil Engineering

Al-Issa, Ahmad, PhD, Indiana University of Pennsylvania, 1998; Professor in English and Associate Dean for Undergraduate Affairs, College of Arts and Sciences

Alkafaji, Yass, DBA, Mississippi State University, 1983; Professor in Accounting

Al-Kaisi, Meis, PhD, University of London, 2006; Assistant Professor in Arabic and Translation Studies

Al-Khader, Maen, PhD, Illinois Institute of Technology, 2008; Associate Professor in Mechanical Engineering

AlKhazali, Osamah, PhD, University of Memphis, 1997; Professor in Finance and Head, Department of Finance

Al-Kofahi, Osameh, PhD, Iowa State University, 2009; Visiting Assistant Professor in Computer Science and Engineering

Al-Najjar, Abeer, PhD, University of Edinburgh, 2003; Associate Professor in Mass Communication

Alnaser, Ali Sami, PhD, Western Michigan University, 2002; Professor in Physics; Head, Department of Physics and PhD-MSE Program Academic Coordinator

Al-Nashash, Hasan, PhD, Kent University, 1988; Professor in Electrical Engineering

Alobaidi, Ghada, PhD, University of Western Ontario, 2000; Associate Professor in Mathematics and Statistics

Al-Othman, Amani, PhD, University of Ottawa, 2012; Associate Professor in Chemical Engineering

Aloul, Fadi, PhD, University of Michigan, 2003; Professor in Computer Science and Engineering; Head, Department of Computer Science and Engineering; HP Institute Director

Al-Sayah, Mohamed, PhD, University of Alberta, 2002; Professor in Biology, Chemistry and Environmental Sciences

Al Shaar, Nuha, PhD, University of Cambridge, 2010; Associate Professor in Arabic and Translation Studies (on sabbatical Fall 2020)

Alshraideh, Hussam, PhD, The Pennsylvania State University, 2011; Associate Professor in Industrial Engineering

Al-Tamimi, Adil, PhD, Strathclyde University, 1990; Professor in Civil Engineering

Alzaatreh, Ayman, PhD, Central Michigan University, 2011; Associate Professor in Mathematics and Statistics

Anabtawi, Mahmoud, PhD, University of Texas, 1998; Professor in Mathematics and Statistics and Dean, College of Arts and Sciences

Anderson, Pia-Kristina, PhD, University of California at Berkeley, 2001; Assistant Professor in International Studies

Angell, Linda, DBA, Boston University, 1996; Director, International Exchange Office

Aqeel, Mohammed Taher, MA, Jawaharlal Nehru and Delhi University, 1993; Professor of Practice in Civil Engineering

Arenfeldt, Pernille, PhD, European University Institute, 2006; Associate Professor in International Studies

Arzaghi, Mohammad, PhD, Brown University, 2005; Associate Professor in Economics (on sabbatical Spring 2021)

As'ad, Rami, PhD, Concordia University, 2011; Assistant Professor in Industrial Engineering

Asa'd, Randa, PhD, University of Cincinnati, 2012; Assistant Professor in Physics

Aslan, Neslihan, MA, Bosphorus University, 2006; Instructor in English

Atabay, Serter, PhD, University of Birmingham, 2001; Professor in Civil Engineering

Attom, Mousa, PhD, Kansas State University, 1989; Professor in Civil Engineering

Audi, Diana, MS, American University of Beirut, 2005; Senior Instructor in Mathematics and Statistics

Aveyard, Mark, PhD, Florida State University, 2007; Associate Professor in International Studies

Awad, Mahmoud, PhD, Wayne State University, 2005; Professor in Industrial Engineering

Ayish, Mohammad, PhD, University of Minnesota, 1986; Professor in Mass Communication and Head, Department of Mass Communication

B

Badawi, Ayman, PhD, University of North Texas, 1993; Professor in Mathematics and Statistics

Badran, Sammy, PhD, University of Kansas, 2018; Assistant Professor in International Studies

Badri, Hadeyeh, MFA, SAIC, 2020; Lecturer in Art and Design

Baghestani, Hamid, PhD, University of Colorado, 1982; Professor in Economics

Bahloul, Maher, PhD, Cornell University, 1994; Associate Professor in English

Bahroun, Zied, PhD, University of Franche-Comté, Besancon, 2000; Associate Professor in Industrial Engineering

Baker, Cynthia, MBA, Texas Tech University, 1997; Senior Instructor in Management

Baker, Jeffrey, PhD, Texas Tech University, 2008; Professor in Marketing and Information Systems; Faculty Advisor, Student Council

Barlas, Gerassimos, PhD, National Technical University, Athens, 1996; Professor in Computer Science and Engineering

Bartholomew, Aaron, PhD, College of William and Mary, 2001; Professor in Biology, Chemistry and Environmental Sciences

Basco, Rodrigo, PhD, Universidad Complutense de Madrid, 2005; Associate Professor of Management and Sheikh Saoud bin Khalid bin Khalid Al-Qassimi Chair in Family Business

Beamer, Rebecca, MFA, University of Alabama, 2016; Assistant Professor in Art and Design

Beheiry, Salwa, PhD, University of Texas at Austin, 2005; Associate Professor in Civil Engineering

Bejarano Rodriguez, Ivonne, PhD, University of Puerto Rico, 2013; Assistant Professor in Biology, Chemistry and Environmental Sciences

Bejtíc, Zinka, PhD, International University of Sarajevo, 2018; Associate Professor in Art and Design; and Associate Dean, College of Architecture, Art and Design

Belhamadia, Youssef, PhD, Laval University, 2004; Associate Professor in Mathematics and Statistics

Belkhdja, Omar, PhD, Laval University, 2006; Associate Professor in Management (on sabbatical Spring 2021)

BenDaya, Mohamed, PhD, Georgia Tech USA, 1998; Professor in Industrial Engineering

Bennett, Haydn, PhD, Strathclyde University, 2002; Visiting Associate Professor in Management

Best, Kathryn, MA, Kingston University, 2005; Associate Professor in Art and Design

Bilikozen, Neslihan, PhD, University of Exeter, 2016; Assistant Professor in English

Blumi, Isa, PhD, New York University, 2005; Associate Professor in International Studies

Bodolica, Virginia, PhD, HEC Montreal Business School, 2006; Professor in Management and Said T. Khoury Chair in Leadership Studies

Boisvert, Jean, PhD, Macquarie Graduate School of Management, 2007; Associate Professor in Marketing and Information Systems

Boubakri, Narjess, PhD, Laval University, 2000; Professor in Finance; Dean; School of Business Administration; and Bank of Sharjah Chair in Finance

Bou-Mehdi, Randa, MA, American University of Sharjah, 2010; Senior Instructor in English

Breslow, Harris, PhD, University of Illinois, Champaign-Urbana, 1995; Associate Professor in Mass Communication

Brodtkorb, Tor, LLM, University of Leicester, 2008; Assistant Professor in Management

Buck, Rachel, PhD, University of Arizona, 2018; Assistant Professor in English

C

Carlow, Jason, MArch, Yale University, 2002; Associate Professor in Architecture

Castillo Melo, Roberto, PhD, University of Kansas, 2015; Assistant Professor in Architecture

Cerro, Camilo, MArch, Columbia University, 1997; Associate Professor in Architecture

Chan, Stephen, PhD, University of Manchester, 2016; Assistant Professor in Mathematics and Statistics

Chathoth, Prakash, PhD, Virginia Polytechnic Institute and State University, 2002; Professor in Marketing and Information Systems

Chavez, Daniel, MArch, University of New Mexico, 2000; Professor of Practice in Architecture

Chazi, Abdelaziz, PhD, University of North Texas, 2004; Professor in Finance

Chebbi, Rachid, PhD, Colorado School of Mines, 1991; Professor in Chemical Engineering

Chiozza, Giacomo, PhD, Duke University, 2004; Associate Professor in Political Studies and Sir Easa Saleh Al Gurg Professor in International Studies

Christodoulides, Georgios, PhD, University of Birmingham, 2016; Professor in Marketing and Information Systems and Chalhoub Professor in Luxury Brand Management

Cobo-Reyes Cano, Ramon, PhD, University of Granada, 2006; Associate Professor in Economics

Conty, Arianne, PhD, University of California, 2009; Associate Professor in International Studies

Craven, Laurence, MA, Oxford Brookes University, 2009; Senior Lecturer in English

Curabba, Brad, MAT, SIT Graduate Institute, 2006; Senior Instructor in English

Curiel, Igor, PhD, Kumamoto University, 1989; Professor of Practice in Architecture

Curran, Paula, MFA, University of Illinois at Urbana-Champaign, 1993; Associate Professor in Art and Design

D

Daghfous, Abdelkader, PhD, Pennsylvania State University, 1997; Professor in Marketing and Information Systems

Dahdal, Suheil, PhD, University of Technology, Sydney, 2000; Associate Professor in Mass Communication

Dalibalta, Sarah, PhD, University of Leicester, 2008; Associate Professor in Biology, Chemistry and Environmental Sciences

Darayseh, Musa, PhD, University of Nebraska-Lincoln, 1990; Professor in Accounting

Darras, Basil, PhD, University of Kentucky, 2008; Associate Professor in Mechanical Engineering

Darwish, Naif, PhD, Oklahoma State University, 1991; Professor in Chemical Engineering

Dhaouadi, Rached, PhD, University of Minnesota, 1990; Professor in Electrical Engineering and Petrofac Research Chair in Renewable Energy

Dhou, Salam, PhD, Virginia Commonwealth University, 2013; Assistant Professor in Computer Engineering

Dougan, Brian, MArch, Texas A&M University, 1989; Professor in Architecture

Dupuis, Daniel, PhD Concordia University 2014; Assistant Professor in Finance

E

Egilmez, Mehmet, PhD, University of Alberta, 2009; Associate Professor in Physics

El-Assadi, Ahmad, MBA, American University of Sharjah, 2009; Senior Instructor in Management

El Bakhour, Hoda, MA, American University of Beirut, 2010; Instructor in English

El-Baz, Hazim, PhD, University of Missouri, Rolla, 1991; Associate Professor in Industrial Engineering

Eleftheriou, Maria, PhD, University of Leicester, 2011; Assistant Professor in English

El-Emam, Magdi, PhD, Queen's University, 2003; Associate Professor in Civil Engineering

El-Fakih, Khaled, PhD, University of Ottawa, 2002; Professor in Computer Science and Engineering

El-Kadri, Oussama, PhD, Wayne State University, 2006; Professor in Biology, Chemistry and Environmental Sciences

El-Khatib, Sami, PhD, New Mexico State University, 2007; Associate Professor in Physics

El-Sakran, Tharwat, PhD, University of Bangor, 1990; Professor in English

El-Sayed, Yehya, PhD, City University of New York, 2006; Professor in Biology, Chemistry and Environmental Sciences

El-Sayegh, Sameh, PhD, Texas A&M University, 1998; Professor in Civil Engineering and MSCM Program Academic Coordinator

El-Tarhuni, Mohamed, PhD, Carleton University, 1997; Professor in Electrical Engineering; Vice Provost of Graduate Studies

Emam, Samir, PhD, Virginia Polytechnic Institute and State University, 2002; Professor in Mechanical Engineering

Enache, Cristian, PhD, Laval University, 2005; Associate Professor in Mathematics and Statistics

F

Fahim Aly, Elrefaie, PhD, Polytechnic Institute of New York, 1993; Visiting Professor in Electrical Engineering

Faiq, Said, PhD, Salford University, 1991; Professor in Arabic and Translation Studies

Farhan, Sara, MA, University of Western Ontario, 2013; Assistant Professor in International Studies

Farr, Marcus, MArch, Rice University, 2004; Assistant Professor in Architecture

Fath, Hassan, PhD, McMaster University, 1981; Visiting Professor in Mechanical Engineering

Fattah, Kazi, PhD, University of British Columbia, 2010; Associate Professor in Civil Engineering

Fedtke, Jana, PhD, University of South Carolina, 2012; Assistant Professor in English

Filipović, Zlatan, MFA, Alfred University, 2001; Associate Professor in Art and Design

Fredrick, Daniel, PhD, Texas Christian University, 2003; Associate Professor in English

G

Gadalla, Mohamed, PhD, University of Alabama, 1988; Professor in Mechanical Engineering

Gahramanov, Emin, PhD, Colorado State University, 2007; Professor in Economics

Gaibullov, Khusrav, PhD, University of Texas at Dallas, 2009; Professor in Economics

Gandhi, Neena, PhD, University of Delhi, 2006; Associate Professor in English

Gavassa, Ana Milena, MBA, Troy University, 1999; Senior Instructor in Mass Communication

Gazley, Aaron, PhD, Victoria University, 2009; Associate Professor in Marketing and Information Systems

Genc, Ismail, PhD, Texas A&M University, 1999; Professor in Economics

Ghani, Usman, PhD, University of Exeter, 2013; Assistant Professor in Arabic and Translation Studies

Ghommam, Mehdi, PhD, Virginia Polytechnic Institute and State University, 2011; Associate Professor in Mechanical Engineering

Gibbs, Joseph, PhD, Boston University, 1994; Professor in Mass Communication

Gleason, Kimberly, PhD, Southern Illinois University, 1999; Professor in Finance

Gmeiner, Frederic, MA, University of the Arts Berlin, 2010; Assistant Professor in Art and Design

Golley, Nawar Al-Hassan, PhD, Nottingham University, 1994; Professor in English

Gregersen, Tammy, PhD, Universidad Catolica de Valparaiso, 1998; Professor in English

Griffin, James, PhD, University of London, 2004; Associate Professor in Mathematics and Statistics, and Vice Provost for Undergraduate Affairs and Instruction

Gross, James, MFA, Wayne State University, 1994; Assistant Professor in Performing Arts

Guessoum, Nidhal, PhD, University of California at San Diego, 1988; Professor in Physics

Gunatillake, Gajath, PhD, Purdue University, 2005; Associate Professor in Mathematics and Statistics

H

Hallal, Hicham, PhD, McGill University, 2008; Lecturer in Computer Science and Engineering

Hamade, Alaa, MBA, American University of Sharjah, 2010; Senior Instructor in Management

Hamdan, Mohammad, PhD, University of Cincinnati, 2003; Professor in Mechanical Engineering

Hamdan, Nasser, PhD, Middle East Technical University, 1993; Professor in Physics

Hamdan, Rana, MS, Accounting, American University of Sharjah, 2019; Visiting Instructor in Accounting

Hammi, Oualid, PhD, University of Calgary, 2009; Professor in Electrical Engineering

Hariga, Moncer, PhD, Cornell University, 1989; Professor in Industrial Engineering; Head, Department of Industrial Engineering

Hassan, Mohamed, PhD, University of Arizona, 2005; Professor in Electrical Engineering

Hawa, Karen, CPA, Colorado State Board of Accountancy, 2005; Senior Instructor in Accounting

Hawileh, Rami, PhD, University of Wisconsin-Milwaukee, 2005; Professor in Civil Engineering

Heintz, W. Eirik, MArch, Harvard University, 1994; Professor in Architecture; Director, CAAD Foundations Year

Highland, Kristen, PhD, New York University, 2015; Assistant Professor in English

Honein, Natalie, PhD, University of Bristol, 2015; Visiting Assistant Professor in English

Horger, Christopher, MA, University of Arizona, 1992; Senior Instructor in English

Hossain, Mahmud, PhD, Baruch College, 2004; Associate Professor in Accounting

Hughes, Michael, MArch, Princeton University, 1993; Professor in Architecture

Husni, Ronak, PhD, University of St. Andrews, 1986; Professor in Arabic and Translation Studies

Husseini, Ghaleb, PhD, Brigham Young University, 2001; Professor in Chemical Engineering and Dana Gas Chair in Chemical Engineering

Hussein, Noha, PhD, Virginia Polytechnic Institute and State University, 2005; Associate Professor in Industrial Engineering

I

Ibahrine, Mohammed, PhD, Hamburg University, 2006; Associate Professor in Mass Communication

Ibrahim, Mahmoud, PhD, University of Mississippi, 2006; Associate Professor in Electrical Engineering

Ibrahim, Riem, MFA, The University of Chicago, 2013; Visiting Assistant Professor in Design

Ibrahim, Taleb, PhD, Auburn University, 1997; Professor in Chemical Engineering

Izwaini, Sattar, PhD, University of Manchester, 2004; Associate Professor in Arabic and Translation Studies

J

Jaidi, Asad Hasan, PhD, University of Kansas, 1993; Professor in Physics

Jaradat, Mohammad, PhD, Texas A&M University, 2005; Professor in Mechanical Engineering and MSMT Program Academic Coordinator

Jarrah, Abdul Salam, PhD, New Mexico State University, 2002; Professor in Mathematics and Statistics, and Head, Department of Mathematics and Statistics

Jimenez Parro, Maria, MArch, Polytechnic University Madrid, 2011; Visiting Assistant Professor in Architecture

K

Kallel, Dorra, MBA, University of Quebec in Montreal, 2006; Visiting Instructor in Marketing and Management Information Systems

Kallel, Sadok, PhD, Stanford University, 1995; Professor in Mathematics and Statistics (on sabbatical Spring 2021)

Kalo, Amar, MS, University of Michigan, 2014; Associate Professor in Architecture and Director, CAAD Labs

Kamal, Sara, PhD, University of Texas at Austin, 2009; Assistant Professor in Mass Communication

Kanan, Sofian, PhD, University of Maine, 2000; Professor in Biology, Chemistry and Environmental Sciences

Kannan, Satish, PhD, University of New Brunswick, 2006; Assistant Professor in Mechanical Engineering

Katodrytis, George, AADip, Architectural Association School of Architecture, 1985; Professor in Architecture and Head, Department of Architecture

Katsos, John, JD, George Washington University, 2011; Associate Professor in Management (on sabbatical Spring 2021)

Katsos, Kristina, MS, Georgetown University, 2010; Lecturer in International Studies

Kaya, Ilker, PhD, University of Georgia, 2009; Associate Professor in Economics

Kaya, Ozgur, PhD, University of Georgia, 2009; Associate Professor in Economics

Khalidi, Bouthaina, PhD, Indiana University, 2008; Professor in Arabic and Translation Studies

Khalil, Reem, PhD, City University of New York, 2013; Assistant Professor in Biology, Chemistry and Environmental Sciences

Khallaf, Ashraf, PhD, Florida Atlantic University, 2004; Professor in Accounting

Khamis, Mustafa, PhD, University of California, 1987; Professor in Biology, Chemistry and Environmental Sciences

Khan, M. Sajid, PhD, University of Manchester, 2001; Professor in Marketing and Information Systems; Head, Department of Marketing and Information Systems

Khan, Naveed, PhD, University of Hull, 1999; Professor in Biology, Chemistry and Environmental Sciences; Head, Department of Biology, Chemistry and Environmental Sciences

Khan, Zahid, PhD, University of Western Ontario, 2007; Associate Professor in Civil Engineering

Khawaja, Ali, MBA, American University of Sharjah, 2004; Senior Instructor in Management

Kherfi, Samer, PhD, Simon Fraser University, 2002; Associate Professor in Economics and Head, Department of Economics

Khoury, Suheil, PhD, Michigan State University, 1994; Professor in Mathematics and Statistics

Khouyibaba, Saadia, PhD, Laval University, 1997; Senior Instructor in Mathematics and Statistics

King, Jeffrey, PhD, University of Missouri, 2017; Assistant Professor in International Studies

King, John, PhD, University Tennessee at Knoxville, 1995; Professor in Mass Communication

Knuteson, Sandra, PhD, Clemson University, 2004; Senior Lecturer in Biology, Chemistry and Environmental Sciences

Kolo, Jerry, PhD, University of Waterloo, 1986; Professor in Architecture and MUP Program Academic Coordinator

Kumra, Savita, PhD, Cranfield University, 2003; Associate Professor in Management

L

Landolsi, Taha, PhD, University of Texas at Dallas, 1999; Professor in Computer Science and Engineering

Leduc, Guillaume, PhD, Carleton University, 1995; Associate Professor in Mathematics and Statistics

Lindsay, Valerie, PhD, University of Warwick, 1999; Professor in Management and Associate Dean for Graduate Programs, School of Business Administration

Lopes, Adrian, PhD, Cornell University, 2014; Assistant Professor in Economics

Louhichi, Issam, PhD, University of Bordeaux 1, 2005; Associate Professor in Mathematics and Statistics

Lusk, Jeniece, PhD, Baylor University, 2010; Assistant Professor in International Studies

M

Maitner, Angela, PhD, University of California, 2007; Associate Professor in International Studies

Majdalawieh, Amin, PhD, Dalhousie University, 2006; Professor in Biology, Chemistry and Environmental Sciences

Majeed, Tariq, PhD, York University, 1991; Associate Professor in Physics (on sabbatical Spring 2021)

Makkawi, Yassir, PhD, Herriot-Watt University, 2004; Professor in Chemical Engineering

Mansoor, Bilal, PhD, University of Michigan, 2010; Visiting Assistant Professor in Mechanical Engineering

Marchi Travares El Melo, Isabela, MFA, 2014; Virginia Commonwealth University, Assistant Professor in Performing Arts

Mariano, Stefania, PhD, University of Molise, 2006; Associate Professor in Management

Mathew, Anijo, PhD, The Open University, 2013; Associate Professor in Art and Design; Head, Department of Art and Design

McAllister, Brian, PhD, The Ohio State University, 2013; Assistant Professor in English

McCarthy, Philip, PhD, University of Memphis, 2005; Assistant Professor in English

McClelland, Patrick, PhD, University of Kansas, 2008; Associate Professor in Management; Head, Department of Management

Mertel, Kurt, PhD, North Western University, 2016; Assistant Professor in International Studies

Mesanovic, Mujo, MS, Syracuse University, 2006; Senior Instructor in Mathematics and Statistics

Milic, Nebojsa, PhD, Baylor University, 2017; Assistant Professor in Marketing and Information Systems

Mir, Hasan, PhD, University of Washington, 2005; Professor in Electrical Engineering

Mirzaei, Ali, PhD, Brunel University, 2013; Assistant Professor in Finance

Misiak, Marian, MA, University of Reading, 2010; Assistant Professor in Art and Design

Mitchell, Kevin, MArch, University of Washington, 1996; Professor in Architecture and Chancellor

Mitra, Sreya, PhD, University of Wisconsin Madison, 2012; Assistant Professor in Mass Communication

Mokhtar, Ahmed, PhD, Concordia University, 1998; Professor in Architecture

Montague, John, PhD, Trinity College Dublin, 2009; Associate Professor in Architecture

Mortula, MD Maruf, PhD, University of Dalhousie, 2006; Professor in Civil Engineering

Mukhopadhyay, Shayok, PhD, Georgia Institute of Technology, 2014; Associate Professor in Electrical Engineering

Mullins, Melissa Anne, MA, Portland State University, 2003; Instructor in English

Munday, Susan, MPhil, University of Glasgow, 2002; Senior Instructor in English

N

Nam, Kichan, PhD, State University of New York at Buffalo, 1995; Professor in Marketing and Information Systems

Nancarrow, Paul Damian, PhD, Queen's University Belfast, 2005; Associate Professor in Chemical Engineering

Nashef, Hania, PhD, University of Kent, 2008; Professor in Mass Communication

Nazzal, Mohammad, PhD, University of Kentucky, 2007; Associate Professor in Mechanical Engineering

Ndiaye, Malick, PhD, University of Burgundy, 1986; Associate Professor in Industrial Engineering and MSEM Program Academic Coordinator

Newlands, George, MArch, University of New Mexico, 1994; Assistant Professor in Architecture

Nsiri, Imed, PhD, Indiana University, 2010; Assistant Professor in Arabic and Translation Studies

Nunn, Roger, PhD, University of Reading, 1996; Professor in English and Head, Department of English

O

O'Connell, Chasity, MA, Seattle Pacific University, 2017; Assistant Professor of Practice in International Studies

Oliver, Maria, MArch, Columbia University, 1990; Assistant Professor in Architecture

Orhan, Mehmet, PhD, University of Ontario, 2011; Associate Professor in Mechanical Engineering

Osman-Ahmed, Ahmed, PhD, University of Calgary, 2003; Professor in Electrical Engineering

P

Pallathucheril, Varkki, PhD, The Ohio State University, 1992; Professor in Architecture and Dean, College of Architecture, Art and Design

Pappalardo, Lucia, PhD, Syracuse University, 1998; Associate Professor in Biology, Chemistry and Environmental Sciences

Park, Juana, PhD, University of Alberta, 2020; Assistant Professor in International Studies

Parlak, Özgür, MA, Northern Arizona University, 2010; Senior Instructor in English

Pasquier, Michel, PhD, National Polytechnic Institute of Grenoble, 1989; Associate Professor in Computer Science and Engineering

Pedersen, Vernon, PhD, Georgetown University, 1993; Professor in International Studies and Head, Department of International Studies

Pizarro, Rafael, PhD, University of Southern California, 2005; Associate Professor in Design

Q

Qadah, Ghassan, PhD, University of Michigan, 1983; Associate Professor in Computer Science and Engineering

Qaddoumi, Nasser, PhD, Colorado State University, 1998; Professor in Electrical Engineering and Head, Department of Electrical Engineering

Qazi, Abroon, PhD, Strathclyde Business School, 2017; Assistant Professor in Marketing and Information Systems

R

Rabeea, Hala, MDes, University of Illinois at Chicago, 2016; Assistant Professor in Art and Design

Rauch, Christian, PhD, Goethe University in Frankfurt-on-Main, 2011; Associate Professor in Finance

Rehman, Habib-ur, PhD, The Ohio State University, 2001; Professor in Electrical Engineering

Reiff, Marija, PhD, University of Iowa, 2018; Assistant Professor in English (on leave Fall 2020)

Rhodes, Patrick, MArch, Southern California Institute of Architecture, 1999; Associate Professor in Architecture

Richard, Todd, PhD, University of Oxford, 2005; Visiting Assistant Professor in Arabic and Translation Studies

Roldán, Juan, MArch, ETSAM Madrid, 2003; Associate Professor in Architecture (on sabbatical Spring 2021)

Romdhane, Lotfi, PhD, University of Florida, 1989; Professor in Mechanical Engineering and Associate Dean for Graduate Affairs and Research, College of Engineering

Roy, Sanket, MA, Cornell University, 2015; Instructor in Economics

S

Saad, Mohsen, PhD, University of Delaware, 2003; Professor in Finance and Associate Dean for Undergraduate Programs, School of Business Administration

Sabouni, Rana, PhD, University of Western Ontario, 2013; Associate Professor in Chemical Engineering

Saeed Osman, Mojahid, PhD, North Carolina A&T University, 2010; Assistant Professor in Industrial Engineering

Sagahyroon, Assim, PhD, University of Arizona, 1989; Professor in Computer Science and Engineering, and Associate Dean for Undergraduate Affairs, College of Engineering

Sakhi, Said, PhD, University of Montreal, 1994; Professor in Physics (on sabbatical Spring 2021)

Salama, Mohamed Feras, PhD, University of Texas, 2008; Associate Professor in Accounting (on sabbatical Fall 2020)

Salamin, Yousef, PhD, University of Colorado, 1987; Professor in Physics

Salvadore, Matteo, PhD, Temple University, 2010; Associate Professor in International Studies

Samara, Fatin, PhD, State University of New York, 2007; Associate Professor in Biology, Chemistry and Environmental Sciences

Samet, Anis, PhD, HEC Montreal, 2009; Associate Professor in Finance

Sarnecky, William, MArch, University of New Mexico, 1999; Professor of Practice in Architecture

Sayed, Sana, MA, California State University, 2004; Senior Instructor in English

Sayidina, Aisha, PhD, University of Exeter, 1993; Assistant Professor in English

Semaan, Rania, PhD, City University of New York, 2012; Associate Professor in Marketing and Information Systems (on sabbatical Spring 2021)

Shaaban, Mostafa, PhD, University of Waterloo, 2014; Associate Professor in Electrical Engineering

Shamayleh, Abdulrahim, PhD, Arizona State University, 2010; Assistant Professor in Industrial Engineering and MSBME Academic Coordinator

Shanableh, Tamer, PhD, University of Essex, 2001 Professor in Computer Science and Engineering

Sharawi, Ziyad, PhD, Central Michigan University, 2006; Associate Professor in Mathematics and Statistics

Shareefdeen, Zarook, PhD, New Jersey Institute of Technology, 1994; Professor in Chemical Engineering

Sheil, Philip, MFA, University of Calgary, 1995; Senior Lecturer in Art & Design

Shih, Shou-Hsing, PhD, University of South Florida, 2008; Assistant Professor in Mathematics and Statistics

Shim, Ji Young, PhD, City University of New York, 2013; Assistant Professor in English

Shockley, Sammy, PhD, Texas A&M University, 2014; Assistant Professor in International Studies

Simonet, Daniel, DBA, University of Paris IX Dauphine, 1998; Professor in Management

Singh, Kamail, PhD, Indian Institute of Technology, 2006; Lecturer in Chemical Engineering

Siry, Isra, MPhil, University of Keele, 1994; Instructor in Physics

Smith, Susan, MA, University of Southern California, 1994; Associate Professor in Mass Communication

Spaw, Gregory, MArch, Harvard University, 2009; Assistant Professor in Architecture

Squalli, Jay, PhD, University of Delaware, 2004; Professor in Economics

Stan, Gorda, PhD, Syracuse University, 2019; Visiting Assistant Professor in Art and Design

Suliman, Hana, PhD, Queen's University, 1998; Professor in Mathematics and Statistics, and Associate Dean for Graduate Affairs, College of Arts and Sciences

Syed, Raza, PhD, Northeastern University, 2005; Assistant Professor in Physics

T

Tabbarah, Faysal, MArch, Architectural Association School of Architecture, 2011; Associate Professor in Architecture

Tabsh, Sami, PhD, University of Michigan, 1990; Professor in Civil Engineering

Taha, Mustafa, PhD, Ohio University, 2001; Associate Professor in Mass Communication

Tariq, Usman, PhD, University of Illinois at Urbana-Champaign, 2013; Assistant Professor in Electrical Engineering

Tasneem, Dina, PhD, McGill University, 2015; Associate Professor in Economics

Tassa, Anthony, MFA, The University of Tennessee, Knoxville, 1995; Professor in Performing Arts and Performing Arts Program Academic Coordinator

Tekinay, Sirin, PhD, George Mason University, 1994; Professor in Engineering and Dean, College of Engineering

Teng, Ming Foey, PhD, University of South Australia, 2012; Lecturer in Electrical Engineering

Thompson, Seth, MFA, Vermont College of Norwich University, 1997; Associate Professor in Art and Design

Toledo, Hugo, PhD, Auburn University, 1999; Professor in Economics (on sabbatical Spring 2021)

Troian, Jais, PhD, Aix-Marseille University 2019; Assistant Professor in International Studies

Tufaha, Amjad, PhD, University of Virginia, 2007; Associate Professor in Mathematics and Statistics

U

Uma, Velury, PhD, University of South Carolina, 1999; Visiting Professor in Accounting

Ursomarzo, Tania, MArch, Cranbrook Academy of Art, 2012; Assistant Professor in Architecture

Uygul, Faruk, PhD, University of Alberta, 2007; Associate Professor in Mathematics

V

Vadlamudi, Sundara, PhD, University of Texas at Austin, 2016; Assistant Professor in International Studies

Vanderpyl, Gregory, MA TESOL, SIT Graduate Institute, 2012; Instructor in English

Van Gorp, Johannes, PhD, Boston University, 2012; Assistant Professor in International Studies

Viriyavipart, Ajalavat, PhD, Texas A&M University, 2015; Assistant Professor in Economics

W

Walsh, Eileen, PhD, Temple University, 2001; Assistant Professor in International Studies

Wang, Yuting, PhD, University of Notre Dame, 2009; Associate Professor in International Studies

Watson, Gregory, MArch, Washington University, 1985; Professor in Architecture

Waxin, Marie-France, PhD, IAE Aix-en-Provence, 2000; Professor in Management

Weagle, Christopher, MA, University of New Brunswick, 2002; Senior Instructor in English

Weiler, Sherri, PhD, Florida State University, 2004; Associate Professor in Performing Arts

Wilmsen, David, PhD, University of Michigan, 1995; Professor in Arabic and Translation Studies and Head, Department of Arabic and Translation Studies

Wunderli, Thomas, PhD, University of Florida, 2003; Associate Professor in Mathematics and Statistics

X

Xu, Xiaobo, PhD, University of Mississippi, 2005; Professor in Marketing and Information Systems and Liaison Officer-China Affairs

Y

Yehia, Sherif, PhD, University of Nebraska-Lincoln, 1999; Professor in Civil Engineering

Younas, Javed, PhD, West Virginia University, 2007; Professor in Economics (on sabbatical Fall 2020)

Yousef, Abdel Rahman, PhD, The University of Toledo, 2009; Visiting Associate Professor in Mathematics and Statistics

Z

Zaid, Bouziane, PhD, University of South Florida, 2009; Visiting Associate Professor in Mass Communication

Zakaria, Amer, PhD, University of Manitoba, 2012; Associate Professor in Electrical Engineering

Zaki, May, PhD, Middlesex University, 2011; Associate Professor in Arabic and Translation Studies

Zantout, Zaher, PhD, Drexel University, 1990; Professor in Finance

Zoubi, Taisier, PhD, University of North Texas, 1992; Professor in Accounting

Zuolkernan, Imran, PhD, University of Minnesota, 1991; Professor in Computer Science and Engineering
