

Master of Science in

# CONSTRUCTION MANAGEMENT

With the construction industry one of the UAE's largest contributors to GDP, highly skilled construction managers are in high-demand across the country. The Master of Science in Construction Management (MSCM) from American University of Sharjah (AUS), will help develop the much-needed talent required to drive the sector's growth.

## Objectives of the MSCM program

With a MSCM from AUS, you will be able to:

- **be a successful professional in a specialized area of construction management**
- **maintain a desire for research, innovation and lifelong learning**
- **uphold the responsibilities of the construction profession**
- **understand the unique nuances of the Middle East's construction industry**

## Faculty of distinction

In undertaking the MSCM, you will work under the supervision of faculty who have received their doctoral degrees from renowned universities, including some of the best engineering institutions in North America and Europe. These faculty are recognized experts in their fields, with extensive teaching and research experience. Graduate students have the opportunity to work with faculty to publish their work in leading international engineering and scientific journals.

## Built-in flexibility

Our graduate programs are flexible, ensuring that students are able to pursue their careers alongside their graduate degree. Students can choose between a full-time schedule and a part-time schedule, with classes offered at times suitable for those in the workforce.

## Graduate assistantships and employment

AUS offers graduate students assistantships and work-study opportunities. These are awarded on a competitive basis, coming in the form of a Graduate Research Assistantship or Graduate Teaching Assistantship. This offers not only financial assistance but also hands-on experience in teaching and research helpful to students interested in pursuing a career in academia.
